Tx-R™ TRANSMITTER-READY

It's as simple as...

EVERYONE'S GETTING EXCITED ABOUT TRANSMITTER-READY AIRCRAFT!

Sales for Tx-R models are going through the roof — and why not? It's the most revolutionary idea in R/C to come along in years. With Transmitter-Ready aircraft, you can use your favorite transmitter to fly more airplanes than ever before AND enjoy 2.4GHz reliability at the same time. You don't need to own or buy a 2.4GHz system to enjoy them; just your current radio and the AnyLink™ Radio Adapter. Everything else is included with your airplane.

Check out all the current Transmitter-Ready models on the following 3 pages — with many more to come — and join the Tx-R revolution!

Look for hobby shops displaying Tx-R posters, window clings and stickers!

TACZ0001 Tactic AnyLink/Tx-R Counter Display

TACZ0003 - TX-R AVAILABLE HERE WINDOW CLING
TACZ0004 - TX-R AVAILABLE HERE AIRPLANE POSTER

Get the AnyLink FREE — a \$24.99 retail value!

From now through April 30, 2012, get the AnyLink Radio Adapter AT NO CHARGE when you purchase a Tx-R plane. Just look for this display!

TACJ2000 AnyLink 2.4GHz Radio Adapter

Designed to work with:

- Futaba®
- Hitec®
- JR®
- Spektrum®

tx-ready.com

Optional AnyLink Cables:

- TACJ0003 AnyLink Cable Futaba/Hitec Round
- TACJ0004 AnyLink Cable Hitec Aurora
- TACJ0005 AnyLink Cable Power Adapter Spektrum DX4e/DX5e/DX7s/DX8/DX10t
- TACJ0006 AnyLink Cable Futaba 12Z/14MZ

AnyLink was designed to be compatible with most radios used by today's R/C pilots. To confirm that AnyLink will work with a specific radio or require an optional adapter, simply refer to the chart on tx-ready.com. All trademarks are the property of their respective owners.

FLY THIS JET WITH YOUR RADIO!

F-86 SABRE

Micro EDF Jet

With its sleek silhouette, authentic markings and fine details molded into the airframe, this model bears a striking resemblance to the full-size fighter. And with brushless electric power, full-length ducting and a 30 mm HyperFlow™ fan you'll enjoy a true jet experience!

- Fully assembled, with a factory-finished foam fuselage and wings
- The canopy attaches magnetically for easy access when changing batteries
- "AA" batteries, a 7.4V LiPo flight battery and balancing LiPo charger are included
- The landing gear can be installed for ROG takeoffs, and removed for hand launches and grass landings
- Molded-in panel lines, a customized pilot figure and water-transfer decals add realistic looks

Inside you'll find an 11,500kV brushless inrunner motor, 30 mm HyperFlow™ ducted fan unit, 6A brushless ESC, three digital ultra-micro servos and a 4-channel 2.4GHz SLT™ micro receiver.

THUNDER TIGER VEHICLES — UPDATED WITH NEW ACE R/C® 2.4

THUNDER TIGER®

Some of Thunder Tiger's best-selling cars and trucks are now equipped with Ace R/C's most advanced surface radio — the Cougar P3! Loaded with top-of-the-line features, this 3-channel system delivers precision control along with 2.4GHz security for the ultimate driving experience!

2.4 GHz

The Cougar P3 radio is standard

ST-1 1/8 Scale 4WD Nitro Stadium Truck

A low center of gravity and ultrawide suspension arms make for excellent handling. A powerful 4.60cc Pro-28BX-R engine provides serious muscle.

Length: 19.1 in (485 mm)

TTRD2581 Orange/Blue

TTRD2582 Purple/Silver

TTRD2583 Red/Black

2.4GHz RADIO SYSTEMS!

ACE RC
COUGAR
 3CH RADIO CONTROL SYSTEM **P3**
 2.4GHz 3-Channel
 Digital Radio System

ACEJ8310

Features:

- Frequency Hopping Spread Spectrum (FHSS) — for secure, virtually interference-free control
- Security ID Binding Link (SIBL) — ensures that the transmitter and receiver bind only with each other
- Interactive Bi-Directional System (IBDC) — uses standard transceiver chips for interactive communication between Tx and Rx
- Failsafe Programmable Individual Channels (FSPC) — allows individual channels to be restored back to their initial settings
- iFHss+ Data Mode — improved data encoding protocol that provides faster data transmission with less power consumption

equipments with these RTRs:

EB-4 S2.5 Pro 1/8 Scale 4WD Nitro Buggy

Boasting a Pro 21BX-R engine, the EB-4 S2.5 Pro is the RTR version of the national champion EB-4.

Length: 15.5" (394mm)

TTRD2781 Red

TTRD2782 Blue

New Color!

TTRD2783 Gray

EB-4 S3 1/8 Scale 4WD Nitro Buggy

A Pro-28BX-R engine powers this rugged, streamlined off-roader, which is ready to start winning right out of the box.

