# R/C FLIGHT — AS EASY AS 1...2...3!

# AIRCORE™

# 1

Pick any AirCore airframe

# 2

Install the Power Core

# 3

Fly with your SLT transmitter

## THE POWER CORE IS AT THE HEART OF EVERY AIRCORE MODEL!

Pushrod Magnets encapsulated in plastic, these magnets line up perfectly time and time again

250mAh LiPo Battery

Brushless Motor delivers powerful performance with an efficient design that prolongs flight times

3 Digital Ultra-Micro Servos provide precision control for all AirCore airframes

2.4GHz SLT Receiver

Brushless ESC

Just drop the Power Core in and fly!

- Self-aligns and locks in securely with magnets — no tools required
- Flight controls connect automatically
- Motor thrust is tuned and set perfectly

### From the Experts:

With the revolutionary AirCore modular airplane system you can fly any AirCore airframe with a single self-contained Power Core! Available separately, the Power Core delivers smooth, stable flight, and can be quickly removed and easily installed with a secure magnetic attachment system. It's the most efficient, affordable and effortless way yet to fly multiple models!

### Long story short...

*AirCore lets you fly a large fleet of airplanes with one Power Core and one radio!*

Turn the page to see the entire lineup of AirCore planes!

# BUILD A BEAST OF A BUGGY!

## Baja 5B SS Super Sport

### 1/5 Scale 2WD Gas Buggy Kit

If you enjoy the satisfaction of assembling an R/C vehicle, customizing it just the way you want and equipping it with your choice of radio, then get the kit that offers a lot to look forward to when you're ready to roll: the Baja 5B SS 2.0 gas-powered buggy! Based on the best-selling Baja 5B SS, the 2.0 version comes with hop-ups already included to boost performance to the max. Plus, this 1/5 scale buggy lets you go BIG...while the others go home!

The 6061 T6 aluminum monocoque chassis is gunmetal anodized for sharp looks, and super-rigid for supreme performance.

Newly designed VVC/HD shocks improve handling over rough terrain. Large diameter shock shafts add durability.

The 8000 rpm clutch launches the Baja 5B SS 2.0 at higher rpm for more punch off the line and out of low-speed corners.

#### The features that have made the Baja 5B SS an all-terrain terror are all here...

- 26 cc gasoline engine
- 8000 rpm clutch
- Aluminum tuned pipe
- VVC/HD Pro shock set
- Gunmetal main chassis
- Orange anodized SS parts
- Metal gear steering
- Heavy-duty bead locks
- Front and rear sway bars
- Rear shock tower brace
- Aluminum alloy diff case
- Pre-cut clear body shell

#### ...plus 2.0 upgrades for even more durability!

- Steel tube header that extends the life of the exhaust system
- Heavy-duty front axles that eliminate the need for e-clips
- Giant 9mm super heavy-duty rear dogbones
- Lighter, stronger one-piece rear uprights

HPIC1611 Baja 5B SS 2.0 1/5 Scale 2WD Gas Buggy Kit  
 Length: 32 in (817 mm)  
 F/R Width: 18.1-18.9 in (460-480 mm)  
 Height: 10 in (255 mm)  
 Weight: 21.3 lb (9.6 kg)  
 Requires: 3-channel radio, 8 "AA" batteries, unleaded gasoline, 2-cycle oil

**From the Experts:**  
 You'll dominate the off-road action when you unleash the Baja 5B SS 2.0! Build this bold buggy to your specs, using the wide array of included option parts to enhance speed and durability. And at almost 3 feet long and powered by a 26 cc gasoline engine, the Baja 5B SS 2.0 conquers environments that can stop smaller buggies in their tracks!

**Long story short...**  
 Experience big-time power, performance, durability and looks with the Baja 5B SS 2.0 kit!

NEWPRODUCT

FLYING MADE EASIER - THROUGH

INTELLIGENT TECHNOLOGY!

NEWPRODUCT

Ready-to-Fly Quadcopter

Fly it Now!

- Two versions — with camera and without camera
- Integrated LEDs allow for cool lighted flight

Beginner and Expert Flight Modes

Select Beginner or Expert flight modes from the transmitter. In Beginner mode, releasing the sticks lets the 1Si stabilize itself in flight — perfect for when you're unsure of how to react. Expert mode turns off the TAGS-FX accelerometers, allowing greater maneuverability. Choose the mode that's right for you. New pilots enjoy unprecedented confidence...experts gain the precision to execute perfect maneuvers.

