From the Experts:

Axial has joined forces with several of the most recognized names in off-roading – to include Jeep, Wrangler and Poison Spyder. The Jeep, Wrangler Wraith, Poison Spyder Edition was designed to resemble its full sized “scale/1:1” counterpart. We have teamed up with the extremely talented Poison Spyder Race team to bring you the latest version of the wildly popular Axial Wraith. Loaded with brand new features, this vehicle is bred for rock racing.

Long story short...

This new Jeep, Wrangler Wraith is right at home ripping across the desert at high speeds, or tackling even the toughest terrain with ease.

OFFICIALLY LICENSED TECHNICAL PARTNERS:

TRUE 1/8 SCALE SIZE — UNDENIABLE 1/8 SCALE POWER

835E

Ready-to-Run 1/8 Scale Brushless 4WD Racing Buggy

You get all this with the 835E:

- Onyx 1/8 scale 2200kV brushless motor
- Onyx 1/8 scale 120A waterproof ESC
- Countersunk, 3.25 mm anodized aluminum chassis
- Waterproof, sealed receiver box
- Beefy, heavy-duty parts, including:
 - 3.5 mm shock shafts
 - 4 mm shock towers
 - 4.5 mm tie-rod turnbuckles
 - 5 mm camber turnbuckles
- Hardened steel driveshaft and gears
- Installed sway bars, front and rear
- High-downforce wing
- Threaded, Big Bore aluminum shocks
- Protective dust boots for shock shafts
- Gray-anodized aluminum parts, including:
 - Shocks and shock mounts
 - Steering drag link
 - Wheel hubs and nuts
 - Suspension parts and more
- Mounted tires with foam inserts
- Racing wheels with 17 mm hex hubs
- Painted, trimmed body (choice of 3 color schemes)

Duratrax 2-channel 2.4GHz
Radio System

Includes:

- Waterproof SX501WP digital, metal-g geared, high-torque steering servo
- Dual-rate steering
- Servo reversing
- Trims
- Charge jack
- Throttle fail-safe

DTXD78** 835E 1/8 Scale EP 2.4GHz Buggy RTR
 DTXD78LL Black
 DTXD78WW White
 DTXD78YY Yellow
 Length: 19.9 in (505 mm)
 Width: 11.9 in (302 mm)
 Height: 7.5 in (190 mm)
 Wheelbase: 12.8 in (325 mm)
 Weight w/battery: 8.4 lb (3.8 kg)

Not just bulletproof...
Guaranteed bulletproof.

Duratrax is so confident of the 835E's durability that all Stress-Tech parts are covered with a 1-year FREE replacement guarantee. See instruction manual for covered parts.

From the Experts:

With the 835E you get affordable price and exceptional performance in the same package. The brushless power system features an Onyx 2200kV motor with an Onyx 120A waterproof ESC, for serious air, explosive hole shots and wailing top end speeds. Hardened steel and anodized aluminum parts keep you in the action, and the 2.4GHz radio offers confident control.

Long story short...

Big-time electric buggy excitement doesn't get any more realistic than the 1/8 scale 835E!

EVADER EXT 2.4 FAST, TOUGH — AND 100% COMPLETE

The invincible Evader EXT racing truck platform now comes so complete, it requires nothing except your skills at the wheel. A 2.4GHz radio system is included and installed. It's fully waterproof, with a waterproof receiver box, SX401WP servo and Sprint WP electronic speed control. Charge the supplied 1500mAh Onyx NiMH battery and you're ready to power down the track to a first-place finish!

Ready to Run, 1/10 Scale Electric 2WD

All-terrain tires on stylish 6-spoke wheels.

Oil filled shocks with metal caps.

Waterproof receiver box and steering servo.

Compatible with 6-7 cell NiCd/NiMH and 2S hard case LiPo batteries.

Waterproof ESC with brake, reverse and battery cut-off.

Photon Speed 2 motor for impressive acceleration and top end.

Includes a 1500mAh battery, wall charger and 8 AA batteries

PROTECTED BY STRESS-TECH GUARANTEE 1 YEAR

Duratrax is so confident in the Evader EXT2.4's durability that we will cover all Stress-Tech parts with a 1-year FREE Replacement Guarantee!

WATERPROOF

Molded MAGNAFLEX™ Parts

DTXD33** 1/10 Scale Evader EXT2.4 RTR

- Length: 16.1 in (409 mm)
- Width: 12.8 in (325 mm)
- Height: 6.6 in (168 mm)
- Ground Clearance: 1.4 in (36 mm)
- Weight: 3.6 lb (1.63 kg)

The Evader EXT2.4 is fully assembled and ready to go, with the same legendary toughness that the Evader line is known for. The evolution of the Evader EXT2 to the EXT2.4 offers beginners and sport racers a "one-box solution" — that is, a model that comes with everything, right down to the batteries and charger.

Long story short...

The Evader EXT2.4 leads the way in value, convenience and all-out fun!

NISSAN GT-R

1/10 scale Nitro 4wd Ready-to-run

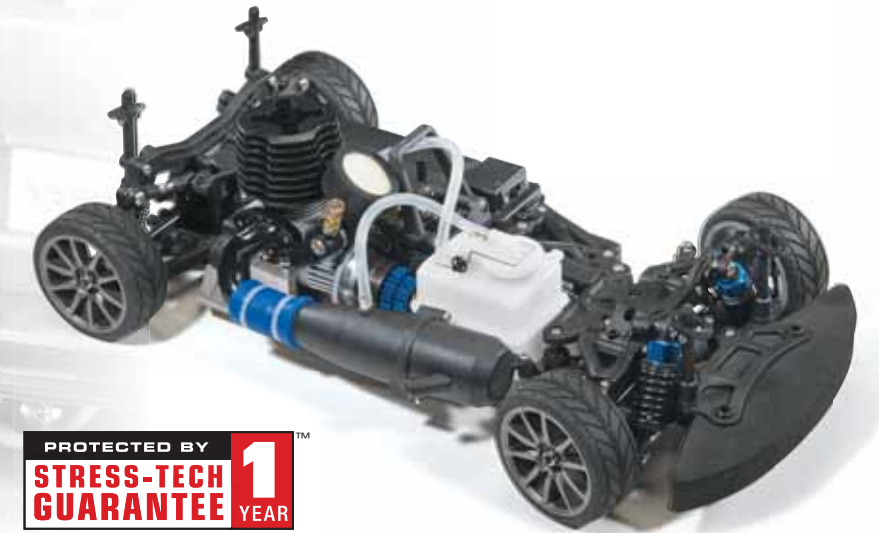

A scale beauty — and performance beast.