Length: 19.5 in (496 mm)

TTRD2791 Orange

TTRD2792 Blue

ACE R/C 2.4GHZ RADIOS ADD BIG VALUE TO THESE THUNDER TIGER RTRS!

THUNDER TIGER®

They're the same Thunder Tiger models that have taken the R/C world by storm...only better! These hot rides now feature Ace R/C's premier 2-channel 2.4GHz radio system, the Cougar P2!

BUILD THIS SAVAGE XS

Savage™ XS SS 4WD Electric Kit

Ever since the Savage XS was released, modelers have been anxiously awaiting a “DIY” version that they could customize. Introducing the Savage XS Super Sport edition, an awesome kit that already includes many super upgrades — with the potential for even hotter looks and greater performance with a long list of option parts and accessories!

These are just some of the features you’ll find on the Savage XS SS:

- **Bulletproof all-metal drivetrain**
- **Waterproof receiver box**
- **Aluminum shocks with threaded bodies and orange-anodized hardware**
- **Front and rear universal driveshafts**
- **Tough steel adjustable turnbuckles**
- **Dual pad slipper clutch**
- **TVP (Twin Vertical Plate) chassis**
- **Durable 4-gear differentials with easy access by removing just 4 screws**
- **Stainless steel bulkhead lower plates**
- **Aluminum front and rear suspension braces**
- **Aluminum motor plate with 4 motor mounting positions**
- **2.2” Savage XS tires with newly designed 6-spoke chrome-plated wheels**

TO YOUR SPECS!

www.gpdealer.com

Equip it with the electronics you want!

The Savage XS SS uses standard 1/10 scale electronics, so you have a wide range of options. Choose a servo for fast, nimble action, or one with more torque. Drop in a 2S-compatible motor and speed control for all-around speed and performance, or go all-out with a 3S-capable combination!

107820 HPID7021 Savage XS Super Sport 4WD Electric Kit

Length: 14.17 in (360 mm)

Width: 11 in (280 mm)

Wheelbase: 12.8 in (325 mm)

Long story short...

The Savage XS SS Kit is your opportunity to build and run a top-notch truck tricked out just the way YOU want!

NEW PRODUCT

THE TEAM'S WORLD SUPREMACY

RC10B4.1 Worlds Car Kit

www.gpdealer.com

Spec'd with the same upgrades as the B4.1s driven by Ryan Cavaleri, Ryan Maifield and Neil Cragg at the 2011 IFMAR World Championships in Finland!

- B4.1 Worlds Car Kit +8mm chassis conversion kit
- Ball diff with lightweight outdrives
- Durable steel center-drilled front axles
- Blue titanium turnbuckles
- Suspension mounts included for 4°, 3.5°, 3° and 2.5° rear toe
- Pro-Line® Bulldog +8mm body (clear)
- Pro-Line M3 Holeshot 2.0 rear and M3 4-rib front tires
- Complete set of precision ball bearings

CONTINUES

V2 slipper clutch with high-rate spring for finer adjustment increments.

Factory Team V2 hard-anodized threaded shock bodies with bleed-screw shock caps.

Factory Team 0° aluminum rear hubs with oversized outer bearing.

CVA joints with pin retainer clips.

The battery and motor recommended for maximum performance!

Reedy 7.4V 4000mAh 60C LiPo Battery

Pure LiPo power and long run times in a very compact battery with a durable hard case.
ASCC0306

Reedy Sonic 7.5 Motor

A competition-level motor engineered to run cooler for less power fade, longer run times and extended motor life.

BETTER BRUSHLESS COMBOS START WITH XP ESCS

Whether as a stand-alone unit or paired with a powerful Reedy 540-SL or 550-SL brushless motor, XP brushless ESCs deliver the performance that drivers demand. They're compact and lightweight, for easy installation in most 1/10 scale vehicles, and simple calibration and a wide variety of tuning options make them ideal for both sport modelers and competition racers.

Both share these great features:

- Adjustable LiPo low-voltage cutoff
- LiPo cell auto detect
- Reversible with Reverse Lockout
- Fully proportional brakes
- Adjustable drag brakes
- Adjustable throttle profile
- Hard case with aluminum heat sink
- Water resistant
- Heavy-duty silicone wires
- Deans® Ultra Plug® connector
- 3.5 mm motor connectors
- Pre-wired for optional cooling fan

Deans® and Ultra Plug® are registered trademarks of W.S. Deans Co. U.S. Patent No. 5,533,915.

ASCM9143 XP SC700-BL BRUSHLESS ESC

ASCM9144 XP SC1200-BL BRUSHLESS ESC

Get the most out of your model: equip it with an XP ESC/Reedy Motor Brushless Combo!

Long story short...

Brushless combos featuring XP ESCs and Reedy motors deliver more power with less maintenance — that means faster speeds, less down time and more FUN!

