SO MANY TX-R™ PLANES AND HELIS... ONE PERFECT RADIO

6-Channel 2.4GHz Computer Radio

Pilots can assign functions to any of the switches. One momentary switch, two 3-position switches and four 2-position switches allow for total customization.

The TTX650's easy-to-use pushbutton programming controls and simple menus are intuitive and straightforward. Information is displayed on a large graphing LCD screen with adjustable contrast.

TACJ2650 TTX650 6-Channel 2.4GHz Computer Radio
 — available separately —
 TACL0624 TR624 6-Channel SLT Receiver

- 20 model memory
- Easy-to-use pushbutton programming and simple menus
- Helicopter programming with adjustable 6-point throttle and pitch curves
- Dual rates
- 8 pre-determined mixes
- 4 programmable mixes
- Digital trims with slow/fast adjustment
- User assignable switches
- Reversing, travel adjustment and sub-trim on all channels
- Large, easy-to-read graphing LCD screen
- Ball-bearing gimbals and adjustable stick lengths
- Up/down and battery timer
- Charge jack for optional NiCd/NiMH packs
- Low-voltage alarm
- Wireless trainer system with selectable channels
- Ergonomic case design
- External antenna that rotates and folds for easy storage
- 4 "AA" alkaline batteries included

Exclusive, proven reliable Secure Link Technology

Compatible with

Introduced in 2007 and proven reliable, SLT eliminates virtually any possibility of interference. An SLT transmitter encodes its signal, then sends it using true frequency-hopping technology. Only the compatible SLT receiver, linked by the push of a button, can capture the signal, decode its commands and relay them to your model.

From the Experts:

The TTX650 has the features needed for sport and intermediate-level pilots to fly almost any airplane or heli. Generous 20 model memory sets this radio apart from comparable systems, and programming is easy and intuitive. With its advanced functionality and budget-friendly price, the TTX650 is a remarkable value!

Long story short...

The TTX650 is the perfect system for anyone entering the ever-expanding world of Transmitter-Ready (Tx-R™) aircraft!

THE BLITZ: NOW BRUSHLESS AND WATERPROOF!

1/10 Scale Brushless 2WD Short Course Truck RTR

BLITZ FLUX

The Blitz took the short course scene by storm, combining durability, performance, style and innovation into one ready-to-run package. Now comes the Blitz Flux, with more power than ever! And with waterproof electronics you can show off this truck's extreme speed and power in rain, snow and mud!

HPID0325 109325 Blitz Flux 1/10 Scale Brushless 2WD Short Course Truck RTR

Length: 21.6 in (548 mm)

Width: 11.6 in (296 mm)

Height (adjustable): 7.25-7.9 in (184-200 mm)

Wheelbase (adjustable): 13 in (329 mm)

Brushless power that will blow your mind!

The Flux Shot motor cranks out 4300kV of pure torque, while the waterproof Flux Reload V2 ESC can handle up to 7 NiMH or 3S LiPo batteries!

- Capable of speeds in excess of 55 mph*!
- Bulletproof, all-metal gear transmission
- High-performance shocks with threaded bodies
- Interference-free 2.4GHz radio system
- Can handle 3S LiPo batteries
- Full ball bearings
- 12mm hex hubs
- 8.4V battery pack and charger included
- SF-20W waterproof servo
- Painted Skorpion short course truck body with bold graphics

*With 3S LiPo battery and optional gearing.

Long story short...

The Blitz Flux comes ready to run, and ready for anything!

A SILKY SMOOTH PERFORMER FOR 90-SIZE MACHINES

GT15HZ Gas Heli Engine

- Fits in most 90-size helis with only minor modifications
- Up to 60 minutes of flight time without refueling!*
- Power that's consistently stable — great for training and entry-level 3D
- Walbro carburetor developed specifically for this engine
- Includes a lightweight IG-05 Ignition Module

*Based on a 600cc fuel tank.

OSMG2878

The compact, optional E4051 silencer preserves scale lines.

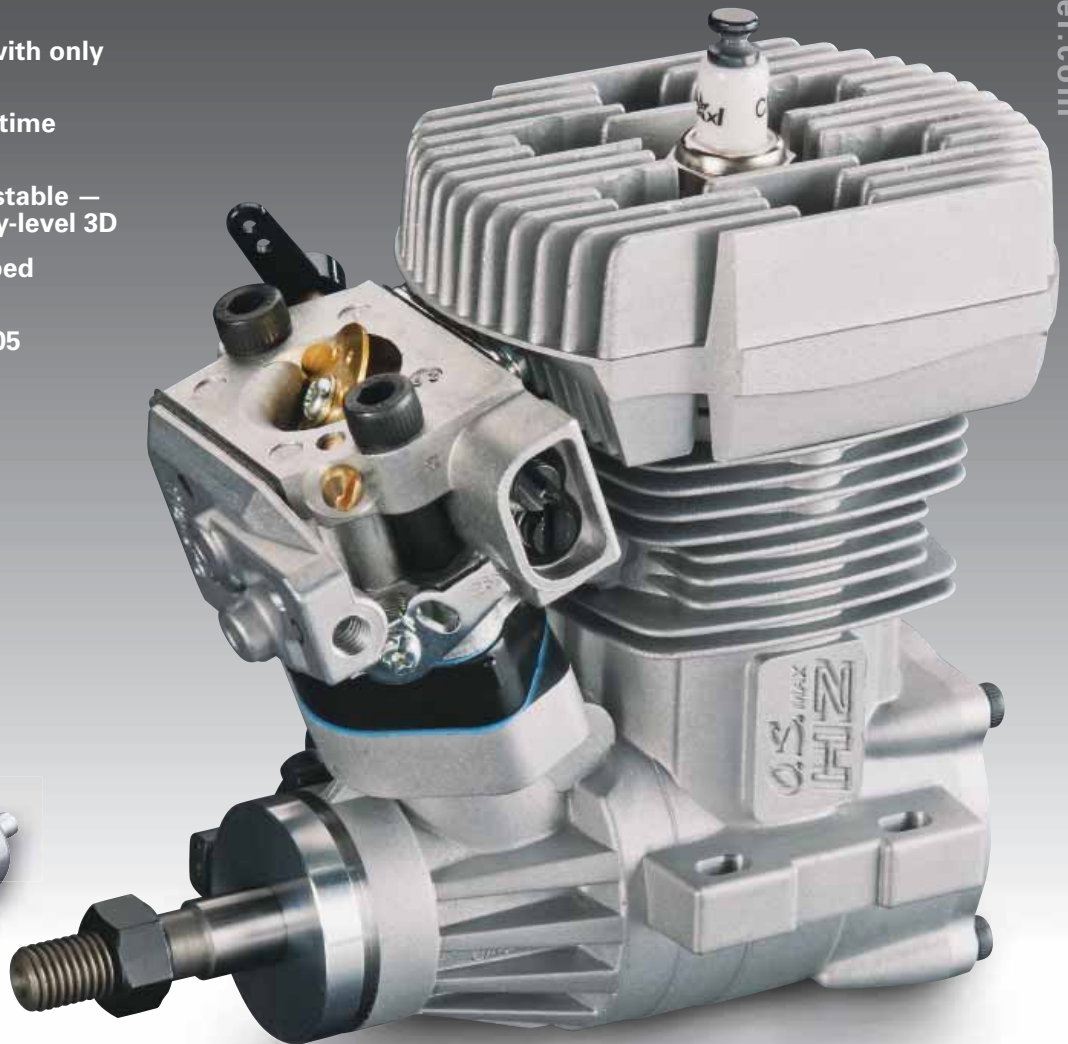

OSMG1916

The GT15HZ is available with or without a PowerBoost Pipe.

