THE REALISM IS IN THE  
DETAILS... TrueView™!

# REALFLIGHT 6.5

R/C FLIGHT SIMULATOR

True to Life™

Upgrade from  
Realflight 6 to 6.5  
**FOR FREE!**

- See colors, contrast and details just like you would at the field
- Welcome Screen eases you into every simulation
- Graphics Settings window with slider bar
- Updated binocular vision
- Over 70 airplanes and more than 20 helis — with many more aircraft included in the Airplane and Heli Mega Packs
- More than 40 flying fields to choose from
- Plus all of the many other incredible features included in RealFlight 6

# The hottest new features found on RealFlight 6.5

www.gpdealer.com

Without TrueView

With TrueView

## TrueView™ realistic lighting

TrueView enhances your RealFlight experience, with more vibrant colors along with details that stand out better than ever before. Canopies are clear, instead of being opaque,

and you can see the outlines just as you would on an actual aircraft. Objects also accurately reflect sunlight: for example, from the ground to the underside of a wing.

## Welcome Screen

A Welcome Screen can be activated after launching RealFlight that allows you to quickly and easily view or select one of the following:

- Aircraft
- Flying site
- Pre-determined scenarios (flying site/aircraft combination)
- Recently viewed selection
- Helpful training videos
- A rotating Tip of the Day

## Other RealFlight 6.5 enhancements:

### Screens for faster setup

### Smart binocular vision

A slider allows you to modify your graphics settings and see the results immediately.

Activates when your aircraft reaches a set distance, and fades away when not needed.

### Airplanes

- PAU Edge 540 36%
- Great Planes Avistar Elite
- Flyzone Millennium Master
- Great Planes Micro F-86 Sabre EDF
- Messerschmitt BF109e
- Top Flite F4U Corsair
- Airboat

### Helis

- Gaui 330X-S Quad Flyer
- Skycrane
- Synergy E6
- Synergy E7

### PhotoField Site

A full-feature controller designed like a real transmitter

# INTERLINK<sup>™</sup> ELITE<sup>™</sup> CONTROLLER

By **Futaba**<sup>®</sup>

Incredibly realistic and easy to use, the InterLink Elite controller offers digital trims, QuickSelect convenience and amazing versatility. You can "fly" with the InterLink Elite, fly with your transmitter using the built-in interface, or with both simultaneously using the unique MultiMode feature.

## Instant Rewind & Reset

Crashes are no big deal with RealFlight: push the Reset button and you're instantly ready to fly again. By holding down on the Reset button you can Rewind, which lets you go back to any point during your last flight for an instant do-over.

RESET

- GPMZ4480 RealFlight 6.5 w/Airplane Mega Pack Mode 2
- GPMZ4481 RealFlight 6.5 w/Airplane Mega Pack Mode 1
- GPMZ4482 RealFlight 6.5 w/Heli Mega Pack Mode 2
- GPMZ4483 RealFlight 6.5 w/Heli Mega Pack Mode 1

### From the Experts:

Every year RealFlight is far and away R/C's best-selling flight simulator — and every year it just keeps getting better! RealFlight 6.5 has even more going for it, starting with the impact of TrueView lighting that adds sharpness and detail to every aircraft and flying site. A Welcome Screen eases you into your options after startup. And all of the extraordinary features and functions that have made RealFlight so popular are all still here!

### Long story short...

*RealFlight 6.5 ramps up the realism for veteran pilots, while adding more convenience for beginners!*

NEW PRODUCT

PALM SIZED — BIG INDOOR FUN!

# 1SQ

Ready-to-Fly Quadcopter

www.gpdealer.com

- 4 independently controlled rotor blades make the 1SQ incredibly easy to fly
- TAGS Triple Axis Gyro stabilization — total control in all conditions
- Can be flown in any room, or outdoors in light winds
- Molded plastic parts and composite materials make the 1SQ very durable
- Available Transmitter-Ready as well as Ready-To-Fly

Both versions come with a 1S 250mAh LiPo flight battery, USB-compatible charger and an extra set of blades

The radio with the RTF is hobby-quality!

The included 2.4GHz radio features selectable beginner and expert modes that let you start flying the 1SQ at the level you're most comfortable with.

Taking quad rotor flight to a new dimension!

The TAGS 3-axis gyro system stabilizes all three axes, so external forces will not adversely affect performance. When combined with the 1SQ's four independently controlled rotor blades you have a machine so stable anyone can fly it!

Fly this Quadcopter with your favorite transmitter!

The AnyLink Radio Adapter (available separately) is compatible with virtually all transmitters, regardless of brand, band or modulation, and allows you to fly any Tx-R aircraft with the transmitter you like best — yours.

Before purchasing AnyLink, see the chart on Tx-Ready.com to determine transmitter compatibility and requirements. AnyLink has a range of 1,000 feet (304.8 meters), which makes it ideal for park flyers and other small electrics.

**ANYLINK™**

**SLT™**  
SECURE LINK TECHNOLOGY

HMXE0834 1SQ Quadcopter RTF  
HMXE0835 1SQ Quadcopter Tx-R  
Length: 5.7 in (145 mm)  
Width: 5.7 in (145 mm)  
Height: 1.37 in (35 mm)  
Weight w/battery: 1.1 oz (31.2 g)  
Blade Length: 2.16 in (55 mm)  
Tx-R Requires: 4-channel transmitter with SLT

**Heli-MAX®**

### From the Experts:

The 1SQ is unlike any other Quadcopter — and not just because of its compact size. ATAGS 3-axis gyro system, combined with 4 independently controlled rotor blades, makes this machine so stable anyone can fly it. It's very durable, perfect for flying indoors but can be flown outside, and both versions come with a LiPo flight battery, charger and extra blades.

### Long story short...

*The 1SQ Quadcopter is unique, innovative — and the ultimate in fun!*

NEW PRODUCT

# UNLEASHING TEAM DURANGO'S M

The truck that won the 2011 RC Pro Series Championship and TQ'd at the 2011 ROAR Nationals has undergone some changes — and this reincarnation of the DESC410R is lighter, more durable and easier to handle!