The real Nissan GT-R tops 190 mph and goes from zero to 60 in just over three seconds — which explains the “super” in supercar. That’s also a good word for this officially licensed R/C version. Durable and ready-to-run, it’s a sweet on-road machine even for non-modelers. Check out the chassis and you’ll find the kind of equipment that gets hard-core racers excited, too — like an easy-to-adjust pillow ball front suspension and 2-speed transmission with adjustable shift point.

T240F 2.4GHz Radio System

- Duratrax 2.4GHz FHSS radio system by Futaba®
- High-rpm ST18-S engine with dual chamber tuned pipe
- Super Start™ RTR hand-held starter system
- Painted, finished polycarbonate body
- Oil-filled shocks with clips for easy ride height adjustments
- Full set of ball bearings
- All metal gears (front spool/rear diff)

PROTECTED BY
**STRESS-TECH
GUARANTEE** 1 YEAR

Length: 17.3 in (440 mm)
Width: 8.5 in (215 mm)
Height: 5.3 in (135 mm)
Weight: 4.1 lb (1.86 kg)

From the Experts:

Here’s an opportunity to satisfy your need for speed with officially licensed style! This Nissan GT-R on-road machine comes ready to run, complete with an ST18-S nitro engine with dual chamber tuned pipe and a 2.4GHz radio system. The strong, lightweight aluminum chassis is loaded with quality components for exhilarating performance. And the famous Stress-Tech Guarantee lets you drive with confidence!

Long story short...

The Nissan GT-R complements your driving skills with scale detail and awesome speed, acceleration and handling!

THE NEXT GENERATION OF REEDY SONIC 540 PERFORMANCE!

Reedy Sonic 540 Mach 2 Spec & Modified Motors

Mach 2 motors have the right stuff to take you to the winner's circle! Alloy end caps replace the plastic versions to prevent accidental timing movement and provide better bearing alignment. Slightly smaller vent holes reduce the chance of debris entering the motor while still maintaining excellent air flow. New bearing sizes improve reliability and increase maximum RPM, and silver-plated solder tabs reduce power-robbing resistance.

- Lightweight design
- Optimized air flow
- Dual precision ball bearings
- High-strength balanced sintered rotor
- Adjustable timing with alloy end cap
- Silver-plated solder tabs
- Completely rebuildable
- 200mm sensor wire
- Ultra-smooth sensored operation
- More rotor options, including 6.0, 7.0 and 8.0 models for greater fine-tuning to specific conditions
- Built to ROAR, EFRA and IFMAR specs for stock and modified racing

AN EXCELLENT VALUE IN A VERSATILE SOLDERING IRON

TK60 60W Soldering Iron

- High-quality heating element
- "Power On" indicator lamp
- Slender, non-slip grip
- Heavy-duty grounded power cord
- Comes with a chisel tip; replacement chisel tip sold separately

TKPR1000TK60 60W Soldering Iron
TKPR1010 2.4mm ChiselTip-TK60

Deluxe Iron Holder with Sponge

- Stand-alone accessory securely holds any soldering iron
- The base holds a sponge for cleaning the tip

TKPR1020 Deluxe Iron Holder with Sponge

Cleaning Wire with Holder

- Effectively cleans any soldering iron's tip without water or a sponge
- Comes with a convenient holder

TKPR1015 Cleaning Wire with Holder

From the Experts:

For budget-conscious modelers wanting a soldering iron for R/C projects as well as household jobs, the TK60 Soldering Iron is the ideal choice. The Cleaning Wire and Deluxe Iron Holder can be used with any soldering iron.

TrakPower™
SPEED EQUIPMENT

Long story short...

Count on TrakPower quality and dependability for all your soldering needs!

GET THE "AUXILIARY ADVANTAGE" WITH PHOENIX EDGE ESCs!