OSMG1915 GT15HZ Gas Heli Engine
 OSMG1916 GT15HZ Gas Heli Engine w/PowerBoost Pipe
 OSMG2878 E4051 Muffler
 OSMG2890 PowerBoost Pipe for GT15HZ
Displacement: 0.91 cu in (14.95cc)
Bore: 0.893 in (22.7 mm)
Stroke: 0.976 in (24.8 mm)
Practical RPM Range: 2,000-16,000
Output: 2.6 hp @ 14,000 rpm
Engine Weight: 24.9 oz (706 g)
Includes: Walbro carb, Pitts-style muffler, IG-05 electronic ignition

O.S. ENGINE
UNEQUALLED QUALITY PRECISION & PERFORMANCE®

From the Experts:

Sport flyers will love how smooth it runs without tweaking, so you can set it and forget it. The GT15HZ's compact size will appeal to scale modelers — and it sips gasoline at a rate that allows you to fly for up to an hour on one tank!

Long story short...

The GT15HZ delivers gasoline power that's dependable and effortless!

TRAXXAS TAKES TO THE SKIES

Get ready for high-flying excitement, as only Traxxas can deliver! Both the QR-1 Quad Rotor and DR-1 Dual Rotor helis feature Normal and Expert modes that make them easy to fly for new pilots with performance to satisfy enthusiasts. The included 4-channel, 2.4GHz transmitter delivers fine control for precision maneuvers and the QR-1 can even go aerobatic with flips, rolls and banked turns! No matter which helicopter you choose, you're just minutes away from exciting heli flight with the performance, convenience and fun Traxxas is known for!

Both the QR-1 and DR-1 include a 4-channel 2.4GHz transmitter with LCD display.

QR-1

Quad Rotor Ready-To-Fly Heli

- Quad-rotor thrust with digital 6-axis stabilization!
- Perform flips, snap rolls and banking turns in Expert mode
- LED "eyes" blink to indicate proper radio link and alert you when the battery is low
- Two high-capacity LiPo batteries and dual-battery USB charger included
- Includes spare prop set

TRAE61** QR-1 Quad Rotor Heli w/o radio
 TRAE62** QR-1 Quad Rotor Heli RTF
 Outer Blade Circumference: 5.8 in (147 mm)
 Rotor Diameter: 2.2 in (55 mm)
 Length/Width: 4.7 in (120 mm)
 Weight: 1.1 oz (33 g)

DR-1

Coaxial Dual Rotor Ready-To-Fly Heli

- Coaxial, dual-rotor design = fast, stable and easy to fly!
- Aluminum side plates, tail boom and landing skids
- Includes high-capacity LiPo battery and handy USB-powered charger
- Spare rotor blade set included

TRAE63** DR-1 Coaxial Dual Rotor Heli w/o radio
 TRAE64** DR-1 Coaxial Dual Rotor Heli RTF
 Length: 8.9 in (225 mm)
 Rotor Diameter: 8.7 in (220 mm)
 Height (overall): 4.6 in (117 mm)
 Weight: 2.4 oz (67 g)

Long story short...

Easy to fly for beginners, high-performance for enthusiasts, QR-1 and DR-1 are hot helis for all pilots!

AWARD-WINNING TRX 3.3 POWER, LEGENDARY SLASH DURABILITY AND FUN!

Nitro Slash 2WD Short Course Truck RTR

NITRO SLASH

Combine the heavyweight horsepower of the TRX 3.3 engine with a lightweight 2WD chassis, and you've got the SC truck of every driver's dreams! The new Nitro Slash arrives Ready-To-Run, with EZ-Start electric starting, precise TQ 2.4GHz control, and all the goodies that deliver maximum speed, handling, durability, convenience — and most of all, fun!

NEW PRODUCT

SET SAIL WITH A UNIQUE RACING YACHT DESIGN!

www.gpdealer.com

Volans 1M Racing Trimaran

TTRB5556 Volans 1-Meter Trimaran Racing Yacht Kit

Length: 39.4 in (1000 mm)
Beam: 21.6 in (549 mm)
Height: 59.25 in (1505 mm)
Sail Area: 514.6 in² (33.2 dm²)
Weight: 7.5 lb (3.4 kg)

- Factory-painted, pre-assembled ABS hulls
- Tear-resistant racing sails
- Rigid extruded aluminum booms and mast
- Easy-to-remove side hulls
- Display stand included

From the Experts:

With a main hull flanked by two side hulls, the Volans 1-meter Trimaran offers excellent straight-line performance and stability, surprisingly fast on the water and nearly unsinkable. The extruded aluminum booms and mast are lightweight and rigid, just like the quality ABS blow-molded hulls.

Long story short...

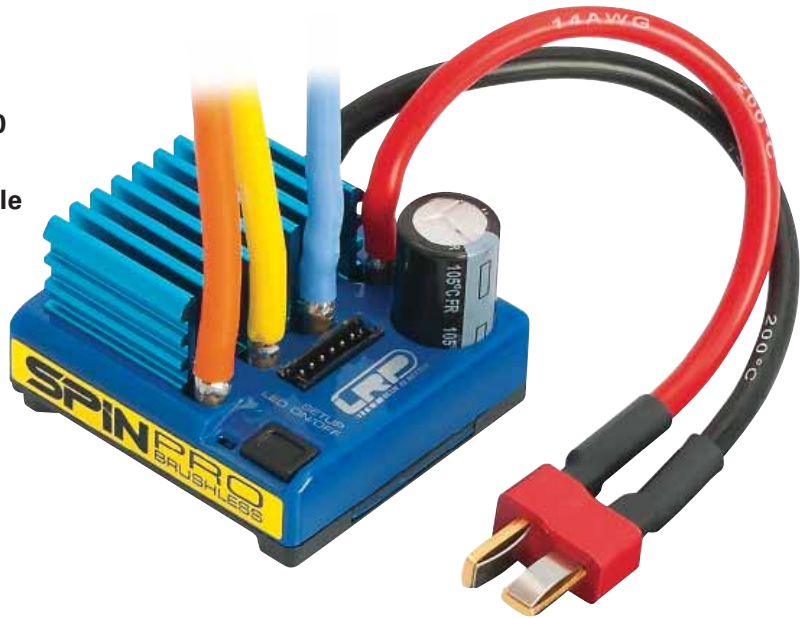

The Volans 1-Meter Trimaran adds a South Pacific feel to yacht racing!