## DESC410R V2

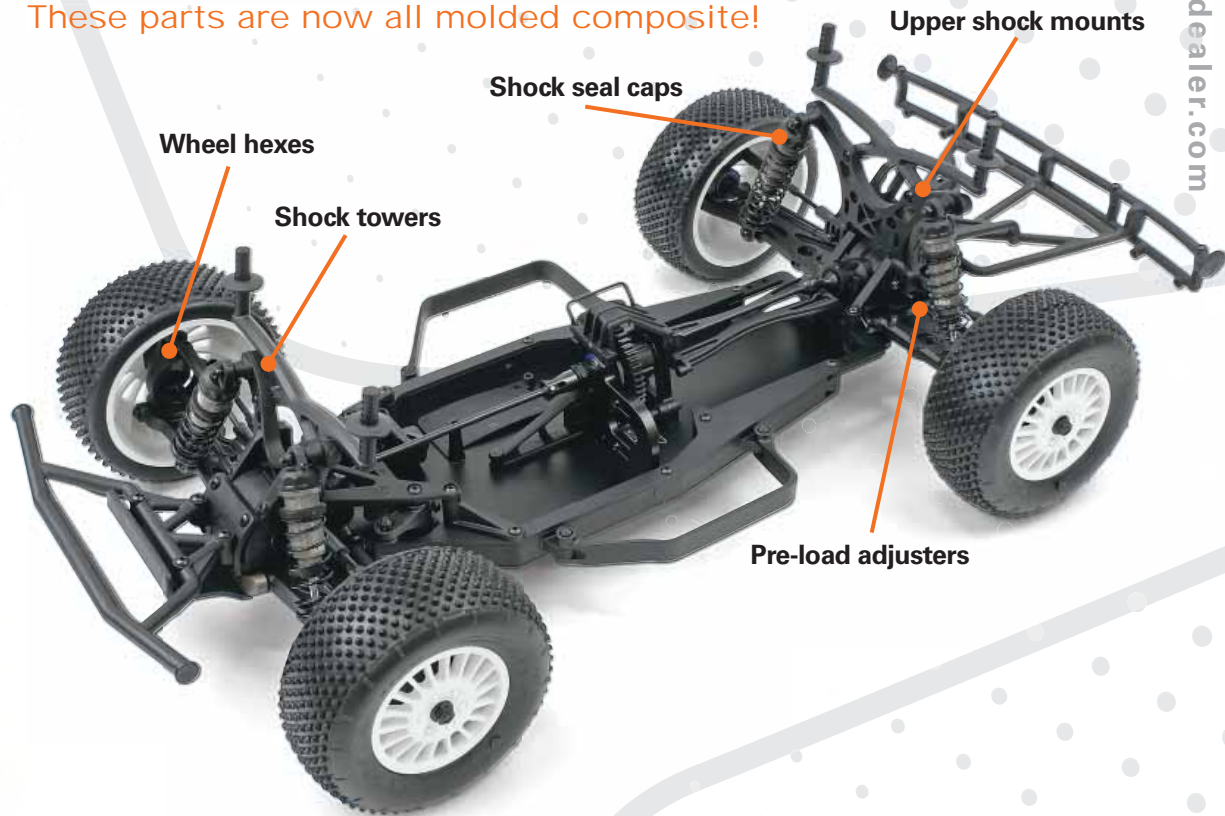

\*Vehicle shown with body— not included

www.gpdealer.com

# NEWEST SHORT COURSE TERROR!

These parts are now all molded composite!

## Other significant upgrades:

- Center diff parts are now included
- 29 mm stroke front shocks replacing the 23 mm stroke versions
- Stylish white wheels
- Both small AND large bumpers are included
- Heavy-duty suspension arms
- Updated rear bulkheads and rear gear inserts

## That's on top of the competition-level features that are still part of the DESC410Rv2's performance package:

- Massive 15 mm hex drives are heftier than the competition's to withstand the rigors of racing
- Adjustable front, rear and center diffs
- 48DP and Module-1 spur/pinion gears to handle 550 brushless motor power
- Adjustable Big Bore fat shocks
- Alloy sandwich chassis construction
- Optimal weight distribution with low CG

TDRC0131 DESC410Rv2 1/10 Scale  
4WD EP Short Course Truck Kit  
Length: 21.7 in (550 mm)  
Width: 11.2 in (285 mm)

## *Long story short...*

*With the extensive upgrades found on the DESC410Rv2, it's clear that Team Durango doesn't believe in resting on its laurels!*

NEW PRODUCT

# AN ADVANCED TRAINER WITH

## AVISTAR<sup>™</sup> elite

Almost-Ready-To-Fly .46 GP/EP Advanced Trainer

Choose glow or  
electric power!

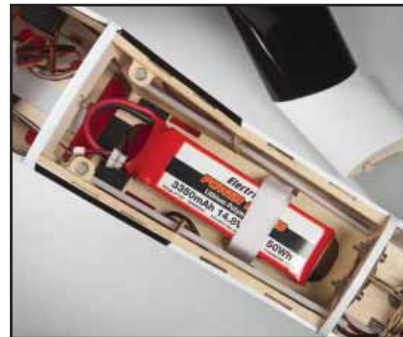

- No-glue assembly
- Durable, stable and maneuverable
- Built-up wood sections arrive expertly finished with MonoKote film
- High-wing design increases flight forgiveness, while the semi-symmetrical airfoil lets you perform aerobatics that flat-bottom airfoil trainers can't
- The patented EasyAlign system guides tail sections into place automatically. Just tighten the thumb screws by hand — no tools required!
- Hardware is included to equip your Avistar Elite for glow or electric power

U.S. Patents #6,938,856 and #6,986,695

## SPORT PLANE PERFORMANCE

The wing halves simply slide onto the joiner tube with no glue, so they remove easily for transport. Pre-hinged control surfaces speed assembly, and this plane can be equipped with optional flaps.

Your flight battery or fuel tank fits easily into this large, on-board compartment with magnetic hatch for easy access.

GPMA1005 Avistar Elite .46 GP/EP ARF  
 Wingspan: 62.5 in (1590 mm)  
 Length: 55 in (1395 mm)  
 Weight: 6.5 lb (2950 g)

### **From the Experts:**

If you've learned basic flight skills, then the Avistar Elite .46 GP/EP ARF is the ideal next model for expanding into aerobatics. It's still very stable, yet capable of smooth sport maneuvers as well. And this ARF can be easily adapted to fly with a glow engine or with brushless electric power.

### **Long story short...**

*With classic styling and a broad performance range, the Avistar Elite .46 GP/EP ARF lets you move up to the next level in sport flying fun.*

# THE UNIQUE GEE BEE — NOW TRANSMITTER-READY!

- Simple, fast, no-glue assembly
- Brushless motor, ESC and 4 micro servos are already installed
- Tactic 2.4GHz SLT receiver is installed
- Roomy interior makes battery pack changes easier, accessible through a hatch that attaches with magnets
- Magnetic landing gear assembly disengages cleanly during rough landings

# Gee Bee

**Tx-R**  
TRANSMITTER-READY

The one-piece wing attaches with one screw, for easy transport.

The AeroCell foam fuselage has details such as panel lines and vents molded in. Easy to install elastic cord "flying wire" is included for scale realism.

**GPMA6022 Gee Bee Sport Scale Brushless Tx-R**

**Wingspan:** 38.5 in (980 mm)  
**Wing Area:** 241 in<sup>2</sup> (15.5 dm<sup>2</sup>)  
**Weight:** 1.75-2.0 lb (790-910 g)  
**Wing Loading:** 16.7-19.1 oz/ft<sup>2</sup> (51-58 g/dm<sup>2</sup>)  
**Length:** 27 in (685 mm)

### **From the Experts:**

The Gee Bee's unusual design helped it become one of the fastest planes of its day, and Great Planes has brought this history-making classic back in a sport scale version that you can fly with any AnyLink-compatible radio! A brushless motor, ESC, servos and SLT receiver are already in place — just install a battery, connect the AnyLink adapter to your favorite transmitter and fly!

### **Long story short...**

*The looks and performance of the Gee Bee will turn heads at the flying field — and you'll appreciate how fast you can get it into the air!*

# AXE 100 HELIS: COMPACT MACHINES WITH ADVANCED TECHNOLOGY

Each model in the Axe 100 lineup has the features most requested by heli modelers. And they're all available in two versions: fly the Transmitter-Ready (Tx-R) models with your favorite radio and AnyLink, or choose the all-in-one convenience of the Axe 100 Ready-To-Fly (RTF) helis with radio included!

## The innovation found on these helis is amazing!

- The first Heli-Max models that are SLT-compatible
- Triple Axis Gyro Stabilization
- Flybarless Head
- Encased micro servos

# AXE 100 CP

- A collective pitch rotor head for optimum 3D capability
- Fully aerobatic flight indoors or out

**Tx-R** TRANSMITTER-READY | **RTF** READY-TO-FLY

HMXE0820 Axe 100 CP Electric Flybarless Heli RTF  
 HMXE0821 Axe 100 CP Electric Flybarless Heli Tx-R  
 Rotor Diameter: 9.5 in (241 mm)

# AXE 100 FP

- More agility than a coaxial design = more fun
- Fixed pitch rotor head adds confidence-building stability

**Tx-R** TRANSMITTER-READY | **RTF** READY-TO-FLY

HMXE0815 Axe 100 FP Electric Flybarless Heli RTF  
 HMXE0816 Axe 100 FP Electric Flybarless Heli Tx-R  
 Rotor Diameter: 9.4 in (239 mm)

A 4-channel 2.4GHz radio system featuring SLT is included with the RTF versions of the Axe 100 FP and MD-530. A USB-compatible battery charger and flight battery are included with both Tx-R and RTF versions.