Phoenix Edge ESC Series

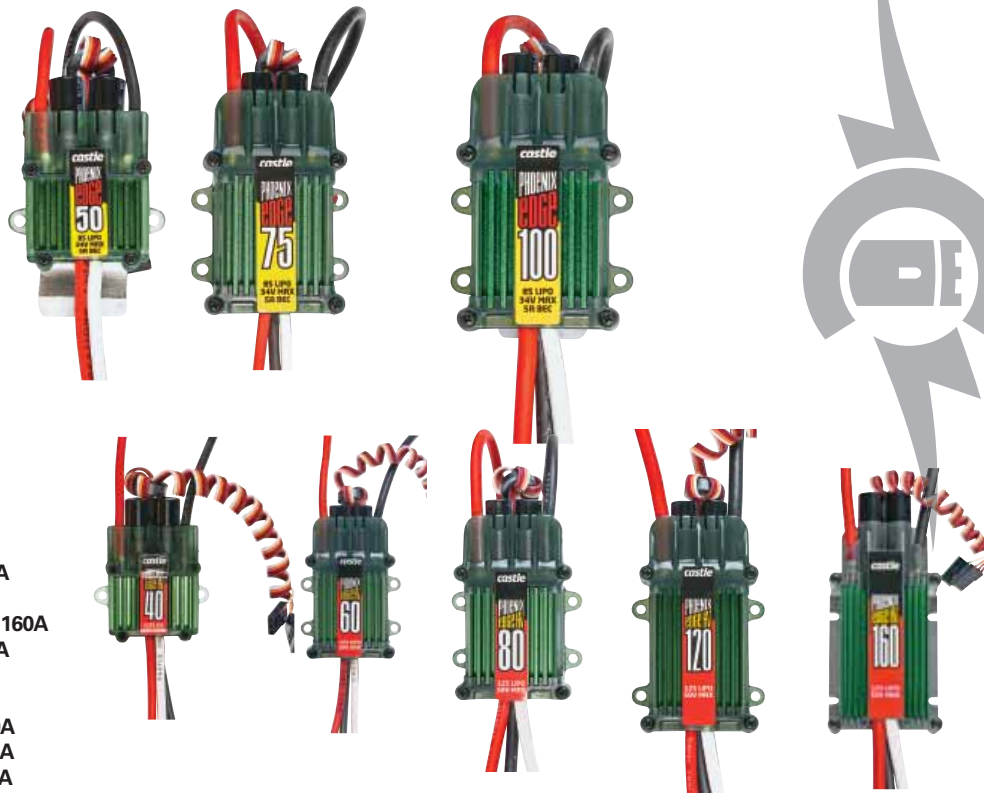

With the introduction of the Phoenix Edge series of ESCs the next evolution in speed controller technology has arrived! Phoenix Edge ESCs come equipped with a white auxiliary wire that is user programmable, and capable of a wide range of functions that until now modelers could only dream of.

Phoenix Edge ESCs are designed for helis ranging from 450 to 800 in size, along with fixed-wing aircraft up to 1.20 and larger, and are available in Lite, HV and Lite HV versions. You'll still enjoy cutting-edge software functions, data logging and USB programming capability via a Castle Link USB adapter — and you get all this for the same price as previous Phoenix speed controllers!

The white auxiliary wire in Phoenix Edge ESCs can:

- allow you to make adjustments in governor gain input while in flight
- serve as an audible beacon after an unexpected landing
- act as an RPM output for 3-axis gyros that support RPM sensors
- be used as an ESC arming lock* or as a receiver arming lock

*A coupon for a Free Arming Lockout Key is included.

- CSEM0000 Phoenix Edge 100 32V 100A
- CSEM0101 Phoenix Edge 75 32V 75A
- CSEM0102 Phoenix Edge 50 32V 50A
- CSEM0104 Phoenix Edge 120 HV 50V 120A
- CSEM0106 Phoenix Edge 60 HV 50V 60A

DRIVE WHAT THE WINNERS ARE DRIVING

Team Durango continues to dominate at prestigious racing events!

Talking about race-winning technology is one thing: those who are serious about winning back it up at world-class venues. And that's where you'll find Team Durango.

The race results all confirm what more and more drivers are discovering: that Team Durango knows what it takes to get to the top spots on the podium. A Hybrid Gear Design that offers four motor mounting options. A fully adjustable platform. Big Bore shocks. Advanced electronics featuring a blinky-mode ESC and 2.4GHz radio. And a whole lot more.

If you follow top-level R/C racing competition, you're sure to notice that Team Durango vehicles are leading the way. Check them out at your local hobby dealer today...and start your own winning tradition.

Skill Level **2**

Blenders™

Two rockets, unique ascent and descent
Max. Altitude: 75 ft (23 m)
Height: 2.6 in (6.6 cm)
Skill Level: 2
ESTT3233

From the Experts:

Rocket season is in full swing, and Estes has what every modeler wants most!

Long story short...

The year's most exciting Estes models have hit the shelves, and there's something to satisfy any rocketeer!

1/25 SCALE "SMOKEY AND THE BANDIT" 77 PONTIAC® FIREBIRD®

Let the chase begin!

Outrunning the law isn't easy, but for \$80,000 you bet 'Bandit' will try it. Helping him out in his high-speed hijinks are a runaway bride, a pack of sympathetic truckers and a V-8 powered black Pontiac Firebird. When State Trooper 'Smokey' gets on his trail, hilarity ensues as cop and con race across several states. Relive all the greatest moments from "Smokey and the Bandit" with this great kit! **Kit features** include an opening hood, detailed V-8 engine, removable "T" top roof panels and a shaker style air intake.

RMXS4027 Total Parts: 89 Skill Level: 3 Length: 7.8 in (200 mm)

1/25 '55 JUKEBOX FORD® Hum along with a Boss® 429

Pro-Modified racers are some of the most killer machines on the planet. In the Pro-Mod circuit just about anything goes; designers pull out all the stops to turn old muscle cars into one crowd-pleasing package. Dick Brown Motorsports runs this beauty, a modified '55 Crown Victoria® with a stretched Boss 429 engine. This **kit features** a complete tube frame race chassis, lift-off body with separate hood and detailed Boss 429 race engine.

RMXS4036 Total Parts: 115 Skill Level: 2 Length: 8.5 in (216 mm)

1/25 '69 CAMARO® ZL-1 All-American iron

All through the muscle car era, engines were getting larger and more powerful. Eventually, huge engines became prohibitively expensive and GM® executives put a cap on engine size. At the request of several dealers, the COPO® program was started to get around those restrictions. Dealers could specially order ZL-1s with 427 cu. in. (7.0 L) engines. The upgrade made the ZL-1 very expensive, but for some gearheads the power was worth the price. This **kit features** a detailed engine, air induction hood and full interior with separate side panels.

RMXS4056 Total Parts: 105 Skill Level: 2 Length: 7.3 in (184 mm)

1/25 SCALE '90 MUSTANG® LX 5.0 A new pony car for the new decade

Mustangs were some of the most popular cars Ford® produced. Early models raked in sales figures that rivaled the Model A. By the mid-eighties, however, the line was losing ground to stiff competition. The revamped 5.0 model was released in 1987 and quickly became popular because it was cheap and powerful. Those same characteristics made it popular with police departments also and soon Mustangs were both chasers and chased. This **kit features** a detailed 5.0 liter V-8 engine, quad shock suspension system, police light bar, radio and rear spotlights.

RMXS4252 Total Parts: 131 Skill Level: 2 Length: 7.3 in (184 mm)

1/25 SCALE MIAMI VICE® '72 DAYTONA SPYDER

Nothing says vice like a cop driving a \$300,000 car

In the seventies, detective Sonny Crockett prowled the streets of Miami in a Daytona Spyder for the hit show Miami Vice. Barring an Abrams, there was no better vehicle for chasing down the bad guys of South Beach. For the first two seasons of the devious TV show, the car was actually an illegal replica of the Ferrari®. A lawsuit precipitated the explosive exit of the car in the first episode of the third season. This **kit features** a detailed V-8 engine and a convertible top.