AN ALL-AROUND, AFFORDABLE SPEED CONTROL

LRP Spin Pro Brushless ESC

- 2S-4S LiPo (7.2-8.4V) adjustable cutoff
- Can be used for both on-road and off-road 1/10 scale applications
- "True Stock Racing – Boost 0" mode adjustable
- "Splash-proof" protection from the elements
- Easy single-touch operation

ASCC0231 LRP Spin Pro Brushless ESC

Long story short...

The Spin Pro Brushless ESC is perfect for sport drivers and aspiring racers; it's also a great upgrade for an RTR!

RECEIVER PACKS WITH BIG, BOLD POWER!

- CSEM0115 1/10 SV3 Sidewinder 12V ESC Waterproof

SEE HOW EASY — AND HOW MUCH FUN — FLYING A HELI CAN BE!

Discover the wonders of Heli-Max electric RTF machines!

Each of these palm-sized helis is just minutes away from being flight-ready, with quality components and features you won't find in comparable machines. Like flybarless rotor heads, a more efficient design that offers a wider flight envelope, TAGS (Triple Axis Gyro) for effortless hovering and maneuvering, and the dependability of a 2.4GHz radio system. Don't let the small dimensions of these helis fool you: they can take some abuse and come back for more, and you can fly them both indoors and outside.

There's an electric RTF heli for every taste and skill level. The fixed-pitch head of the Axe 100 FP adds stability; that same stability is also available with super scale looks in the MD-530. Enjoy optimum 3D capability for exciting aerobatics with the collective pitch Axe 100 CP. And for a truly unique flying experience, there's the 1SQ Quadcopter with 4 independent rotor blades. No matter which Heli-Max machine you choose, you'll soon discover just how easy and fun flying a heli can be!

Look for these awesome Heli-Max Ready-To-Fly helis on display:

- HMXE0813 Heli-Max MD530 Flybarless EP Heli 2.4GHz
- HMXE0815 Heli-Max Axe 100 FP Flybarless EP Heli 2.4GHz
- HMXE0820 Heli-Max Axe 100 CP Flybarless EP Heli 2.4GHz
- HMXE0834 Heli-Max 1SQ Quadcopter Flybarless EP Heli 2.4GHz

MORE AND MORE MODELERS ARE GOING WITH ARRMA!

Get more metal...more durability...and more innovation for your money!

www.gpdealer.com

www.gpdealer.com

Standard on all ARRMA vehicles

ARRMA knows what R/Cers want — and they deliver! Every ARRMA vehicle is Ready-To-Run, value-priced and built tough...with cutting-edge technology and upgrades that'll keep you out in front. Choose from a wide array of buggies and trucks, and get on the fast track to fun!

You get all this — and more — with ARRMA models:

- The finest quality materials
- A streamlined, "modular" chassis
- Extensive parts compatibility (47%!)
- A total commitment to keeping costs down
- Rapid product delivery and ongoing customer support
- An iron-clad 2-year warranty

As complete as they are rugged!

Every ARRMA RTR includes a Power Kit with an Onyx 6-cell NiMH pack, "AA" batteries and an 110V AC wall charger — "must-haves" that you don't have to purchase separately!

The adaptable transmitter — a classic example of ARRMA innovation!

With the press of a button, the ATX300 transmitter can be switched from left-handed to right-handed and back again. It lets anyone hold the radio in the way that feels most comfortable — and only ARRMA has it!

Design Patent No. 29/384,679

Don't take our word for it — here's what hobby shops are saying about ARRMA!

"I sold out of my order of Raider, Granite and Mojave RTRs. Customers love the price and the 2-year warranty, and these vehicles have much better quality and features than others in their price range. I also appreciate the parts compatibility."

Dave,
High Speed Hobbies,
Paris, TN

"I'm excited with how this line is doing in our store. I sold 4 Raiders before I could unpack my order, and the Vortex and Mojave are selling well too. These vehicles are well constructed, and the chrome detail gives them a sharp look. Plus, customers are looking for cars and trucks that are complete with the battery and charger."

Susan,
Carlton Hobbies,
White Lake, MI

"I've sold several ARRMA vehicles because of the unique radio. Lefties love that they can switch it over...it's the only RTR vehicle on the market that has it."

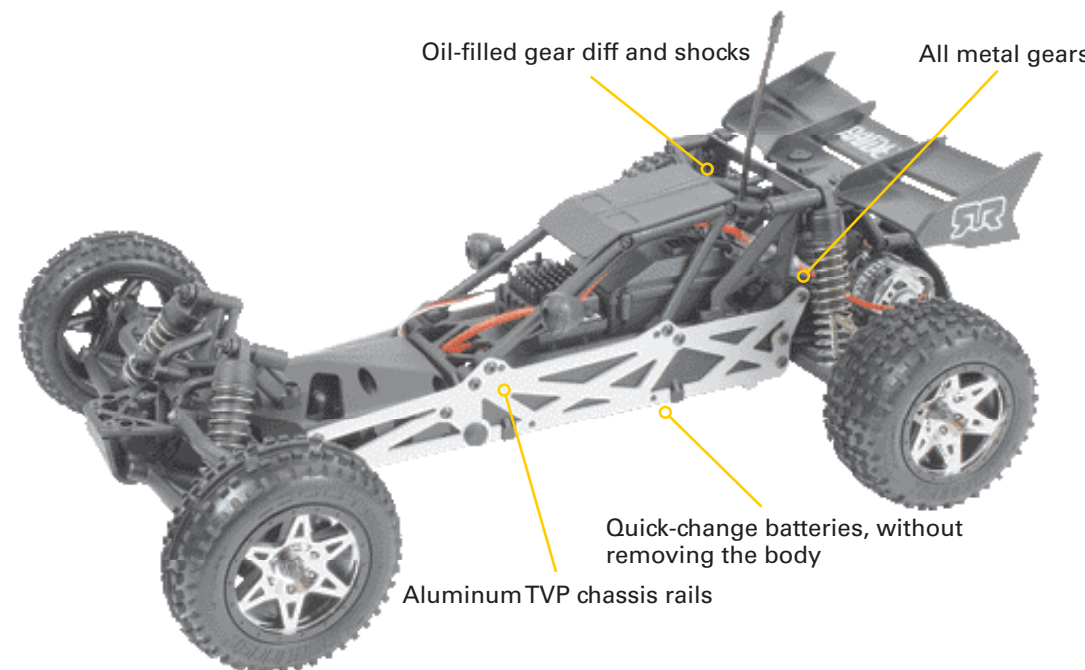

Mike,
Tom Thumb Hobbies,
Columbus, OH

"I love the ARRMA line because it offers a great price point for a starter vehicle with tons of options to upgrade later. Whoever designed this line is a genius!"

