NEW PRODUCT

ONE MODEL...TWO EXCITING

www.gpdealer.com

Convert the Syncro from a glider to a sport plane, right at the field!

- Comes with both a 55.5" span soaring wing and 31.5" sport wing
- A unique ducted fan power pod attaches with magnets and one bolt
- Durable AeroCell™ foam construction
- Removable landing gear

Final assembly of the Syncro is quick and easy, and the generously sized battery compartment allows for easy access without removing the wing.

ElectriFly®

GPMA1581 Syncro EDF Glider ARF

Wingspan (Glider/Sport): 55.5 in/31.5 in (1410 mm/800 mm)

Wing Area (Glider/Sport): 400 in²/219 in² (25.8 dm²/14.1 dm²)

Weight (Glider/Sport): 28.0-29.5 oz/22.5-24.0 oz (795-835 g/640-680 g)

Length (Both Versions): 34.5 in (875 mm)

WAYS TO FLY!

syncro™

From the Experts:

No other plane can offer such a wide flight envelope as the Syncro! Enjoy long, leisurely soaring with the 55.5" glider wing configuration — or change to the 31.5" sport wing for jet-like aerobatics. One reviewer claimed, "Soaring ability is terrific...I flew for an hour and 45 minutes with just 6 minutes of motor!" The high-performance ducted fan unit works with both wing options, and the tricycle landing gear can be used for runway takeoffs or removed for grass landings.

Long story short...

Whether it's a relaxing ride among the thermals or graceful sport maneuvers, the Syncro EDF lets you do both!

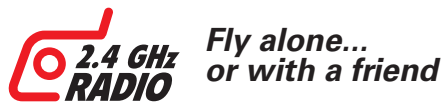

NEW PRODUCT

www.gpdealer.com

FAST EASY FLYING!™

Everything you need to start flying is included, right down to all the batteries and a balancing LiPo charger with AC adapter. The motor, radio gear and servos are already installed, so final assembly (including joining the 2-piece wing) requires less than 5 minutes, with no tools.

SKYCRUISER™

- "Rolled up" wingtips are more than just aesthetically pleasing — they also create built-in dihedral for added stability
- FlightFlex™ material bends upon impact instead of breaking — in just seconds you can straighten it out, and you're ready to fly again!
- In the event of a nose-in crash, the Sky Cruiser's pod-mounted pusher design offers more protection for the prop
- If the SafeProp™ does strike the ground, it pops off to prevent damage, and then pops right back on
- A 4-channel 2.4GHz radio lets you fly with no worries about interference, and you can set the controls for "New Pilot" or "Experienced Pilot" by just pushing down on the stick
- The 2S LiPo battery and brushed motor provide plenty of power for this super-lightweight glider

COXA6503 Sky Cruiser RTF
 Wingspan: 27.6 in (702 mm)
 Weight: 3.3 oz (94 g)
 Length: 20.2 in (515 mm)

From the Experts:

Starting out in R/C flying doesn't get any easier than the Sky Cruiser! Virtually all building is done for you, and there's nothing extra for you to buy. Thanks to FlightFlex material and exclusive SafeProp protection you can fly the Sky Cruiser with confidence, and the 2.4GHz radio eliminates any concerns about interference.

Long story short...

The Sky Cruiser is everything a first plane should be: stable and extremely easy to fly. You can be enjoying strong climbs and long glides in less than 5 minutes!

READY TO ROCK — AND ROLL WITH THE BEST OF 'EM!

Axial® Wraith™ 1/10 Electric 4WD Rock Racer RTR

www.gpdealer.com

- Not just a low-speed crawler, the Wraith is also built to go fast
- Features a realistic full tube-frame chassis design, manufactured with high-strength composite materials
- True 4-wheel drive locked diffs improve traction
- Power comes from the 20T 550 motor, with control courtesy of an AX-2 2.4GHz radio system
- Scale touches galore, from the 8-spoke Rebel™ wheels mounted on Ripsaw™ 2.2 tires to the licensed Corbeau® LG1 race seats inside the highly detailed interior

AXID9018 Wraith 1/10 Electric 4WD Rock Racer RTR

Wheelbase: 13.5 in (343 mm)

Width: 11.6 in (295.3 mm)

Height: 9 in (228.6 mm)

Ground Clearance: 3 in (76.2 mm)

Weight: 5.5 lb (249 kg)

Long story short...

Sand tamer. Mountain trail runner. Rock racer. Mud bogger. Any kind of backyard bashing you can dream up, the versatile 4WD Wraith can take it on!

EXPANSION PACK 8

REALFLIGHT®
True to Life™

MORE POPULAR AIRCRAFT TO ENJOY ON REALFLIGHT!

- Expansion Pack 8 adds new challenges and adventures to your RealFlight experience!
- Choose from 15 new aircraft, including jets, aerobats, fighters, helis and more
- Three new flying sites to explore, including the Austria and San Diego PhotoFields™ sites and a new 3D Obstacle Course

Please note: Expansion Pack 8 is compatible only with RealFlight G5 and later versions. All trademarks and registered trademarks are the property of their respective owners. Pitts® is a registered trademark of Aviat Aircraft, Inc. and is used under license by Hobbico®, Inc.

GPMZ4118 RealFlight Expansion Pack 8

- 11 **New Airplanes!**
- 3 **New Rotary Wings!**
- 1 **Quadcopter!**
- 3 **New Flying Sites!**

From the Experts:

With RealFlight, virtual R/C flying is as close as your computer, and Expansion Pack 8 adds even more variety! Fascinated at the thought of flying a jet? Expansion Pack 8 has three of them...including the F-14 Tomcat! You can also race a Thompson Trophy contender from the '30s, or push the SBach 342 foamy or awesome Synergy N5 to new extremes in performance. You'll also find three detailed new flying sites — and all feature the amazing graphics and realistic physics that RealFlight is known for!

Long story short...

Enhance your enjoyment of RealFlight with the exciting new aircraft and realistic flying sites you'll find on Expansion Pack 8!

"SUPER-SIZED" WITH MORE CHANNELS... AND CGY750 GYRO SUPPORT!

8FG Super 14-Channel Computer System

8FG SUPER

The 8FG Super boasts features above and beyond the original 8FG:

- Expanded with 14 total transmitter channels – 12 proportional and 2 switched
- Includes the R6208SB 2.4GHz FASST 8/18 Channel S.Bus High-Voltage Receiver
- The gyro menu supports 3-axis gyros and is perfectly tailored to the CGY750
- User menu allows pilots to customize and display frequently used functions
- VPP (Variable Pitch Propeller) compatibility can be set to three conditions for throttle and pitch curve
- Swash trim can be adjusted from the swash screen

Recommended by
renowned pilots
**Bobby Watts, Matt Botos
and Kyle Stacy!**

And retains these exceptional 8FG functions:

- SensorTouch™ programming
- Factory-defined mixes
- Low latency and 2048 resolution for fast, accurate Real-Time Response™
- Accepts 32MG to 2GB SD memory cards*

*SD memory card not included.

