R/C FLIGHT JUST BECAME AS EASY AS 1...2...3!

AirCore™

1

Pick any AirCore airframe

Flyzone
how high will you soar™

2

Install the Power Core

It's a revolutionary concept in radio-control aircraft! AirCore airframes run on a single Power Core (available separately), which can be quickly removed and easily installed into other AirCore airframes, thanks to a magnetic attachment system. The Power Core contains all the power and control components for the plane: a brushless motor, brushless ESC, Tactic SLT receiver and 3 ultra-micro digital servos.

Since you can fly all AirCore airframes with the same Power Core, you can pilot a large fleet of AirCore planes, at a fraction of the time, effort and expense!

See it

3

Fly with your SLT transmitter

From the Experts:

With the ability to fly any AirCore airframe with a single Power Core, the AirCore modular aircraft system is the newest and most efficient way to fly! Each airframe is precision engineered for smooth, stable flight. The self-contained Power Core takes the guesswork out of equipping your airplane, and the models are expertly decorated for outstanding looks!

Long story short...

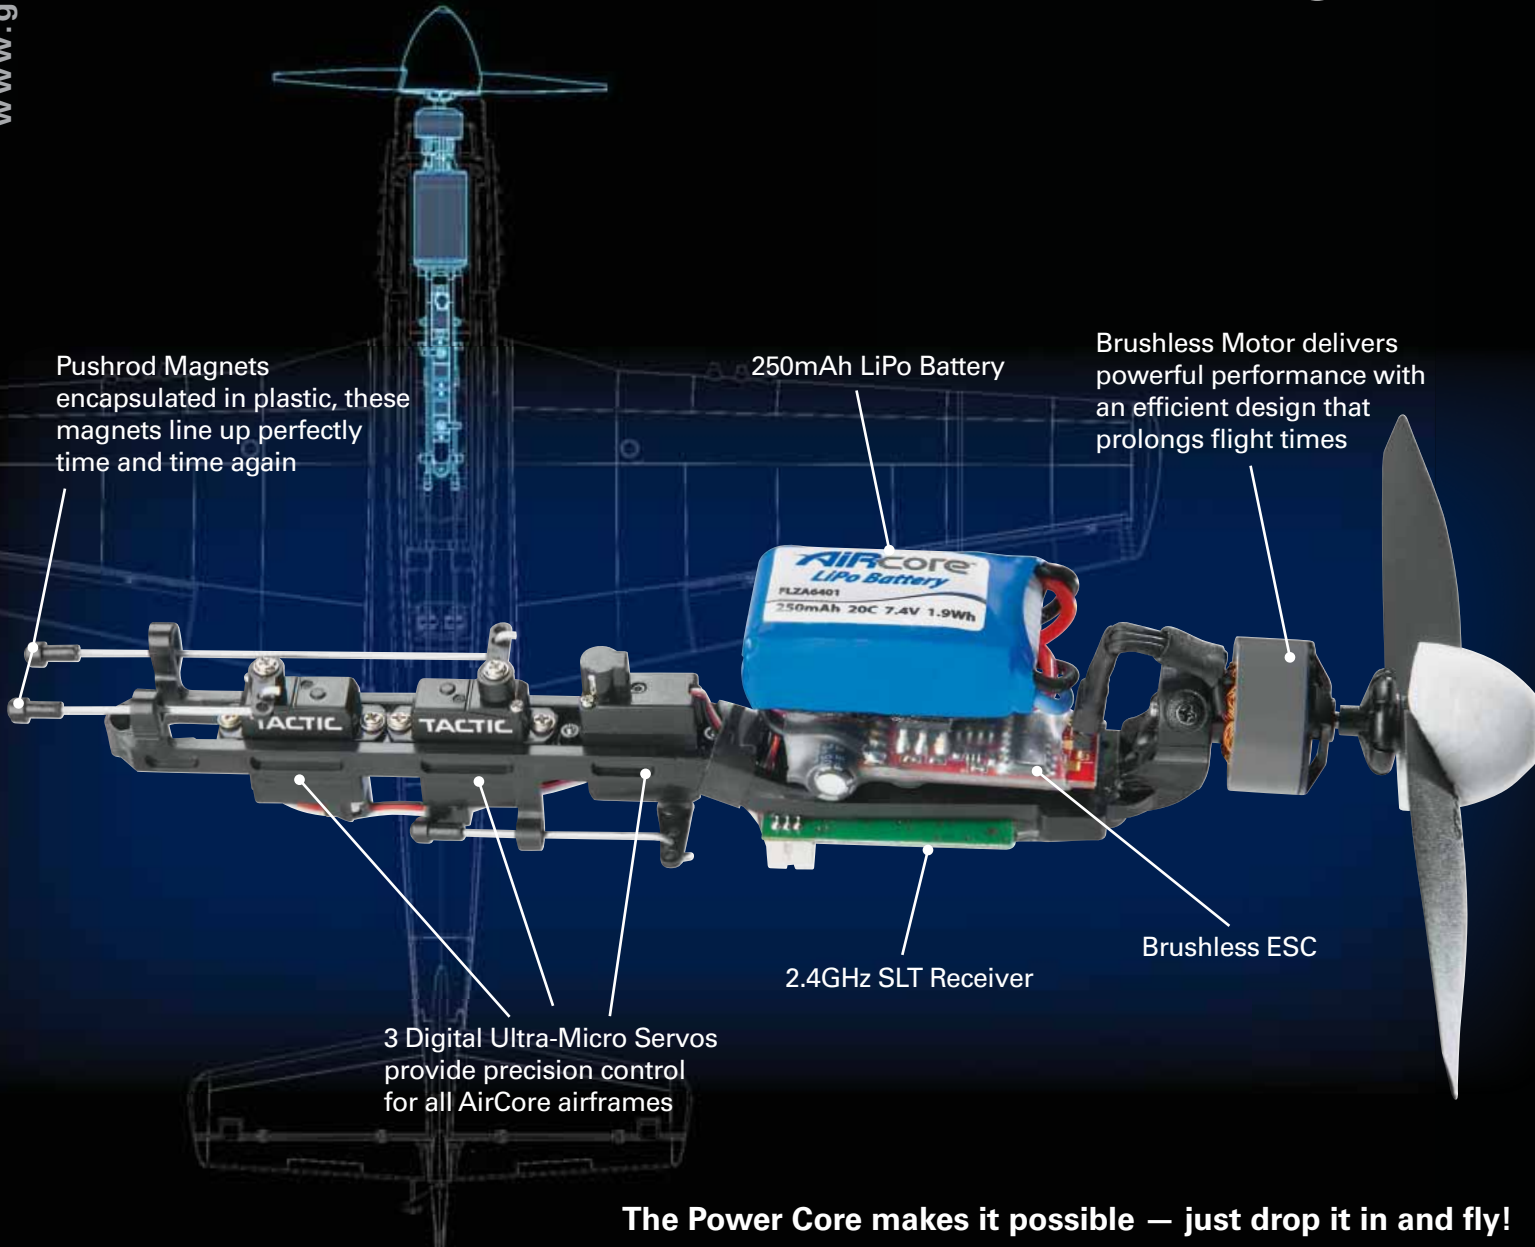

Fly any airframe with one Power Core and one radio – that's the AirCore advantage!

Turn the page to find out more about AirCore!

AT THE HEART OF EVERY AIRCORE MODEL IS THE POWER CORE!

COMPLETE THE EXPERIENCE WITH THESE AIRCORE ACCESSORIES

Pushrod Magnets encapsulated in plastic, these magnets line up perfectly time and time again

250mAh LiPo Battery

Brushless Motor delivers powerful performance with an efficient design that prolongs flight times

3 Digital Ultra-Micro Servos provide precision control for all AirCore airframes

2.4GHz SLT Receiver

Brushless ESC

The Power Core makes it possible — just drop it in and fly!