China Patent Number 201010559370. Other worldwide patents pending.

S

All of these Axe helis share amazing cutting-edge features

Heli-Max has already installed the ideal on-board equipment for the Axe 100Tx-R versions, including an SLT receiver compatible with AnyLink. Simply add your transmitter, the AnyLink adapter and you're good to go!

TAGS goes beyond a single-axis gyro, giving stability to the yaw, roll and pitch axes. Once you've experienced TAGS, you won't want to fly without it!

# MD-530

- Realistic heli looks with a full fuselage
- Stable flight with a fixed pitch rotor head
- The unique battery compartment allows for easy access and preserves the MD-530's scale appearance

HMXE0813 Axe 100 MD-530 FP Electric Flybarless Heli RTF  
 HMXE0814 Axe 100 MD-530 FP Electric Flybarless Heli Tx-R  
 Rotor Diameter: 9.4 in (239 mm)

The flybarless head offers a wider flight envelope, with a low parts count that makes it more durable and more efficient than a flybar design.

Encased rotary drive servos offer unmatched precision, feel and durability.

# Heli-Max®

NEW PRODUCT

# EXPLORE THE GREAT OUTDOORS

www.gpdealer.com

# DHC-2 Beaver

**RTF**  
READY-TO-FLY

**Select Scale™** **Tx-R™**  
TRANSMITTER-READY

- Comes with both floats and fixed landing gear
- Working navigation and landing lights add realism
- The ailerons and flaps feature drop hinges and authentic corrugation
- Advanced AeroCell™ foam construction makes the DHC-2 Beaver crash-tough and feather-light
- Servo and receiver are already installed
- Available Transmitter-Ready or Ready-To-Fly

The DHC-2 Beaver includes floats for water takeoffs and landings, as well as fixed landing gear. Water rudders on both floats improve handling, and the tailwheel on the fixed landing gear is steerable.

## ANY LINK™

Buy this plane...get a  
FREE AnyLink adapter!

Through December 31, 2012, purchase any Tx-R aircraft and you'll receive an AnyLink adapter AT NO EXTRA CHARGE! AnyLink is compatible with virtually all transmitters, regardless of brand, band or modulation — allowing you to fly any Tx-R aircraft with the transmitter you like best: YOURS! See your participating hobby retailer for details.

**FLZA4020 DHC-2 Beaver RTF**  
**FLZA4022 DHC-2 Beaver Select Scale Tx-R**

**Wingspan:** 59.5 in (1510 mm)

**Length:** 38.5 in (980 mm)

**RTF Weight:** 48 oz (1360 g)

**Tx-R Weight:** 48-52 oz (1360-1470 g)

**Tx-R Requires:** AnyLink adapter (TACJ2000), compatible 5-channel transmitter, 11.1V 1800mAh LiPo battery, compatible charger

**Flyzone™**  
how high will you soar

### The included radio with the RTF is top-notch!

In addition to secure, interference-free control, the Tactic 2.4GHz radio boasts digital\* trims, servo reversing and a wireless trainer feature.

\*on elevator, ailerons and rudder

### From the Experts:

Equip the deHavilland DHC-2 Beaver with the included floats for takeoffs and landings from a pond or small lake, or go with the included fixed landing gear instead; both are quick and easy to install. Simple final assembly involves no gluing, and the plane's detail is amazing. Plus, you can choose the convenience of the RTF or the versatility of the Tx-R!

### Long story short...

**You'll feel like an adventurous bush pilot at the controls of your utilitarian DHC-2 Beaver!**

# THE MOST COMPETITIVE RTRs

These 2WD vehicles are long on convenience, but they're NOT short on race-proven features! Even though all assembly is done at the factory, racers can enjoy many of the same performance perks of Team Durango's legendary kits — with none of the building!

- Injection-molded composite chassis
- Patented gearbox design
- Oil-filled gear differential
- Big Bore aluminum racing shocks with hard anodizing
- Motor and speed control are race-proven and ROAR-legal right out of the box
- All vehicles are available in blue or red

**Top Wingspan:** 15.3 in (389 mm)

**Length:** 12.5 in (318 mm)

**Weight:** 1.16 oz (33 g)

The included Tactic TTX402 radio offers Secure Link Technology for a rock-solid transmitter-receiver link, along with digital trims and a built-in battery charger. You also get a rechargeable 3.7V 140mAh LiPo flight battery and 5 "AA" batteries.

### ***From the Experts:***

With Flyzone's Nieuport 17 RTF, you can be airborne within minutes of opening the box. Everything you need is included, starting with a replica of the French WWI fighter with lots of military details. The Tactic radio offers dependable, interference-free control, and the plane's micro size lets you fly in most any size park or backyard.

### ***Long story short...***

***Becoming a WWI ace has never been easier than piloting Flyzone's Micro Nieuport 17 RTF!***

**Flyzone**<sup>™</sup>  
how high will you soar

# MORE POWER AND PERFORMANCE THAN EVER BEFORE!

DLE-60, DLE-35RA and DLE-55RA Gas Engines

- Give your aircraft the unique sound and low-vibration smoothness of a horizontally opposed twin!
- Includes Pitts-style mufflers, featuring a new beveled shape to allow a tighter fit in most cowlings
- Aluminum alloy crankcase, high-quality crankshaft bearings and a custom DLE carburetor

#### DLEG0060 DLE-60 Twin Gas Engine

**Displacement:** 61 cc (3.72 cu in)

**Bore:** 1.42 in (36 mm)

**Stroke:** 1.18 in (30 mm)

**Total Weight:** 4.4 lb (2.0 kg)

**RPM Range:** 1,400-8,500

**Output:** 7 hp @ 8,500 rpm

The DLE-35RA and DLE-55RA are powerhouses featuring a lightened piston skirt for improved throttle response, fuel economy and wear resistance. The rear exhaust design makes for compact installation, and is perfect for optional tuned pipe setups.

#### DLEG0435 DLE-35RA Gas Engine

**Displacement:** 34.9 cc (2.13 cu in)

**Bore:** 1.52 in (38.5 mm)

**Stroke:** 1.18 in (30 mm)

**Total Weight:** 2.77 lb (1.26 kg)

**RPM Range:** 1,500-8,500

**Output:** 4.1 hp @ 8,500 rpm

- Great for pattern pilots and any flyer eager to give their aerobat an extra edge
- Gas power convenience and performance in a popular size — with 400 more rpm than the DLE-30!

#### DLEG0455 DLE-55RA Gas Engine

**Displacement:** 55.6 cc (3.4 cu in)

**Bore:** 1.77 in (45 mm)

**Stroke:** 1.38 in (35 mm)

**Total Weight:** 3.74 lb (1.7 kg)

**RPM Range:** 1,500-8,500

**Output:** 5.5 hp @ 8,500 rpm

- A great power plant for warbirds and aerobatic aircraft
- Produces 100 more rpm than the DLE-55 — this engine screams performance!

### **From the Experts:**

The electronic ignition system on DLE engines now handles voltages from 4.8V to 12V, with redesigned circuitry and software for improved idle and throttle transition. Advanced CNC machinery, tight tolerances and refined porting improve compression and fuel burning efficiency to raise performance and reduce exhaust residue.

### **Long story short...**

**Put a DLE gasoline engine under your plane's cowl, and see the difference superior engineering makes!**

# TRAINER CONFIDENCE. SPORT PERFORMANCE.

## AVISTAR<sup>™</sup> elite

Ready-To-Fly .46 Advanced Trainer

### Everything you need is included!

The Avistar Elite .46 RTF features a low parts count, along with factory-built, modular components that assemble quickly without glue! The fuel tank and lines for the O.S. 46AX II engine are already in place. Even "AA" transmitter batteries are included for the Tactic 6-channel 2.4GHz radio with SLT.