FUTK8010 8FG Super FASST 2.4GHz 14-Channel Radio-Air
FUTK8011 8FG Super FASST 2.4GHz 14-Channel Radio-Heli

From the Experts:

The original 8FG was already the best 2.4GHz radio value available. Now, for the same cost, the 8FG Super offers six additional channels! The 8FG Super is the first radio that really supports flybarless helicopters. It's perfect for all other applications, too... making the 8FG Super a smart choice for ANY forward-looking flier.

Long story short...

The 8FG Super offers even more of the sophisticated radio technology that serious airplane and heli modelers demand!

THE FIRST SPEED-TUNED AIRCRAFT ENGINES FROM O.S.

91HZ-R Competition Heli Engines

91HZ-R 3C Speed

A carburetor intake bore maximized to 11.6 mm and cylinder exhaust timing advanced to 170° combine to produce extreme horsepower for faster flight speeds and more stable hovering.

OSMG1980 91HZ-R 3C Speed

91HZ-R 3D Speed

With the carburetor inlet enlarged to 11.2 mm and exhaust port timing set at 160°, the 91HZ-R 3D offers incredibly stable mid-torque power for awesome 3D flight.

OSMG1981 91HZ-R 3D Speed

91HZ-R 3D Speed w/PowerBoost Pipe 91

All the features of the 91HZ-R 3D, plus a PowerBoost pipe for precision performance from high RPM maneuvering to idling and hovering.

OSMG1982 91HZ-R 3D Speed Black 61G w/PowerBoost Pipe

PowerBoost Pipe 91 is also sold separately (OSMG2881)

- Featuring newly designed combustion chambers, shaped to match the big bore carburetors and advanced exhaust cylinder timing
- Lightweight, machined heatsink heads
- Crankshaft counter weight has been modified to reduce vibration at high RPM
- Black anodized crankcases offer better heat dissipation
- "Demand Regulator System (DRS)" guarantees a steady fuel supply to the carb at any attitude, on a full or empty tank and during the most abrupt throttle changes

From the Experts:

O.S. proudly introduces the 91HZ-R 3C and 3D, exceptional heli engines for F3C and 3D competition. Both versions share many great features, not the least of which is the "On Demand" Regulator System which delivers fuel consistently to the carb regardless of the heli's attitude or the pilot's flying style. But both also boast unique advantages that give you a decided edge in your particular application.

Long story short...

Whether you're into precise F3C maneuvers or stick-bashing 3D thrills, there's a 91HZ-R power plant that's perfect for your kind of heli flying!

O.S. ENGINE
UNEQUALLED QUALITY PRECISION & PERFORMANCE

BRUSHLESS POWER BRINGS OUT THE BEAST IN THIS TRUCK!

1/8 MT4 G3 Brushless 4WD Monster Truck RTR

- The high-torque 2000kV Ripper brushless motor and 150A ESC provide mega muscle for extreme off-roading
- Enjoy secure, confident control with the Cougar PS3i 2.4GHz radio system and high torque, metal gear steering servo
- A 3 mm rigid aluminum chassis, full CVD drive shafts and quality bearings enable the MT4 G3 to stand up to unforgiving conditions
- Features the same transmission as in the nitro ST-1, with steel gears and hardened steel rings in all three diffs
- Aluminum oil filled shocks and Deans® plugs boost performance even more
- Comes with a stylish monster truck body in blue and orange or red and yellow

TTRD80BN 1/8 MT4 G3 Brushless 4WD Monster Truck RTR-Blue/Orange

TTRD80RY 1/8 MT4 G3 Brushless 4WD Monster Truck RTR-Red/Yellow

Length: 21 in (532 mm)

Width: 17 in (434 mm)

Height: 9.4 in (240 mm)

Wheelbase: 14.2 in (360 mm)

Weight: 9.2 lb (4180 g)

(Battery not included)

From the Experts:

Wheelies, back flips, big air...you can do them all with the 1/8 scale MT4 G3! In addition to the brushless motor and ESC, this electric monster inherits lots of other goodies from the nitro version, including many durability and performance parts found in the transmission and suspension. All this, AND the fact that it's ready to run, makes the MT4 G3 the complete package in monster truck mayhem!

Long story short...

With its brushless power system the MT4 G3 dominates the RTR electric monster truck competition!

A TORQUE TUBE TAIL TAKES THE TITAN X50 TO THE EXTREME!

Titan X50 Kit w/Torque Tube Tail

- The highly efficient torque tube-driven tail rotor delivers the crisp rudder response and 100% power transfer that 3D heli pilots demand
- In addition to high-tech looks, the carbon/aluminum compound tail boom adds stiffness and reduces vibration
- Each tail rotor grip has two radial and thrust bearings, for precision and reliability
- The under-slung flybar head is machined aluminum, including the blade grips
- All shafts are made of heat-treated, hardened stainless steel
- Choose the Titan X50 Kit, or go all-out with the kit version that includes a Redline 53H engine with 3D pipe and carbon-fiber blades
- A separate Conversion Kit is available for upgrading the belt-driven Titan X50B to the all-out performance levels of the torque tube Titan X50

TTRE0073 Titan X50 Kit w/Torque Tube Tail
 TTRE0074 Titan X50 Torque Tube Kit w/53H/Muffler/CF Blades
 TTRE4579 Titan X50B Torque Tube Conversion Kit
 Main Rotor Diameter: 53 in (1345 mm)
 Tail Rotor Diameter: 10.25 in (260 mm)
 Fuselage Length: 47.25 in (1200 mm)
 Weight (Fully Equipped): 7.16 lb (3250 g)

From the Experts:

Take full advantage of the efficient power transfer provided by the torque tube tail on the Titan X50! Everything about this amazing machine is designed to deliver ultra-smooth handling and adrenalin-pumping 3D performance with no limits. Step up to the Titan X50 equipped with the torque tube-driven tail and experience the difference for yourself!

Long story short...

With its proven torque tube-driven tail rotor and many other upgrades, the Titan X50 is the ultimate 50-class machine!

READY TO WIN...WITH PRO-LEVEL FEATURES

1/8 EB-4 S2 Pro 4WD Nitro Buggy RTR

- This big, bold buggy is designed to dominate 1/8 scale competition!
- The Thunder Tiger Pro-21BX-R engine cranks out enormous power
- A high-torque metal gear steering servo delivers confident handling on the straightaways and in the turns
- A 3-channel Cougar PS3 2.4GHz radio puts you in control with security and precision
- Race-legal 125 cc fuel tank with a flip top for quick refueling
- Equipped with high-performance Deans® plugs

TTRD2771 1/8 EB-4 S2 4WD Pro Nitro Buggy RTR-Red
 TTRD2772 1/8 EB-4 S2 4WD Pro Nitro Buggy RTR-Blue
Wheelbase: adjustable from 12.4-12.6 in (315-320 mm)
Front Track Width: adjustable from 11.6-12 in (295-305 mm)
Rear Track Width: 11.8 in (300 mm)
Weight: 6.8 lb (3100 g)

From the Experts:

It started with the National Champion EB-4...and the S2 Pro version takes that winning technology to new heights! This awesome off-roader is loaded, from the Pro-21BX-R nitro engine to the race-proven suspension geometry and fiberglass reinforced composite parts. Even the stylin' body is pre-painted with decals, so you can get after it right from the get-go!

Long story short...