- Self-aligns with the airframe cradle
- Locks in securely with magnets — no tools required
- Flight controls connect automatically
- All components are included and expertly engineered
- Motor thrust is tuned and set perfectly

FLZA6400 AirCore Power Core Cartridge
U.S. Patent Number 8,256,714. Other Patents Pending Worldwide.

THE 7.4V 250mAh LIPO BATTERY — POTENT POWER FOR EVERY AIRCORE PLANE!

- A compact, lightweight pack that delivers 5-6 minutes of flying

FLZA6401

TACTIC AND ANYLINK — THE ULTIMATE IN CONTROL AND CONVENIENCE

TTX403 4-Channel Mini Radio

- Lightweight and ergonomic
- Compatible with all micro Tx-R aircraft

TACJ2403

TTX650 6-Channel 2.4GHz Computer Radio

- 20 model memory
- Easy-to-use pushbutton operation
- Digital trims with slow/fast adjustment
- Large, easy-to-read graphing LCD screen

TACJ2650

AnyLink 2.4GHz Radio Adapter

- Lets you use your radio to fly any Transmitter-Ready (Tx-R) aircraft, as well as most any electric airplane equipped with a 2.4GHz SLT receiver
- Works with virtually any transmitter, regardless of brand, band or modulation

TACJ2000

BRING AN ENTIRE AIRCORE FLEET TO THE FLIGHT LINE!

Swap the Power Core into any other airframe and fly!

AIRCORE

Principle™ Trainer

A gentle-flying, high-wing design — a great plane to start with
Wingspan: 22 in (560 mm)
Length: 17.8 in (452 mm)
Weight: 3.4 oz (96 g)
FLZA3903

Cathy II P-51 Mustang

Modeled after a revered Allied fighter from World War II
Wingspan: 22 in (560 mm)
Length: 19 in (485 mm)
Weight: 4.1 oz (116 g)
FLZA3904

Arriving in January

Focke Wulf FW-190

AirCore's salute to one of Germany's most aggressive warbirds
Wingspan: 22 in (560 mm)
Length: 18.5 in (470 mm)
Weight: 4.3 oz (122 g)
FLZA3905

Arriving in January

Spitfire

Replicates the staunch defender of British airspace
Wingspan: 22 in (560 mm)
Length: 18 in (457 mm)
Weight: 4.1 oz (116 g)
FLZA3907

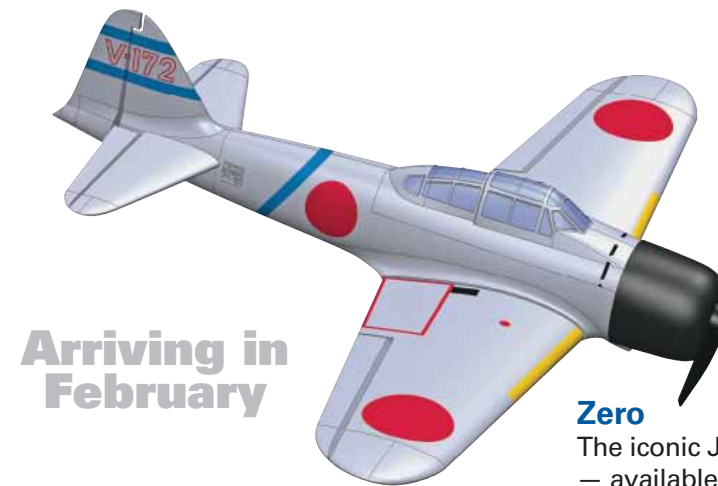

Me-109

Rule the skies with this fearsome German Luftwaffe favorite
Wingspan: 22 in (560 mm)
Length: 20 in (510 mm)
Weight: 4.0 oz (113 g)
FLZA3906

Miss America P-51 Mustang

A patriotic trim scheme adorns this 5-time air race champion
Wingspan: 22 in (560 mm)
Length: 19 in (485 mm)
Weight: 4.1 oz (116 g)
FLZA3910

Arriving in February

Zero

The iconic Japanese WWII fighter — available in two trim schemes
Wingspan: TBA
Length: TBA
Weight: TBA
FLZA3908 White
FLZA3909 Green

Arriving in February

There's a wide variety of AirCore airframes to choose from — with many more on the way!

MEET THE CHALLENGE: AN AWESOME FEATURE OF RF7!

RF7 REALFLIGHT

It's so much fun, it's downright addictive! The Challenges feature on RF7 includes several different game-like events that will test your piloting skills to the max. During each challenge you score points; completing a level unlocks new, more difficult levels. Make it through all the levels, and nothing at the flying field will faze you. It's a killer learning tool, and another reason RealFlight is the #1 selling flight sim!

True to Life™

There's an edition of RF7 for every pilot:

Tactic Tx-R Radio Edition

Experience RealFlight with a real radio! The TTX600 SLT radio will fly every plane included with the RealFlight software, plus any aircraft at the field with an SLT receiver.

InterLink Elite Controller Edition

Featuring the incredibly realistic 8-channel InterLink Elite controller, with digital trims, the convenience of QuickSelect, Reset/Rewind and much more.

Transmitter Interface Edition

Plug the included interface into your transmitter and your computer's USB port, and control the sim with your favorite radio.

RF7 also offers all this, and so much more:

- Over 130 total aircraft, encompassing all types of airplanes and helis
- Over 40 flying sites to explore, in both PhotoField™ and 3D
- RealPhysics™ 3D
- TrueView™ realistic lighting
- Reset/Rewind on the InterLink Elite controller
- Multiplayer and MultiMode
- Onscreen camera controls
- Water takeoffs and landings
- Night flying
- Welcome Screen
- Real Rendering™
- AccuModel aircraft editor
- FlexiField™ flying site editor
- TruFlo™ Wind Dynamics
- Blade stop autorotations
- Numerous combat options

SOME OF THE NEW FEATURES YOU'LL FIND ON RF7:

Unlimited Combat

Fly any aircraft with any available weaponry, against other pilots with the same options.

New Aircraft

RF7 features several exciting new airplanes and helis.

Heads-Up Display (HUD)

Have vital information such as altitude, airspeed, heading, etc. displayed on your aircraft's windscreen.

CHALLENGES

Air Race

Fly around and through gates in a specific pattern at specific attitudes. Score is based on speed and accuracy, with different aircraft and different courses at each level.

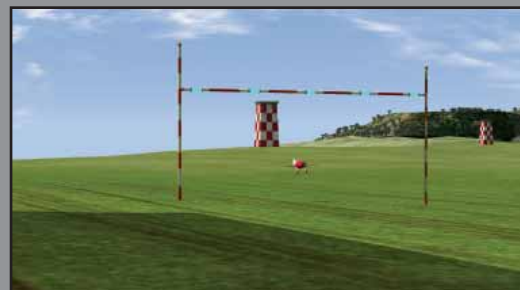

Balloon Burst

Burst as many balloons as possible before time runs out. Higher levels bring more balloons — some of which may be hard to find.

Grapple

Maneuver helis and quadcopters to pick up and re-locate items using an electromagnetic grapple.

Limbo

Navigate past obstacles through multiple horizontal poles, answering the age-old question, "How low can you go?"

Ring Race™

Test your reflexes as you pilot your aircraft through a series of rings. Your model's airspeed increases and the courses become more unpredictable as you advance to higher levels.

Spot Landing

Try to land safely and accurately; as targets decrease in size you may have limited power...or no power at all!

- GPMZ4500 RF7 w/InterLink Elite Controller Mode 2
- GPMZ4501 RF7 w/InterLink Elite Controller Mode 1
- GPMZ4504 RF7 w/Interface
- GPMZ4508 RF7 Software-Only Upgrade
- GPMZ4510 RF7 w/TTX600 Transmitter & Interface

From the Experts:

RF7 is taking RealFlight to new heights — especially with exciting additions such as the game-like Challenges, Heads-Up Display and unlimited combat options. All of the other great features are still here, and you have three RF7 editions to choose from: one with the versatile InterLink Elite controller, one with a transmitter interface, and one with an actual TTX600 SLT transmitter.