Randall,
McIntyre Gifts & Hobby Shop,
Burgaw, NC

"A new customer showed up at track two hours prior to a race and WON with a stock Fury he had just bought. Now a lot of our regulars want to find out more about ARRMA."

Mary,
Linville Signs & Hobbies,
Batesville, IN

2 BUGGIES — 1 GOAL: FAST, FREE-WHEELING FUN!

They're both buggies, but they could hardly be more different! The SC10B RS is based on a National Champion 2WD Short Course truck chassis just add batteries to start catching that big air. The B44.2 Factory Team Kit is the latest evolution of a proven World and National Champion 4WD platform that is ready for you to complete and then compete!

- Powerful Reedy 3300kV brushless motor
- Water-resistant XP brushless ESC with reverse
- Heavy-duty sealed differential
- Blue anodized aluminum V2 coil-over shocks
- Molded composite chassis with straps for NiMH or LiPo batteries
- XP 2.4GHz radio system with metal gear steering servo
- Pro buggy body with full roll cage and integral nerf bars
- KMC® replica hex wheels with aggressive short-course racing tires
- Realistic window nets and detailed driver figure

Stacey David asks, "What are YOU workin' on?"

When he's not building a full-size vehicle on the set of his hit SPEED Channel series, GearZ host and executive producer Stacey David can be found working on a model car. It's a way to relax while maintaining his creative edge. Stacey has been a hobbyist as long or longer than he's been fixing and modifying real cars. Starting his 7th season of GearZ in 2012, David previously hosted and produced another popular automotive series on Spike TV for eight years.

Now, Stacey David is teaming up with Revell for this year's Model Car Championship! Stacey, along with a full panel of expert judges will evaluate each entry base on its creativity, use of the kit, adherence to the theme, fit/finish and use of color. The entry with the most points in each category will win

Get complete contest details at revell.com

STREAK ACROSS THE STRATOSPHERE

Six new choices for sky-high flight

All include:

- Plastic or laser-cut wood fins
- Decals
- Recovery parachute

All require:

- Engines
- Launch pad
- Launch controller
- Igniters
- Recovery wadding
- Tools
- White or yellow glue
- Finishing supplies

Ages 10 and up. Adult supervision recommended for modelers under 12.

RTF (Ready-to-Fly)

No paint, glue or modeling skills required. Rocket comes assembled and is ready to launch in minutes.

E2X® (Easy to Assemble)

No paint or special tools are required. Parts are painted and easy to assemble. Just glue together, apply decals and attach the recovery system.

Skill level 2:

Requires gluing, painting and sanding. Assembly can take up to a day.

1/25 SCALE ROYAL '66 PONTIAC® GTO® AND FIGURE

Real hot rod royalty

When GM® issued orders against involvement in auto racing, they sharply undercut their Pontiac line's market. Fortunately for the muscle car world, Pontiac worked around these restrictions and developed the GTO. Royal Pontiac in Michigan sold hop-up packages that turned GTOs into speed demons capable of going zero to 60 in 4.6 seconds. The Royals were icons of the drag strip, and the mysterious tiger-suited driver of the GeeTO was the most famous of all. This **kit features** a pre-painted GeeTO Tiger figure, detailed engine and racing decals.

RMXS4037 Total Parts: 114 Skill Level: 2 Length: 8.3 in (209.6 mm)

1/25 SCALE '66 CHEVELLE® STATION WAGON

The kids have to go somewhere

In front of the "A" pillar, the '66 Chevelle Station Wagon is all muscle car. It was built with the same engine and drive train as one of the most potent muscle cars in history, the Chevelle. But you have to put the kids somewhere. The station wagon's designers stretched the two-door, four-seat car into a four-door, eight-seat wagon. Gone were the sport-spec performance and six packs, replaced by cargo capacity and diaper bags. This **kit features** a detailed Chevy® big block engine, custom wheels and color decals.

RMXS4054 Total Parts: 125 Skill Level: 2 Length: 7.9 in (200 mm)

1/25 SCALE '37 FORD® PANEL TRUCK

From Chicago to everywhere

Panel trucks like these helped turn a small wholesale foods business started for \$400 into a sprawling multi-national, multi-million dollar corporation. The Sexton Foods Corporation® used panel trucks and railcars to transport millions of dollars in groceries to colleges, restaurants and the army. These panel trucks are pickups converted with larger enclosed cargo cabins for transporting bulk orders that don't require a semi-tractor or full-size truck. This **kit features** a detailed Flathead V-8, interior with simulated wood floor and choice of three decal versions.

RMXS4930 Total Parts: 110 Skill Level: 2 Length: 7.3 in (184 mm)

1/25 SCALE STACEY DAVID'S RAT ROASTER

Lay down some rubber with this custom classic

When Stacey David, host of Speed TV's "GearZ™", soups up a car, it becomes one mean machine. This car is a late '60s-style hot rod with so many mods you can hardly tell what the original ride was. David's elbow grease and innovation turned this car into a full-throttle thrill ride with a front-end moon tank and a Weiand® 250 blower. This **kit features** a choice of 2 carburetor intakes, a replica Rat Roaster guitar, optional front fenders and Stacey David design decals.

RMXS4995 Total Parts: 148 Skill Level: 2 Length: 6.8 in (171.5 mm)

1/32 SCALE ATOMIC CANNON

"Now I am become death, the destroyer of worlds."

– J. Robert Oppenheimer

In May 1953, the Upshot-Knothole tests proved that the M65 Atomic Cannon could fire a 16 kiloton yield nuclear weapon seven miles (11.3 km). It used the same warhead that Oppenheimer had helped create. The United States constructed twenty of these weapons and deployed them to Europe and Korea as deterrents against a communist invasion. None of the atomic cannons were used in combat; the hostile nations showed good sense by not openly attacking each other. This **kit features** a crew of seven figures and US Army decals.

RMXS7818 Total Parts: 292 Skill Level: 3 Length: 33.5 in (851 mm)

1/72 SCALE CROMWELL MK.IV

Meteoric power

Even though it carried more armor than the Sherman and mounted the same caliber gun, the Cromwell was nearly twice as fast as its American cousin. A 600 hp Rolls-Royce® Meteor engine gave the Cromwell a top speed of 40 mph (65 km/h). The speed and low silhouette of the Cromwell enabled it to flank the slower Tiger tanks of the German army. This **kit features** a rotating turret, fine surface detailing, optional hedgerow cutter and decals for two British tanks.

RVLS3191 Total Parts: 127 Skill Level: 4 Length: 3.5 in (89 mm)

1/35 SCALE GERMAN TRUCK V3000S

Carrying the Krieg

Modern warfare requires tons of supplies to be brought to front-line units. Without mechanized transport for supplies, military endeavors will quickly deteriorate. No army knew this better than the Nazi Heer during WWII. They decided to standardize all of their trucks to make finding replacement parts easier. The V3000S 3-ton truck was the design they chose. From bullets to bratwursts, these trucks transported everything the Heer used. This **kit features** detailed engine parts and surface features plus, authentic decals for four German vehicles.