RMXS4917 Total Parts: 78 Skill Level: 2 Length: 7.4 in (189 mm)

1/25 SCALE MISS DEAL FUNNY CAR SSP

A unique spin on a '53 Studebaker

Funny cars have been a hit with racing fans since the mid-1960s. These modified racers have an altered wheelbase and big rear slicks for increased traction. Today, classics like this redesigned '53 Studebaker can be seen at events such as the NHRA® Heritage Hot Rod Racing Series. This limited edition **kit features** an early funny car frame and suspension, a hinged one-piece simulated fiberglass body, a detailed supercharged V-8 engine, a removable hood, a center-mounted bucket seat, a rear parachute pack, a push bar, soft black tires and chrome-plated parts.

RMXS7817 (Limited Edition) Total Parts: 107 Skill Level: 2 Length: 8.3 (210 mm)

1/100 SCALE TORNADO

Storms left by the Cold War

Panavia® Tornados are variable-sweep, multi-role combat aircraft in use with the air forces of many world nations. There are few aircraft in the world with as broad a range of missions profiles as the Tornado. Depending on the equipment load it is given, the Tornado can counter air, land, sea and missile threats and even deploy nuclear weapons. Continuous upgrades to these aircraft have allowed them to stay airworthy from their introduction in the early eighties to the present day.

RVLS0602 Total Parts: 22 Skill Level: 2 Length: 6.2 (158 mm)

1/100 SCALE EUROFIGHTER TYPHOON

Fly Europe's finest fighter

After thirty years in development, the Eurofighter Typhoon is making its way into Europe's air forces. It's well worth the wait. State-of-the-art pilot voice interaction systems make the Typhoon easier to control than the average fighter while the plane's agility and top speed exceeds that of many fighter jets. Once the Meteor missile's development is finished, the Typhoon will be able to engage any aircraft from beyond visual range, making it one of the deadliest fighters in the sky.

RVLS0603 Total Parts: 23 Skill Level: 2 Length: 6.2 (158 mm)

1/72 SCALE JAPANESE INFANTRY WWII

Driven by honor

In many ways, the Imperial Japanese Army was the most remarkable fighting force ever constructed. In less than seventy years the army went from a force fighting largely with swords and spears to a modern army equipped with tanks, machine guns and rifles. Even more importantly, Japanese forces retained the codes of honor passed down from samurai that insisted Japanese forces fight to the death. It was this progress in equipment and tenacity of temperament that made the Japanese such tough opponents during WWII. **Kit features** fifty Japanese infantry men.

RVLS2507 Total Parts: 50 Figures, 56 parts Wingspan: 9.1 in (230 mm)

1/72 SCALE FAIREY GANNET T.5

Sub sonic sub hunters

Aviation experimentation has led to a lot of truly wild aircraft, including the Fairey Gannet. Two engines drove two props which counter-rotated on the same shaft. It had gull wings and an odd triple tail. It's amazing the Gannet worked! It did, though. It was safe, stable and great at smashing enemy subs. The Gannet is awkward, but it's also an effective plane well deserving its own kit! This **kit features** a full cockpit, a weapons bay, a radome, movable propellers and decals for XT752 and a Royal Navy bird.

RVLS4845 Total Parts: 105 Skill Level: 4

© Shannan Hendricks

1/72 AND 1/144 SCALE TORNADO ECR "TIGER MEET 2011"

Fly the tiger you prefer

Panavia® Tornados are variable-sweep, multi-role combat aircraft in use with the air forces of many nations. Tornados flown by No. 1 Squadron, Fighter Bomber Wing 32 are frequently among the best decorated aircraft at Tiger Meets. These aircraft follow that tradition of excellence with an amazing paint scheme. Both kits feature detailed Tornado ECRs with full cockpits, pivoting wings, detailed undercarriages, external fuel tanks, missiles and special livery decals for Jabo G 32, Tiger Meet 2011. The 1/72 scale Tornado also includes decals for Tiger Meet 2012.

RVLS4846&4847 Total Parts: 4846- 63; 4847-155 Skill Level: 3
Length: 4846- 4.6 in (118 mm), 4847- 9.6 in (243 mm)

NEW RELEASES

Hobby kits

1/72 SCALE F-20 TIGERSHARK TWO KIT COMBO

Shot down by politics

Northrop F-20 Tigersharks were designed to be the most efficient, affordable and effective fighters of modern times. Their weapon systems were second to none and they could be deployed faster than any contemporary fighter. Unfortunately, because of stiff opposition from F-16 proponents, Tigersharks were never accepted by the U.S.A.F. Now you can build this one of a kind plane that could have changed the face of the Air Force entirely! This limited edition **kit features** decals for prototypes 1 and 2 codes: 339 and 340.

00967 (Limited Edition) HSGS0967 Total Parts: 2 x 51 Skill Level: 3

1/144 SCALE J-AIR EMBRAER 170 MODERN JET AIRLINER

A brand new logo for a whole new era

The most compact of all the Embraer E-Jets, the Embraer 170 made its first public appearance in 2002. Today, 175 Embraer 170s currently serve major airlines all around the world, and it's fast becoming one of today's most-requested jet airliners. The new decals for this Japan Air Lines airliner render the company logo in perfect, vivid detail. It's sure to be among the most anticipated aircraft models of the year! This **kit features** decals that show the new Japan Air Lines Logo.

11102 HSGS1102 Total Parts: 50 Skill Level: 3

1/72 SCALE P-2H (P2V-7) NEPTUNE J.M.S.D.F.

Loaded with first-class upgrades!

The Lockheed® P-2 Neptune was a Maritime Patrol aircraft. In America, the P-2 replaced the PV-1 Ventura and PV-2 Harpoon. The Japan Maritime Self Defense Force build a licensed version of the P-2, designated the P2V-7. The P2V-7 was re-designated as the P-2H in 1962. Today, you can find many examples in museums all over the U.S. This limited edition **kit features** decals to model one of two J.M.S.D.F. P-2 Neptunes: 1. 3rd Squadron, Code: 4660 & 4658; 2. 7th Squadron, Code: 4782 & 4783.