#### GPMA1605 Avistar Elite .46 RTF

**Wingspan:** 62.5 in (1590 mm)

**Length:** 55 in (1395 mm)

**Weight:** 6.5 lb (2950 g)

- A semi-symmetrical wing combines trainer-like stability with the ability to execute smooth rolls and sport aerobatics
- Durable, stable and maneuverable
- Wing halves feature pre-hinged control surfaces and servo bays for optional flaps
- Already installed on the IsoSmooth<sup>™</sup> engine mount is an O.S.<sup>®</sup> 46AX II engine
- The patented EasyAlign<sup>™</sup> system guides tail sections into place automatically! Just tighten the thumb screws by hand — no tools required.

U.S. Patents #6,938,856 and #6,986,695

### From the Experts:

The Avistar Elite .46 RTF is the ideal "second" airplane that's second to none when it comes to convenience and aerobic capabilities. Great Planes has engineered a durable, classic-styled airplane that's flight-ready in just minutes. And because the Avistar Elite RTF is all-in-the-box complete, you won't have to shop around for essential add-ons!

### Long story short...

*Just as a high-wing trainer helped you learn basic flight skills, the Avistar Elite gives you extra confidence when getting into aerobatics.*

# BRUSHLESS POWER BOOSTS THIS MINI COUNTRYMAN RALLY CAR!

ER-4 G3 Mini Countryman Rally Car RTR

- Powered by a BLC-80C ESC and Ripper IBL40 2000kv brushless motor
- Precision-milled 7075-T6 aluminum chassis
- Lightweight suspension arms with fully adjustable ride height
- Fully adjustable pivot ball system for easy toe, camber and caster tuning
- Four oversized oil-filled shock absorbers with 16 mm diameter pistons
- Equipped with front/center/rear metal gear differentials
- A Cougar P3 3-channel 2.4GHz radio system offers interference-free control
- Pre-painted body and rear wing feature the officially licensed markings of the MINI Countryman WRC racer

**TTRD7021 ER-4 G3 1/8 Scale Mini Countryman Rally Car RTR**  
**Length:** 21.25 in (540 mm)  
**Width:** 12.2 in (310 mm)  
**Wheelbase:** 13 in (330 mm)  
**Height:** 7.9 in (200 mm)  
**Weight:** 7.7 lb (3500 g) (w/o battery)

## ***From the Experts:***

With a licensed 1/8 scale Mini Countryman body and brushless power that translates into blazing speeds, this ER4 G3 is a sure-fire winner! Total adjustability lets you fine-tune your rally racer to meet any track conditions, and it's designed to be as durable as it is fun to drive!

## ***Long story short...***

***Take the wheel of the ER-4 G3 Mini Countryman, and take on the rally car competition with confidence!***

THUNDER TIGER®

# A RALLY CAR AS AGGRESSIVE AS YOU ARE!

1/8 Scale EB4 S2.5 .21 Nitro 2.4GHz  
WRC Mini Countryman RTR

- ThunderTiger PRO-21 BX-R engine with pull start and performance tuned pipe
- Ace RC Cougar P3 3-channel 2.4GHz with high-torque steering servo
- Race-proven suspension geometry
- Sturdy aluminum chassis with tub side guards
- Durable gear differential system
- Large volume, adjustable aluminum competition shocks
- Front ball type universal drive shaft
- Officially licensed Mini Countryman WRC rally body

TTRD2700 1/8 Scale EB4 S2.5 .21 Nitro  
2.4GHz WRC Mini Countryman RTR  
Length: 21.2 in (540 mm)  
Width: 11.6-12.0 in (295-305 mm)  
Wheelbase: 12.4 - 12.6 in (315 - 320 mm)  
Weight: 6.8 lb (3.1 kg)

### ***From the Experts:***

This EB4 S2.5 Nitro Mini Countryman is not just Ready-To-Run, it's ready to win! A Cougar P3 2.4GHz radio offers reliable, interference-free control, while the PRO-21 engine cranks out realistic nitro power. Being Ready-To-Run means you can be out on the track in no time — and a 3 mm thick chassis and strong, fiberglass reinforced composite parts keep you there.

### ***Long story short...***

***ThunderTiger's EB4 S2.5 Nitro Mini Countryman brings the excitement of rally racing to 1/8 scale!***

THUNDER TIGER®

# HIT THE GROUND RUNNING WITH THIS HYBRID OFF-ROADER!

1/8 Scale ST4 G3 Brushless Truggy RTRs

- Factory-assembled, low CG chassis based on the nitro ST1
- Super-strong suspension arms with fully adjustable ride height
- Fully adjustable pivot ball system for easy toe, camber and caster tuning
- Front/center CV style driveshafts
- Front/center/rear metal gear differentials
- Powerful Ripper IBL40 2000kV brushless motor and 80A ESC
- Cougar P3 2.4GHz radio system

**Width:** 15.75 in (400 mm)  
**Wheelbase:** 13.75-14.37 in (360-365 mm)  
**Height:** 7.7 in (196 mm)  
**Ground Clearance:** 1.9 in (48 mm)  
**Weight (w/o battery):** 8.37 lb (3800 g)

THUNDER TIGER®

## From the Experts:

When it came to equipping the ST4 G3, ThunderTiger didn't cut any corners. The Ace RC brushless power system delivers awesome speeds and long run times. The aluminum chassis and race-proven suspension stand up to rugged off-roading. Plus, it's Ready-To-Run so all you have to do is install your batteries and go!

## Long story short...

*The ST4 G3 combines the best elements of a buggy and stadium truck, in a 1/8 scale RTR with brushless power and super durability!*

# SET SAIL ON A SPIRITED BOAT RACING ADVENTURE

## Naulantia 1-Meter Racing Yacht

- Pre-painted, factory-assembled ABS hull
- Low drag hydrodynamic steel ballast
- Rigid extruded aluminum booms and mast
- Scale-like deck detail
- Display stand included

TTRB5547 Naulantia 1-Meter Racing Yacht-Red  
 TTRB5548 Naulantia 1-Meter Racing Yacht-Blue  
 TTRB5549 Naulantia 1-Meter Racing Yacht-Yellow

**Length:** 39.4 in (1000 mm)

**Beam:** 6.75 in (160 mm)

**Overall Height:** 67 in (1580 mm)

**Sail Area:** 618.5 in<sup>2</sup> (39.9 dm<sup>2</sup>)

**Total Weight:** 7.7 lb (3.5 kg)

THUNDER TIGER®

### ***From the Experts:***

At over five and a half feet tall, the Naulantia cuts an impressive figure on the water — and its quality construction lives up to its looks. The ABS blow-molded hull is lightweight and rigid, just like the extruded aluminum booms and mast. The Naulantia is available in 3 attractive hull colors, with deck accessories that add scale realism to every voyage.