Long story short...

Once you've experienced RealFlight RF7 and the fun of the Challenges feature, you'll be hooked!

INTELLIGENT TECHNOLOGY MAKES FLYING EASIER!

Fly it Now!™

- Two versions — with camera and without camera
- Integrated LEDs allow for cool lighted flight

Beginner and Expert Flight Modes

Select Beginner or Expert flight modes from the transmitter. In Beginner mode, releasing the sticks lets the 1Si stabilize itself in flight — perfect for when you're unsure of how to react. Expert mode turns off the TAGS-FX accelerometers, allowing greater maneuverability. Choose the mode that's right for you. New pilots enjoy unprecedented confidence...experts gain the precision to execute perfect maneuvers.

Everything is included:

- 2.4GHz SLT radio
- LiPo battery and USB charger
- "AA" batteries
- Extra rotor blades
- Rotor blade guards

The 1Si Quadcopter is available in a version with a micro digital camera for taking still photos and shooting video, with on/off control from the transmitter. Save them onto the included 2GB micro SD memory card with USB card reader.
*The 1Si with camera is not to be used for commercial ventures. Be sure to fly in a safe environment and respect the privacy of others.

Actual Direction Control
Turn it on, and the 1Si goes in the same direction that you move the sticks — whether it's flying toward you or away from you.

Return to Pilot
Utilizes built-in sensors to bring the 1Si back to its pilot automatically with a push of a transmitter button.

Maximum stability from 3 gyros and 3 accelerometers

From the Experts:

There's never been a quadcopter this small with so much technology built-in! The 1Si RTF is flight-ready right out of the box. Beginner and Expert flight modes let you choose the level of control for maximum confidence, with advanced technologies to aid you even more. Want more? It's also available with a micro digital camera!

Long story short...

The 1Si takes quadcopter technology to a new level, with features that make this machine highly advanced!

AX10™ DEADBOLT™
 1/10th SCALE ELECTRIC 4WD #AX90033
READY TO RUN

- █ Officially licensed 2.2 Maxxis Trepador tires
- █ Officially licensed 2.2 Raceline Renegade wheels
- █ Durable, lightweight & rigid tube style chassis
- █ New body, roll cage & driver
- █ 4-Link suspension, optimized to reduce axle steer
- █ WB8 metal to metal universal joint drive shaft system
- █ AE-2 ESC with drag brake featuring LiPo cutoff

- █ Protective transmission cover to keep dirt and debris out of your gears
- █ Performance competition shocks featuring threaded shock bodies
- █ Protective electronics box designed to keep receiver away from dust and debris
- █ The AR60 OCP-Axle (off center pumpkin design) gives you more ground clearance and a better driveshaft angle

AX10™ Deadbolt™
Length: 448mm (17.6")
Width: 288mm (11.3")
Height: 250mm (9.8")
Wheelbase: 310mm (12.2")
Ground Clearance: 3 in (77 mm)
Weight: 4.75lbs (2.15kg)

For additional items see a complete list at www.GPDealer.com

From the Experts:

The Axial AX10™ Deadbolt™ packs all of the speed and versatile crawling capabilities as its original AX10 counterpart and adds a custom body with a molded driver figure, three interchangeable heads (three styles included: A motocross, open skull-face or motorsport helmet) and officially licensed Maxxis 2.2 Trepador tires giving the vehicle a more aggressive and scale look! Power is provided by a 20T motor and AE-2 ESC that's mounted vertically to help shield it from dust and debris.

Long story short...

The new AX10 is packed with all of the original and trusted features along with a set of high performance Maxxis Trepador tires.

From the Experts:

The Axial SCX10™ Jeep® Wrangler G6 is the type of vehicle that is rarely left stock once in the hands of its owner, especially someone competing in a RECON G6 Challenge event! We understand this and have come to the table with our next offering, the SCX10™ Jeep® Wrangler G6. It's a kit version that allows you to build your Jeep® vehicle from the ground up, specifically for RECON G6 Challenge events.

Long story short...

Trail running with the SCX10™ Jeep® Wrangler G6 is just about the most fun you can have off-roading!

HELI FLYING MADE EASY, FUN AND AFFORDABLE

AXE™ 100 CX

Electric Coaxial Helicopter

Fly it Now!™

Coaxial design offers the most stable flight, making the Axe 100 incredibly easy to fly. The sturdy, flexible flybar remains intact even if it strikes an object!

Nothing else is needed to start flying with the Axe 100 CX RTF. Everything is in the box, including a TX410 2.4GHz SLT radio transmitter, 3.7V 150mAh LiPo battery, USB-compatible LiPo charger and "AA" batteries.

- Ideal for beginners and budget-minded R/Cers
- Forgiving flight
- Confidence-boosting durability
- Perfect for flying indoors
- The TX410 2.4GHz SLT radio transmitter included with the RTF version features Beginner & Expert modes that start newcomers out slow and allow for more maneuvering ability as pilot skills grow
- The lower-cost Tx-R version can be flown with any 4-channel SLT radio

HMXE0818 Axe 100 CX EP Coaxial Heli RTF
HMXE0819 Axe 100 CX EP Coaxial Heli Tx-R
Rotor Diameter: 7.4 in (190 mm)
Length: 9.0 in (230 mm)
RTF Weight: 1.1 oz (33 g)
RTF Requires: Nothing
Tx-R Requires: 4-channel SLT transmitter or AnyLink and compatible 4-channel transmitter

Heli-Max®

From the Experts:

The Axe 100 CX makes getting into heli flying a thoroughly enjoyable experience. It flies so smoothly, anyone can get the hang of it in just a few minutes, and the durable components will bail them out if they do have a mishap. The full fuselage and flashy graphics give the Axe 100 CX looks beyond that of a beginner model, and it's available Ready-To-Fly or ready for your transmitter.

Long story short...

Perfect for anyone interested in R/C, the Axe 100 CX makes learning easy, fun and affordable.

AN AUTHENTIC-LOOKING FIRE FIGHTER THAT'S READY FOR ACTION!

Rescue 17 Fireboat 2.4GHz RTR

RESCUE 17

- Finished, assembled fiberglass hull, deck and superstructure
- Tactic TTX490 4-channel 2.4GHz SLT transmitter
- TR400 4-channel 2.4GHz SLT receiver
- 600-size motor
- Water-cooled, waterproof and LiPo-compatible 11.1V ESC
- Water pump, servos, linkages and drive system

Incredible scale details!

- Working water cannon with high-capacity pump
- 10-piece LED lighting system
- Wire rope deck railing
- Ladders and stairways
- Life preservers, fire extinguishers and standpipe
- Radar and radio mast
- Windows, cabin detail and more

A high-volume pump on the forward water cannon lets you shoot a jet of water up to 10 feet! A powerful servo rotates the cannon up to 120°.

LEDs give you working cabin lights, searchlights, an illuminated communications mast and red/green nav lights for night runs. Lights switch on separately and run on main battery power — no auxiliary pack required.

Release the latch, and the cabin tilts back for easy access. A sturdy brace swings down for support during battery changes and maintenance.

AQUB5700 Rescue 17 Fireboat 2.4GHz RTR

Length: 38 in (965 mm)
 Beam: 10.25 in (261 mm)
 Height: 17 in (432 mm)
 Weight: 8 lb (3.60 kg)

From the Experts:

It's a one-of-a-kind model: a large-scale fireboat that's ready to hit the water just moments out of the box, with extensive detailing that makes it equally display-worthy! The Rescue 17 comes fully assembled, boasting quality fiberglass construction and a working water cannon and LED lights. It also comes equipped with a 2.4GHz radio for interference-free control.

Long story short...