RVLS3234 Total Parts: 192 Skill Level: 5 Length: 7.2 in (182 mm)

1/32 SCALE P-39D AIRACOBRA

Training, Initiative, Tenacity, Strategy

The Bell® Airacobra was an aggressively armed early war plane that was very different from most contemporary planes. Its engine was mounted behind the pilot to allow a 37 mm cannon to be placed in the nose. The P-39 found its niche in ground attack missions in the Pacific Theatre. Its main armament was devastating to ground targets and the unusual engine placement reduced the P-39's vulnerability to ground fire. This **kit features** two decal marking options for the U.S.A.A.F. 8FG 36FS.

RVLS4868 Total Parts: 166 Skill Level: 3 Length: 12.7 in (322 mm)

1/72 SCALE BAE SEA HARRIER MK1 (TWO KITS) Harrying and hammering the Argentines

During the Falklands Conflict, the Royal Navy used the Harrier to launch strikes against Argentinian occupation forces. Despite being hugely outnumbered, British Harriers inflicted twenty air-to-air kills on the Argentines and lost only one Harrier to enemy action. The power of the Harrier helped British forces overcome Argentine air superiority and retake the islands in less than three months. This limited edition **kit features** decals for two Harriers assigned to the Royal navy carriers Hermes and Invincible during the Falklands Conflict in 1982.

limited edition 02017 HSGS2017 Total Parts: 76 x 2 Skill Level: 3

1/72 SCALE MITSUBISHI® A6M5A ZERO Building on the best

Mitsubishi created the A6M5 Type 0 Model 52 to counter the firepower and speed of the F6F Hellcat and F4U Corsair. Featuring a top speed of 340 mph (540 km/h), the A6M5 could reach an impressive altitude of 26,250 feet (8,000 m) in just 10 minutes. With the model's maneuverability, the high speed A6M5 was a match for most American planes. This limited edition **kit features** new metal bomb, bomb rack and photo-etched bomb fin parts, as well as two decal marking options for the I.J.N. 653rd N.F.G.

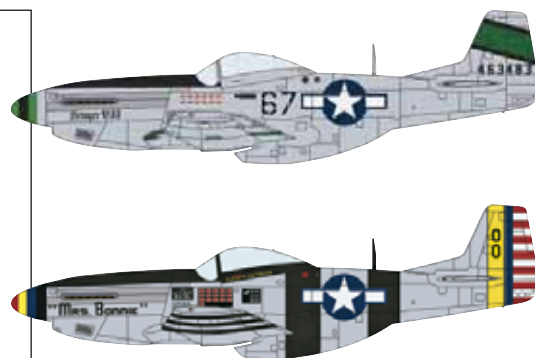

limited edition 02019 HSGS2019 Total Parts: 51 Skill Level: 3

1/72 SCALE P-51D/K MUSTANG "PACIFIC ACES COMBO" (TWO KITS) Through the skies to victory

The 348th Fighter Group had some of the most highly distinguished Allied aces of World War II, including a Medal of Honor recipient. In the last year of the war, the group flew P-51 Mustangs and proceeded to drop a record tonnage of bombs on Japanese positions. Their close support was essential in allowing ground forces to take critical objectives and bring the war to a close. This limited edition **kit features** decal markings for three U.S.A.A.F. planes, two from the 348FG and one from 15FG.

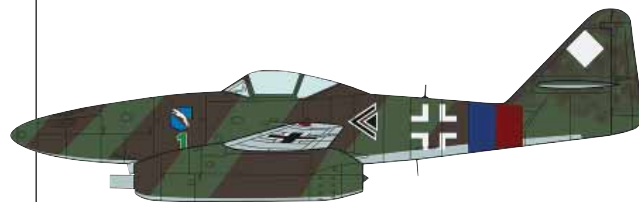

limited edition 02020 HSGS2020 Total Parts: 56 X 2 Skill Level: 3

1/72 SCALE MESSERSCHMITT ME262A-1A AND W.GR.21 Fast and fatal

The Messerschmitt Me262A-1a was so fast that it frequently overshot its targets. W.Gr.21 rockets corrected this problem by letting the Germans stand off and fire. These rockets could fly over 1,000 yards (1,000m), allowing the Me262s to stay outside of their enemy's effective range. The rockets carried a 90 lb (40.8 kg) explosive warhead that would shred even the vaunted B-17. This limited edition **kit features** new metal W.Gr.21 rocket parts, plus decals for two JG7 pilots: Kommandeur Major Rudolf Sinner and Geschwader Adjutant Hauptmann Erick Mikat.

limited edition 02021 HSGS2021 Total Parts: 53 Skill Level: 3

1/72 SCALE F-14A TOMCAT "VF-211 FIGHTING CHECKMATES"

That's not Santa...

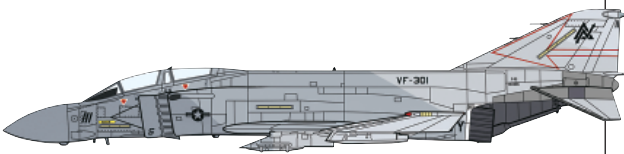

Like many military groups, VF-211 has many traditions. One of those traditions involves painting a rocket-wielding thug in a Santa suit (his name is Brutus) on their planes whenever the group is deployed over Christmas. The 14,500 lb (6,600 kg) payload of the F-14A Tomcat ensures that Brutus delivers extra-explosive presents to all the bad boys and girls. When it comes to high-explosive ordinance, it is much better to give than to receive. This limited edition **kit features** decal markings for two "Fighting Checkmates" aircraft.

limited edition 02022

HSGS2022

Total Parts: 191

Skill Level: 3

1/72 SCALE F-4S PHANTOM II "VF-301 DEVIL'S DISCIPLES"

Giv'em Hell Baby

The "Devil's Disciples" were the first ever air reserve unit to deploy air-to-ground munitions. Their F-4 Phantom IIs set multiple world records for speed, range and altitude during the planes' operational lifetime. Both VF-301 and her sister squadron, VF-302, were deactivated in the post Cold War troop drawdowns of the nineties. This limited edition **kit features** two decal marking options, one for U.S. Navy VF-301 Code: ND111, 1983 and the other for VF-302 "Stallions" Code: ND200 1983.

limited edition 02023

HSGS2023

Total Parts: 162

Skill Level: 3

1/1500 SCALE SPACE PIRATE BATTLESHIP ARCADIA

One ship against the galaxy

Captain Harlock pilots the Battleship Arcadia in a fierce resistance to the encroachments of an alien race, the Mazone. His semi-sentient ship is one of the few hopes for survival humanity has left. Pulsar cannons bristle from the sleek green decks, prepared to turn warships into cosmic dust. Grapnel launchers stand ready to fix into prey and bring the Arcadia's lethal blade ram to bear. Even without ever seeing the movies or mangas, this ship is a piece of lethal art deserving of a proud place in your display case.