### ***Long story short...***

***The Naulantia Racing Yacht is the perfect way to rock your boat!***

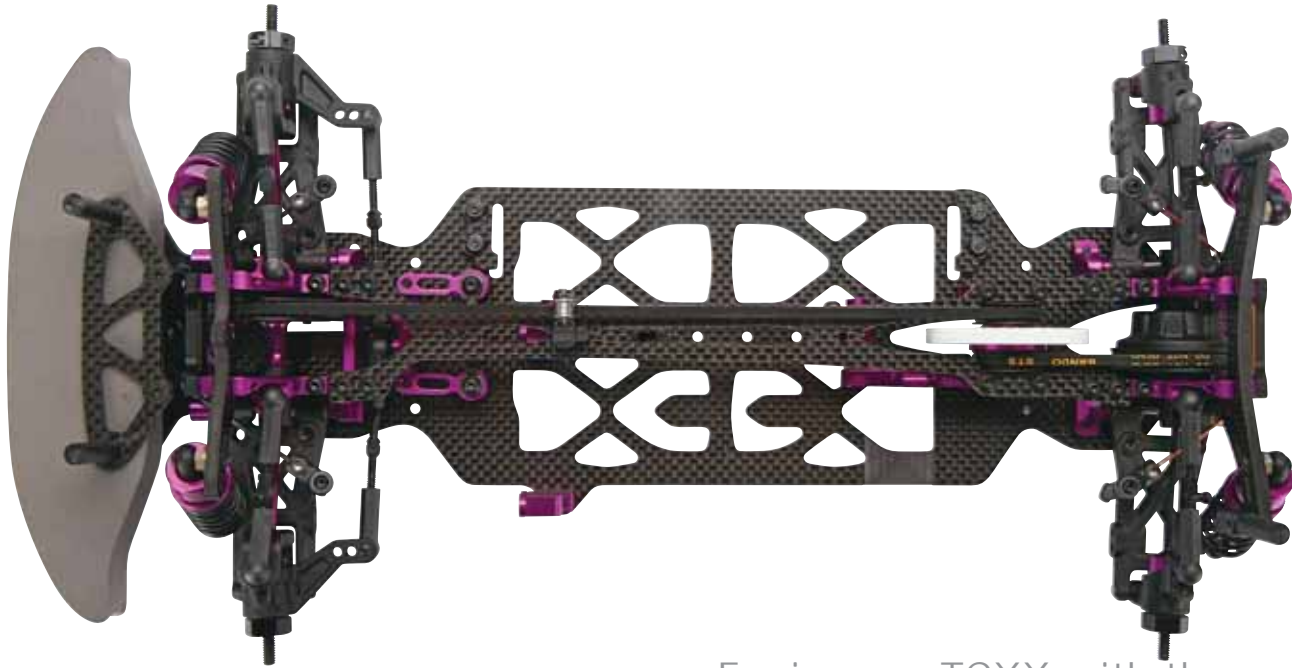

# THE NEWEST TOURING CAR TERROR FROM HOT BODIES!

HB TCXX Touring Car Kit

# TCXX

www.gpdealer.com

- Battery and low-profile motor are more centralized, for optimum balance
- The extra-narrow chassis is designed for more overall flex, and features a one-piece, fully symmetrical top deck
- Twin-Crank steering makes the most of your control inputs and gives you more steering throw
- Rear gear differential allows for the use of powerful 3.5 brushless motors without changing the diff settings
- Central belt layout keeps all onboard components closer to the centerline
- Shocks are upgraded versions of the ones found on the World Champion TC and TCX

HBSC6829 1/10 Scale HBTCXX Touring Car Kit

Equip your TCXX with these top-of-the-line components!

### Flux Pro Competition ESC

A powerful, versatile speed controller that mounts in small spaces.  
HBSM1830

### Plazma Pro 7.4V 6500mAh 95C 2S LiPo Battery

Massive power for quick acceleration and top speeds throughout the race.  
HPIC6399

### Flux Pro Brushless Motor

Maximize the TCXX's full potential with an adjustable, rebuildable Flux Pro power plant. See your hobby dealer for the best Flux motors for your rides.  
HBSC1723

**Long story short...**

*The TCXX represents the latest evolution in touring car kit technology!*

# PURE-SENSOR SYSTEMS FOR ELECTRIC DOMINATION

## Activ8/Ballistic Brushless Systems

www.gpdealer.com

### Activ8/Ballistic 8 Brushless Systems

- Meets the high demands of 1/8 scale electric buggy racing
- The heavy-duty Activ8 ESC features X-Drive™ and Nova Brakes™
- The 1514-sized, sensed Ballistic 8 motor is 100% rebuildable
- Includes heavy-duty 12 GA silicone power wire and cooling fan
- NOVC3181 is great for smaller and medium-sized tracks; NOVC3182 is ideal for racing on larger layouts

NOVC3181 Activ8/Ballistic 8 Brushless System 1.5Y/1950kV  
NOVC3182 Activ8/Ballistic 8 Brushless System 2D/2650kV

### Activ8/Ballistic 550 4XSC Brushless System 4.5T

- Developed specifically for 4WD short-course trucks
- Pairs the Activ8 ESC with the high-torque, ROAR-approved Ballistic 550 motor that's vented for added cooling
- Complete on-board ESC customization including DynamicTiming Advance
- Includes heavy-duty 12 GA silicone power wire and cooling fan

NOVC3185 Activ8/Ballistic 550 4XSC Brushless System 4.5T

### Ballistic Spec High-RPM Brushless Motor 17.5T

- A new secret weapon for your racing arsenal!
- A higher kV stator wound with Novak's low-resistance red wire means faster speeds, while vented end bells mean cooler operation
- 100% rebuildable design
- The Ballistic High-RPM Red Wire Stator 17.5T is also available separately for upgrading any Ballistic motor

NOVC3627 Ballistic Spec High-RPM Brushless Motor 17.5T  
NOVC6627 Ballistic High-RPM Red Wire Stator 17.5T

### Amp up any system's performance with the Impact Racing Brushless ESC!

- A super-compact ESC ideal for 2WD 1/10 scale and 1/12 scale racing
- Five on-board driving profiles that can be independently tuned and saved — no other ESC has it!
- Comes with Novak's SuperTuner™ firmware for complete customization without a programming card
- Also equipped with X-Drive™ and NovaBrakes™ for exceptional handling and performance
- A non-timing profile allows for competing in ROAR Sportsman class racing

NOVC1730 Impact Racing Brushless ESC with X-Drive

## Long story short...

*Novak's Activ8/Ballistic brushless systems are the ultimate power packages for beating the 1/8 scale competition!*

# FUTABA HIGH VOLTAGE S.BUS SERVOS

ARRMA vehicles

# LL TAKE WHATEVER YOU CAN DISH OUT!

ARRMA will blow you away! ARRMA may be new to the R/C market, but their management and design teams have decades of experience in the industry. Combine that with an aggressive approach to research and development and state-of-the-art manufacturing facilities, and you've got an exciting new brand of R/C models that you're gonna want to go with — and go FAST!

Here's why you'll want to own ARRMA:

- **The finest quality materials — all rigorously tested and approved**
- **Exciting original and scale designs — covering virtually every style of R/C car and truck, with many more in the works**
- **A streamlined, "modular" chassis — where every ARRMA model shares many key features**
- **Extensive parts compatibility (47%) — to keep aftermarket support simple**
- **A total commitment to keeping costs down — to provide models that are great fun while also being an excellent value**
- **A pledge to provide rapid product delivery and ongoing customer support**
- **An iron-clad 2-year warranty — unlike any other manufacturer's warranty in the industry**

## ARRMA RTRs complete!

Check out the standard equipment you now get with every ARRMA model! The included Power Kit adds an Onyx 6-cell NiMH pack, "AA" batteries and an 110V AC wall charger — quality components for your ride that you don't have to purchase separately!

NEW PRODUCT

# FOAM FLIERS

Fly with Earth's mightiest heroes!

- Just in time for the hit film's release on Blu-ray™ and DVD!
- Glider** easily assembles in minutes, and flies with a simple hand-launch. No glue is required. Decals are included.
- Air Rockets** fly up to 50 feet (15.2 m) per flight. Set includes two air rockets, a launch pad, air cube, air shaft, air hose, three platform legs and decals.
- Officially licensed by Marvel®. Ages 8 and up.

# MARVEL THE AVENGERS™

ESTA4009 Avengers Glider

ESTH1909 Avengers Air Rocket Set

## Long story short...

Bring home all the heroism of this summer's biggest blockbuster with these licensed foam fliers!

marvelkids.com

**1/25 SCALE '62 CORVETTE® ROADSTER 2 'N 1**  
The pinnacle of Corvette convertible design

Relive the glory days of the iconic 1962 Corvette. With its distinctive looks and powerful engine, the original 'Vettes were a huge hit with WWII veterans looking for a thrill. The 340 horsepower engine of this car was sure to blow their hair back, after all the first generation Corvettes only came in convertible models. **Kit features** parts molded in white, red and clear resin with chrome details, a separate chassis, a chrome-plated windshield frame, custom soft black tires/wheels and factory decals.