01902-7 (Limited Edition) HSGS1902 Total Parts: 117 Skill Level: 3

1/72 SCALE KAWASAKI KI-45A I

Toryu "Dragon Slayers"

The twin-engine Ki-45 was designed to carry a heavy armament on long-range missions. They were clumsier than single engine fighters, but a 37 mm cannon made them highly effective against bombers. One of the air groups deployed by Japan shot down eight B-29s on its first mission. The Ki-45 took a heavy toll of bombers, ships and men before becoming obsolete as more single-engine fighters arrived with American carriers. This limited edition **kit features** decals for two Ki-45s of the fourth fighter regiment based out of Yamaguchi A.F.B.

02039 (Limited Edition) HSGS2039 Total Parts: 77 Skill Level: 3

1/72 SCALE F-14A TOMCAT "VF-211 FIGHTING CHECKMATES"

That's not Santa...

Like many military groups, VF-211 has many traditions. One of those traditions involves painting a rocket-wielding thug in a Santa suit (his name is Brutus) on their planes whenever the group is deployed over Christmas. The 14,500 lb (6,600 kg) payload of the F-14A Tomcat ensures that Brutus delivers extra-explosive presents to all the bad boys and girls. When it comes to high-explosive ordinance, it is much better to give than to receive. This limited edition **kit features** decal markings for two "Fighting Checkmates" aircraft.

02040 (Limited Edition) HSGS2040 Total Parts: 191 Skill Level: 3

1/72 SCALE SR-71A BLACKBIRD + D21-B DRONE Top secret reconnaissance

The American public was not meant to know that the SR-71 and D21-B existed. These secret aircraft were built by Lockheed Skunk Works to gather intelligence on the activities of the Soviets and Chinese. The D21 was one of the first ever operational unmanned aerial vehicles. Unfortunately, because of technological restrictions, the drones frequently experienced problems that prevented mission completion. SR-71s were very successful. Together they gathered valuable intelligence and pushed the boundaries of aerospace technology. This limited edition **kit features** decals for two experimental aircraft based at Area 51.

02041 (Limited Edition) HSGS2041 Total Parts: 51 Skill Level: 3

1/72 SCALE SHENYANG® J-15 CHINESE NAVY CARRIER FIGHTER

Sucking all the good tech out of the Sukhoi-33

The PRC J-15 fighter is a copy of the Sukhoi-33, made in violation of international copyrights and agreements. Liaoning, an aircraft carrier, was bought from Ukraine to be turned into a "casino". Instead the carrier is armed, upgraded and used to launch the J-15. The project is technically illegal, but apparently you can do what you want when you own sixteen of the most powerful jet fighters around. This limited edition **kit features** decals for Chinese People's Liberation Army Navy Codes: 552, 553 Carrier Liaoning, Nov, 2012.

02042 (Limited Edition) HSGS2042 Total Parts: 204 Skill Level: 3

1/72 SCALE AH-1S COBRA CHOPPERTWO KIT COMBO Sink your fangs into a "Kisarazu Special"

Cobras are the Japan Ground Self Defense Forces' key attack helicopters. Crews and ground crews take great pride in their helis, often giving them extensive detailing for special occasions. It's easy to see why the J.G.S.D.F values the Cobra so highly; it's a veritable whirlwind of destruction. The Cobra's 20 mm Gatling-style cannon, TOW missiles and 38 70 mm rockets will mess up your whole day. This limited edition kit combo **features** two complete Cobra kits with decals for the 19th and 20th anniversaries of the 4ATH.

02043 (Limited Edition) HSGS2043 Total Parts: 78 x 2 Skill Level: 3

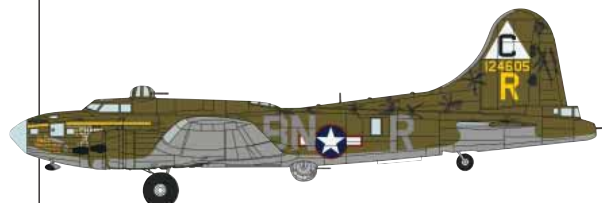

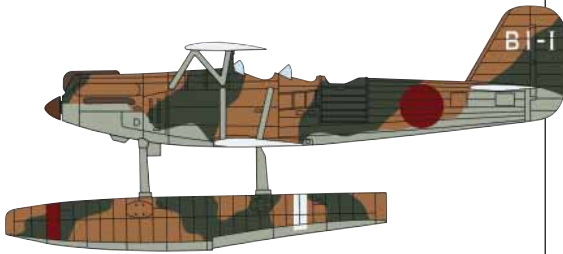

1/72 SCALE B-17F FLYING FORTRESS "KNOCK-OUT DROPPER"

The 8th Bomber Command's luckiest lady

No fighter cover, no experience, no Allies on the ground, no problem. "Knock-out Dropper" was the first bomber in the Eighth Bomber Command to fly 50 missions, and then it was the first to fly 75. Since crew members only had to complete 25 missions to be rotated out, this lucky lady carried a full three crews to and from some of the most dangerous targets of WWII. "Knock-out Dropper" was a lucky craft, coming through all 75 missions with minor damage. This **kit features** decals for "Knockout Dropper" 1944.

02044 (Limited Edition) HSGS2044 Total Parts: 98 Skill Level: 3

1/72 SCALE KAWANISHI E7K RECONNAISSANCE SEAPLANE

The Battleship Kirishima's eyes in the sky

In World War II, the limited effectiveness of radar meant ships often relied on visual contact to establish enemy positions. Seaplanes, launched from catapults on ships like the Kirishima, could detect threats long before radar or ship lookouts could. Low speed and light armament made seaplanes sitting ducks if enemy fighters showed up, but the risk was often worth the reward. This limited edition **kit features** decals for four I.J.N. floatplanes: Battleship Kirishima Code: BI-1, Depot Ship Chiyoda code: Z-55 and two additional codes Z-52/53.