Everything is included:

- 2.4GHz SLT radio
- LiPo battery and USB charger
- "AA" batteries
- Extra rotor blades
- Rotor blade guards
- 720P HD Video camera

The 1Si Quadcopter is available in a version with a micro digital camera for taking still photos and shooting 720P HD video, with on/off control from the transmitter. Save them onto the included 2GB micro SD memory card with USB card reader.

\*The 1Si with camera is not to be used for commercial ventures. Be sure to fly in a safe environment and respect the privacy of others.

Actual Direction Control

Turn it on, and the 1Si goes in the same direction that you move the sticks — whether it's flying toward you or away from you.

Return to Pilot

Utilizes built-in sensors to bring the 1Si back to its pilot automatically with a push of a transmitter button.

From the Experts:

Right out of the box, the 1Si is flight-ready, with built-in technology never before seen on a quadcopter this small! Beginner and Expert flight modes let you choose the level of control for maximum confidence, and LEDs light up every flight. Want more? It's also available with a micro digital camera!

Long story short...

The highly advanced features found on the 1Si take quadcopter technology to a new level!

# AMPING UP THE SC10 WITH XP COMPONENTS!

## SC10 Pro Comp 2.4GHz RTR

1/10 Scale Ready-To-Run 2WD Electric Off-Road Race Truck

## 4-Time R.O.A.R. Short Course National Champion!

The SC10 has earned a solid reputation as an off-roader that has what it takes to be a champion, and this re-released RTR with Pro Comp markings ups the ante with even more high-performance goodies!

- XP 2.4GHz radio system
- XP digital ESC with High Current T-Plug battery connector and LiPo compatibility
- Powerful Reedy 17-turn brushed motor
- Blue anodized aluminum coil-over shocks
- 2.6:1 ratio gearbox with heavy-duty sealed gear differential and externally adjustable slipper clutch
- KMC™ short-course wheels front and rear
- Aggressive multi-terrain scale tires
- Factory-finished short course racing truck body
- Realistic front and rear bumpers with AE logo rear mud flaps
- 14 precision rubber-sealed ball bearings
- Accepts many Factory Team and Reedy option parts

ASCD7028 SC10 Pro Comp 2.4GHz RTR  
 Length: 21.6 in (550 mm)  
 Width: 11.5 in (293 mm)  
 Weight: 4.6 lb (2080 g)  
 Wheelbase: 12.9 in (327 mm)

The XP 2.4GHz radio system comes with an XP metal gear steering servo. The XP digital ESC features a High Current T-Plug battery connector.

### Long story short...

The SC10 is a proven performer, and the re-released Pro Comp RTR utilizes XP technology to stay ahead of the pack!

NEW PRODUCT

# EASY, FUN AND AFFORDABLE!

## AXE™ 100 CX

Ready-To-Fly Electric Coaxial Helicopter

- Ideal for beginners and budget-minded R/Cers
- Coaxial design offers extremely stable flight
- The sturdy, flexible flybar remains intact even if it strikes an object
- The TX410 2.4GHz SLT radio transmitter included with the RTF version features Beginner & Expert modes that start newcomers out slow and allow for more maneuvering ability as pilot skills grow
- The lower-cost Tx-R version can be flown with any 4-channel SLT radio

HMXE0818 Axe 100 CX EP Coaxial Heli RTF  
 HMXE0819 Axe 100 CX EP Coaxial Heli Tx-R  
 Rotor Diameter: 7.4 in (190 mm)  
 Length: 9.0 in (230 mm)  
 RTF Weight: 1.1 oz (33 g)  
 RTF Requires: Nothing  
 Tx-R Requires: 4-channel SLT transmitter or  
 AnyLink and compatible 4-channel transmitter

Nothing else is needed to start flying with the Axe 100 CX RTF. Everything is in the box, including a TX410 2.4GHz SLT radio transmitter, 3.7V 150mAh LiPo battery, USB-compatible LiPo charger and "AA" batteries.