RMXS4277      Total Parts: 148      Skill Level: 2

**1/25 SCALE '67 DODGE® CORONET**  
Ever seen an elephant run at 100 mph?

Designed with V-8 engines and extra-long bodies, Coronets quickly picked up the "Funny Car" nickname when they were entered into NHRA® competitions. But there was nothing funny about their 426 cu. cm., 425 horsepower, 7.0L engines. These "elephant" engines gave the heavy Coronet all the power it needed to win in competitions, catapulting riders around at breakneck speeds. Luckily, they came with padded dashboards and seatbelts. **Kit features** molded white and clear resin parts with chrome details, a detailed 426 Hemi® engine, soft black tires and authentic Foote Design® decals.

RMXS4906      Total Parts: 113      Skill Level: 2

**1/25 SCALE MICKEY THOMPSON'S CHALLENGER I**  
Achieving new heights in speed

In September of 1960, Mickey Thompson became the first American to go faster than 400 mph (644 km/h) on land. His quad V-8 powered Challenger I topped out at 406.6 mph (653 km/h) at the Bonneville Salt Flats. For sixty years, Mickey designed racers, set trends, beat records and won competitions in everything from drag racing to the Indianapolis 500. **Kit features** parts molded in white resin, four V-8 engines with transmissions, detailed tube chassis, removable body panels, rear parachute tube, soft black tires and Mickey Thompson figure.

RMXS4918      Total Parts: 186      Skill Level: 2

**1/25 SCALE 1999 FORD® SVT® F-150® LIGHTNING**  
It aint your gran'pappie's hay hauler

Trucks like the F-150 have an image as reliable heavy haulers and work trucks. For the Lightning, Ford decided to add sport spec performance to their trucks. A highly improved suspension, lower slung body and 18 inch (457.2 mm) alloy wheels made the Lightning more than a match in performance with any other sport truck. **Kit features** parts molded in white, red and clear resin with chrome detailing, custom body "aero" package, detailed SOHC 5.4 liter engine with supercharger, authentic factory stock decals and soft black tires.

RMXS7223      Total Parts: 127      Skill Level: 2      Length: 8.8 in (222.3 mm)

### 1/25 SCALE '93 MUSTANG® SVT COBRA® High-Performance 3-door hatchback

Redefine performance with the 1/24 scale '93 Mustang SVT Cobra. The scale replica of the 240 horsepower 5.0 liter engine shows you the power that vaulted the Cobra from 0 to 60 mph (96.6 km/h) in six seconds. **Kit features** an authentic chassis molded from clear resin, chrome plated parts and soft tires for a realistic look and feel. A separate instrument pod and driving lights let you custom-fit the Cobra's details to your own desires. Model also includes authentic factory stock detailing decals to spruce up your model.

MONS4013      Total Parts: 81      Skill Level: 2

### 1/25 SCALE '99 MUSTANG® SVT COBRA Designed for the new millennium

Mustang completely rebuilt their line in '94, but the approaching new millennium demanded many more changes. The '99 had sleeker lines, the fuel system was more environmentally-friendly and it was the first Mustang with an independent rear suspension system. The '99 kept the 1994's 4.6-liter DOHC V-8 engine and tuned it to produce 320 horsepower. **Kit features** parts molded in white, red and clear resin with chrome details, detailed 4.6-liter DOHC V-8, detailed rear suspension, separate rear spoiler, factory stock decals and soft black tires.

MONS4014      Total Parts: 107      Skill Level: 2      Length: 7.3 in (185.4mm)

### 1/24 SCALE '85 CAMARO® Z28 So fast the cops had to buy some to keep up

By 1985 Camaro was in its third generation and had established itself as a top performer. Z28 models incorporated hood louvers that opened at full throttle to give the 5.0 liter V-8 engine more power. An optional 215 horsepower engine launched the 3,000 lb (1,361 kg) body from 0 to 60 mph (96.6 km/h) in seven seconds. This scale version is a dream with a detailed interior, engine, suspension and more. **Kit features** parts molded in white and clear resin with chrome sections, soft black tires and factory stock decals.

MONS4015      Total Parts: 107      Skill Level: 2

### 1/24 SCALE TOM DANIEL VANDAL VAN Race and space all in one place

Move over soccer moms, this Vandal Van is here to sack the track. With a blown big block motor perched right next to the driver and big slicks in back, this Vandal is more than cool; it will blow your mind. The 1970s-style custom interior is a perfect place to cool your jets after a speed run. **Kit features** parts molded in white and clear resin with chrome detailing, complete super mini bike, separate swing open side and rear doors, colorful custom decals and soft black tires.

MONS4926      Total Parts: 84      Skill Level: 2      Length: 7.3 in (184.2mm)

## 1/35 SCALE LEOPARD 2 A6/A6M

### Europe's deadliest tank

Many weapons experts consider the Leopard 2 to be the world's best battle tank. Its stature has grown even more impressive over time, thanks to modified upgrades. The A6 features a Rheinmetall® 120 mm L55 smoothbore gun, while the A6M is equipped with anti-mine armor plating. **Kit features** new tooling, finely detailed structural surfaces with non-slip coating, a choice of A6 or A6M (anti-mine armor) versions, an elevating gun, a rotating turret, opening hatches, eight smoke grenade dischargers, easy-to-fit vinyl tracks and four decal marking options.

RVLS3097      Total Parts: 222      Skill Level: 5      Length: 12.3 in (313 mm)

## 1/72 SCALE BOSTON MK. IV/V/A-20J

### A legend by any name

British and Commonwealth air forces referred to this fighter-bomber as the Boston. RAF pilots knew it as the Havoc. U.S. Army Air Force pilots, on the other hand, identified it as the A-20. Whatever name you use, this aircraft is a true World War II legend. **Kit features** structured surfaces with recessed panel lines, detailed engine pods with twin radial engines, a detailed cockpit with side consoles, machine gun turrets, a detailed undercarriage, a nose cone with bomb sight, an instrument panel and decals for RAF and USAAF versions.

RVLS4278      Total Parts: 118      Skill Level: 3      Length: 8 in (204 mm)  
Wingspan: 10.3 in (261 mm)

## 1/32 SCALE EUROCOPTER® EC135

### The quietest heli in its class

Eurocopter introduced the EC135 to the U.S. at 1995's Heli-Expo in Las Vegas. Its spacious interior and enclosed low-noise tail rotor have made it a favorite of air rescue and police units in the U.S. and Europe alike. The EC135 is sometimes used for business and offshore flights as well. The airframe and rotor blades are constructed with lightweight composite materials, which make the EC135 one of today's most cost-effective, low-maintenance helis. **Kit features** multiple decal marking options.

RVLS4659      Total Parts: 180      Skill Level: 4      Length: 12.7 in (323 mm)  
Rotor Diameter: 12.4 in (316 mm)

## 1/1200 SCALE USS NIMITZ (CVN-68)

### The backbone of the American Navy

At over 1000 feet (305 m) long the USS Nimitz (CVN-68) is equivalent in many ways to a small floating city. Nearly 6,000 people live and work on the ship. Twin nuclear power plants enable these craft to operate at unlimited range for up to twenty years without refueling. The class can deploy their air wings to nearly anywhere in the world. Now you can enjoy building the veteran USS Nimitz which has supported nearly every conflict the U.S. has been in since its introduction in the 1975.

RVLS5814      Total Parts: 70      Skill Level: 3      Length: 11 in (277 mm)

### 1/12 SCALE TEAM PROJECT FRS.7C HONDA RS250RW The 2008 All Japan Road Race Championship race bike

Shouya Tomizawa placed 2nd in the 250cc-class moto GP championship before he graduated from high school. The custom bike he rode was a high-powered, lightweight and built exclusively for competition. Tomizawa went on to win the first-ever Moto2 race but died in a subsequent race in 2010. **Kit features** a rear swing arm, rear fender and tank pad as well as decals to mark this cycle as 2008 All Japan Road Race Championship 250cc class 2nd place car number 48.