The EB-4 S2 Pro is the complete package in nitro excitement: 100% assembled, and equipped with top-of-the-line performance parts!

BEHOLD THE NEW BRUSHLESS BUGGY CHAMPION!

1/8 EB-4 G3 4WD Brushless Buggy RTR

- The G3's suspension is based on the ROAR National Champion EB-4 S3, and is compatible with most EB-4 S3 series parts
- 2000kV brushless motor and 80A brushless ESC reduce friction for super-fast speeds and tremendous torque
- Drive with confidence and no fear of interference with the included Cougar PS3i 3-channel 2.4GHz radio
- Hardened steel diff rings make gear stripping virtually impossible; a full set of bearings ensures smooth power transfer
- Other race-winning features include aluminum oil-filled shocks, a high-torque metal gear steering servo and Super Deans® plugs

TTRD7000 1/8 EB-4 G3 4WD Brushless Buggy RTR-Yellow

TTRD7001 1/8 EB-4 G3 4WD Brushless Buggy RTR-Blue

Length: 19.3 in (490 mm)

Wheelbase: 12.6-13 in (320-330 mm)

Width: 12 in (305 mm)

Weight: 7 lb (3160 g)

(Battery not included)

From the Experts:

The EB-4 G3 starts with the impressive pedigree of the EB-4 S3 and supplements it with a power-packed brushless motor and ESC. A high-torque, metal gear steering servo stands up to all-out 1/8 scale off-roading to keep you in control. And even with all of its speed potential, the G3's durability is not compromised. With many suspension parts made of machined or anodized aluminum, this buggy is built to stay on the track, and stay out of the shop!

Long story short...

With cutting-edge components and performance perks galore, the EB-4 G3 continues the EB-4 legacy all the way to the winner's circle!

LOWER-PRICED, FULLY FUNCTIONAL R/C TANKS

1/24 SCALE ZERO EDITION RTR TANKS

- Zero Edition R/C tanks offer the same realistic operation and battle capability found on more expensive models
- Maneuver your tank with 3 speeds forward, 2 speeds reverse, left and right turns and even a stationary pivot; the turret also rotates 330°
- Tanks emit realistic sound effects while moving and firing
- Each comes completely assembled and ready for action right out of the box, with a 2-stick controller included

- VSKD1027 1/24 Zero Edition Tiger 1 Late Production Gray RTR 27MHz
- VSKD1049 1/24 Zero Edition Tiger 1 Late Production Gray RTR 49MHz
- VSKD1527 1/24 Zero Edition Leopard 2 A5 Camo RTR 27MHz
- VSKD1549 1/24 Zero Edition Leopard 2 A5 Camo RTR 49MHz
- VSKD2827 1/24 Zero Edition M1A2 Abrams Desert RTR 27MHz
- VSKD2849 1/24 Zero Edition M1A2 Abrams Desert RTR 49MHz

COMBAT CAPABLE!

Engage in armored combat with any other VSTank! Fire an infrared beam at the opposing tank's sensor — hitting it registers a "hit"; and five "hits" disable that tank.

The original series 1/24 scale Leopard 2 A5 Tank is now available with a Camo Winter trim scheme!
 VSKD71** 1/24 Leopard 2 A5 Camo Winter RTR

From the Experts:

If you're into radio controlled tanks for the fun of driving them and the excitement of waging wireless warfare, then Zero Edition RTR tanks were made for you. Almost anything the higher-priced models can do, these tanks can too — including multi-speed, multi-directional control and total off-road capability. And you can employ military strategies against your friends in realistic combat using infrared beam firepower, whether you're indoors or outdoors!

Long story short...

VSTank's Zero Edition series of 1/24 scale tank models are the easy, more affordable way to unleash your inner tank commander!

FUTABA® HIGH-VOLTAGE SERVOS

"These servos blow away any I have ever flown"

- Designed to handle up to 7.4V LiPo battery power
- The BLS157HV's incredible torque (514 oz-in) makes it THE choice for 3D/scale aerobatics or large-scale surface applications
- The BLS255HV is ideal for swash plate control on flybarless CCPM helis
- All include dual bearings and metal gears for smooth, long-lasting operation — BLS156HV and BLS157HV offer the added cooling benefit of a metal center case

FUTM0715 S3051HV High Voltage High Torque Standard Servo
 FUTM0750 BLS156HV High Voltage High Torque Servo
 FUTM0751 BLS157HV High Voltage Ultra Torque Servo
 FUTM0758 BLS255HV High Voltage High Speed Servo

www.gpdealer.com

Futaba®

Long story short...

Futaba engineering means that these High Voltage servos offer more holding power and precision than any other!

THUNDER TIGER® REDLINE SERIES .56H HELI ENGINE

The new ruler in .50-size performance power!

- Cylinder liner features an XC2 composite coating to extend engine life — and an etched criss-cross pattern to minimize friction
- Carb comes with a heat insulator mount for more consistent power, plus dual needles that can be adjusted with a screwdriver or hex wrench
- Other advancements include a reinforced beam mount, dual bearings and an oversized CNC-machined anodized heat sink head

TTRG1156 Redline Series .56H Heli Engine

Displacement: 0.553 cu in (9.05 cc)

Bore: 0.906 in (23 mm)

Stroke: 0.858 in (21.8 mm)

RPM Range: 2,000-21,000

Output: 2.23 hp @ 17,500 rpm

Weight: 13.8 oz (390 g)

Includes: Redline R3 glow plug

Long story short...

It's Thunder Tiger's largest .50-class displacement — and most advanced heli engine!

**Thunder
Tiger**

Associated 8-Piece 1/4" Hex Driver Set

The compact tool solution for the beginner and pro racer!

- All the most popular standard and metric hex sizes
- The hardened tips can be used in power screwdrivers with a 1/4" hex drive to tackle big jobs such as 1/8 scale vehicle maintenance
- Drivers are conveniently stored inside the machined aluminum handle

ASCR1655
8-Piece 1/4"
Hex Driver Set

Associated 1/4" 5-Piece Power Tool Set

A "must-have" set for nitro vehicle owners!

- Popular hex tip sizes ranging from 2.0 mm to 2.5 mm
- The hardened tips can be used in power screwdrivers with a 1/4" hex drive
- Storage case is included

ASCR1674
1/4" 5-Piece
Power Tool Set

HPI® Lancer EVO X Body 200 mm

A licensed replica of the full-size Mitsubishi street car!

- Lots of scale detail, including front and rear light buckets and die-cut premium decals
- Dimples mark the body post locations for easy, accurate drilling; overspray film and pre-cut window masks make painting fast and simple
- Designed to fit all 1/10 scale touring cars, and will fit on 190 mm chassis using wide offset wheels

HPIC1745
Lancer EVO X
Body 200 mm

HPI® 1966 Ford® Mustang GT Coupe Body 200 mm

The famous American classic rides again!

- Durable 1/10 scale polycarbonate body is ready for you to customize
- Realistic vinyl decals include window frames, headlights, grill, tail lights and more
- Dimple marks indicate body post drill locations

HPIC4926
1966 Ford Mustang GT
Coupe Body 200 mm

JCOC3173
Carvers SCT 3.0" x 2.2"
Tire-Gold (2)

JConcepts Carvers SCT 3.0 x 2.2 Tire-Gold (2)

Your secret weapon for more consistent SC truck steering!