02045 (Limited Edition) HSGS2045 Total Parts: 85 Skill Level: 3

1/72 SCALE MITSUBISHI® F-1 TWO KIT COMBO

Making sure enemies never make it to shore

The Mitsubishi F-1 was the first jet aircraft that Japan produced after WWII. Its primary armament is the ASM1, an anti-ship missile containing a warhead with more than 330 lb (150 kg) of high explosive that can target ships thirty miles (50 km) away. Couple that range with the F-1's combat radius and you don't want to be on a hostile boat within 400 miles (650 km) of Japan. This limited edition kit combo **features** parts for two aircraft and includes decals for three J.A.S.D.F. aircraft.

02046 (Limited Edition) HSGS2046 Total Parts: 73+72 Skill Level: 3

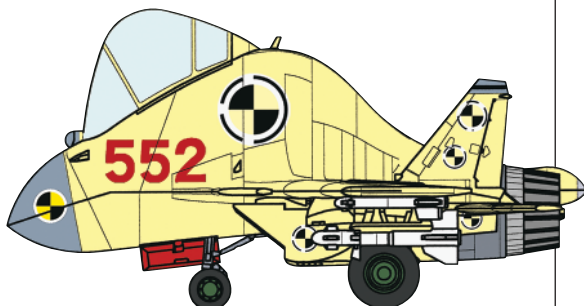

1/72 SCALE CF-18A HORNET

Our northern neighbor's contribution to NORAD

The Royal Canadian Air Force chose the Hornet as a replacement for the aging aircraft they had been using to defend NORAD airspace. Many of the Hornet's, like twin engines, make it ideal for long patrols over Arctic waters. In addition to their watchdog role, these fighters have fought in many conflicts since the Gulf War. Canada's demonstration team, the Snowbirds, fly their aircraft with a panache to match the American Blue Angels. This limited edition **kit features** special decal markings for the R.C.A.F. demonstration team code: 781.

02047 (Limited Edition) HSGS2047 Total Parts: 76 Skill Level: 3

CHINESE NAVY J-15 EGG PLANE

It's not eggs-actly copyright in-fridge-ment

The Chinese Navy broke a whole carton of international egg-reements when they plucked all the juiciest **features** of the Russian Sukhoi-33 and used them to feather their own bird. If that's not eggs-asperating enough, the roost for these finagled fighters is an aircraft carrier lifted from the hen house under false pretenses. Other countries have squawked plenty, but they ended up with egg on their faces. Apparently, you can do anything when you're the cock of the walk. Ruffle some feathers when you crow about your Grade-A construction!

60502 HSGS6052 Total Parts: 36 Skill Level: 3

1/48 SCALE F-16C FIGHTING FALCON®

Turkish delight

Turkey is just one of dozens of countries that have taken advantage of the F-16 Fighting Falcon's astounding power. This particular Turkish Air Force variant is tasked with suppressing enemy air defenses. A sophisticated targeting system guides the Falcons to range, the weapons do the rest. Cannons, rockets, missiles and bombs can all be fielded from the Falcon with a precision and in such profusion that target destruction is virtually assured. This limited edition **kit features** decals for a F-16C from Turkey's 192 Squadron, decorated for the 2012 "Tiger Meet."

07338 (Limited Edition) HSGS7338 Total Parts: 121 Skill Level: 3

1/48 SCALE SEA KING HAR.5 "ARK ROYAL"

Superior search-and-rescue realism

The Sea King HAR.5 was added to the 771 Naval Air Squadron's fleet in 1987, just as it adopted a SAR (Search and Rescue) role. Famous for their grey and red color scheme, these helis are on call 24/7, 365 days a year. Sea Kings were deployed from the HMS Ark Royal in the Bosnian War and 2003's Invasion of Iraq. This limited edition **kit features** new large radar parts, new mesh intake filter parts and one decal marking option: 1. Royal Navy HMS Ark Royal 771 NAS, Code: 824.

07339 (Limited Edition) HSGS7339 Total Parts: 193 Skill Level: 3

1/48 SCALE F-104S STARFIGHTER "VELTRO 1"

The last of the fastest

The F-104S Starfighter – a licensed Italian version of the supersonic Lockheed® interceptor – was the final F-104 variant. It could carry up to 7,500 lb (3,400 kg) in external stores. The Italian Air Force's 5th Wing, 23rd Fighter Squadron took advantage of the F-104S's Mach 2.2 speeds and extensive weapons arrays for thirty-five years, until it was decommissioned in 2004. This limited edition **kit features** new ventral fin parts, new resin machine gun cover parts and one decal marking option: 1. Italian A.F. 5th Stormo 23rd Gruppo 5-42: Veltro 1.

07340 (Limited Edition) HSGS7340 Total Parts: 145 Skill Level: 3

Academy Models 1/350 Scale USS Indianapolis (CA-35)

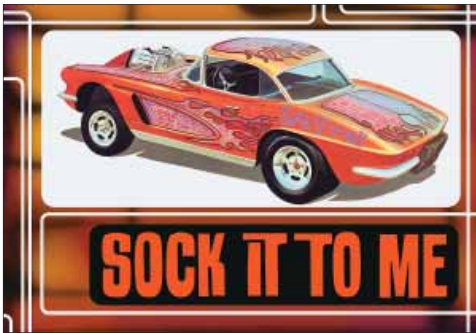

Armed with atomic authority

The USS Indianapolis was impressively sized, and impressively armed. Weapons included nine 55 cal. guns, eight 25 cal. anti-aircraft guns – and in July 1945, the enriched uranium used to build the Little Boy atomic bomb. **Kit features** new tooling, waterline and full hull options, a detailed superstructure, 8" main guns, 5" guns, quad 40 mm and twin 20 mm cannons, radars, a searchlight, life rafts, floater nets, an aircraft steam catapult, a scale SC-1 Seahawk search plane, wartime markings, four U.S. flags and an optional display stand with name plate.

14107 ACYS4107

Plastic Models

AMT® 1/25 Scale 1962 Corvette®

This sporty classic will sock it to ya!