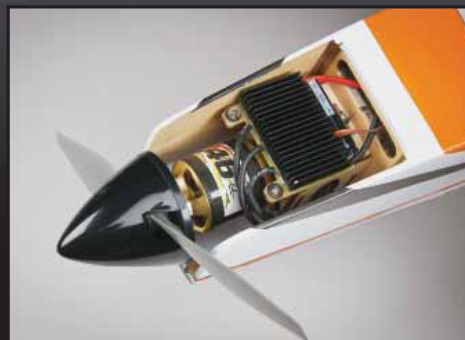

You'll be patrolling your local pond or lake with style when you're at the helm of the Rescue 17 Fireboat!

BREAK FREE FROM THE EVERYDAY

ESCAPADE™ Mx

Almost-Ready-to-Fly .46-.55/EP Sport Plane

With either glow or electric power, the Escapade MX delivers superb sport performance. Included mounts simplify installation of either option.

The two-piece wing adds to the convenience. The wing panels assemble onto a joiner tube, simplifying building and transport.

- Fast, easy, glue-free assembly
- Tail surfaces bolt on and align automatically to save time and effort; even the control horns come pre-installed and pre-aligned!
- Aluminum landing gear and fiberglass wheel pants complement the Escapade MX's built-up wood construction and colorful trim scheme
- A magnetic hatch provides easy access to onboard gear

MONOKOTE
COVERING

GREAT PLANES
MODEL MANUFACTURING COMPANY

GPMA1202 Escapade MX GP/EP ARF
 Wingspan: 52 in (1320 mm)
 Wing Area: 449 in² (29 dm²)
 Weight: 5-5.5 lb (2270-2490 g)
 Wing Loading: 26-28 oz/ft² (79-85 g/dm²)
 Length: 45 in (1145 mm)

From the Experts:

The Escapade MX combines classic sport engineering with the creature comforts you've come to expect from Great Planes. It builds fast, and it flies even faster. It uses commonplace components, and the trim scheme is as eye-catching as it is unique. Throw in the option to choose between glow and electric power, and you have a sport plane that's a break from the everyday!

Long story short...

One exceptional sport ARF + two power options = the Escapade MX!

THE BUGGY FOR SERIOUS 1/8 SCALE RACERS

The DEX408v2 boasts these high-tech breakthroughs in electric buggy design:

- The option of bladder or emulsion style Big Bore 16mm shocks
- Rear suspension arms with extra shock mount positions
- Rear DPA hubs that allow for adjustable roll center
- DPC front caster blocks for added stability

Also on the DEX408v2:

- Narrower inner suspension arm mounts
- New rear bulkhead for rear-mounted shocks and sway bar
- Composite diff cross pins and inserts
- Longer wing mount for improved handling during high-speed cornering
- Pro Team springs and sway bar

DEX408v2

1/8 Scale Electric 4WD Buggy Kit

16mm Big Bore shocks in bladder or emulsion style offer better handling and are compatible with all current spring types.

Position #1

Position #2

Select position #1 for higher traction during cornering, or choose position #2 for smoother cornering.

Driveshaft assembly with clip fittings

Straight rear diff output

TDR0301 DEX408v2 1/8 Scale Electric 4WD Buggy Kit

Length: 15.9 in (405 mm)

Width: 11.9 in (302 mm)

Requires: brushless motor, ESC, pinion gear, radio, servos, wheels, tires, body, battery, charger

From the Experts:

Everything about the DEX408v2 says championship performance! The expertise and attention to detail that Team Durango engineers are known for are on full display with this 1/8 scale electric kit. Extensive research has resulted in a super-efficient drivetrain, improved handling and setups that match PROTeam specs.

Long story short...

If 1/8 scale electric off-roading is your class, then the DEX408v2 is your buggy!

NEWPRODUCT

NEW MARKINGS FOR A PROVEN ROAR CHAMPION!

SC10RS Monster Energy® Toyota® Brushless Short Course Truck 2.4GHz RTR

- The 3-time R.O.A.R. National Champion SC10RS short course racing truck is available with the eye-catching Monster Energy drink sponsor trim scheme!
- Molded composite low-CG chassis
- Blue anodized aluminum V2 coil-over shocks
- 2.6:1 ratio gearbox with heavy-duty sealed gear diff and externally adjustable V2 slipper clutch
- Reedy 3300kV brushless motor and water-resistant XP SC700 brushless speed control with high power connector
- Water-resistant enclosed receiver box
- Short course hex-drive wheels front and rear
- Rugged steel turnbuckles
- Angled bellcrank "coplanar" steering with integral servo saver
- Fully adjustable suspension geometry
- High-traction racing compound rear tires
- Vertical ball end roll-center adjustments front and rear
- Factory-finished short course racing truck body with Monster Energy® Racing markings

ASCD7055 SC10RS Monster Energy
Toyota Brushless SC Truck 2.4GHz RTR
Length: 21.7 in (550 mm)
Width: 11.5 in (293 mm)
Weight: 4.8 lb (2080 g)
Wheelbase: 12.9 in (327 mm)

Long story short...

The graphics are new, but this SC10RS Toyota RTR Short Course Truck boasts the same race-winning pedigree!

RELIABLE, POWERFUL NITRO MUSCLE

Reedy 121VS .21 Off-Road Pull-Start Nitro Engine

- Race-legal displacement
- Reliable operation
- ABC construction
- Precision ball bearings
- Machined aluminum heatsink head
- 2-needle carburetor
- Reliable pull-start system
- Uses a standard glow plug

Pair the XP SC1300 Brushless ESC with a Reedy brushless motor for a potent combination of power and efficiency!

NEWPRODUCT

ESTES® PROTO X™ 2.4GHZ RTF

Nano-sized and primed for indoor flight.

Only \$39⁹⁹!

protoX™

- Compact, beginner-friendly and ideal for indoor flying
- Weighs less than half an ounce
- Bright, built-in LEDs make it easy to see in low-light flight
- 2.4GHz radio links only to your aircraft; multiple Proto X Quadcopters can fly at once
- Gyro provides smooth, stable flight
- Sleek, tough high-tech body
- Includes a 3.7V 100mAh LiPo battery, USB charge cord and spare rotor blades

ESTE4606 Proto X 2.4GHz RTF
 Dimensions: 1.8 in x 1.8 in (45 mm x 45 mm)
 Weight: 0.4 oz (11.5 g)
 Requires: 2 "AAA" batteries

From the Experts:

The Proto X delivers big-time fun in a nano-sized, easy-to-fly package. It's stylishly designed and impressively equipped with virtually everything you need to get up in the air. Add two "AAA" batteries, and you're ready for takeoff!

Long story short...

Incredibly small, incredibly cool, and incredibly priced, the Proto X is this season's must have Quadcopter!

HELIS WITH THE FOCUS ON FUN

RADIO CONTROL HELICOPTER
SOLOPRO 290

LAMA

- Realistic appearance
- Collective pitch 3-rotor blade system
- 4-in-1 control unit with 3-axis gyro, 20A ESC, mixer and receiver
- Brushless motor
- 8g and 9g tail lock servos
- Efficient shaft-drive tail rotor system
- Stable hovering, with a wide 3D aerobatic envelope
- RTF versions include a 6-channel 2.4GHz SLT radio system
- 3S 11.1V 1100mAh 25C LiPo battery

NEAE0100 Solo Pro Lama 290 RTF-Red/Yellow
 NEAE0101 Solo Pro Lama 290 Tx-R-Red/Yellow
 NEAE0105 Solo Pro Lama 290 RTF-Black/Green
 NEAE0106 Solo Pro Lama 290 Tx-R-Black/Green

Main Rotor Diameter: 17.7 in (450 mm)
Tail Rotor Diameter: 4.7 in (120 mm)
Length: 18 in (456 mm)
Width: 3.7 in (95 mm)
Height: 6.4 in (163 mm)
RTF Weight: 16.5 oz (470 g)

From the Experts:

Nine Eagles' Solo Pro Lama 290 helis have all the perks aspiring pilots want in an electric machine: a collective pitch main rotor, brushless motor, shaft-drive tail rotor and more. The gyro, ESC, mixer and receiver are combined into one efficient unit. Go for the convenience of the RTF with 6-channel SLT radio, or fly the Tx-R version with your favorite transmitter!