## ***Fly it Now!™***

### ***From the Experts:***

The Axe 100 CX flies so smoothly, anyone can get the hang of it in just a few minutes — and the durable components will bail you out if you do have a mishap. This heli has looks that go beyond that of a beginner model, and it's available Ready-To-Fly or ready for your transmitter.

### ***Long story short...***

*Perfect for anyone interested in R/C, the Axe 100 CX makes getting into heli flying a thoroughly enjoyable experience.*

# AN INCREDIBLE VALUE IN A BALANCING CHARGER!

## Li-24 2S-4S LiPo/LiFe AC Balancing Charger

Balancing plugs

Charge status LED

Battery type switch

Cell LED

Charge current switch

AC 100-240V power jack

Charge output jack

- Balance charges 2S-4S (2-cell to 4-cell) LiPo or LiFe batteries
- AC 100-240V input
- 3A maximum charge current
- CC/CV charging
- Includes Deans® Ultra Plug® connector
- Charge status LED
- Balancing status LED for each cell
- LiPo/LiFe switch
- Gold plated connectors
- CE and ROHS certified

Deans and Ultra Plus are registered trademarks of W.S. Deans Co. U.S. Patent No. 5,533,915.

**DTXP4620 Li-24 2S-4S LiPo/LiFe AC Balancing Charger**

**AC Input:** 100-240V AC  
**Battery Type:** LiPo/LiFe  
**Cells:** 2-4  
**Charge Current:** adjustable, 3A maximum  
**Balance Current:** 200mA  
**Dimensions:** 4.4 x 2.7 x 1.6 in (111 x 69 x 41 mm)  
**Charger Weight:** 6.2 oz (176 g)

**From the Experts:**

The Li-24 charger's features alone make this a "must-have" accessory — and its budget-friendly price is the icing on the cake! You get all of this functionality in a compact unit that fits easily in your field bag or on your workbench. Plus, the Li-24's versatility extends beyond cars and trucks!

**Long story short...**

**When you compare the Li-24's features to its price, you'll be amazed!**

NEW PRODUCT

## 3D FLIGHT DONE RIGHT

## U-Can-Do SF

Almost-Ready-to-Fly .55-.82/EP Sport Aerobat

- Side Force Generators (SFGs) provide maximum control authority
- The dual-tapered, lightweight wings offer extra stability and are one-piece for easy transport
- The cowl and wheel pants are molded fiberglass and the landing gear is tough aluminum
- Recommended glow or electric power systems are easy to install and both deliver outstanding performance

## GPMA1272 U-Can-Do SF .55-.82/EP Sport ARF

Wingspan: 59 in (1500 mm)

Wing Area: 912 in<sup>2</sup> (58.8 dm<sup>2</sup>)

Weight: 6.75-7.25 lb (2950-3290 g)

Wing Loading: 18.3 oz/ft<sup>2</sup> (56 g/dm<sup>2</sup>)

Length: 58 in (1475 mm)

A big part of what makes the U-Can-Do SF such a great 3D flyer is the removable SFGs. These wing-tip extensions increase airflow over the ailerons, stabilizing the aircraft in level flight, high-alpha and 3D maneuvers.

**From the Experts:**

By eliminating wing-tip turbulence and increasing airflow over the ailerons, the Side Force Generators (SFGs) on the U-Can-Do SF deliver optimum control during level flight as well as high-alpha and 3D maneuvers. A 59" wingspan gives this aerobat impressive sky-presence for getting the most "wow" out of every stunt, and the U-Can-Do SF can be equipped for glow or electric power.

**Long story short...**

**Innovative Side Force Generators on the U-Can-Do SF help you get more out of every 3D maneuver than ever before!**

# SIMPLE DESIGN, SPECTACULAR PERFORMANCE

## Factor 3D

Almost-Ready-to-Fly

The two-piece wing adds convenience. Wing panels assemble onto a joiner tube, simplifying transport.

- Ultra-lightweight construction, featuring a carbon fiber wing tube
- Compact size makes the Factor 3D an ideal park flyer
- Assembles quick and easy, with pre-hinged ailerons
- Aileron servo in each wing panel eases assembly and increases mixing options
- Large hatch is magnetically attached for quick battery changes
- A complete hardware package with spinner and all control linkages is included

### From the Experts:

The Factor 3D's design is simple and straightforward, with the shape purpose-built for optimized flight performance. Fast final assembly means you can have it up and flying in no time, and the 38" wingspan makes the Factor 3D easy to transport. From harriers to torque rolls to waterfalls and more, this ultra-light sport flyer can do it all — and using common, economical 3S-compatible components.