- The first tire engineered specifically to be mounted up front on Short Course trucks!
- Utilizes a radial rib design for less aggressive, more predictable front end response
- The large sidewall retains a realistic look, while also providing an additional tuning option
- In new condition the Carvers is ideal on low-traction and wet surfaces; after accumulating some wear you can use them on indoor/outdoor clay tracks

JCOC3221
Bar Code V2 Rear
Tires-Blue (2)

JConcepts Bar Code V2 Rear Tires (2)

Setting the "Bar" for racing tires even higher!

- The aggressive alternating bar design offer super gripping power
- "Y" side bars provide uncompromising support for blue and black groove conditions as well as wet indoor tracks
- There's a Bar Code V2 compound that's just right for you: Soft (Blue), Super Soft (Green) and Indoor Soft (Gold)

Also Available:

JCOC3222 Bar Code V2 Rear Tires-Green (2)
JCOC3223 Bar Code V2 Rear Tires-Gold (2)

NOVC3162
Kinetic Spec/Ballistic 540
17.5T Brushless System

Novak Kinetic Spec/Ballistic 540 17.5T

The complete, affordable package for brushless domination!

- Includes the feature-packed Kinetic Spec ESC that's specifically designed for spec racing
- The 17.5T Ballistic Spec motor is completely rebuildable, so one motor can be used in all spec class races by installing the color-coded stator
- An easy-to-adjust timing assembly alters the RPM range, while also retaining previous user settings

NOVM1742
Kinetic Spec Racing
Brushless ESC

Novak Kinetic Spec Racing Brushless ESC

Kinetic ESC technology extends to Spec Class racing!

- Has many of the features of the Kinetic 2S, in a more compact, more affordable sensored unit
- Dynamic Timing Advance offers eight onboard timing settings — with further adjustability via NovaLink™
- Brake and Throttle Curves allow drivers to preset and fine tune parameters to meet track conditions and individual driving styles

OSMG2715
RP8 Turbo Glow
Plug-Cold

O.S.® Engines RP8 Turbo Glow Plug-Cold

Outlast the hottest temps with Turbo power!

- Keep your 21VZ-R or 12TR engine cool — and performance hot!
- Compatible with 25% or higher nitro fuel
- The perfect plug for serious on-road competitors!

ProtoForm J71 Clear Body for VTA Class

Adds style and performance to any VTA chassis!

- A stirring replica of the 1971 Trans-Am Championship winner!
- Made of durable .030 Lexan® material
- Comes with an add-on nose with air dam that mounts easily on the front; a spare nose is also included
- A molded-in rear spoiler adds to the body's distinctive look

Body in this image is painted. Actual product is a clear body sold separately from the vehicle.

America's

Save BIG on R/C's hottest products!

Got your eye on an exciting new airplane, heli, car or boat? Want to upgrade your radio gear or check out the latest accessories? There's no better time than NOW — when you can get in on the best deals on R/C merchandise you'll find this year!

With **over 115** R/C products featured, the 2011 America's Best R/C Sale has something for EVERYONE. The price reductions are unbelievable, and include top-of-the-line merchandise from over a dozen of your favorite manufacturers. With **up to \$50** off on some items, you'll want to act fast. Visit your local participating hobby dealer before June 30, 2011 and save like never before!

Sale prices good through June 30, 2011

For a complete list of products on sale visit bestrc.com and click on the America's Best R/C Sale logo.

To locate the participating hobby retailer nearest you, click on the Find A Dealer logo on the sale page off of bestrc.com. You'll get store names, addresses, phone numbers — and in some cases even a map!

PURCHASE REALFLIGHT G5.5... ...GET \$20 IN R/C MERCHANDISE!

\$20 MERCHANDISE CERTIFICATE

With over 80 aircraft and 30 flying sites to choose from, RealFlight G5.5 is already far and away the #1 choice for virtual R/C flight.

And if you get it by June 30, 2011 you'll get even more: a certificate worth \$20 towards quality products from any of nearly 30 top-notch R/C manufacturers!

GPMZ4450/GPMZ4451

Your Price \$199.97

Suggested prices are available only at participating hobby shops in the U.S. and Canada. Local prices may vary and are set by the independent retailers. RealFlight rebate request form and official rules are available at bestrc.com or realflight.com. RealFlight G5.5 purchases must be made before June 30, 2011 and requests must be submitted by July 31, 2011.

HASEGAWA® 1/72 SCALE JUNKERS JU 188A

The Luftwaffe's recon-ready torpedo-bomber.

In 1942, Junkers combined features of the previous Ju 88 and the subsequent Ju 288 to create the Ju 188. On the surface, the Ju 188 was merely an improvement on the aging Ju 88's design; however, it was powered by a more powerful engine (the 1,730 Jumo 213A) and could handle larger bomb loads. Later "A" versions were equipped with the FuG 200 sea-search radar (for recon missions) and torpedo shackles, which proved highly effective for naval strike missions.

01939-3
HSGS1939 (Limited Edition)
 Total parts: 159
 Skill level 3

- This limited edition kit features new torpedo parts and bomb rack components.
- Also includes photo-etched parts for the FuG 200 radar and resin nose rod cover parts.
- Kit offers three late WWII decal marking options:
 1. Luftwaffe 7./KG26, Code: BR, Norway, May, 1945
 2. Luftwaffe 8./KG26, Code: BS, Norway, May, 1945
 3. Luftwaffe 9./KG26, Code: 1H+GT, May, 1945

From the Experts:

The Junkers Ju 188A is a worthwhile addition to any WWII aircraft modeler's collection, with exceptional detail that could only come from Hasegawa.