Long story short...

Whether you're a beginner or an experienced R/Cer, the Solo Pro Lama 290 is a heli you'll enjoy flying!

Nine Eagles

DROMIDA

by Revell

- As easy as they are fun!
- Ready for exciting R/C action right out of the box — no assembled required!
- 1/18 scale — enjoy racing and bashing almost anywhere, indoors or out!
- Super-fast RTRs — capable of speeds of over 20 mph!
- Option/upgrade parts are available to boost performance even more
- 80+% parts compatibility

SC4.18 1/18 Scale EP Short Course Truck 2.4GHz RTR

Length: 11.4 in (290 mm)
 Width: 7.5 in (190 mm)
 Height: 4.1 in (105 mm)
 DIDC0041

BX4.18 1/18 Scale EP Buggy 2.4GHz RTR

Length: 10.2 in (260 mm)
 Width: 7.2 in (182 mm)
 Height: 3.9 in (100 mm)
 DIDC0043

MT4.18 1/18 Scale EP Monster Truck 2.4GHz RTR

Length: 10.6 in (270 mm)
 Width: 7.5 in (190 mm)
 Height: 4.3 in (110 mm)
 DIDC0042

Every Dromida model comes with all this:

- Fully assembled vehicle
- D100 2.4GHz radio system with trims and dual rates
- M370 super high-speed brushed motor
- 2-in-1 waterproof ESC/receiver
- 7.2V 1300mAh NiMH battery
- 110V AC NiMH wall charger
- 4 "AA" batteries

Check out all the great features you'll find on these RTRs!

- Fully adjustable
- Separate steering servo, for better handling
- Oil-filled Big Bore shocks
- Large, protective bumpers on the SC4.18 and MT4.18
- Gear differential
- Independent suspension
- Multiple shock mounting locations, for more precise tuning
- Adjustable camber rods, body mounts and aluminum motor mounts
- Tires are glued to wheels

A complete RTR for only \$99.99!

From the Experts:

With Dromida, you're on the fast track to fun! Every vehicle is complete and ready to run, with quality components like those found on more advanced models. Besides being easy to drive, Dromida RTRs are also durable enough to withstand rugged backyard racing, with speeds of over 20 mph. And each vehicle costs less than \$100, so the whole family can get in on the action!

Long story short...

Dromida vehicles are fun, easy, durable, well-made...and with a price of under \$100, they're also an excellent value!

Atomik 2-3 Cell AC/DC LiPo Balance Charger

The ideal charger for smaller battery packs!

- Charges and balances each cell individually within the pack for optimum performance
- Intuitive LEDs indicate battery charge status
- Compatible with Venom series or 2-3 cell LiPo batteries

ATKP0681
2-3 Cell AC/DC LiPo
Balance Charger

Castle™ Creations 1/10 SV3 Sidewinder SC System + 3800kV

Featuring the all-weather Sidewinder 3 ESC!

- The waterproof Sidewinder 3 ESC can power off-rovers through rain, mud and puddles
- Newly designed case makes removing the fan for driving in wet conditions a snap, with 4mm CC bullet connectors to simplify motor connections
- Industry-leading software functions and USB capability via the Castle Link USB adapter (sold separately)
- Now available paired with a 3800kV motor to create an awesome system at an incredible price!

CSEC0123
SV3 Sidewinder SC
System + 3800kV

Castle™ Creations Quadpack 35

Multiply your power options!

- Includes four 35A multi-rotor ESCs — three without a BEC and one with
- Each ESC features optimized firmware specifically designed for quadcopters and other multi-rotor platforms
- Refresh rates up to 490KHz give platforms exceptional stability and maneuverability, without missing a beat
- Easily programmable using the Castle Link USB adapter (sold separately)

CSEM2500
Quadpack 35

Castle™ Creations Phoenix Edge HVF 160 ESC

The cooler side of speed control!

- A built-in 5V DC fan keeps temps down to keep performance and efficiency high
- Ideal for 700-800 size helis, and interior-mounted ESC applications inside aircraft with no venting
- All other functions are identical to the industry-leading Edge HV 160 ESC, including programming capability via the optional Castle Link USB adapter

CSEM2700
Phoenix Edge HVF
50 Volt 160A ESC

Castle™ Creations Talon 25 ESC 35A 25.2V

Big ESC features in a little ESC package!

- Boasts an impressive 8 amp peak/3 amp continuous BEC, keeping up with the most power-hungry servos
- Includes Castle's industry-leading functions, plus easy programming using the Castle Link USB adapter (sold separately)
- Ideal for 400-size helis running up to 6S LiPos, or 3D foamies using up to 25 amps
- Weighs just 18 grams, and sports a super-low price!

CSEM2800
Talon 25 ESC 35A 25.2V

THERE'S STILL TIME TO GET 2 GREAT RECEIVERS - FREE!

Don't miss this awesome opportunity! Through December 31, 2013, if you buy a Tactic TTX650 6-channel 2.4GHz SLT transmitter you'll also receive not one but TWO Tactic TR624 6-channel 2.4GHz receivers AT NO EXTRA CHARGE — a \$79.98 retail value!

**EXTENDED through
December 31, 2013!**

TTX650 6-Channel SLT Transmitter

- Proven, reliable Secure Link Technology™
- 20-model memory
- Easy-to-use pushbutton programming for airplanes and helicopters
- Large, easy-to-read graphing LCD screen
- Digital trims with slow/fast adjustment
- User-selectable switch assignments

Get TWO Tactic TR624 6-Channel 2.4GHz SLT receivers FREE!

- Compatible with AnyLink, Tactic TTX404, TTX600 and TTX650 transmitters, as well as any transmitter with SLT
- Features a built-in "link" button with red LED status indicator
- Very compact and lightweight — only 0.29 ounces

**A \$79.98
retail value!**

TURN HERE FOR GENERAL HOBBY PRODUCTS

FROM AMATEURS TO EXPERTS, ESTES HAS A ROCKET FOR YOU!

With six skill levels available and over 160 rocket kits to choose from, we've got the rocket that will rock your world.

RTF, ARF and E2X rockets are virtually ready to go; a few moments of final assembly and you're ready to launch!

Are you ready to build your own rocket? These choices are more challenging, but if you have the building skills they give you more 'bang' for your 'buck'.

With Payload Rockets like the ones below, not only can you send a rocket hurtling into the sky, but you can also send something along for the ride!

Long story short...

Add altitude to your fall festivities with this collection of brand-new Estes rockets!

1/25 SCALE '69 FORD® SHELBY® GT500® CONVERTIBLE
 Legendary performance with convertible class

Mustangs were never just cars; they were icons of American industry and ingenuity. For the years that the Mustang was combined with the genius of Carol Shelby, unmatched performance was coupled with an elegance so refined, that these cars are now show-piece collector's items. With its powerful 428 ci V-8, the GT500 was a top competitor on and off the track. **Kit features** a convertible top that can be modeled in the up or down position, optional dual quads, stock or custom wheels and high-rise manifold.

85-4025 RMXS4025 Total Parts: 115 Skill Level: 2 Length: 7.75 in (197 mm)

1/24 SCALE VOLKSWAGEN® '60S BEETLE TYPE 1
 Your ride through the summer of love

They were designed by one of the most hateful regimes in history, but Volkswagen sales peaked at the height of the 60s and 70s. They were icons of the counter-culture movement. The original Type 1s were efficient and inexpensive marvels of engineering. The type became so popular that over 21 million Beetles have been produced throughout their 65-year production run. It has taken nearly fifty years for the automotive industry to create cars to match the Beetle. This **kit features** optional left or right hand drive and a detailed interior/engine.