AN AMAZING VALUE IN AN 8-CHANNEL SYSTEM

8J 2.4GHz S-FHSS w/R2008SB

- S-FHSS 2.4GHz security
- Wireless model data transfer between 8J transmitters
- 6 programmable mixes (2 with curves)
- 5 heli flight conditions
- 3-axis gyro support
- 5-point pitch/throttle curves
- Full-range internal antenna
- Easy access and programming with a jog dial and three buttons

FUTK8100 8JA 2.4GHz S-FHSS w/R2008SB
FUTK8101 8JH 2.4GHz S-FHSS w/R2008SB

R2008SB 2.4GHz S-FHSS Receiver

- Equipped with Dual Antenna Diversity
- Features 8 PWM channels and is S.Bus-compatible
- Can also handle high voltage applications

FUTL7608 R2008SB 2.4GHz S-FHSS Receiver

You don't often find radios at this price with a backlit LCD screen, but the 8J has one.

From the Experts:

The 8J has so many extraordinary features, it's impossible to list them all. With its sophistication and programming ease it's the ideal system for pilots of virtually all skill levels. Perhaps best of all, the 8J delivers all of this performance and convenience at a very competitive price!

Long story short...

For the same price as some 7-channel systems, the 8J offers lots more functions — along with S-FHSS frequency-hopping technology!

Futaba®

DIGITAL PRECISION WITH USER-FRIENDLY PROGRAMMING

4PKS 2.4GHz FASST w/R614FS

- View up to 36 functions (including Crawler functions) on the adjustable-contrast LCD Menu screen
- The multi-functional jog button with red LED makes navigating the menus easy
- Built into the grip is a vibrator that can be used as a lap timer, up timer, navigation aid or to alert you to low battery levels
- A drop-down adapter is included for repositioning wheel height and angle for maximum comfort
- Extra protection features include High Voltage and Low Battery alarms, and automatic system shut-down

FUTK4902 4PKS 2.4GHz FASST System w/R614FS

Featuring the R614FS 2.4GHz FASST 4-Channel Receiver

- Dual Antenna Diversity selects the best reception between two antennas
- Pre-Vision™ scans and filters incoming data.
- A lightweight (0.28 oz/7.8 g), ultra-compact, high-voltage receiver!

FUTL7635 R614FS 2.4GHz FASST 4-Channel Receiver

From the Experts:

The 4PKS offers programming sophistication and advancements never before incorporated into a surface system — and the included R614FS receiver allows for even greater precision. All functions (such as 40-model memory, menu customizing and much more) are displayed on the easy-to-read LED screen, and 2.4GHz FASST technology provides the ultimate in security!

Long story short...

With performance features galore that are easy to access and use, the 4PKS is now the premier surface system for competitive drivers.

READY TO BLOW THE COMPETITION AWAY!

Titan X50F Flybarless Heli

This is the 3D machine you've been looking for.

- Precision CNC-machined aluminum flybarless rotor head
- Torque tube-driven tail
- Titanium turnbuckle pitch linkages
- V2 carbon fiber mail blades included
- Carbon fiber tail blades included

TTRE0076 Titan X50F Flybarless Heli w/CF Blades
 TTRE0077 Titan X50F Flybarless Heli w/Engine & CF Blades
Main Rotor Diameter: 53 in (1345 mm)
Tail Rotor Diameter: 10.25 in (260 mm)
Length: 47.25 in (1200 mm)
Flying Weight: 6.94 lb (3150 g)

From the Experts:

Everything about the Titan X50F has been designed with performance in mind. In addition to the advantages of the flybarless rotor, this machine boasts long metal control arms for precise control, a rigid and lightweight one-piece main rotor hub, titanium turnbuckle linkages and 3-piece metal main rotor grips.

Long story short...

The Titan X50F's outstanding precision and maneuverability has earned it a big "thumbs up" from Thunder Tiger Team International pilots!

BIG-TIME PERFORMANCE FOR EXTREME AEROBATICS

Red Line RL-1.00H Ringed Heli Engine

- Enjoy massive torque, crisp response and lightning-fast power transition
- Designed for stable hovering and thrilling 3D maneuvers
- Features a NANO XC2 cylinder liner etched with a special criss-cross pattern
- The precision-balanced crankshaft has Nickel plating to reduce corrosion

TTRG1194 Red Line RL-1.00H Ringed Heli Engine

Displacement: 1.0 cu in (16.38 cc)

Bore: 1.14 in (29 mm)

Stroke: 0.98 in (24.8 mm)

Practical RPM range: 2,000-16,000

Output: 3.91 bhp @ 14,500 rpm

Weight: 22.0 oz (625 g)

Long story short...

The Red Line RL-1.00H boasts the killer combination of huge power and 1.00 displacement in a compact .90-size footprint!