21704      HSGS1704      Total Parts: 145      Skill Level: 3

### 1/72 SCALE FOCKE-WULF FW190A-5/6/8 "PRILLER COMBO"

Build two of Josef Priller's planes from one box

Oberstleutnant Josef Priller, commander of Jagdgeschwader 26, was born during WWI in Germany. He joined the Luftwaffe in 1935 and claimed 101 victories in the skies over Western Europe during World War II. His kills in the Fw190A included 68 Spitfires, the highest number shot down by any single German pilot. Perhaps his most memorable action, however, was the near-suicidal strafing run he and his wingman conducted alone on Sword Beach on D-Day. **Decal marking options** for your craft include A-5/6/8 Luftwaffe JG26 France May 1943-May 1944.

02003      HSGS2003      Total Parts: 33+46      Skill Level: 3

### 1/72 SCALE RF-35 DRAKEN RECON Sweden's eye in the sky

Feel the Cold War's chill off this model fighter from Northern Europe. Originally, the SAAB® 35 Draken was intended to be a fighter jet for the Swedish Air Force, but it was sold to other countries as well. One purchaser was the Royal Danish Air Force, which bought the RF-35 and modified it to carry reconnaissance equipment. The distinctive double-delta wings of RF-35 now guard the gates of Karup Airbase in Denmark. **Kit features** decals to mark your Draken as Royal Danish AF Esk 729 codes AR-117 or AR-109.

02004      HSGS2004      Total Parts: 65      Skill Level: 3

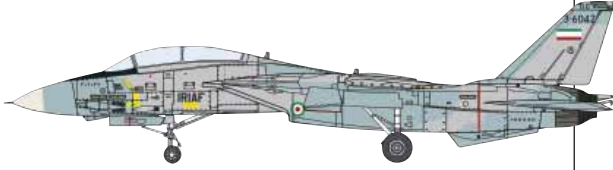

### 1/72 SCALE AD-6 SKYRAIDER "VA-65 TIGERS" Flying the fight to the foe

Sheer reliability and the option to carry up to 8,000 lbs (3630 kg) of bombs kept the AD-6 Skyraider flying well into the jet-powered era. Production of the AD-6 ended in 1957 but the birds were used by the U.S. Navy until 1972. Millions of pounds of ordnance were dropped by the Skyraiders against ground targets in Korea and Vietnam. **Kit features** mark your craft as belonging to the U.S. Navy's USS Enterprise VA-65 "Tigers" Code: AE406 or USS Oriskany VA-165 Code: AH500 1962-63.

02005      HSGS2005      Total Parts: 92      Skill Level: 3

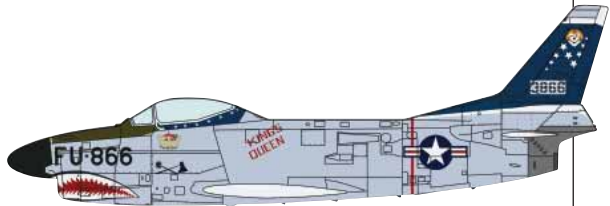

## 1/72 SCALE F-14A TOMCAT "IRANIAN AIR FORCE" Speed range firepower

In 1976, the United States supplied the government of Iran with 80 F-14s, missiles and pilot training. Each F-14 can carry up to 6 AIM-54 Phoenix Missiles and a 20 mm Vulcan Gatling-type cannon. Although they have been phased out by U.S. forces, this remarkable super-sonic twin-engine fighter is still in use by Iran. The versatile Tomcat can be equipped with a range of hardware and payload options for interception, escort or ground attack missions. **Decal options include** Iranian Air Force Codes 3-6008, 3-6077 and 3-6042.

02006      HSGS2006      Total Parts: 195      Skill Level: 3

## 1/72 SCALE F-86D SABRE DOG "SHARK TEETH" Their bite was every bit as bad as their bark

A hulking variant of the standard F-86, the F-86D was larger, faster and far more deadly than the original. These interceptor-style fighters carried 24 2.75 in (70mm) rockets in a closeable ventral tray. Swarms of these unguided rockets were intended to be fired at enemy bombers in place of the normal cannon fire of the time. In 1956 the 498th was based in Washington to provide fighter defense for the West Coast. **Kit features** decal options to tag your dog as U.S.A.F. 498FIS codes: FU-866 or FU-997 1956.

02007      HSGS2007      Total Parts: 69      Skill Level: 3

## 1/48 SCALE P-40E WARHAWK "PRISONER OF WAR" A tiger flying for the Japanese

An unknown number of P-40E Warhawks were captured by the Japanese during World War II and repurposed to fight their designers. These exceptionally tough warbirds served their operators well no matter who they were. Although they were overmatched in speed, maneuverability and armament by Japanese fighters, the P-40s of the "Flying Tigers" claimed 297 kills for a loss of only 4 planes over their 6 months of service. **Kit features** decal options for prisoner of I.J.A., I.J.A.A.F. 50th F.R. Rangoon S.A.D.F.G. Burma March 1943 and I.J.A.A.F. 25th F.R. China 1943.

52104      HSGS5204      Total Parts: 109      Skill Level: 3

## 1/48 SCALE MITSUBISHI J2M3 RAIDEN TYPE 21 "PRISONER OF WAR"

### Stealing technology for the next war

Designed for shooting down bombers, these Japanese-built craft carried four forward-facing 20 mm cannons. Some were modified to carry upward facing 20 mm cannons. Fighters with the upward-firing guns would fly under bombers and fire into their lightly protected bellies. Several of these planes were captured at the end of the war and experimented on by the U.S. and Britain. **Kit features** decals for marking your craft as British ATAIU-SEA code: B1-01 Malay Peninsula 1946 or U.S. Technical Air Intelligence Unit code: S12 Philippines June 1945.

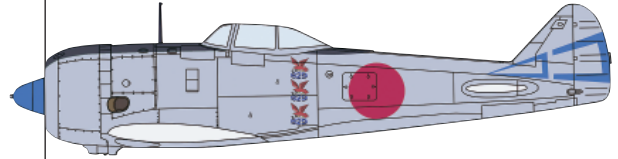

52105      HSGS5205      Total Parts: 81      Skill Level: 3

### 1/48 SCALE NAKAJIMA KI44-II TYPE 2 FIGHTER

A Japanese fighter with an incendiary bite

The heavy KI44-II more closely resembled American fighters in armament and design than other Japanese fighters. Where the Zero and other planes like it emphasized speed and maneuverability, the KI44-II focused on speed, rate of climb and armament. A few of these planes were outfitted with short-range 40 mm cannons and were meant to be crashed into B-29 bombers. **Kit features** convertible parts for type II Hei or Koh. Marking options include I.J.A.A.F. 70th F.R. Maj. Atsuyuki Sakado June 1945 and 3rd SQ. Sgt. Sadao Miyazawa Feb. 1945.

07311 HSGS7311 Total Parts: 85 Skill Level: 3

### 1/48 SCALE FOCKE-WULF FW190A-9

Minimize pilot casualties with armor plating

Focke-Wulfs were superior to most early Allied fighters, enabling them to rack up kill tallies far in excess of their own losses. German planes relied on modifying existing designs to improve their chances against new Allied fighters as the war progressed. Late in the war, JG301 and JG4 were a threat to Allied planes, but casualties were unsustainable. The new Fw190A-9 fighters incorporated more armor to protect pilots from attacks from above and behind. **Decals include** markings for Luftwaffe 6./JG301 Red-22 April 1945 or Luftwaffe Stab/JG4 Germany 1945.