85-4192 RMXS4192 Total Parts: 125 Skill Level: 3 Length: 6.75 in (171 mm)

1/25 SCALE 1970 PLYMOUTH® HEMI® 'CUDA 2N1
 Top power, total performance

If you ever see a 1970 Hemi Cuda, take a picture, they are one in a million. Only a few over 600 Hemi Cudas were ever made and they remain one of the rarest and most collectable muscle cars of all time. Adding to their appeal is the massive power of the original HEMI engines. Those V-8 beauties crank out 426 horsepower and make an unmistakable roar as the engines gets up to full power. This **kit features** two hood designs and stock or custom rims and suspension.

85-4268 RMXS4268 Total Parts: 149 Skill Level: 3 Length: 7.5 in (190 mm)

1/24 SCALE 1983 CAMARO PRO STOCK
 National Champions

The competition in the Pro Stock class is fierce, and experience counts. From their home in Texas, the Reher-Morrison team won the National Championship in the Pro Stock class 2 years running, 1982 and 1983. They are experts in chassis tuning and getting the most out of their 500 cubic inch Chevy® "Rat Motor". This kit is molded in white and clear with chrome plated parts and soft black tires. Detailed Pro Stock tube chassis. Chevy "Rat Motor" with dual carbs and high-rise manifold. Large rear slicks and deck spoiler.

85-4994 RMXS4994 Total Parts: 106 Skill Level: 2 Length: 7.3 in (186 mm)

1/200 SCALE USS GEORGE WASHINGTON RENWAL SSP "Second strike" submersible

Ballistic Missile Submarines were designed with one very specific thought in mind—vengeance. In the swarm of theories surrounding the concept of nuclear deterrence, these subs serve as Second Strike weapons. In the event of a nuclear first strike that wipes out the command structure of the U.S., these subs were ordered to automatically launch a retaliatory attack heavy enough to wipe out the original attackers. If anyone attacks everybody dies, so nobody attacks. It's genius! Isn't it? **Kit features** removable side panels and interior detail including 16 missile tubes.

85-7820 RMXS7820 Total Parts: 214 Skill Level: 3 Length: 25 in (635 mm)

Revell OF GERMANY® PLASTIC MODELS

1/72 SCALE RUSSIAN BATTLE TANK T-90 Russia's unstoppable main battle tank

The T-90 is perfectly suited to combat on the modern battlefield. Its three-tier defense system consists of conventional armor, explosive-reactive armor and an electronic jamming system that detects and diverts incoming missiles. Tests of this impressive defense system have concluded that the T-90 is virtually invulnerable to most kinds of ground-to-ground munitions, even at very close ranges. Field reports also show that the T-90 is highly resistant to the threats of urban combat, the traditional downfall of tanks. **Kit features** detailed parts, rotating turret and three decal versions.

03190 RVLS3190 Total Parts: 157 Skill Level: 5 Length: 5.6 in (142 mm)

1/76 SCALE "MONTY'S CARAVAN" Home, mobile home on the battlefield

Bernard Montgomery was commander of the British Army in Africa from 1942 on. Because of the blistering heat and blowing sands of Africa, "Monty" frequently worked from a modified Leyland Retriever which had a camper or "Caravan" on it. This space allowed Monty to read maps and plan operations without the distractions of the heat and dust. For operations at the front, Monty frequently used a Grant tank or a Daimler Scout Car like the one in this kit. **Kit features** a diorama base, two vehicles, three vehicles and decals.

03227 RVLS3227 Total Parts: 142 Skill Level: 4

1/32 SCALE EUROFIGHTER TYPHOON (GERMAN/BRITISH AIR FORCE) Field Europe's finest fighter

After thirty years in development, the Eurofighter Typhoon is making its way into Europe's air forces. It's well worth the wait. State-of-the-art pilot voice interaction systems make the Typhoon easier to control than the average fighter while the plane's agility and top speed exceeds that of many fighter jets. Once the Meteor missile's development is finished, the Typhoon will be able to engage any aircraft from beyond visual range. **Kit features** a two-seat version of the Eurofighter Typhoon with missiles, bombs and decals for the German and British Air Forces.

04855 RVLS4855 Total Parts: 435 Skill Level: 5 Length: 19.6 in (498 mm)

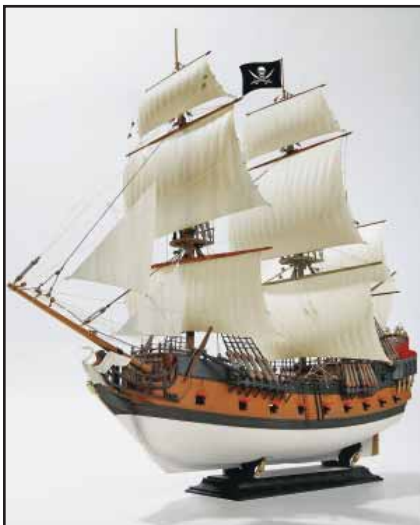

1/72 SCALE GERMAN SUBMARINE XXVIIB "SEEHUND"

Tiny terrors of the Third Reich

At just 41ft in length, Seehund submarines were only slightly longer than the payload they carried. Nevertheless, these tiny, two-man terrors were much more effective against Allied shipping than their diminutive size might suggest. Their success was predicated on the fact that they were virtually impossible to detect when submerged. The type's only failing was that it was unseaworthy; storms caused most of the 35 Seehund losses during the war. **Kit features** detailed parts, two torpedoes, display stand and decals for two submarines, U-5022 and U-5316.

05125 RVL5125 Total Parts: 42 Skill Level: 4 Length: 6.5 in (165 mm)

1/72 SCALE PIRATE SHIP

It's not all about the booty...

...unless you're a pirate, then it most assuredly is all about the booty. Ducats, doubloons, drachma, gold or silver, it doesn't matter. If it glints or glimmers it will draw pirates like a picnic draws ants. So shake out the topgallants, unfurl the Jolly Roger and run out the long nines. If the lubbers have any sense they'll heave too. If they don't, then you get to have some real fun. **Kit features** wood-finish decks, textured sails, rigging thread, long guns, jolly boat and display stand.

05605 RVL5605 Total Parts: 896 Skill Level: 5 Length: 21.65 in (550 mm)

1/1200 SCALE MS TROLLFJORD

Braving the Norwegian Sea

MS Trollfjord bears the dual roles of mail ship and cruise-liner as it travels the lengthy coastline of Norway from Bergen, a city of 400,000 in the south, to Kirkenes, a town of 4,000 in the north. Along the way, the ship passes pristine fjords, coastal mountains and glacial peaks. It is a beautiful and dangerous trek performed in total darkness for several months of the year. **Kit features** a detailed vessel with swimming pool, detailed hull, decorative display stand and decals for the Trollfjord.

05815 RVL5815 Total Parts: 43 Skill Level: 3 Length: 4.45 in (113 mm)

1/24 SCALE BMW® M3 DTM 2012 "MARTIN TOMZCYK"

Top contender of the "Deutsche Tourenwagen Masters"

The DTM championship is an intense German race which pits touring cars against one another. These cars are designed to exacting standards laid out by the race rules. Every vehicle has to be under a certain cost and be the same wheelbase, length, width and weight as all the other cars. In 2012, Martin Tomczyk was successful in the new BMW. He had been champion in 2011 and won 69 points in 2012 thanks to several podium finishes. **Kit features** multi-part engine, removable hood, rotating wheels and detailed interior.

1/24 SCALE BMW® M3 DTM 2012 "BRUNO SPENGLER" Champion of the "Deutsche Tourenwagen Masters"

The DTM championship is an intense German race which pits touring cars against one another. These cars are designed to exacting standards laid out by the race rules. Every vehicle has to be under a certain cost and be the same wheelbase, length, width and weight as all the other cars. In 2012, Bruno Spengler swept the championship in the new BMW. He finished on the podium for 6 of the 11 races in 2012. **Kit features** multi-part engine, removable hood, rotating wheels and detailed interior.