THUNDER TIGER® UNVEILS THE NEW BMW M3 GT2 BODY

1/10 Scale BMW M3 GT2 RTR

- ThunderTiger's newest RTR replicates the BMW M3 GT2 in stunning scale detail
- The body's aggressive looks complement the quality and performance of the ThunderTiger chassis
- Available in your choice of nitro (Tomahawk VX and MX) or electric power (Sparrowhawk VX and DX)
- Ready right out of the box for exciting on-road action!

- TTRD1888 1/10 Tomahawk VX 4WD Nitro Touring Car BMW M3 GT2
- TTRD1968 1/10 Tomahawk MX 4WD Nitro Touring Car BMW M3 GT2
- TTRD6547 1/10 Sparrowhawk DX 4WD Electric Drift Racer BMW M3 GT2
- TTRD6560 1/10 Sparrowhawk VX 4WD Electric Onroad Sedan BMW M3 GT2
- TTRD8787 1/10 Sparrowhawk DX BL 4WD Electric Drift Racer BMW M3 GT2

Long story short...

Now five of Thunder Tiger's most popular on-road chassis are available with the sleek, stylish BMW M3 GT2 body!

The BMW logo, BMW wordmark and BMW model designations are trademarks of BMW AG and are used under license.

O.S. QUALITY COMES TO ESCS

OCA Brushless ESCs and OCP-1 Programmer

- Equipped with the latest generation FET for cooler running
- ESCs automatically recognize the number of cells in the battery being connected
- Loaded with safety features, including overheating and accidental start protection, as well as low-voltage and no-signal cutoffs
- Opto-isolation on OCA-170HV and OCA-1100HV prevents motor feedback from reaching the receiver

OSMM0150 OCA-150 50A 25V Brushless ESC
 OSMM0170 OCA-170HV 70A 50V Brushless ESC
 OSMM1100 OCA-1100HV 100A Brushless ESC

OCP-1 ESC Programmer

Quick and easy setup of OCA ESCs without the need for a PC
 OSMM0001

GET ON THE FAST TRACK TO ...AND GET UP

REALFLIGHT⁶ R/C FLIGHT SIMULATOR

Go to realflight.com to find the rebate form.

Purchase RealFlight 6 along with a new model, and receive a certificate towards quality R/C products!

The best way to learn to fly a new airplane or heli (or to sharpen your piloting skills) is to fly it first on RealFlight before taking it out to the field...and that's what this offer is all about! When you purchase a RealFlight 6 flight simulator and any of a number of select aircraft models by April 30, 2012, you'll receive a Merchandise Certificate worth UPTO \$50!

RealFlight 6 is far and away the best flight sim there is, and features many of R/C's finest aircraft — including all of the ones listed on the next page. When you virtually fly an airplane or heli on RealFlight first, you'll have even more fun when you're flying the real thing at the field. And for a limited time only when you buy an aircraft model and RealFlight 6, you'll be able to redeem a certificate for quality merchandise from any of 30 top R/C brands!

Void where prohibited. Some terms, conditions and restrictions apply, and only while supplies last. Available at participating local hobby shops only. Go to bestrc.com for official rules and the downloadable request form to have in your store. All trademarks are the property of their respective owners. ©2012 — Hobbico®, Inc.

READY-TO-RUN
WRAITH™
 1/10th SCALE ELECTRIC 4WD ROCK RACER

The Wraith is anything you want it to be — rock racer; mountain trail runner; mud bogger; sand tamer; extreme crawler — making it the most versatile platform ever designed. To tackle this kind of terrain takes one tough truck, and the Wraith is just that. In fact, it's TWO tough trucks — because Axial offers the Wraith in two versions: with Ready-To-Run convenience, or as a kit with additional upgrades. Ready to take on whatever Mother Nature throws at you? You can count on the Wraith being willing and able.

Both Wraith™ models feature:

- **AR60 OCP-Axle™ Off-Center Pumpkin Design** — for more ground clearance and a better driveshaft angle
- **Full composite tube frame chassis** — designed for exceptional strength
- **Optimized steering geometry** — with maximum pivot angle, minimal scrub, adjustable castor and Ackerman set as close to 0° as possible
- **4-Link Suspension** — which reduces axle steer, allows for the proper amount of anti-squat and roll, and fights suspension wrap-up in high power applications
- **Protective transmission spur gear cover** — that helps keep dirt and debris out of the pinion and spur gear for quiet, efficient operation

AXID9018 Wraith 1/10 EP 4WD Rock Racer RTR
 AXID9020 Wraith 1/10 EP 4WD Rock Racer Kit
Length: 19 in (483 mm)
Width: 11.6 in (295 mm)
Height: 9 in (229 mm)
Wheelbase: 13.5 in (343 mm)
Ground Clearance: 3 in (76 mm)

WITH WRAITH™

**Itching to get out there?
The Wraith™ RTR comes complete with:**

- 2.4GHz radio system — for interference-free, crystal-free operation
- 20T motor — with the capability to upgrade to a 550 size
- AE-2 ESC — with LiPo cutoff, drag brake and programming capability through Castle Link™*

*Castle Link™ not included.