07312 HSGS7312 Total Parts: 82 Skill Level: 3

### 1/48 SCALE F6F-5 HELLCAT PACIFIC ACES

The Wildcats bigger, badder brother

Simple construction, speed, armor and a heavy armament made the F6F-5 the U.S. navy's favorite fighter in the Pacific Theater where it was credited with over 5,000 kills. 2,000 horsepower engines made the F6F-5 faster and more maneuverable than the Japanese Zero. This edge in performance helped Lt. Ray Hawkins shoot down 14 Japanese aircraft while in the F6F. **Kit features** decal markings for U.S. Navy USS Essex VF-83 Ens. Littleton Word code: 115 May 1945 and USS Cabot VF-31 Lt. J.G. Ray Hawkins code: 12 Sep., 1944.

07313 HSGS7313 Total Parts: 98 Skill Level: 3

### 1/48 SCALE EA-18G GROWLER

A "Scorpion" with an electrifying sting

Unlike many other fighters, the Growler's primary role is to keep other craft alive by using sophisticated electronic equipment to jam the systems of enemy fighters and missiles. That's not to say that the Growler doesn't have a bite, though. Multiple under-wing hard-points can carry missiles for in-air actions. Introduced in 2009, the EA-18G received its first combat test in the skies over Libya during Operation Odyssey Dawn, supporting the UN no-fly zone. **Kit features** include markings for U.S. Navy COMVAQWINGPAC VAQ-132 "Scorpions" CO Codes: NL540 2010 and 2011.

07314 HSGS7314 Total Parts: 300 Skill Level: 3

## 1/32 SCALE MESSERSCHMITT BF 109F-4/B "JABO" Command the do-all aircraft of the Nazi war machine

German fighters claimed 70,000 air victories against the Allies during WWII, 50 of those kills were made by Knight's Cross recipient Frank Liesendahl in a Bf 109F-4/B. The F-4/B series variant of the Bf 109 carried machine guns in the fuselage of the craft and light bomb loads under the wings. These planes were formed into "Jabo" units— fighter-bomber squadrons equipped to attack land targets. **Designations include:** Luftwaffe 10.(Jabo)/JG2 Staffelkapitän Oberleutnant Frank Liesendahl Blue-1 April 1942, JG53 Unteroffizier Feliz Sauer White-3 March 1942 or Staffelkapitän Oberleutnant Werner Langemann White-1 July 1942.

08228      HSGS8228      Total Parts: 161      Skill Level: 3

# Plastic Models

## AMT® 1/3300 Scale Star Trek® Deep Space 9® *Fit for Federation duty*

Premiering in 1993, "Star Trek: Deep Space Nine" was the first series in the franchise to not use a starship as its main setting. The hit show centered on a Federation space station and its inhabitants, including Worf and Miles O'Brian from "The Next Generation." Seven seasons and 176 episodes later, this award-winning program remains a fan favorite. **Kit features** clear injection-molded plastic pieces (to allow the use of aftermarket lighting kits), a bonus 1/2500 scale model kit of the U.S.S. Defiant, window placement guides and new window decals.

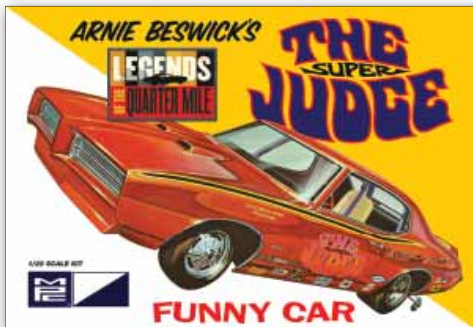

AMT751      AMTS0751      Skill Level: 2

## Polar Lights® 1/1000 Scale Star Trek® U.S.S. Enterprise™ Lunchbox Tin Edition *Sci-fi's most iconic spacecraft*

The U.S.S. Enterprise first appeared on television screens on September 8, 1966, in the classic episode "The Man Trap." While this episode was the public's first glimpse of the Enterprise, it wasn't anything new to network execs. The first pilot, "The Cage," didn't air until October 1968. The second pilot, "Where No Man Has Gone Before," became the series' third episode. This vintage **kit features** easy snap-together assembly, optional parts for three versions ("Production," "First Pilot" or "Second Pilot"), decals and collectible lunchbox tin packaging with vintage illustrations.

POL889      PLLS0889      Skill Level: 2      Length: 11.5 in (292 mm)

## MPC® 1/25 Scale Arnie Beswick's "The Super Judge" Funny Car *The first "Legends of the Quarter Mile"™ reissue.*

Arnie "The Farmer" Beswick is the world's most famous Pontiac® drag racer, and he has four generations of fans to prove it. When Beswick received his first GTO in 1964, he swapped out the stock 389 for a Super Duty 421. A year later, the "funny car" made its debut. Beswick dominated this circuit through the early 1970s. **Kit features** all-original tooling, a hinged one-piece 1969 GTO® body, a fully detailed tubular chassis and blown engine, vinyl pad-printed slicks, waterslide decals with authentic "Super Judge" markings and original box artwork.

MPC784      MPCS0784      Skill Level: 2

# 2012 MODEL BUILDING CONTEST BEATS EXPECTATIONS!

Thousands entered, sales soared

Many entries were purchased at independent hobby shops across North America

The second annual Global Model Car Championships were the best yet! With thousands of entries to choose from, the judges really had their work cut out for them.

As in last year's contest, this year's winners were chosen

with careful consideration. To see the complete list, please visit [StaceyDavid.com](http://StaceyDavid.com).

Here's a sneak peek of this year's most impressive entries, from kits sold at hobby shops like yours!

## The Winner's Circle:

From: Value Craft

# COMING IN 2013...

...the 3rd annual model building contest!

Stacey David asks, "What are YOU workin' on?"®

2012's Global Model Car Championships was a big hit, and we think that next year's contest will be an even bigger success!

Once again, Great Planes will help hobby shops get their customers interested in this exciting event. Check out future issues of Great News for Model Building Contest End Cap Specials on all the eligible models chosen for the 2013 contest.

Retailers will receive free End Cap promo materials for in-store visibility.

Revell and Stacey David will team up to announce 2013 contest details on the Web.

Stacey David will also feature the contest on an episode of GearZ, broadcast on the Speed Channel.

# BECOME A MASTER MODELER

As your skills grow, so does the fun!

Revell and Testors are two of the most trusted names in plastic models. Quality and accuracy are the rule, not the exception – which is why their products have been preferred by modelers for several decades.

Skill level 1 (SnapTite®) kits are ideal for new builders. Assembly usually takes an hour or less. Paint and glue are not required. Intermediate modelers can turn to skill level 2 kits, while experienced modelers will prefer skill level 3 kits. Both require glue, paint and patience. These kits can take a few sessions to build, but modelers will find that the process is as challenging as it is rewarding.

The 83-piece **PT-109** recreates every detail of JFK's legendary Patrol Torpedo boat, with realistic weapons, figures, a U.S. flag and a display stand. 1/72 scale. Skill level 2.

The 32-piece **'34 Ford Street Rod** offers SnapTite construction, a choice of "street rod" or "highboy" versions and Peel & Stick decals. 1/25 scale. Skill level 1.

## Revell

RMXS1943 SnapTite® 1/25 Scale '34 Ford® Street Rod  
 RMXS0310 1/72 Scale PT-109 PT. Boat  
 RMXS5256 1/48 Scale P-51 B/C Mustang

## Testors

TESR1601 Plastic Cement 5/8 oz.  
 TESR3519 Model Car Enamel Paint Set  
 TESR3531 Military Flat Paint Kit  
 TESR9188 Aircraft Acrylic Paint Set

The 51-piece **P-51 B/C Mustang** resurrects WWII's most famous fighter in 1/48 scale form. Includes a detailed cockpit, a choice of "standard" or "bubble" canopies, a pilot figure and two waterslide decal options. Skill level 2.

Testors **Paint Sets** include popular colors of paint, brushes and mixing trays.

Quick-drying **Plastic Cement** can be used to join plastic to plastic and plastic to wood. Also ideal for repairing household items, too! 5/8 oz. (18mL) tube.