07178 RVLS7178 Total Parts: 125 Skill Level: 4 Length: 7.8 in (199 mm)

1/25 SCALE HUMMER® H2 The All-American luxury off-roader

Designed on the specs of the original military HMMWV, the H2 is a purely civilian ride with significant off-roading capabilities and luxury styling. It weighs in at 3 tons, but the 398 hp V-8 can really move the H2. This beast has a huge ground clearance, heated leather seats, a 6-CD changer and BOSE sound system so you can roar across the tundra or down the freeway and never know the difference. **Kit features** detailed parts and interior, separate tail-gate and exhaust, metal axles and chrome rims.

07186 RVLS7186 Total Parts: 87 Skill Level: 3 Length: 7.6in (194 mm)

1/25 SCALE MERCEDES 1628S The "New Generation" of heavy haulers

In the seventies and eighties Mercedes designed a sequence of trucks that were much different than those being produced anywhere else in the world. They were smaller, lighter and more aerodynamic. They consumed far less fuel while still allowing the towing of extremely heavy (20+ ton) loads. This was partially due to the use of a simple roof spoiler that reduced drag and partially to the extremely efficient V-8 engine that powered the truck. **Kit features** detailed chassis and suspension, multi-part engine, tilting cab and decals for 10 countries.

07467 RVLS7467 Total Parts: 133 Skill Level: 4 Length: 9 in (229 mm)

NEW RELEASES

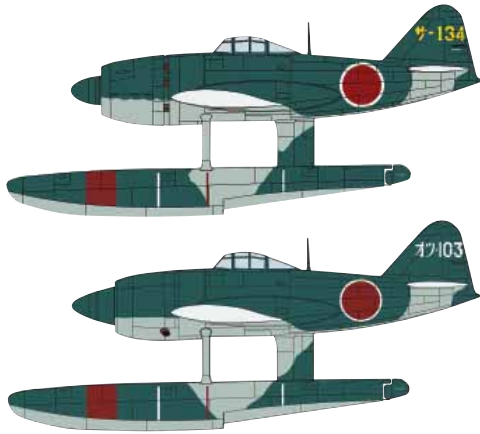

Hobby kits

1/72 SCALE F-4J PHANTOM II "VF-96 FIGHTING FALCONS" Nothing gets through

Based at NAS Miramar, California, the Fighting Falcons were deployed as fleet defense for the USS America and USS Constellation during the Vietnam War. The F-4 Phantom II was their mount of choice. These famous aircraft were able to deploy up to 18,000 pounds of ordnance against air or ground targets in a 420 mile (680 km) combat radius. Although the capability was never used operationally, the F-4J could also deliver nuclear weapons. This limited edition **kit features** two decal marking options for aircraft from VF-96 Fighting Falcons.

02064 (Limited Edition) HSGS2064 Total Parts: 108 Skill Level: 3

1/72 SCALE KAWANISHI N1K1 KYOFU (REX) "EARLY/LATE VERSION COMBO"

Japan's fearless floatplane-fighter

Known as Kyofu ("strong wind") by the Japanese and "Rex" by the Allies, the N1K could hold its own against Hellcats and Mustangs. The N1K1 variant was the sole floatplane of the bunch. Later N1K variants were best suited for hydroplane and fighter-bomber applications. This limited edition **kit combo features** one early N1K1 kit with two marking options: 1. I.J.N. Otsu N.F.G., Code: Otsu-103, 1944 and 2. I.J.N. Sasebo N.F.G., Code: Sa-137, 1944, as well as one late-model kit with one marking option: 1. I.J.N. Sasebo N.F.G., Code: Sa-134, 1944.

02065 (Limited Edition) HSGS2065 Total Parts: 54 & 58 Skill Level: 3

1/48 SCALE AICHI D3A1 TYPE 99 CARRIER DIVE-BOMBER (VAL)

Scouring the Indian Ocean of ships

The "Val" was a very bad girl--fast, agile, well-armed and lethal; the Allies felt their bite time and again throughout the war, losing more ships to this plane than any other warbird. During the Indian Ocean raid, Vals were instrumental in destroying or driving off the entire British Indian fleet. Their 550 lb (250 kg) bombs ripped through ships, sending sailors to the bottom in one of the worst defeats the Royal Navy ever suffered. This limited edition **kit features** decals for four aircraft flown in the raid.

07356 (Limited Edition) HSGS7356 Total Parts: 119 Skill Level: 3

1/48 SCALE NAKAJIMA KI-84 TYPE 4 FIGHTER HAYATE (FRANK)

Late war legends

Nakajima began developing the Ki-84 in 1942, offering improved firepower and tougher armor than the company's Ki-43. Heavily armed with two 12.7mm machine guns and two wing-mounted cannons, the "Frank" was an equal in theory for anything fielded by the Allies. In practice, however, Japanese pilots were being rushed into the air with inadequate training and supplies of gas, parts and ammunition were low. The full potential of the Ki-84 wasn't realized until the Allies tested it after the war. Limited edition **kit features** two Hitachi Flight Training Division decals.

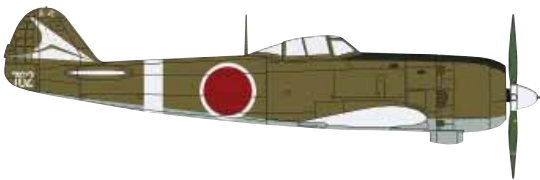

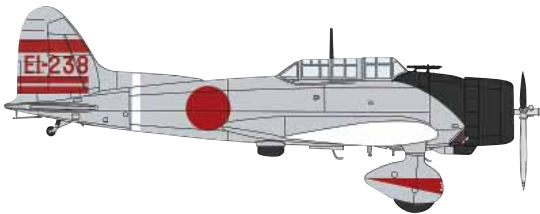

07357 (Limited Edition) HSGS7357 Total Parts: 125 Skill Level: 3

1/48 SCALE DOUGLAS A-4E/F SKYHAWK "TOPGUN"

Training for total aerial domination

Skyhawks are battle-proven aggressor aircraft whose speed and power has made them popular with air forces around the world. A-4E/F models are upgraded with improved engine, radar, armament and avionics. With its massively upgraded capabilities, the new Skyhawk became a common feature of TOPGUN training and of training squadrons for units deployed worldwide. The agility of the aircraft made it ideal as an aggressor aircraft for dissimilar air combat training. This limited edition **kit features** decals for an E and F variant of the A-4 Skyhawk.

07358 (Limited Edition) HSGS7358 Total Parts: 156 Skill Level: 3

1/32 SCALE KAWANISHI N1K2-J (GEORGE) "343RD FIGHTER GROUP"

Flying with the rising sun

With the N1K2-J, Kawanishi did the impossible; turning a float plane into a dogfighter that could stand up to the best America had to offer. "George" fighters were quite capable of shooting down Hellcats, Corsairs and, in the hands of expert pilots, even the vaunted B-29 Superfortress. In larger numbers the N1K2-J could have had a massive effect on the war, but only 428 were built. By comparison 12,000 Corsairs, comparable to the N1K2-J, were produced by the U.S. This **kit features** decals for two 343rd NFG aircraft.

08883 (Limited Edition) HSGS8883 Total Parts: 148 Skill Level: 3

Plastic Models

AMT® 1/25 Scale Ford® LN 8000 Race Car Hauler

Back after 30 years!

For the first time in 30 years, you can own a brand new AMT model Ford LN 8000 Race Car Hauler. Relive the glory days of automotive racing with an open ramp bed that is just begging to help you display your favorite race car. The truck itself is a work of art, with a full fuel-injected diesel engine, loading ramps and vintage packaging. **Kit features** detailed parts, bonus pre-lettered racing slicks and full-color decals.