limited edition 64505

HSGS6505

Total Parts: 152

Skill Level: 3

Length: 13.2 in (336.5 mm)

1/48 SCALE JUNKERS JU87D-3N STUKA "NSGR.2"

Death from a darkened sky

Nachtschlachtgruppe 2 was formed on the Eastern Front during the Russian winter. The squadron's objective was to harass Russian forces by dropping incendiary and fragmentation bombs on Russian positions at night. For these missions, the psychological effect of the Stuka dive bomber was magnified by cold and darkness. Despite the efforts of NSGr.2, the Russians' will did not break. By spring, the war had swung in the Soviets' favor. This limited edition **kit features** decal markings for Luftwaffe 2./NSGr.2 Code: G Italy June, 1944.

limited edition 07323

HSGS7323

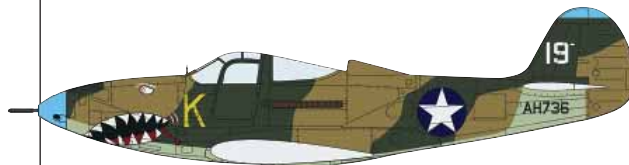

Total Parts: 100

Skill Level: 3

1/48 SCALE P-400 AIRACOBRA "SHARK TEETH" More bite than a Great White

The Bell® Airacobra was an aggressively armed early war plane. Like many American aircraft it was heavily armed and armored. Unlike most planes, however its engine was mounted behind the pilot. This unusual placement allowed a 37 mm cannon to be placed in the nose. Though it was slower than most contemporary fighters, the P-400 found its niche in ground attack missions in the Pacific and on the Eastern Front. This limited edition **kit features** two decal marking options for the U.S.A.A.F. 8FG 80FS.

limited edition 07324 HSGS7324 Total Parts: 122 Skill Level: 3

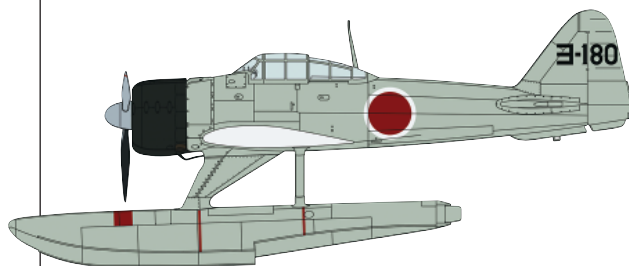

1/48 SCALE NAKAJIMA A6M2-N TYPE 2 FIGHTER SEAPLANE

From land or sea to the air

In the widely varied terrain of the Pacific War, it was not always possible to operate aircraft from land bases. Nakajima A6M2s were Zeroes equipped with floats that allowed them to operate from any body of water. The planes' distinctive floats made them vulnerable to Allied fighters. If they could evade Allied air cover, these seaplanes were effective counters to American patrol boats. The A6M2-Ns would spot the wakes of patrol boats and strafe or bomb them. This limited edition **kit features** decals for two Yokosuka float groups.

limited edition 07325 HSGS7325 Total Parts: 84 Skill Level: 3

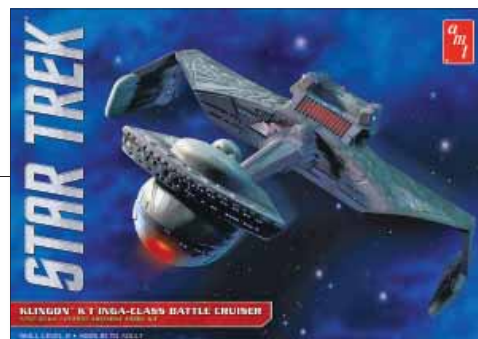

Plastic Models

AMT® 1/537 Scale Star Trek® Klingon® K'tinga *Primed for intergalactic battle*

The Klingon K'tinga became an instant fan favorite when it was introduced in 1979's "Star Trek: The Motion Picture." It has subsequently appeared in "Star Trek VI: The Undiscovered Country," and each spin-off. Like many of Trek's best vessels, it was designed by Andrew Probert. The K'tinga resembles the D7 in many ways; the differences lie in the ultra-detailed hull, impulse engine configuration and the addition of an aft torpedo launcher and disruptor beam. **Kit features** glue and paint assembly, a large dome base with metal rod and updated decals.

AMT794/12 AMTS0794 Total Parts: Skill Level: 2

Airfix® 1/76 Scale Infantry Tank MkII Matilda *It can't waltz, but it sure can wallop*

A maximum of 78 mm of armor made the Matilda the most heavily armored tank of early World War II. All that armor also made it painfully slow. As the tank crept along at 6 mph (9 km/h), German shells would ricochet off the armor. Through sheer indestructibility, Matildas often turned battles for the British in North Africa. Despite low speed and comparatively-light 40 mm armament, Matildas were the only British tanks to serve throughout the entire war. This **kit features** decals for 1 troop 'A' squadron, El Alamein, 1942.

01318 ARXS1318 Total Parts: 65 Skill Level: 2 Length: 3.2 in (82 mm)

Airfix® 1/48 Scale Supacat® HMT600 Coyote

Hauling the hurt in Helmand

Supacat Coyotes are the bigger brothers of the Jackal patrol vehicles that transport British troops across Helmand Province, Afghanistan. The role of these 6x6 vehicles is to haul heavy artillery, troops and supplies to wherever they are needed for Operation Herrick. The vehicle and crew are protected by thick armor plating and a changeable mixture of machine guns and automatic 40 mm grenade launchers. This **kit features** decals for a vehicle deployed with the British Army to Afghanistan in 2012.

06302 ARXS6302 Total Parts: 148 Length: 6 in (151 mm) Skill Level: 3

Dragon® 1/144 Scale Lockheed® TR-1A (U-2)

Ready for high-altitude recon

The TR-1A has the high aspect ratio wings you'd expect from a glider. Yet, this modified U-2 is built for high-altitude tactical recon. Side-looking radar, updated avionics and improved electronic countermeasures equipment make the TR-1A perfect for covert ops. **Kit features** a newly tooled design, a slide-molded cockpit canopy, cockpit interior details, optional side-looking radar, high aspect ratio wings with detailed surface panel lines, a fuselage with intricate cooling vents, a standard "super" pod, a detailed antenna, realistic rudders and landing gear with optional taxiing or flying positions.

4640 DMLS4640

Maisto® 1/12 Scale Kawasaki® KX450F

A Motocross masterpiece

Kawasaki designed the KX450F to destroy the competition at Motocross competitions all over the world. The KX250, predecessor of the 450, won just about every match they could throw it into, then they up gunned it to a 450 for production models. Take it over a jump and these bikes will flat fly, literally soaring over the competition. This **kit features** a die-cast and plastic Kawasaki KX450F body with spring rear suspension, steerable fork front and soft vinyl tires.