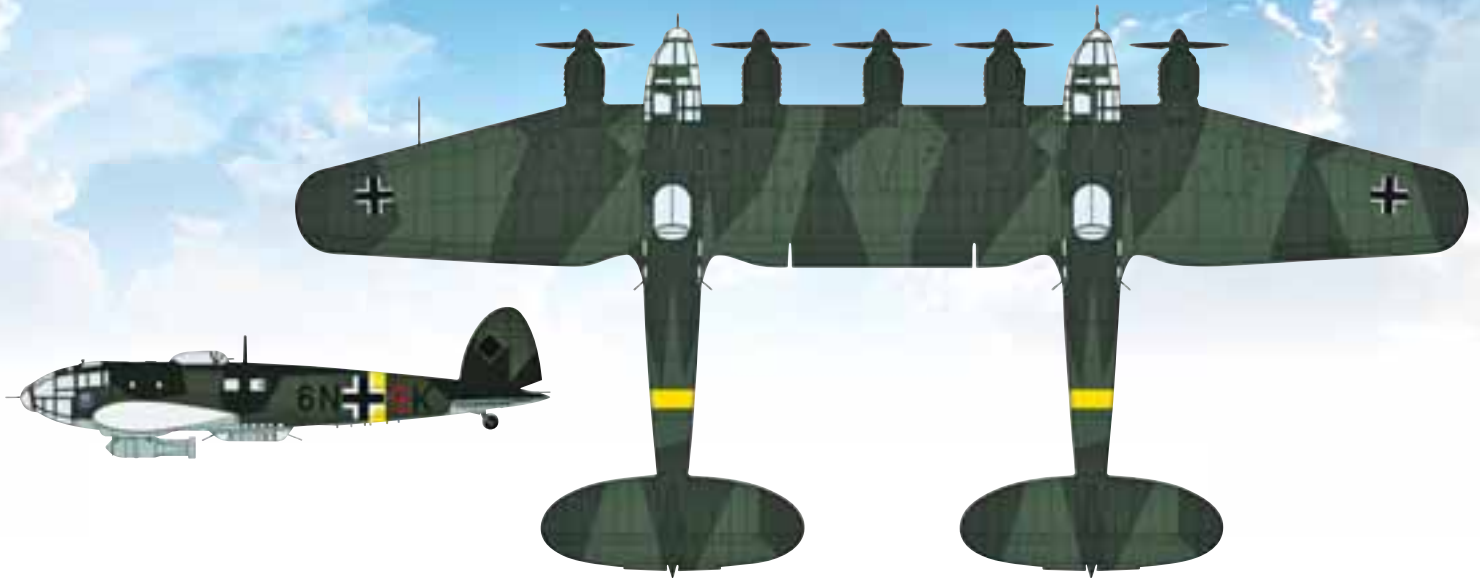

Long story short...

Run, don't walk, to your local dealer, to get the limited edition Hasegawa 1/72 Scale Junkers Ju 188A now, before they fly off the shelves!

HASEGAWA® 1/72 SCALE HEINKEL HE 111Z-2 LONG-RANGE BOMBER

The Luftwaffe bomber with twice the firepower.

The design for the Heinkel He 111Z Zwilling combined two standard He 111s to create one virtually unstoppable aircraft. It was powered by five 1,340 hp Jumo 211F engines, which provided an unexpected benefit. If three of the centrally positioned power plants failed, the He 111Z could fly on the two remaining engines. The subsequently planned (but never produced) He 111Z-2 required additional Hirth TK 11 superchargers to carry up to four Henschel Hs 293 guided missiles at once. By the time the He 111Z-2 would have been produced in 1944, Germany abandoned the costly production of bomber aircraft.

01940-9
HSGS1940 (Limited Edition)
Total parts: 228
Skill level 3

- This limited edition kit features parts for two new resin bomb racks and six SC1000 bombs.
- Includes fictional markings for the Luftwaffe 2./KG100, Code: 6N + SK, Russia.

From the Experts:

Hasegawa has turned one of history's most unique, unrealized aircraft into one of the most spectacular 1/72 scale kits of the year.

Long story short...

The Hasegawa 1/72 scale He 111Z-2 has twice the detail, twice the excitement and twice the firepower of any kit around!

HASEGAWA® 1/450 SCALE U.S. NAVY BATTLESHIP U.S.S. MISSOURI

"Big Mo," back and better than ever in 1/450 scale.

The U.S.S. Missouri (BB-63) is most famous as the site of Japan's official surrender to the U.S. in 1945. However, that was just one of many major events in the U.S.S. Missouri's long, extraordinary service. This Iowa-class battleship – the last one ever completed by the U.S. – aided the Allies by repelling Japanese forces in the battles of Iwo Jima and Okinawa. President Truman later dispatched her to South Korea to intervene in the Korean Conflict. Decommissioned in 1955, the U.S.S. Missouri was reactivated nearly 30 years later. In 1991, she served commendably in the Gulf War, and became a museum ship in 1999.

40114-3
HSGS4114
Total parts: 290
Skill level 3

Did you know?

- The U.S.S. Missouri earned three battle stars for WWII service, five battle stars during the Korean War and three battle stars in the Gulf War.
- The U.S.S. Missouri has hosted Presidents Harry Truman and George H.W. Bush.
- Pearl Harbor, Hawaii is currently the U.S.S. Missouri's home, where she serves as a memorial museum.

From the Experts:

This exciting Hasegawa kit lets you recreate one of history's most remarkable battleships. It's a must-have for military buffs!

Long story short...

The Hasegawa 1/450 Scale U.S.S. Missouri is a museum-caliber model that's worthy of the famed battleship's celebrated career!

HASEGAWA® 1/450 SCALE ROYAL NAVY BATTLESHIP H.M.S. VANGUARD

The biggest, fastest battleship in the Royal Navy's fleet.

Launched in November, 1944, the H.M.S. Vanguard (23) was the biggest, fastest battleship in the Royal Navy's Fleet. Often regarded as the world's final completed battleship, her history is just as incredible as her size and speed. While she wasn't completed in time for WWII, this versatile craft did act as a training ship and a flagship for the Royal Navy Reserve Fleet. Her guns were not her own – they were recycled from notable WWI and WWII-era ships such as the Queen Elizabeth and the Royal Sovereign. Ironically, these guns were never fired in combat. After nearly two decades honorably serving her Queen and Country, the H.M.S. Vanguard was sold for scrap in August, 1960.

40115-0
HSGS4115
Total parts: 150
Skill level 3

Did you know?

- The H.M.S. Vanguard was once used by England's Royal Family as a "royal yacht," taking George VI and his daughter, Elizabeth II, to South Africa. This trip marked the first time the future Queen had ever the country.
- The Vanguard's impressive 15-inch gun turrets stood in for guns aboard the H.M.S. Hood and the H.M.S. King George V in the 1960 film, *Sink the Bismarck!*
- Before she was scrapped, portions of the Vanguard's thick steel armor plating were recovered and recycled as shielding for a whole body monitor at England's prestigious Radiobiological Research Laboratory.

From the Experts:

The H.M.S. Vanguard makes a remarkable return with a superior Hasegawa kit so detailed, you'll think it's seaworthy!

Long story short...

Enlist in the Royal Navy Reserve with the Hasegawa 1/450 scale H.M.S. Vanguard – the best kit of this classic ship yet!

1/25 SCALE '62 CHEVY® IMPALA™ SS™ HARDTOP 2 'N 1

Two terrific ways to build the collectible classic.

The '62 Impala SS was only the second Super Sport model, but it proved that drivers didn't have to sacrifice style for peak performance. Options included a 409 cu. in. V-8 engine and an engine-turned aluminum panel to house the triple taillight assembly. Kit features a detailed 409 cu. in. V-8 with dual carbs, an optional custom air cleaner and finned valve covers. Also included are bucket seats, a choice of stock wheels and tires or custom wheels with low-profile tires, chrome-plated parts and decals with stock and custom graphics.

RMXS4281 Total parts: 149 Skill level 2 Length: 8.4 in (214 mm)

1/25 SCALE "JUNGLE JIM" VEGA NHRA® FUNNY CAR

A true, trend-setting superstar.

In the history of drag racing, there's never been another driver quite like "Jungle Jim" Liberman. His trademark maneuver – driving backwards at 100 mph speeds following a burnout – always managed to entertain spectators each and every race. His flamboyant personality extended to the paint scheme on his cars, like this '72 Vega Pro Stocker, which features a cartoon Jungle Jim sporting shades and flame-streaked hair. Kit features a one-piece tubular chassis, a flip-top Vega body, a replica blown fuel engine, narrow front tires, super-wide slicks, mag wheels and chrome-plated parts.