758/06 AMTS0758 Skill Level: 3

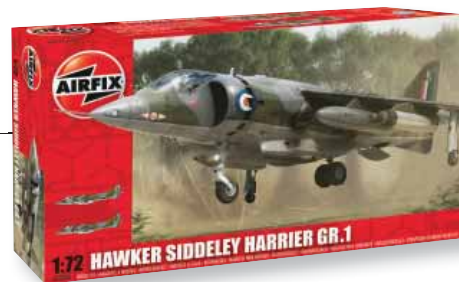

Airfix® 1/72 Scale Hawker—Siddeley Harrier GR1

Innovation taken to new heights

How do you make planes fly without a runway? That must have been the question the designers of the Harrier asked when they built an aircraft which could operate from unprepared forward airbases. Their answer was the Harrier. This impressive aircraft is able to take off vertically thanks to thrust-vectoring nozzles. It does this while still carrying an extremely effective weapons and sensors array. The GR1 was the first full-production variant. It proved that the concept of VTOL was viable and effective. **Kit features** decals for two RAF versions.

03003 ARXS3003 Total Parts: 89 Skill Level: 2 Length: 5.8 in (148 mm)

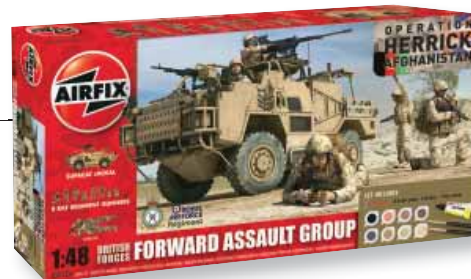

Airfix® 1/48 Scale British Forward Forces Assault Group Gift Set

Royal Air Force Regiment regulars

There is no front line and no rear. Nowhere is safe... unless you're being watched over by the RAFR. Royal Air Force Regiment personnel defend airbases against insurgents by proactively searching out and destroying them. In this role the Jackal, an armored and highly-mobile heavy weapons platform, is invaluable. It is fast, resistant to improvised explosive devices, and all-terrain capable. This allows crews to avoid ambushes and still accomplish their missions while providing heavy fire support. **Kit features** a Jackal and eight RAF Regiment models.

A50124 ARXS5124 Total Parts: 169 Skill Level: 3 Length: 4.9 in (125 mm)

Airfix® 1/24 Scale Focke-Wulf Fw 190A-5/A-6

The "Butcher-Bird's" best pilots

German fighters of all types were a major threat during WWII but the Fw 190 was in a class all its own. With a pilot like Herman Gram or Anton Hackl behind the controls, the odds of coming out unscathed were incredibly low. Both Gram and Hackl amassed roughly 200 confirmed kills, many of them in Fw 190s and many of Hackl's against four-engine bombers. Though not uncommon in the Luftwaffe, these scores were astronomical by Allied standards. **Kit features** decals for Herman Gram, 1943 and Anton Hackl, 1944.

A16001A ARXS6001 Total Parts: 171 Skill Level: 4 Length: 14.5 in (368 mm)

Airfix® 1/72 Scale Short Stirling B.Mk.I/B.Mk.III

Britain's original four-engine bomber

Drop the most bombs, cause the most destruction, and you win. At its root, that is the logic behind the carpet bombing campaigns of WWII. To carry all those bombs, the RAF needed a new, heavier bomber. Short Brothers aviation stripped the bottom deck and floats off of one of its flying boats, added bomb bays and gun turrets, and the Stirling was born. Compared to contemporary bombers, it carried a larger bomb load over a longer range. **Kit features** decals for two RAF versions.

A07002 ARXS7002 Total Parts: 273 Skill Level: 2 Length: 16.5 in (419 mm)

Dragon Models® 1/72 5.5 cm Zwilling Flakpanzer

Double the trouble

American and British airpower was crushing the Wehrmacht on the Western Front. The Luftwaffe was a fading memory and German ground troops had no way to answer the strafing planes of their enemies. Harsh necessity drove them to develop weapons like this one, a pair of 55mm anti-aircraft guns mounted on an up-armored panzer chassis. Though the vehicles did help stem the slaughter, by 1945 there was little the Heer could do to stop the Allied advance. **Kit features** detailed parts and panoramic background scene.

7488 DMLS7488

Minicraft® 1/48 Beechcraft Bonanza F-33

Record-breaking icon of American aviation

The Beechcraft Bonanza has the longest production run of any aircraft in history. It is surprisingly easy to handle in the air and is still the plane that the rich and famous choose for short-distance flights. It is one of the most reliable and high-performance planes on the planet. In fact, the aircraft has many distance flight records; most notably one for a non-stop from Honolulu to New Jersey. Build the plane that is the last word in celebrity transportation! **Kit features** detailed parts and life like decals.

11670 MMIS1670

Minicraft® 1/48 Beechcraft Bonanza V-35

Just what the doctor ordered

The V-Tail of the V-35 made it the most distinctive private aviation aircraft on the market. It also made it surprisingly agile and easy to push into intense aerobatics. Many pilots with flight experience in cubs and other craft were stunned by the V-35's maneuverability. For the decades it was in production, the V-35 made a big impact wherever it went. In fact, the aircraft has many distance flight records; most notably one for a non-stop from Honolulu to New Jersey. **Kit features** decals for U.S. and Canadian planes.

11676 MMIS1676

Minicraft Models® 1/48 Scale Piper® Super Cub

Making anywhere accessible

Super Cubs were designed with the unknown in mind. They are designed to carry up to 800 lbs of cargo, passengers and crew over 400 miles and still be able to take off and land from unprepared landing strips four-hundred feet long. Their astonishing array of features enables them to fly further into undeveloped territory than any other aircraft. With floats, skis or any of the numerous other modifications frequently given to the Super Cub; the versatility of the aircraft increases even further. **Kit features** detailed parts and decals.

11678 MMIS1678

Trumpeter® 1/48 Scale Vampire F.Mk5 British Fighter

The RAF jet with a 20mm bite

With a top speed nearly 100 mph higher than the P-51 Mustang, the de Havilland Vampire was an extremely effective fighter bomber and interceptor craft. It carried four 20mm cannons and a choice of rockets or bombs. Had it been completed before the end of WWII it would have been an effective counter to the Me-262. As it was, the plane was introduced late in 1945 and primarily served to improve the overall design and performance of jet-powered aircraft. **Kit features** detailed parts and decals.

2874 TSMS2874

Trumpeter® 1/700 Scale HMS Barham Battleship 1941

Famous for its foundering

Even after fighting in the Battle of Jutland, shelling Dakar and serving as the flagship of the Atlantic Fleet, the most memorable event of HMS Barham's career was its sinking. As she was participating in a raid on an Italian convoy off the coast of Egypt, Barham was struck by three torpedoes from a U-boat. A cameraman caught the tragedy of the next four minutes on film. The ship heeled over and her magazines detonated, sealing the fate of over 800 officers and crew. **Kit features** detailed parts, display stand and name plate.

TESTORS® HAS YOU COVERED

For projects both big and small--Testors paint covers it all

With cap sprayers, airbrushes, paint markers and standard acrylics, Testors has more options than ever for putting the finishing touches on your hobby project.

TURN HERE FOR RADIO CONTROL PRODUCTS

With the new **Airbrush** and **Cap Spray** systems you can cover large areas quickly using standard Testors paint cans. You don't even need an air compressor—propellant is included in the sets. Just snap the paint bottles in with the included quick connector caps and get spraying!

For more detailed projects there are Testors paint markers and acrylic paint sets! Paint markers work great on most hobby materials and come in sets of three. Acrylic paint sets come in sets of six paints with three brushes and a mixing tray. They are water-soluble for easy cleanup, non-toxic, fast-drying and can be thinned for use with airbrushes.

Long story short...

No matter what project you are working on, Testors has the paint and the application systems to make it a breeze.