39175 MAIS9175 Total Parts: 24

Minicraft Models® 1/16 Scale 1935 Morgan® Cyclecar

Three wheels keep on turnin'

Take three wheels add an engine, some combustibles and a heaping spoonful of insanity and you get the 1935 Morgan Cyclecar. The concept of the three-wheeled touring car was originally developed by the father of the corporation, H.F.S. Morgan. Although later versions would be powered by 4-cylinder engines, this model is powered by an original V-Twin motorcycle engine. After a decade out of production, this kit is once again available to the market. This **kit features** a V-Twin engine, quirky 3-wheel design, realistic interior and real rubber tires.

11241 MMIS1241

Minicraft® 1/144 Scale NASA Space Shuttle

Once more, the sky is the limit

This commemorative kit looks back on the space shuttle program and allows you to build one of the four surviving shuttles. After three decades of scientific exploration, the retired shuttles Atlantis, Discovery, Endeavour and Enterprise will soon be put on display at space centers around the United States. Perhaps modelers of this kit and future visitors to the full scale shuttles will be inspired to reach further than NASA has ever gone. This **kit features** decals for marking your shuttle as one of the four surviving space shuttles.

11668 MMIS1668

Minicraft® 1/144 Scale KC-135E ANG

Gassing on the go

Jet engine bombers are extremely thirsty aircraft, and the long distances to targets often require mid-air refueling. Luckily, the KC-135E can haul up to 200,000 lbs (90,718 kg) of fuel. The aging KC-135E refueling tanker fleet hauls the extra gas that warplanes need to get to their targets. This model represents one of the many tankers tasked to the Air National Guard for combat support missions. This **kit features** an all new fuselage and wing tooling, pose-able boarding hatch with ladder and markings for two USAF planes.

14627 MMIS4627

Minicraft® 1/144 Scale USAF C-130B Transport

A world of war on its shoulders

The Lockheed C-130 is the ultimate heavy lifter. The USAF has used versions of the plane for transport, recon, close support, med evac and other missions since its introduction in the fifties. The cargo capacity of the C-130 is truly legendary. During the evacuation from Vietnam, a C-130 took off with 452 passengers on board—the plane's rated passenger capacity is 92. It is one of the last prop-driven aircraft in use by modern air forces. This **kit features** decals for 2 aircraft and an opening rear cargo door.

14672 MMIS4672

Minicraft® 1/144 Scale Aichi E-13A Seaplane (Jake)

The IJN's eye in the sky

Floatplanes and seaplanes were used extensively for recon in the Pacific Theatre's island-hopping campaigns. The three-seater Aichi E-13A was the most commonly produced Japanese seaplane of WWII. It was used in reconnaissance missions from Pearl Harbor all the way until the end of the war. Floats made it ideal for operating from specialized ships or isolated islands which did not have airstrips. This **kit features** decal markings representing two Imperial Japanese Navy aircraft.

14678 MMIS4678

Minicraft® 1/144 Scale Aichi B7A Ryusei (Grace)

Devastating dive bombers

Many people think of the Zero as Japan's finest aircraft, but the Aichi B7A was more maneuverable and more heavily armed than that legendary fighter. The fast, sleek and powerful B7A could have seriously hampered U.S. efforts in the Pacific. Fortunately for the U.S., the carriers that were designed to launch these bombers were both sunk before their aircraft could be put to use. Without their carriers, B7As were reduced to fighting naval battles from land bases. This **kit features** decals for two different aircraft.

14679 MMIS4679

Minicraft® 1/144 Scale B-29A

Nothing says "Hi There" like a nuclear bomb

The B-29 is the only aircraft that has ever operationally deployed a nuclear weapon. Modified B-29s flew both atomic bombs to their targets during World War II. In all aspects, the B-29 is an impressive craft. Its wingspan is 141 ft (43 m), it can carry 20,000 lbs (9000 kg) of bombs and has a 3,000 mile (5,000 km) range. It was undoubtedly the most deadly weapons delivery system of the war. This **kit features** camouflage paint markings for two early B-29 units.

14682 MMIS4682

Minicraft® 1/144 Scale B-17G

Bringing bombs to the burgomeisters

The B-17G was the most advanced and most commonly produced B-17 variant. B-17Gs bristled with a total of thirteen .50 caliber machine guns, which improved their defensive capabilities, allowing them to deliver up to 8,000 lbs (3,600 kg) of bombs to their heavily defended targets. Those bombs ground down the Nazi war machine by destroying factories, supply lines and air fields. Without the war materials provided by the factories, the Wehrmacht was doomed. This **kit features** decals for two 8th Air Force aircraft from WWII.

14683 MMIS4683

Moebius® 1/32 Scale Finished

Battlestar Galactica® Viper Mk.II

Fit for the fight!

Designed to operate in outer space and atmosphere, the Viper is the Colonial Fleet's primary Superiority Fighter/Attack craft. The Mk.II model was originally introduced shortly before the outbreak of the first Cylon War. Much of humanity owes its survival to the power of the Viper Mk.IIs that helped Battlestar Galactica escape destruction. It remained in service long after the end of the conflict, although it was superseded by newer models. This assembled and painted plastic **replica features** authentic detailing and launch tube packaging perfect for display!

2912 MOES2912

Moebius® Models 1/4105 Scale Finished

Battlestar Galactica™

Fully ready to fight the inhuman foe!

The Battlestar Galactica is the last hope for the human race, the last vessel capable of defending humanity from the Cylons. Luckily, this ship is perfectly suited to her role. Armed with nukes, primary KEWs and point defense KEWs and loaded with swarms of Colonial Vipers, the Battlestar Galactica is a match for any foe. And with Commander Adama on the bridge, it will take more than a few cyborgs to stop the Galactica as she searches for Earth. **Set features** a fully assembled replica of the Battlestar Galactica.

2915 MOES2915

Polar Lights® 1/1000 Scale Star Trek® Romulan® Battle Cruiser

Highly detailed, a breeze to build

Star Trek fans saw the Romulan Battle Cruiser for the first time in season three's "The Enterprise Incident," which aired on September 27, 1968. Many eagle-eyed viewers have noticed that it looks suspiciously similar to the popular Klingon® D7 Battle Cruiser. That's because it is the same ship, simply redressed by the special effects team with Romulan "Bird of Prey" markings! **Kit features** easy snap assembly, metallic plastic parts, assorted clear and chrome parts, Romulan bird decals, an optional decal set and a dome base.

POL897 PLLS0897 Skill Level: 2

Tamiya® 1/35 Scale Zimmerit Coating Sheet- King Tiger Production Turret

Anti-magnetic armor paste

The characteristic ridged effect you see on Nazi tanks isn't paint, it's Zimmerit. Zimmerit was a paste that was applied to German tanks in ridges that made the tanks less vulnerable to magnetic mines. This sheet lets you give a King Tiger the distinctive look of Zimmerit without spending hours applying modeling putty. Does your tank have a magnetic personality that keeps getting it in sticky situations? Are you tired of it attracting every mine in miles? Get Zimmerit and get some peace from mines.