**Want more performance perks?
The Wraith Kit has these hop-ups:**

- More durable 7 mm threaded aluminum lower links
- 2.2" RipSaw tires in softer R35 compound
- Universal joint axles over 50° steering
- Softer shock springs
- Clear body for customization

Stacey David, host of Speed Channel's GearZ® asks, "What are YOU workin' on?"®

Raised in Idaho, Stacey David earned his reputation as the local hot-rodder by driving his 1930 5-window coupe to school every day. "It was a real hot rod . . . fast and dangerous! It's a wonder I'm still alive!" His intrigue for all things with a motor started way before that. Stacey helped restore his first car when he was 12 years old – his sister's 1963 VW® bug. But even before that he was building blindingly fast go-karts with 440 snowmobile engines! However, it was Stacey's father's old flat-fender Willys Jeep® that ignited his passion for 4-wheel drive and off-roading that continues to this day.

When he's not building a full-size vehicle on the set of his hit SPEED Channel® series, GearZ host and executive producer, Stacey David, can often be found working on a model car. As a way to relax while still maintaining his creative edge, Stacey has been a hobbyist as long or longer than he's been fixing and modifying real cars. Starting his 6th season of GearZ in 2011 David previously hosted and produced another popular automotive series on Spike TV® for eight years.

Stacey David is teaming up with Revell once again to launch the second annual Model Car Championship! Judges will include Stacey himself, along with these experts:

- Bill Bozgan, writer and Research Consultant to Ford Licensing and Archives;
- Roy Sorenson, publisher/editor of Model Car Builder model car magazine;
- Bill Coulter, feature writer for Model Cars Magazine and author of numerous model car building books, including "The Directory of Model Car Kits;"
- David Thibodeau, regular feature article contributor to Model Cars and Scale Auto magazines and "Best in Show" winner at the NNL East contest; and
- Bob Downie, regular feature article contributor in Scale Auto magazine and officer at ACME Model Car Club.

Winners will be announced on GearZ® in July, 2012!

PRO SERIES II™ ROCKET KITS

Have rocket-building experience? Think you're ready to launch with the big boys? Pro Series II rockets are for you! Younger crowds will be thrilled to see these rockets launched. Sparking interest and excitement about model rocketry.

One awesome feature they all share is the new quick-release motor retention system, which helps to minimize assembly time. Even though Pro Series II rockets are imposing in size, construction is not difficult. Building and finishing work can easily be accomplished over a few days!

SNAPTITE® 1/24 SCALE ENZO FERRARI®

The fiercest, fastest Ferrari ever made.

The Enzo Ferrari was unveiled at 2002's Paris Motor Show to celebrate the company's first Formula One win of the decade. Its 6L Tipo F140B V-12 engine can go from 0 to 100 mph (160 km/h) in 6.6 seconds. Only 400 were ever produced, but many consider it to be one of the 2000s' best sports cars. **Kit features** snap-together assembly, painted and detailed plastic pieces, a screw-on chassis, a see-through rear window with realistic engine details, soft black tires, rolling wheels with metal axles, chrome-plated parts and peel-and-stick decals.

RMXS1967 Total parts: 45 Skill level 1 Length: 7.7 in (195 mm)

1/25 SCALE ED ROTH "TWEEDY PIE"

The tough, timeless classic custom.

The Tweedy Pie made its debut over half a century ago. To pull off this eye-popping purple hot rod, Ed "Big Daddy" Roth used an old-school Ford® Model "T" chassis. The end result won "Best in Show" at Disneyland's® first car show in 1958. It remains one of Roth's most inspired creations! **Kit features** a choice of roadster and pickup bodies, optional custom front-end treatments, optional cycle fenders, soft black tires, chrome-plated parts and waterslide decals with contemporary custom pin stripe graphics.

RMXS4922 Total parts: 160 Skill level 3 Length: 4.4 in (113 mm)

1/25 SCALE ORANGE CRATE® '32 FORD® SEDAN

The citrus-fueled phenom!

Using the popular '32 Ford® Model B as its foundation, the Orange Crate was the first car to win the Los Angeles Winternationals Award two years in a row. By 1963, it had also taken home the Oakland Trophy, becoming the first car ever to win both awards in two successive years. **Kit features** a one-piece hinged body with chopped top, a detailed blown engine, a chrome exhaust system, an all-chrome tubular frame, opening doors, a detailed interior, soft black tires and decals with authentic Orange Crate graphics.

RMXS4939 Total parts: 118 Skill level 3 Length: 5.8 in (146 mm)

1/32 SCALE TERACRUZER & MACE MISSILE (SSP RENWAL™)

Scaled from U.S. Army Ordnance blueprints.

Introduced in 1959, the TM-76 Mace surface-to-surface tactical missile offered double the fuel capacity of the MGM-1 Matador. The Teracruzer was a complete mobile launching system designed to haul the Mace missile. It was equipped with twelve low-pressure, wide-tracked tires, which allowed the Teracruzer to travel through tough terrain. **Kit features** a simulated hydraulic Mace missile launching system, a Teracruzer truck with a trailer, a detailed cab and opening doors, plus five combat figures (including a driver and crew).