### Long story short...

**Get the Factor, and cut your teeth on 3D with a plane that doesn't bite back!**

GPMA1552 Factor 3D EP ARF

Wingspan: 38 in (965 mm)

Wing Area: 375 in<sup>2</sup> (24.3 dm<sup>2</sup>)

Weight: 28-32 oz (795-905 g)

Wing Loading: 10.8-12.3 oz/ft<sup>2</sup> (33-38 g/dm<sup>2</sup>)

Length: 41.5 in (1055 mm)

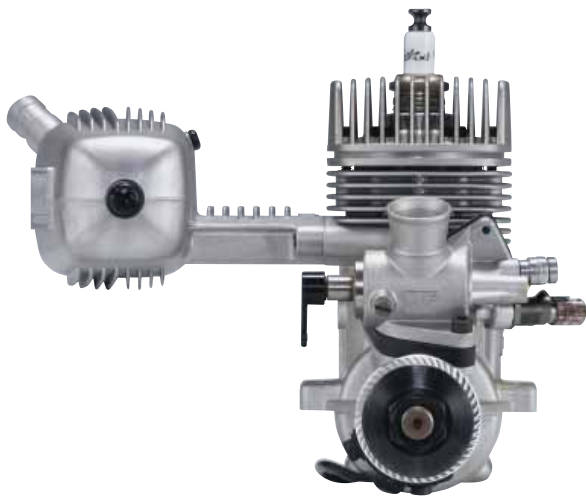

NEWPRODUCT

# THE "MIGHTY MITE" OF O.S. GASOLINE AIRPLANE ENGINES

## GT15

- The power equivalent of a .90 4-stroke or .60 2-stroke glow engine, with the fuel economy of gasoline
- Features the same mounting pattern as the 65AX
- O.S.-designed carb makes tuning a breeze and delivers excellent throttle response
- Carb comes equipped with a regulator and PD-08 pump
- A special roller bearing on the conrod allows for 50:1 oil/fuel mixture
- Includes the compact IG-06 ignition module for easy, dependable starts

### OSMG1515 GT15 Gasoline Airplane Engine

**Displacement:** 0.91 cu in (14.95 cc)

**Bore:** 1.091 in (27.7 mm)

**Stroke:** 0.97 in (24.8 mm)

**RPM Range:** 2,000-11,000

**Output:** 2.37 hp @ 15,000 rpm

**Weight:**

**Engine:** 22.26 oz (631 g)

**Ignition Module:** 3.35 oz (95 g)

**Muffler:** 6.28 oz (178 g)

**Includes:** E-4040 muffler, IG-06 ignition module, spark plug

**O.S. ENGINE**  
UNEQUALLED QUALITY PRECISION & PERFORMANCE

### From the Experts:

Drop the GT15 into any .60 2-stroke or .90 4-stroke size model, and enjoy the benefits of smooth performance AND superb fuel economy! A PD-08 pump delivers fuel consistently at any attitude or altitude, and an included IG-06 ignition module offers starting ease and reliability.

### Long story short...

*Make the switch to the GT15 and experience the advantages that gasoline has to offer!*

# TUNED TO WIN!

NEW PRODUCT

www.gpdealer.com

The DEX408v2 includes these exciting new updates:

- Ultra-slim, hard anodized aluminum chassis
- 16 mm Big Bore shocks
- Tapered angle-hole pistons
- Lighter composite diff gear parts
- Drivetrain geometry
- Dual position rear hubs
- Rear suspension arms redesigned for better weight transfer
- Shock adjustment nuts

Also on the DEX408v2:

- High-quality, hard anodized aluminum shock towers
- Custom aluminum motor mount that fits all standard 1/8 brushless motors
- Custom hook & loop battery straps
- Lightweight ESC and PT trays
- Machined aluminum bulkheads and suspension hangers
- Multiple front and rear camber adjustments to dial into any track condition