This unique AMT custom creation – sporting a colorful design and 1960s-inspired “Sock It to Me” graphics – ranks as one of the brand’s rarest, most celebrated kits. Now it’s back, with updated parts and decals that are sure to help keep it flying off the shelves! **Kit features** white plastic molding, multiple engine and wheel options, lettered drag slicks, a reproduction “Sock It to Me” sticker and a wildly colorful decal sheet.

AMT803/12 AMTS0803 Skill Level: 2

Minicraft® 1/144 Scale MiG-21

Soviet Stratafortress Slayers

Over half the world uses or has used the MiG-21 in their air forces, and it’s easy to see why. The extremely simple, low-maintenance design of these aircraft makes them easy for relatively unskilled ground crews to maintain and the flight characteristics are perfect for inexperienced pilots. The MiG-21 is an interceptor and the earliest aircraft with a confirmed kill of a B-52 Stratafortress. Many countries purchased the MiG-21 or were supplied it by the Soviets. This **kit features** decals for Soviet Union and the Warsaw Pact Countries’ aircraft.

14677 MMIS4677

Minicraft® 1/144 Scale Nakajima C6N Saiun (Myrt)

Available for the first time in ten years

The Nakajima C6N was a late addition to the Imperial Japanese Navy Air Service’s aircraft fleet in World War II. It was also Japan’s fastest carrier-based aircraft at the time, reaching maximum speeds of 379 mph (610 km/h). Thanks to the C6N, Japan could go toe-to-toe against the Allies’ intimidating F6F Hellcat. Although it was fast, it wasn’t invincible. The C6N also had the honor of being the last aircraft shot down in WWII. Japan officially surrendered five minutes later. This exciting kit reissue **features** new decal markings.

14680 MMIS4680

Moebius® 1/25 Scale Dark Knight Rises Tumbler

The Dark Knight’s stallion of choice

With a new trilogy on the way, Batman’s designers decided that a new Batmobile was needed. They designed the Tumbler. A heavily-armored, jet-powered, six-wheeled contrivance capable of auto-pilot, compressing into a largely indestructible armored mass, and deploying a lighter reconnaissance vehicle—the Bat Pod. It unfortunately didn’t include the flashing lights and pulsating strobes of earlier models. All in all it is exactly the kind of vehicle an affluent vigilante with a corner on a defense industry might drive. This **kit features** brand new tooling, detailed interior and vinyl tires.

943 MOES0943 Length: 7 in (177.8 mm) Total Parts: 120 Skill Level: 3

Polar Lights® 1/25 Scale Vintage Tommy Grove Mustang® Funny Car

Get “The Going Thing,” before it’s gone

“The Going Thing” was driver Tommy Grove’s beloved 1969 Ford® Mach I Mustang funny car. It debuted in late 1968 with power coming from a 427 SOHC engine and a chassis built by the Logghe Stamping Company. Grove’s car made headlines in 1969 when it was clocked going 203 mph (327 km/h). **Kit features** snap-together assembly, a fully detailed tubular “Logghe” chassis, a blown Ford drag engine, a choice of ‘69 or ‘70 front fasciae, pad-printed drag slicks, front/rear wheel options, assorted chrome parts and colorful decals with optional markings.

POL852 PLLS0852 Total Parts: Skill Level: 2

Polar Lights® 1/25 Scale Scooby-Doo® Mystery Machine®

Create your own crime-solving capers

"Scooby-Doo, Where Are You!" premiered on CBS® in September of 1969. The cartoon, created by Hanna-Barbera writers Joe Ruby and Ken Spears, became an instant hit with kids. The show's combination of light scares and slapstick humor proved to be magic ingredients; over 300 episodes and four decades later, the Mystery Machine gang is still solving supernatural mysteries. **Kit features** easy snap-together assembly, all-new tooling, painted plastic parts, opening rear doors, spinning wheels, painted Scooby-Doo and Shaggy figures, plus easy-to-apply stickers.

POL901 PLLS0901 Skill Level: 1

Trumpeter® 1/35 Scale Mk. 23 MTRV Cargo Truck

Moving M777s through tough terrain

Also known as the 7-Ton, the Medium Tactical Vehicle Replacement (MTRV) is among the latest all-terrain, all-wheel drive vehicles used by the U.S. Marine Corp and U.S. Navy. It is used for various tasks, including troop transport and hauling supplies like fuel and water. Its most famous use is transporting the M777 howitzer through desert terrain. **Kit features** a detailed, slide-molded multi-directional cab, a full drivetrain assembly with engine, transmission, differential housing and suspension units, clear windshields and side windows, hollow rubber tires, detailed wheel hubs and photo-etched parts.

1011 TSMS1011 Total Parts: 430 Length: 9.1 in (230 mm)

Trumpeter® 1/35 Scale Soviet KV-122 Heavy Tank

Hot and heavy Soviet firepower

KV tanks were some of the first true heavy tanks in combat. Their dense armor plating provided ample protection against Finnish anti-tank weapons during the Winter War. However, they were no match for German artillery during WWII. 1944's KV-122 prototype was virtually identical to the KV-85, but it was equipped with a 122 mm D-25T cannon instead of an 85 mm D-5T cannon. **Kit features** refined details, a multi slide-molded lower hull, a detailed turret, 192 individual track links, a metal gun barrel, brass wire, photo-etched parts and decal markings.

1570 TSMS1570 Total Parts: 440 Length: 10.9 in (278 mm)

Trumpeter® 1/35 Scale Soviet BTR-60/PU Armored Personnel Carrier

Amphibious APCs

Many vehicles have the "all-terrain" descriptor attached to them, most actually aren't. BTR-60s really are. Mud, dirt, rocks, asphalt—nothing stops them; they can even walk on water! The mobility of the BTR-60 was impressive, its armor wasn't. RPG-7s, invented in the same year as this APC, could easily destroy the vehicle. Soviet forces still used the BTR-60 in most of their conflicts from its introduction in the sixties until the early nineties. This highly detailed **kit features** hollow rubber tires and some photo-etched parts.