RMXS4288 Total parts: 101 Skill level 3 Length: 7.9 in (200 mm)

1/24 SCALE FERRARI® 458 ITALIA

Formula One-inspired. Unmistakably Ferrari.

The Ferrari 458 Italia combines the power and performance of a Formula One racer with an ultra-modern design that could only come from Ferrari. The Italia can go from 0 to 60 mph (97 kph) in 3 seconds, thanks to a 275 cu. in. (4.5L) V-8 engine that produces 560 hp at 9,000 RPM! Kit features an authentically sculptured body with a multi-piece 4.5L V-8 engine, a super-detailed interior and suspension, detailed wheel and brake assemblies, a positional front axle, soft black tires, chrome-plated parts and decals with factory markings.

RMXS4912 Total parts: 110 Skill level 3 Length: 7.4 in (189 mm)

1/72 SCALE SPACE SHUTTLE

Space travel's crowning achievement.

NASA spent the '70s exploring the use of practical, reusable space transports. The Space Shuttle became the crowning achievement of this research. The first operational shuttle flight occurred in 1982 with Space Shuttle Columbia. After three memorable decades in space, the program's final flight will occur in June, 2011. Kit features a detailed space shuttle with a realistic fuel tank and booster rockets, a detailed opening cargo bay with optional payload assemblies, a display stand and decal markings for all six space shuttles (Enterprise, Columbia, Discovery, Endeavor, Challenger and Atlantis).

MONS5089 Total parts: 128 Skill level 3 Length: 31.5 in (800 mm)
Wingspan: 13.1 in (333 mm)

1/8 SCALE GOLD KNIGHT & HORSE

Masterfully made for medieval chivalry.

At first glance, one might assume that the Gold Knight of Nice is a character taken out of an old King Arthur legend. However, his gold-plated armor realistically represents how typical knights appeared throughout the medieval period. Many elite soldiers of the time were given similar-looking armor for use in battle and jousting. It usually consisted of metal pieces (including gauntlets and a breastplate), which were specially tailored to fit that particular knight. Kit features light grey molding, a removable helmet, a sword and a horse with armor and accessories.

MONS6525 Total parts: 84 Skill level 2 Length: 11.6 in (295 mm)

REVELL OF GERMANY

1/72 SCALE PZ. KPFW. IV AUSF. H

Legendary power and performance.

Celebrated German general Heinz Guderian developed the Panzer IV as a safeguard against the ever-increasing threat of anti-tank weapons. The Ausf. H variant's armor was coated with Zimmerit paste to protect against magnetic mines. Damage-resistant side-skirt supports were fitted to the hull. Initial models featured rubber return rollers; in later models they were made of tougher cast steel. Kit features authentic surface details, a movable turret with stowage lockers, a replica MG 34 machine gun, side aprons, injection-molded tracks with individual links and segments, plus decals for two German versions.

RVLS3184 Total parts: 202 Skill level 4 Length: 3.8 in (97 mm)

REVELL® GERMANY 1/220 SCALE C-160 TRANSALL

Turboprop-powered, highly reliable.

The Transall C-160 was designed in the early '60s to replace France's aging fleet of Nord Noratlas transport aircraft. Developed by Aerospatiale and Messerschmitt-Bölkow-Blohm, the C-160 is powered by twin Rolls-Royce® turboprop engines. Only one accident has ever been reported in over forty years, placing it among history's safest and most reliable aircraft. The C-160 will be replaced by the Airbus A400M, which is currently undergoing initial tests. Kit features highly detailed surfaces, a rotating propeller and decals for a Luftwaffe version and a French Air Force version.

RVLS3998 Total parts: 24 Skill level 3 Length: 5.7 in (144 mm)
Wingspan: 7.2 in (183 mm)

1/1200 SCALE U.S.S. YORKTOWN (CV-5)

A fantastic recreation of the famed "Fighting Lady."

The U.S.S. Yorktown (CV-5) was the lead ship of the Yorktown Class. She entered service in September, 1937, and was stationed throughout the Atlantic until the Pearl Harbor attack in December, 1941. After being transferred to the Pacific, the U.S.S. Yorktown played important roles in the Battle of the Coral Sea and the Battle of Midway. During the latter battle, she sank after being struck by torpedoes from the Japanese submarine I-168. For her heroic efforts, the Yorktown (CV-5) was awarded three battle stars.

RVLS5800 Total parts: 36 Skill level 2 Length: 8.1 in (206 mm)

1/24 SCALE MERCEDES-BENZ® 300 SLR Winner of the 1955 World Sportscar Championship.

From the distinctive gull-wing doors to the eye-catching coupe styling, there's never been a racer like 1955's Mercedes-Benz 300 SLR. Featuring a top speed of 190 mph (290 km/h), the 300 SLR eventually became the winner of the 1955 World Sportscar Championship season, thanks to victories at races like the 1955 Millie Miglia. Kit features a detailed chassis, a multi-part 8-cylinder engine, a realistic interior, a tubular space frame, large brake drums, opening gull-wing doors, an opening hood, rubber tires, movable wheels, multiple chrome parts and authentic decals.

RVLS7171 Total parts: 124 Skill level 4 Length: 7.1 in (180 mm)

NEW RELEASES

1/32 SCALE KAWASAKI KI-61-I OTSU HIEN ("TONY") "SHINTEN SEIKUTAI"

The favored fighter of the 244th Sentai.

Built to compete with the P-40 Warhawk, the Ki-61-I was the first Japanese fighter to feature a liquid-cooled inline engine. This limited edition kit features new upper machine gun bulge parts and three marking options: 1. I.J.A.A.F. 244th F.R. Corporal Masao Itagaki, Code: 73, Chofu A.B., 1945; 2. I.J.A.A.F. 244th F.R. Sergeant Masao Itagaki, Code: 14, Chofu A.B., Feb., 1945 and 3. I.J.A.A.F. 244th F.R. Corporal Matsumi Nakano, Code: 33, Chofu A.B., Dec., 1944.

HSGS0212 (Limited Edition) Total parts: 152 Skill level 3

1/72 SCALE YAKOVLEV YAK-3 COMBO Superior Soviet air support.

In the eyes of many WWII fighter pilots, the Yakovlev Yak-3 was the ideal dogfighter, with its small, lightweight design and superb power-to-weight ratio. In fact, the French Air Force's Normandie-Niemen squadron used the Yak-3 to score the last 99 of their 273 Luftwaffe "kills." This limited edition kit combo features three decal marking options: 1. Russian A.F. Normandie-Niemen, Capt. René Challe, Code: 1; 2. Russian A.F. Normandie-Niemen, Lieutenant Roger Sauvage, Code: 5, April, 1945 and 3. Russian A.F. Normandie-Niemen, Colonel Louis Delfino, Code: 00, 1945.

HSGS1938 (Limited Edition) Total parts (per kit): 38 (Includes 2 kits) Skill level 3

1/48 SCALE MITSUBISHI F-1 "6SQ SPECIAL MARKING" Japan's first post-WWII jet fighter, in 1/48 scale.