RMXS7812 Total parts: 278 Skill level 2 Length: 23.8 in (603 mm)

1/25 SCALE 1929 FORD® RAT ROD (3 'N 1)
 Custom craziness, in commanding 1/25 scale.

Rat rods aren't your old man's ride. They're crazy custom creations covered in rust, blemishes and flat primer – and they're taking the auto world by storm. Rat rods may not be pristine, but they've inspired the hearts and minds of those who like hot rods with attitude. Spirit and speed are the stars here, and rat rods have plenty of both. **Kit features** a choice of two different cab styles, opening doors, soft vinyl tires, chrome-plated parts, three different wheel styles and Rat Rod custom decals.

MONS4932 Total parts: 159 Skill level 3 Length: 6.5 in (165 mm)

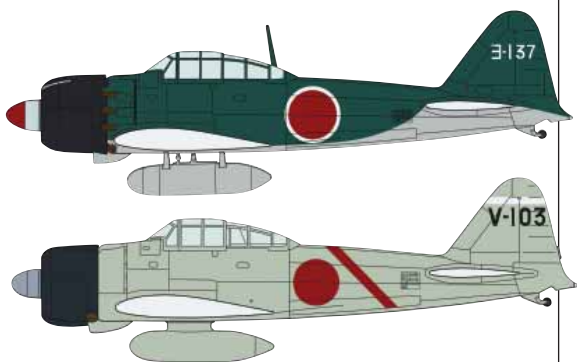

NEW RELEASES

1/12 SCALE SCOT RACING TEAM HONDA® RS250RW "2007 WGP250"
 A double dose of fan favorites.

The Scot Racing Team has used Honda motorcycles since 1994. The partnership shows no signs of stopping anytime soon. In 2007, Team Scot riders Yuki Takahashi and Andrea Dovizioso both helmed Honda RS250RWs. While Takahashi finished 11th for the season, Dovizioso fared better, earning a 2nd place standing. This limited edition **kit features** new rear swing arm parts, rear fender parts and tank pad parts, plus two marking options: 1. 2007 WGP 250 Machine number 55, rider: Yuki Takahashi and 2. 2007 WGP 250 Machine number 34, rider: Andrea Dovizioso.

1/72 SCALE MITSUBISHI® A6M2B/A6M5C ZERO FIGHTER TYPE 21/52 HEI "SAMURAI COMBO"
 Japan's legendary "Sky Samurai."

Saburō Sakai, the I.J.N.'s fourth-ranking WWII flying ace, scored at least 60 "kills!" This limited edition kit combo features a Type 21 kit and a Type 52 Hei kit. Each **kit includes** two marking options. (Type 21): 1. I.J.N. Tainan N.F.G. NAP/1C Saburō Sakai, Code: V-103, Rabaul, 1942 and 2. I.J.N. Tainan N.F.G. NAP/1C Saburō Sakai, Code: V-138, Rabaul, 1942. (Type 52 Hei): 1. I.J.N. Yokosuka N.F.G. Lt. J.G. Saburō Sakai, Code: Yo-137, Yokosuka A.B., 1945 and 2. I.J.N. Yokosuka N.F.G. Lt. J.G. Saburō Sakai, Code: Yo-138, Yokosuka A.B., 1945.

01973 HSGS1973 (Limited Edition) Total parts (Type 21): 46; (Type 52 Hei): 53 Skill level 3

1/72 SCALE F2A-2/3 BUFFALO "U.S. NAVY/MARINE COMBO"
 Finely detailed, for authentic WWII action.

In 1939, the F2A Buffalo beat out the F4F Wildcat to become the U.S. Navy's first monoplane fighter. Initial flight tests were impressive enough to interest many European Air Forces, including the RAF. However, the Buffalo's performance fell short of expectations. This limited edition **kit combo features** one F2A-2 kit and one F2A-3 kit, each with one marking option. (F2A-2): 1. U.S. Navy U.S.S. Saratoga, VF-3, Code: 3-F-8, 1941. (F2A-3): 1. U.S. Marine VMF-221, Code: MF-15, Midway, June 1942. The F2A-3 also features new resin nose and prop hub parts.

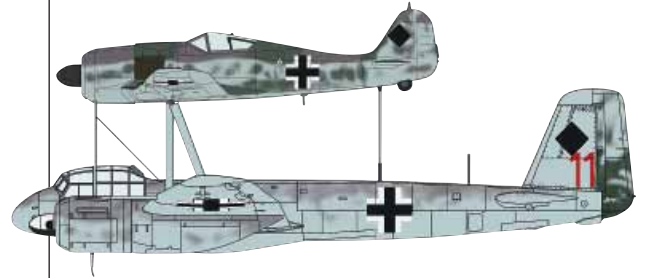

01974 HSGS1974 (Limited Edition) Total parts (F2A-2): 55; (F2A-3): 52 Skill level 3

1/72 SCALE FW 190A-8 & JU 88G-1 "MISTEL S2"

The Luftwaffe's commanding composite bomber.