TDR0301 DEX408v2 1/8 Scale Electric 4WD Buggy Kit

Length: 15.9 in (405 mm)

Width: 11.9 in (302 mm)

Requires: brushless motor, ESC, pinion gear, radio, servos, wheels, tires, battery, charger

## DEX408<sup>v2</sup>

1/8 Scale Electric 4WD Buggy Kit

### ***From the Experts:***

Straight out of the box, the DEX408v2 is engineered to win. With all new rear end geometry settings and super-smooth precision shocks, this buggy delivers unrivaled handling to go along with Team Durango's legendary durability. And the highly efficient drivetrain is specially designed to maximize the race-winning advantages of today's brushless technology!

### ***Long story short...***

***The DEX408v2 is engineered to deliver the ultimate in strength, durability and performance!***

## GASOLINE ECONOMY — ELECTRONIC IGNITION EASE!

### DLE-20RA Rear Exhaust 20cc Engine

- Two-petal reed valve rear induction with custom DLE carburetor
- Lightweight piston for fast acceleration, excellent compression and lower vibration
- Newly updated electronic ignition unit features ultra-smooth idle, easy starting and awesome throttle transition
- Lightweight aluminum alloy crankcase
- Includes muffler, spark plug, gasket, bolts and throttle arm extension

DLEG0420 DLE-20RA Rear Exhaust Engine w/Electronic Ignition

Displacement: 1.2 in<sup>3</sup> (20 cc)

Output: 2.5 hp @ 9,000 rpm

Weight:

(Engine): 1.7 lb (660 g)

(Exhaust): 2.8 oz (80 g)

(Ignition): 4.6 oz (130 g)

Fuel Mixture: 30:1

### Long story short...

The DLE-20RA gives you the installation ease of a rear exhaust, plus performance that is hard to beat.

## GET THE WINNING EDGE WITH REEDY RECEIVER PACKS!

### Reedy LiPo 2S 7.4V Receiver Batteries

- The 1200mAh battery's light weight can improve handling by reducing the vehicle's overall weight
- The 1200mAh also offers more flexibility for left/right and front/rear weight distribution
- The 2300mAh battery's high capacity makes it ideal for serious racers competing in long main events, as well as enthusiasts who don't want to continually re-charge their receiver battery
- Both packs feature premium cells with high-strength, low-resistance connectors equipped with standard plugs

# THE "TWO FREE RECEIVERS" OFFER ENDS THIS MONTH!

This awesome opportunity is coming to an end! Through December 31, 2013, if you buy a Tactic TTX650 6-channel 2.4GHz SLT transmitter you'll also receive not one but TWO Tactic TR624 6-channel 2.4GHz receivers AT NO EXTRA CHARGE — a \$79.99 retail value!

**Hurry This offer ends December 31, 2013!**

## TTX650 6-Channel SLT Transmitter

- Proven, reliable Secure Link Technology™
- 20-model memory
- Easy-to-use pushbutton programming for airplanes and helicopters
- Large, easy-to-read graphing LCD screen
- Digital trims with slow/fast adjustment
- User-selectable switch assignments

## Get TWO Tactic TR624 6-Channel 2.4GHz SLT receivers FREE!

- Compatible with AnyLink, Tactic TTX404, TTX600 and TTX650 transmitters, as well as any transmitter with SLT
- Features a built-in "link" button with red LED status indicator
- Very compact and lightweight — only 0.29 ounces

**A \$79.99 retail value!**

# TWO GREAT WAYS TO ENJOY ONE AWESOME TRUCK

GRANITE MEGA Brushed & GRANITE BLX Brushless 2WD Electric Monster Truck

## 'ARRMA'

DESIGNED FAST DESIGNED TOUGH

ARRMA knows what it takes to make strong, fast, fun-to-drive R/C vehicles, and the GRANITE is a classic example! This 1/10 scale, Ready-To-Run monster is manufactured from high-grade aluminum and composite materials, so it's tough enough to stand up to brutal bashing and aggressive off-roading.