The Mitsubishi F-1 was developed for ground-attack and anti-shiping duties. It was first flown in June, 1975, and introduced three years later. Today, many units are upgrading F-1s with newer F-2s and F-4EJ Phantom IIs. This limited edition kit features four marking options: 1. J.A.S.D.F. 6SQ. 40th Anniversary, Special Marking, Code: 240, Tsuiki AB, 1999; 2. J.A.S.D.F. 6SQ. 40th Anniversary, Special Marking, Code: 201, Tsuiki AB, 1999; 3. J.A.S.D.F. 40th Anniversary, Special Marking, Code: 248, Tsuiki AB, 1994 and 4. J.A.S.D.F. 40th Anniversary, Special Marking, Code: 260, Tsuiki AB, 1994.

HSGS9944 (Limited Edition) Total parts: 166 Skill level 3

1/48 SCALE MESSERSCHMITT BF 109F-4/B "JG53"

The Luftwaffe's surefire success.

The Jagdgeschwader 53 (JG53) fighter-wing adopted the Messerschmitt Bf 109 in early 1941, just as they were preparing for Operation Barbarossa. From June-December, 1941, JG53 scored 762 Soviet "kills" with help from the BF 109. By comparison, JG53 only lost 37 aircraft, a testament to the Luftwaffe's firepower and fighting skills. This limited edition kit features new bomb parts, new metal inlet parts and two decal marking options: 1. Luftwaffe 10.(Jabo)/JG53 Unteroffizier Felix Sauer, Code: 3, March, 1942 and 2. Luftwaffe 10.(Jabo)/JG53 Staffelkapitän Oberleutnant Werner Laugemann, Code: 1, July, 1942.

HSGS9945 (Limited Edition)

Total parts: 80

Skill level 3

1/48 SCALE F/A-18D HORNET "IWAKUNI SPECIAL MARKING"

Flown by the best all-weather squadrons.

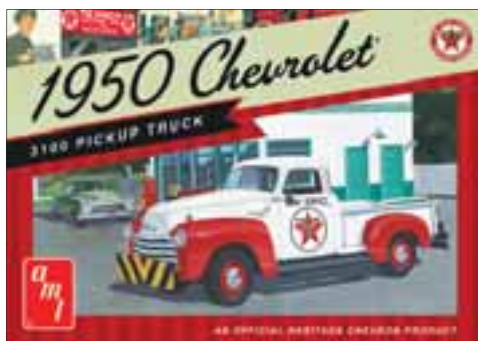

The F/A-18D Hornet is one of today's most advanced fighters. It's no wonder that elite U.S. Marine all-weather squadrons like the "Fighting Bengals" and the "Vikings" fly the Hornet. In fact, both squadrons were deployed in support of Operation Iraqi Freedom, flying combat sorties to aid U.S. troops in the air and on the ground. This limited edition kit features new antenna parts, plus two special marking options: 1. U.S. Marine VMFA(AW)-224 "Bengals," Code: WK01, 2009 and 2. U.S. Marine VMFA(AW)-225 "Vikings," Code: CE01, 2009.

AMT® 1/25 Scale 1950 Chevrolet® 3100 Pickup Truck

Vintage looks, "Advance Design" authenticity.

61 years after its original release, the 1950 Chevrolet 3100 is still a hit with collectors – and it's easy to see why. Like all trucks in the "Advance Design" series, the half-ton 3100 was big, strong and sleek-looking. 1950 marked the final year for the rear bumper, while telescopic shock absorbers were added, replacing the lever-action kind. Kit features new parts for the optional roof, fender flasher lights and the front "push bumper." Also included are black vinyl tires, chrome parts genuine Texaco® waterslide decals and collectible vintage Texaco packaging.

AMT679 AMTS0679

Skill level 2

AMT® 1/650 Scale Star Trek® U.S.S. Enterprise The Tholian Web Edition

Can you untangle the Tholian Web?

Star Trek's 64th episode, The Tholian Web, first aired on November 15, 1968, instantly becoming a fan favorite. In this now-classic episode, the Enterprise becomes trapped in an energy field while searching for the missing U.S.S. Defiant. Kirk gets trapped in another dimension after finding the lost ship, which forces Spock and McCoy to work together and untangle the Tholian Web. Kit features glow-in-the-dark plastic molding, new Tholian Web spinners, decals with multiple alternate marking options (including the U.S.S. Defiant), a cardboard backdrop and collectible, retro-style packaging.

AMT695 AMTS0695

Skill level 2

AMT® 1/25 Scale NASCAR® 2010 Chevrolet® Impala™

Design your own NASCAR racer!

Without question, the Chevrolet Impala has a commanding presence, whether it's on the street or at the racetrack. It's been a staple at NASCAR races since 2007, when it replaced the popular Monte Carlo. Also known as the "Car of Tomorrow," the Impala represents Chevy in the Sprint Cup Series, as well as the Nationwide Series. Ideal for aftermarket decals, this kit features easy-to-build snap assembly; an undecorated white body; current NASCAR COT spoiler and original wing options; detailed windows, wheels and tires; plus optional Auto World® decals.

AMT739 AMTS0739

Skill level 1

AMT® 1/350 Scale Star Trek® U.S.S. Enterprise™ NCC-1701-A Decal Set

Add authentic detail to any large-scale NCC-1701-A.

As seen in 1979's Star Trek: The Motion Picture, the Enterprise NCC-1701-A was designed with various shades of pearlescent paints to give the ship a "paneled" appearance. Now, you can add the same kind of detail to your large-scale Enterprise with this highly anticipated decal set! It features four sheets of Aztec paneling decals included with 2009's NCC-1701-A kit release, plus one all-new decal sheet – created exclusively for this release – which features alternate ship names and registry numbers. Engineering colors include blue, gray and green, and detailed application instructions are provided.

MKA001 AMTS9001 Total sheets: 5

Airfix® 1/600 Scale H.M.S. Victorious

One of Britain's most distinguished carriers.

The H.M.S. Victorious was called to duty in the Battle of the Atlantic immediately following her 1939 launch. She served the Royal Navy with distinction during WWII, most memorably during attacks on German battleships such as the Bismarck and the Tirpitz. After WWII, the Victorious was modernized and re-commissioned, serving in the Far East Fleet in the 1960s. Kit features a full hull, an angled flight deck and superstructure, an aft flight deck elevator, ship's boats, six Sea Vixens, four Scimitars, four Skyraiders, display cradles, superstructure decals and deck markings.

4201 ARXS0420 Total parts: 94 Skill level 2 Length: 15.6 in (397 mm)

Dragon® 1/35 Scale Allied Force ETO, 1944

Trained to take Europe by storm.

In February, 1944, General Eisenhower became Supreme Allied Commander of the European Theater of Operations (ETO). His first order of business: overseeing Operation Overlord, in which 3 million troops invaded German-occupied Normandy, France on June 6, 1944. By March, 1945, the Allies had control of the Rhine River, ensuring the war's end was near. Kit features three U.S. GI figures and one Royal Marine Commando figure with individual action poses, detailed uniforms and accessories. Featured weapons include a Sten gun, a Thompson submachine gun and a Browning Automatic Rifle (BAR).