On their own, the Focke-Wulf Fw 190 and Junkers Ju 88 were impressive fighters. Joined together, they became the unstoppable Mistel. This composite bomber was constructed by mounting an Fw 190 to a Ju 88 loaded with explosive warheads, using struts. The fighter half of a captured Mistel survives today, and it's currently on display at the Imperial War Museum in London. This limited edition **kit features** new joint parts and large drop tank parts, plus one marking option: 1. Luftwaffe 6./KG 200, Code: Red-11, Denmark, February 1945.

01975 HSGS1975 (Limited Edition) Total parts: 157 Skill level 3

1/32 SCALE MITSUBISHI® J2M6 RAIDEN (JACK) TYPE 31

The I.J.N.'s high-altitude interceptor.

The J2M was developed and designed by Jiro Horikoshi, creator of the celebrated A6M Zero. Nicknamed the "Raiden" ("Thunderbolt"), J2Ms were powered by an oversized – and often unreliable – Mitsubishi Kasei engine. While the J2M offered exceptional climbing ability, visibility was compromised. As a result, later variants (like the J2M6) were outfitted with bubble canopies and wider cockpits. This limited edition **kit features** new upper nose panel parts, new canopy parts and one marking option: 1. I.J.N. 302nd N.F.G. "Yo D-183," Atsugi A.B., Spring, 1945.

08222 HSGS8222 (Limited Edition) Total parts: 157 Skill level 3

1/48 SCALE F-14B/D TOMCAT "LOW VISIBILITY"

Outfitted with low-viz luster.

Many of today's jet fighters are decorated in camouflage paint for added protection against enemy attacks. The F-14 Tomcat is no exception. Another form of protection many F-14s share is the use of low-visibility insignia. Often created with low-contrast colors, low-viz insignia makes F-14s less conspicuous in low-level attacks. This limited edition **kit features** new launcher parts, new LANTIRN pylon parts and two marking options: 1. F-14B: U.S. Navy VF-103, "Jolly Rogers," Code: AA112 and 2. F-14D: U.S. Navy VF-2 "Bounty Hunters," Code: NE110.

09971 HSGS9971 (Limited Edition) Total parts: 247 Skill level 3

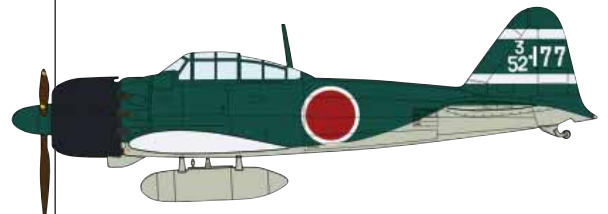

1/48 SCALE MITSUBISHI® A6M5C ZERO FIGHTER TYPE 52 HEI "352ND FLYING GROUP"

The I.J.N.'s gung-ho go-getter.

Many consider the A6M5 to be the definitive Zero, and with good reason. Improved dive speeds allowed the A6M5 to hold its own against the faster F6F Hellcat and F4U Corsair. A6M5c variants also boasted a boost in firepower, including three .51 guns and twin Type 99-II guns. This limited edition **kit features** three marking options: 1. I.J.N. 352nd Naval F.G., Code: 352-177, Omura A.B., March 1945; 2. I.J.N. 352nd Naval F.G., Code: 352-112, Omura A.B., March 1945 and 3. I.J.N. 352nd Naval F.G., Code: 352-157, Omura A.B., March 1945.

09972 HSGS9972 (Limited Edition) Total parts: 75 Skill level 3

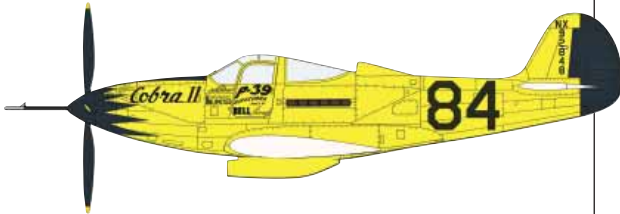

1/48 SCALE RF-4B PHANTOM II "VMCJ-2"

Fully equipped and ready for recon.

The RF-4B was the tactical reconnaissance version of the F-4B Phantom II used by the U.S. Marine Corps. Instead of having weapons, they were equipped with three movable, mounted cameras and an infrared reconnaissance system. By the time the RF-4B was officially retired in 1990, 46 were built in all. This limited edition **kit features** three decal marking options: 1. U.S. Marine VMCJ-2, Code: CY01, 157344; Block 41; 2. U.S. Marine VMCJ-2, Code: CY00, 157342; Block 41 and 3. U.S. Marine VMCJ-2, Code: CY12, 157344; Block 41.