1576 TSMS1576 Total Parts: 620 Skill Level: 3 Length: 8.1 in (206 mm)
Wingspan: 18.8 in (477 mm)

Trumpeter® 1/32 Scale A-1D Skyraider

The ultimate aerial assault vehicle

Sheer reliability and massive ordnance capacity kept the piston-powered Skyraiders flying well into the jet-power era. Their slow flight actually made them better for the ground attack role than any contemporary jet aircraft; their ordnance capacity was also much greater. Millions of pounds of ordnance and one toilet were dropped by the Skyraiders against ground targets in Korea and Vietnam. The Skyraider retired from American service in 1972. This **kit features** a highly detailed Skyraider with the option for folded wings and photo-etched seatbelts and cockpit interior.

2252 TSMS2252 Total Parts: 400 Skill Level: 3

Trumpeter® 1/700 Scale German Zerstörer Z-7 *Light German destroyer of WWII*

Named Hermann Schoemann after a WWI navy crewman, Z-7 was a German destroyer commissioned on September 15, 1937. German ships of the period were generally inferior to British ships in range, speed and magazine capacity. Z-7 was no exception. Her role was restricted to mine laying until she engaged a crippled British light cruiser, the Edinburgh. Stiff resistance left Z-7 so badly damaged that she was scuttled on May 2, 1942. **Kit features** the option to build a waterline or full-hull model; includes photo-etched parts for the mast.

5793 TSMS5793 Total Parts: 230 Skill Level: 3 Length: 6.7 in (170 mm)

Trumpeter® 1/72 Scale Panzer Selbstfahrlafette "Dicker Max" *Germany's answer to the Maginot Line*

After World War I, France designed the Maginot Line—a seemingly impenetrable network of bunkers, gun emplacements and tank obstacles. To combat those fortifications, the "Dicker Max" was designed. This self-propelled artillery piece carried a 105 mm gun capable of knocking out hardened targets from miles away. In the end, German forces simply went around the French fortifications instead of attacking them. Two prototypes of the "Dicker Max" were built but, with no sizable fortifications to destroy, became tank destroyers instead. This **kit features** a detailed hull and turret.

7108 TSMS7108 Total Parts: 100 Skill Level: 3 Length: 4.2 in (106 mm)

MASTER PIECES JIGSAW PUZZLES®

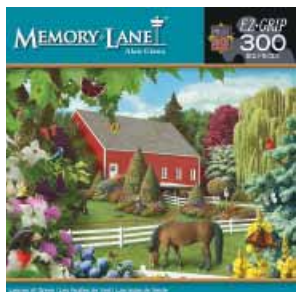

Make a Masterpiece, One Piece at a Time

Puzzles offer something for everyone, from the nostalgic Memories of "Lucky Day" puzzles, to the scenic vistas of Ted Blaylock's "Canadian Pacific™" collection and the warm and fuzzy feelings the animals of "Friends Forever™" bring. They're even available in multiple parts counts: 1000 piece "Cinderella™" sets, charming 750 piece "Running Free™"; and even EZ-Grip 100 piece "Crossing Cedar Creek™" puzzles featuring artwork by Alan Giana.

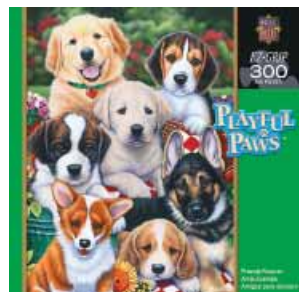

All Master Pieces Puzzles Feature

- Full color artwork
- Pieces made from recycled materials
- Suitable for ages 13+

RAVENSBURGER® ORIGINAL PUZZLES

High-quality puzzles, original artwork

When you're in need of a little serenity, there's nothing like a Ravensburger puzzle. The landscapes of "Tropical Paradise", "Seychelles", "Tuscan Flair", and "Country Cottage" are entrancing. Landscapes aren't all Ravensburger offers, though; the selection includes cats, ships and treasures beneath the waves. To keep it all organized Ravensburger offers the "Puzzle Sort and Go!®" — a stackable, six-tray sorting system and carrying case for puzzles up to 1,000 pieces!

All Ravensburger Puzzles Feature

- Premium Softclick Technology — puzzle pieces fit together perfectly for a seamless finish!
- Original full-color artwork
- Suitable for ages 13+

BUFFALO GAMES AND SUNSOUT® PUZZLES

Two companies, one passion for great puzzles

With all the puzzles out there, it's hard to decide which to get; but with low cost, high-quality Buffalo Games and SunsOut puzzles the question is: which do you get first? You can't go wrong with any of these puzzles, but the scenic masterpieces of Chuck Pinson "New Horizons," and "Sweet Garden" are great choices from Buffalo Games. "Beautiful Autumn" from SunsOut is a natural beauty of colorful Autumn days.

All Buffalo and SunsOut puzzles are

- Proudly made in the U.S.A.
- Pieces are made from recycled paper board
- SunsOut Puzzles are also made with eco-safe, soy-based ink.

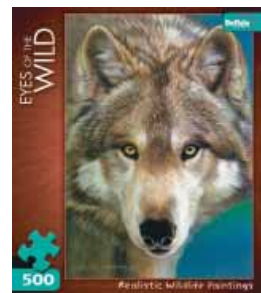

WINNING MOVES® GAMES PASTIME PUZZLES®

Pass the time making a true work of art

From the simple elegance of the 300 piece "Lone Wolf" to the intricate, 1000 piece, scenic masterpiece that is "Cathedral Snow," Winning Moves puzzles are stunning pieces of artwork that you can assemble yourself! Whether you want to experience the frigid march of the penguins in "Penguin Family" or relax by the ocean with "Maui Sunrise," there is something everyone can enjoy in these puzzles.

Winning Moves Puzzles

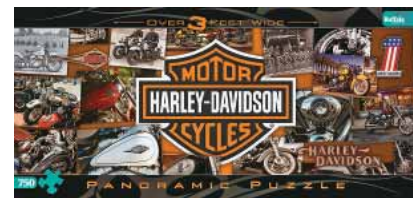

- Contain information about the artist who created your puzzle
- Some include "Whimsy" pieces—unique puzzle shapes