12648 TAMS1248

Tamiya® US M1A2 SEP Abrams TUSK II

Going where the fighting is thickest

The Abrams is one of the toughest tanks ever created, but even this Goliath is vulnerable in urban combat. High buildings provide cover for infantry and allow them to attack the tank's vulnerable areas. To counter the threats of urban warfare, Abrams are being upgraded with TUSK, Tank Urban Survival Kits. These add mass-reactive armor tiles to the sides of the vehicle, slotted armor to the rear, and remote-controlled weapons systems. This **kit features** all-new armor and weapons, plus other extras, realistic figurines and multiple decal options.

35326 TAMS5326

Trumpeter® 1/35 Scale Canadian AVGP Cougar

Ready for recon training

AVGPs (Armored Vehicle General Purpose) first entered front-line service with Canadian Forces in 1976. The Cougar was initially designed for reconnaissance training. Many featured marine propulsion systems; over time, rising costs made these versions less common. Today, Canadian Forces have a fleet of 100 Cougars, which are used only by reserve armored units. **Kit features** slide-molded lower and upper hulls, a separate rear panel with crew entry doors, hollow treaded rubber tires, a metal gun barrel, photo-etched parts and Canadian Army decal markings.

1504 TSMS1504 Total Parts: 250 Length: 6.8 in (173 mm)

Trumpeter® 1/35 Scale BMP-3 in Cyprus Service

Heavily armed, for amphibious combat

The BMP-3 officially entered service with the Soviet Army in 1987. However, it didn't make its public debut until three years later, when it was shown off in the 1990 May Day parade. The BMP-3's arsenal is impressive from any angle; weapons include a 2A70 100 mm rifle gun and three 2,000-round 7.62 mm PKT machine guns. Firepower is as effective on land as it is on water. **Kit features** refined details, slide-molded upper and lower hulls, a slide-molded turret, 192 individual track links, plus assorted photo-etched and clear parts.

1534 TSMS1534 Total Parts: 740 Length: 8 in (203 mm)

Trumpeter® 1/144 Scale Chinese J-20 Mighty Dragon

China's latest stealthy surprise

The Chengdu J-20 is one of the more impressive byproducts of China's J-XX stealth fighter program, which launched in the late 1990s. Its first flight occurred on January 11, 2011. The J-20 surprised spectators with its resemblance to several U.S. and Russian aircraft, including the Lockheed® F-22 Raptor and the Sukhoi® T-50. Four prototypes have been produced so far. Experts estimate that the J-20 will enter production sometime between 2017 and 2019. **Kit features** new tooling, a detailed fuselage and wings with finely engraved panel lines and multiple clear parts.

3923 TSMS3923 Total Parts: 50 Length: 5.7 in (146 mm) Wingspan: 3.6 in (91 mm)

Trumpeter® 1/35 Scale Russian BRDM-2UM

A commanding presence in any scale

The BRDM-2UM is a specially modified export version of the BRDM-2 that is designed for use as a command vehicle. Unlike other variants, it lacks a turret. On the other hand, the BRDM-2UM features a 1kW generator, a large antenna base and several radios. Besides the former Soviet Union, other countries which used the BRDM-2UM included Egypt and Germany. **Kit features** extensive refined details, multi-part slide-molded top and lower hulls, finely detailed rubber tires, photo-etched parts and decals with Russian Army markings.

5514 TSMS5514 Total Parts: 220 Length: 6.5 in (165 mm)

ROUND 2 MODELS®

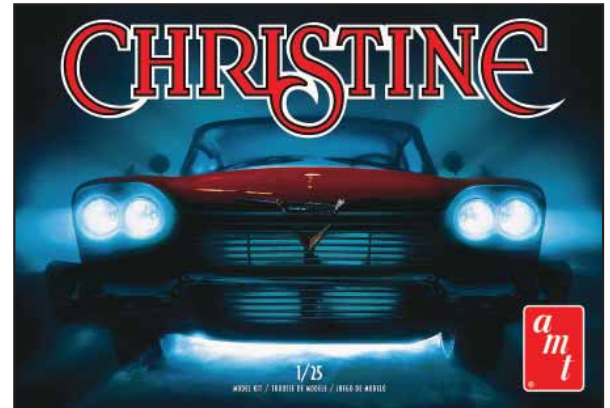

Supplying your creative side for sixty years!

Round 2 Models is proud to feature the most diverse and popular lines in plastic models through their three famous brands. Through AMT®, MPC® and Polar Lights® Round 2 Models is able to offer nearly every

model you can dream of from classic cars to Sci-Fi favorites and pop culture icons. Their lines of quality, detailed models are sure to inspire imagination and creativity in any hobbyist.

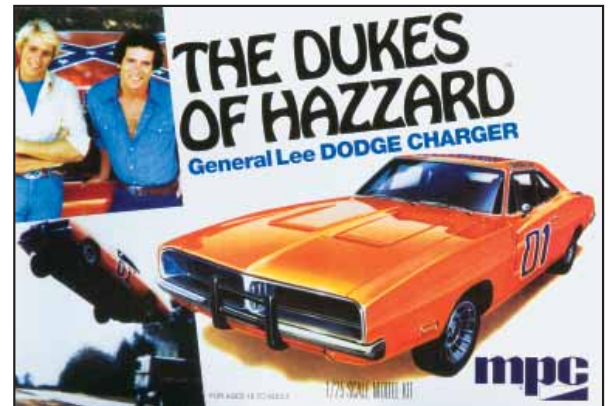

AMT is one of the most recognized names in the hobby industry. Their innovative approach to modeling has been a delight to hobbyists everywhere since 1948. AMT kits have set the standard for excellence everywhere. A large and diverse bank of tooling lets AMT offer a broad selections of 1/25 scale models for prominent license-built models from GM®, Ford®, StarTrek®, Chrysler®, Munsters® and Batman® to name a few. One of their most popular kits is Christine, the famously rapacious '58 Plymouth® Fury, so evil they made a movie about her.

AMTS0801

When you want something wild, look to MPC to satisfy your need for exotic subjects. Since 1963 MPC has been manufacturing highly-detailed kits from drag racing and factory stock cars to sci-fi, horror and rocket kits. Many of the popular kits MPC produced years ago are being brought back to delight an entirely new generation. MPC is proud to offer products based on Dark Shadows®, Road Runner®, Dukes of Hazzard® and Spider Man®. The boys would be proud of MPC's '69 General Lee Charger®. It's not just a car; it's a rip-roarin' rebel riot!

MPCS0706

Every day the good folks at Polar Lights take images that have only existed on the silver screen or in the back of people's minds and turn them into amazing kits. Their models of StarTrek®, Batman®,

Marvel® and other classic licenses are incredibly authentic in every detail. With model kits dealing with the mystical and the musical, sci-fi, horror and pop culture Polar Lights has a model to fit every fancy. And with snap-together kits like the Scooby-Doo™ Mystery Machine, Polar Lights appeals to every age too!