6653 DMLS6653 Total parts (approx.): 50

Minicraft® Models 1/200 Scale Spruce Goose

Howard Hughes' awe-inspiring H-4 Hercules.

By 1942, the U.S. Navy needed a long-range transport seaplane that could carry 750 troops (or one Sherman tank) over the Atlantic. Designer Howard Hughes and industrialist Henry J. Kaiser developed the now-legendary Hughes H-4 Hercules as a result. Wartime restrictions forced the builders to use birch, and Hughes' perfectionist nature caused repeated delays. However, once the H-4 Hercules took its first and only record-setting flight on November 2, 1947, all was forgiven. Kit features 8 rotating propellers, wing floats, a display base, waterslide decal markings and all-new packaging artwork.

11657 MMIS1657 Length: 13.1 in (333 mm) Wingspan: 18.6 in (472 mm)

Minicraft® Models 1/144 Scale B-24D Liberator

Bombs away, for high-altitude heroics.

The B-24 Liberator isn't just the most-produced WWII Allied heavy bomber. It's also the most-produced U.S. military aircraft in history, with almost 18,500 built from 1940-1945! The "D" variant was a favorite of multiple Allied Air Force units worldwide, offering powerful R-1830-43 supercharged engines and a .50-caliber (12.7 mm) tunnel gun, which was replaced in later models by a retractable Sperry ball turret. Kit features new "D" fuselage tooling, a new "greenhouse" nose and three new marking options representing the U.S. Army, U.S. Navy and Royal Australian Air Force.

14636 MMIS4636

Moebius® Models 1/8 Scale Bela Lugosi as Broadway's Dracula

The iconic role that made Lugosi a star.

Bram Stoker's classic novel "Dracula" was published in 1897, and, almost instantly, it became the subject of countless stage and film adaptations. Without a doubt, the most famous Dracula of them all will always be Bela Lugosi, who first played the part on Broadway in a 1927 stage adaptation. After terrifying audiences in his first English-speaking role, Lugosi would portray the undead Count in Todd Browning's celebrated 1931 film. Kit features a display base with a bloodthirsty bat and a scary skull. Officially licensed by the Lugosi estate.

914 MOES0914 Total parts: 40

Moebius® Models 1/8 Scale Elvira®, Mistress of the Dark

Bring home television's campy horror hostess.

Cassandra Peterson's alter-ego Elvira first caught the eye of T.V. audiences as the host of "Elvira's Movie Macabre" on L.A.'s KHJ-TV in 1981. The program, which featured campy "B"-grade horror flicks, turned Elvira from local celebrity into a cult phenomenon within a year. The character continues to appear in movies and T.V. shows today, most recently a 2010 revamp of "Movie Macabre". Kit features the "Mistress of the Dark," perched upon a sofa with her dog. Accessories include a rug with a spooky monster's hand coming out of it, and a candelabra.

918 MOES0918 Total parts: 64

Moebius® Models 1/25 Scale 2010 Navistar® International® LoneStar®

Sleek, streamlined and instantly recognized.

The Navistar International LoneStar embodies the best that modern trucking has to offer. A sleek, streamlined design makes it instantly recognizable, while a powerful MaxxForce® 15 engine makes it ideal for heavy-duty use. Available options range from the standard model to the LoneStar Recovery tow truck and the special edition LoneStar Harley, which includes multiple design elements inspired by Harley-Davidson® motorcycles. Kit features a detailed MaxxForce 15 engine, a full interior, posable steering, multiple decal marking options and more.

Moebius® Models 1/55 Scale Prefinished Moon Bus

Painted and assembled, for dynamic display.

A rare classic returns with the release of the 1/55 scale Moon Bus! Recreating every detail of the vehicle that appeared in the 1968 Stanley Kubrick film, "2001: A Space Odyssey", this magnificent model is a 21st century retooling of the hard-to-find original kit (which has been unavailable since 1969). This replica of the classic Aurora Moon Bus kit is painted and assembled, for maximum ease and enjoyment. Includes collectible display packaging.

22001-1 MOES2200

Trumpeter® 1/35 Scale Canadian AVGP Cougar (Early)

Canada's standout, six-wheeled AFV.

The AVGP (Armored Vehicle General Purpose) fleet first entered service with the Canadian military in the late 1970s. These AFVs are distinguished by three distinct versions: the Grizzly Armored Personnel Carrier, the Husky Armored Recovery Vehicle and the Cougar tank trainer/fire support vehicle. Often used in U.N. missions, the Cougar is primarily used for recon training. All are now being outfitted with 21st century upgrades. Kit features slide-molded upper and lower hulls, a separate rear panel with crew entry doors, hollow rubber treaded tires, a photo-etched fret and decal markings.

MODEL ROCKETS ADD NEW LEVELS OF

It's no wonder so many kids look forward to summer camps: fun, fellowship, and the chance to participate in activities you wouldn't normally be able to, especially if you live in an urban area. Science- and space-themed camps that offer model rocketry programs are especially popular, and there are many to choose from. Visit the American Camp Association website (www.acacamps.org), or learn more about museums that sponsor weekly sessions and day camps with rocketry programs through the Association of Science-Technology Centers (www.astc.org). Most local YMCAs, 4-H Clubs and Scouting organizations also offer model rocketry among their summer programs. Fun and educational model rocketry programs are all around you this summer — enroll in one today!

EAA AIR ACADEMY Oshkosh, Wisconsin

Week-long Residence Camps

- **Young Eagles: Ages 12 & 13;**
June 13-17 & July 12-16
- **Basic: Ages 14 & 15;** June 19-24,
June 26-July 1 & July 5-10

All aspects of aviation are explored, including how model rockets are flown by building, launching and recovering them and recording pertinent statistical data.

SPACE CAMP DAY CAMPS Huntsville, Alabama

Week-long Residence Camps and Day Camps

- **Star Group Day Camp: Ages 7 & 8**
- **Constellation Group Day Camp: Ages 9-11**
- **Weekly Sessions: May 30-August 6**

Building rockets, conducting scientific experiments and learning what it's like to be an astronaut on a space station are among the many activities campers will enjoy.

IF YOU'D LIKE TO EXPERIENCE THE EXCITEMENT OF MODEL ROCKETRY FOR YOURSELF, ESTES HAS MANY THRILLING ROCKETS FOR YOU TO CHOOSE FROM!

A PROUD EDUCATION PARTNER FOR TARC!

What once started as a one-time event to celebrate the Centennial of Flight has now become the world's largest model rocket contest! Created by the Aerospace Industries Association (AIA) and National Association of Rocketry (NAR), the Team America Rocketry Challenge (TARC) has been held annually since 2003.

Approximately 7,000 students across the U.S. in grades 7-12 form teams to design, build and launch a model rocket. The rocket must carry an egg payload to a certain altitude for a certain amount of time, and return with the egg intact. The top 100 qualifying teams will compete in the national finals on May 14, 2011 in Washington, D.C. — with the top 10 teams splitting prizes and scholarships totaling \$60,000.

The #1 national team will then move on to international competition!

The TARC contest is designed to motivate students to study science and math, and it's an awesome way to integrate STEM into school curriculums! Discover all things TARC at rocketcontest.org. There are also TARC links on the home pages of estesrockets.com and esteseducator.com.