09973 HSGS9973 (Limited Edition) Total parts: 119 Skill level 3

1/48 SCALE P-39Q AIRACOBRA "THOMPSON TROPHY RACE"

Win 1946's Thompson Trophy.

After WWII, the P-39 Airacobra became an airshow crowd-pleaser. The Cobra I and Cobra II were P-39s owned by test pilots Chalmers Goodlin, Alvin Johnston and Jack Woolams. Johnston and Woolams both flew in the 1946 Thompson Trophy Race, but only Johnston's Cobra II came out on top. This limited edition **kit features** a metal pitot tube, a new metal propeller, a resin spinner, resin intake parts and two decal marking options: 1. Thompson Trophy race winner #84: Cobra II, 1946 and 2. Thompson Trophy race #75: Cobra I, 1946.

09974 HSGS9974 (Limited Edition) Total parts: 79 Skill level 3

Plastic Models

Dragon® 1/72 Scale Gemini Spacecraft & Spacewalker

Traverse Earth's atmosphere.

On June 3, 1965, the first American spacewalk occurred. Ed White's EVA (Extra Vehicular Activity) only lasted 23 minutes, but it paved the way for every future NASA® mission to come. **Kit features** a realistic spacewalker, a Gemini spacecraft with a newly tooled, detailed cockpit interior, a heat shield with intricately molded details, a detailed cabin section with attitude control thrusters, opening capsule hatches, an opening drogue chute cover, drogue and pilot parachute mortar cartridges, two astronaut figures and a preformed wire tether. First edition packages also include a bonus gold-painted propellant tank!

11013 DMLS1113

Dragon® 1/72 Scale Sd.Kfz.232 Schwerer Panzerspähwagen (FU)

8-wheel reconnaissance at its finest.

The Sd.Kfz.232 provided German troops with eight-wheel drive, for cross-country mobility. Sd.Kfz.232s were made recon-ready with extra radio equipment and a large frame antenna, both designed for long-distance communication. **Kit features** new tooling, a slide-molded upper hull, a highly detailed rear hull, slide-molded fenders with on-vehicle tools, a 2 cm KwK 30 L/55 and MG34, a 3-directional slide-molded turret with vision ports, an engine deck with delicate grille detail, sharply reproduced cargo and jerry cans, injection-molded tow cables, an injection-molded plastic frame antenna and detailed wheels with treaded tires.

7429 DMLS7429

Plastic Models

Dragon® 1/72 Scale IJN Type 2 "Ka-Mi" Amphibious Tank (Combat Version)

Outfitted for amphibious operation.

Development of the Type 2 "Ka-Mi" began in 1941. This, Japan's first-ever amphibious tank, was designed to help the IJN carry out its island-hopping campaign in the Pacific. When large pontoons were attached, the Type 2 could travel on water. Once the tank reached land, they could be jettisoned. **Kit features** all-new tooling, true-to-scale dimensions, one-piece slide-molded hulls, an easy-to-assemble suspension system, a detailed turret with opening hatch, intricate idler wheels and return rollers, injection-molded float attachments, a highly detailed ventilation grille, ultra-thin propellers, one-piece DS track and sprocket wheels.

7435 DMLS7435

Minicraft® Models 1/72 Scale PV-1 Ventura™ (Lend-Lease Export)

The Allies' patrol-bombing behemoth.

Built for the Allies by the Vega Aircraft Company, production for the PV-1 Ventura began in 1940. The U.S. Navy received its first shipment of this highly effective, long-range maritime patrol bomber two years later. It became a pilot favorite within months. Soon, British Commonwealth units – including Canada and South Africa – were receiving their own PV-1s via the Lend-Lease Act. The PV-1's increased fuel capacity and ASD-1 search radar contributed to the aircraft's overall success during WWII. **Kit features** markings for Royal Air Force and Royal Canadian Air Force versions.

11661 MMIS1661

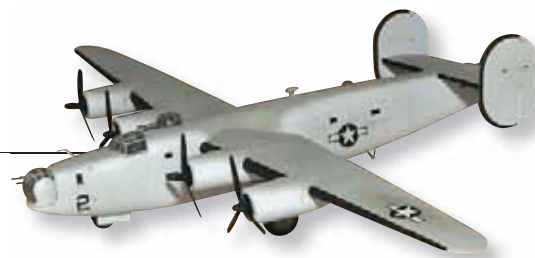

Minicraft® Models 1/144 Scale PB4Y-1 Liberator

Terminate targets with all-out precision.

The PB4Y-1 was a specially modified version of WWII's celebrated Consolidated B-24 Liberator, designed for long-range anti-submarine patrols. Many early models were equipped with an ERCO (Engineering and Research Company) turret, while later models featured a bow turret. In all, the U.S. Navy operated approximately 1,000 PB4Y-1s during WWII. Many remained in use following WWII's end. **Kit features** new tooling representing an early WWII Liberator, as well as U.S. Navy and RAF decal markings.