Oil-filled heavy duty shocks

Aluminum front bulkhead skid plate

Beefed-up servo mounts

BLX chassis shown

Twin Vertical Plates (TVP)

Waterproof receiver box

All-metal differential

Pre-mounted, high traction dBoots™ tires

The GRANITE is available with your choice of brushed or brushless motor and ESC, a ATX100 2.4GHz radio and ARX100 receiver. Both versions are equipped to the max right out of the box, and there are plenty of red anodized hop-up parts available for amping up the performance even more! Both vehicles also come with the ARRMA 2-year warranty.

Powered by a MEGA 15T motor and MEGA waterproof ESC!

# DROMIDA

by Revell

### The 10 things you absolutely need to know about Dromida RTRs:

- 1 Assembled — nothing to build
- 2 Complete — nothing else to buy
- 3 Fast — speeds up to 20+ mph
- 4 4-wheel drive power and traction
- 5 Easy to drive — even for beginners
- 6 Great indoors — or out!
- 7 Durably built — designed to last
- 8 Option parts — create a custom look
- 9 Hop-ups and Speed Kits — for greater performance
- 10 Value-packed and priced at just \$99.99

### Each includes:

- Fully assembled vehicle and finished body
- D100 2.4GHz radio system with dual-rate steering
- 6-cell, 1300mAh NiMH battery
- AC wall charger
- M370 high-speed motor
- (4) "AA" batteries

### All vehicles offer these performance pluses!

- Separate steering servo for better handling and steering
- Waterproof ESC and receiver
- Big Bore, oil-filled shocks
- Multiple shock-mounting positions
- Full set of friction-fighting ball bearings
- Gear differential
- Adjustable independent suspension
- Mounted, glued tires with foam inserts

**Customer loyalty is what inspires Onyx to keep raising the bar.** Onyx batteries, chargers and brushless power systems are known for performance, reliability and innovation — with numerous R/C industry awards as proof. And because those awards reflect your appreciation for Onyx products, the R&D team at Onyx is inspired to continue introducing accessories that help you get the most out of your R/C experience. In the future, look for more Onyx products that represent quality and exceptional value, because you — and the engineers at Onyx — expect nothing less.

NEW PRODUCT

# ROCKET FUN FOR EVERYONE!

Have a blast with four new Estes rockets!

## Ready to Fly **RTF**

No paint, glue or modeling skills required. Rocket comes assembled and is ready to launch in minutes.

### Satellite Silver™

Line the clouds with silver

**Max Altitude:** 550 ft (168 m)

**Height:** 19.8 in (50.3 cm)

**Skill level:** RTF

**ESTT1111**

## Easy to Assemble **E2X**

No paint or special tools are required. Parts are pre-colored and easy to assemble. Just glue together, apply decals and attach the recovery system.

### Dark Zero™

Start your countdown at Zero

**Max Altitude:** 975 ft (297 m)

**Height:** 21.3 in (54.1 cm)

**Skill Level:** E2X

**ESTT2463**

## Almost Ready to Fly **ARF**

No paint, glue or modeling skills required. Very minor assembly required and is ready to launch in just a few minutes.

### Fractured™

The only thing broken

is the sound barrier

**Max Altitude:** 600 ft (183 m)

**Height:** 18 in (45.7 cm)

**Skill Level:** ARF

**ESTT2490**

### Drifter™

On course for the sky

**Max Altitude:** 700 ft (213 m)

**Height:** 18.6 in (47.2 cm)

**Skill Level:** ARF

**ESTT2491**

### All include:

- Plastic Fins
- Decals
- Recovery parachute

### All require:

- Engines
- Launch pad
- Launch controller
- Starters
- Recovery Wadding

### From the Experts:

With RTF, ARF and E2X launch sets, every season is rocket season! Get your hands on one of these easy to build rockets and get ready for blastoff!

## Long story short...

*Everything you need to make this holiday season a blast is right here!*

**1/12 SCALE FOOSE '69 CAMARO® Z-28**  
 "A small, vicious animal that eats Mustangs"

Chevrolet® designed the Camaro to counteract the massive success that the Ford® Mustang® had experienced since its introduction. The Camaro was much more than a simple market-share grabber, however. It possessed both elegance and power in abundance and was popular with most segments of the population. This model is a Chip Foose modified version of the highly popular Z-28, a V-8 powered sportster that won the Trans-Am competition. **Kit features** 302 Ci engine, tuned suspension, separate spoilers, Cross-Ram manifold, dual carb intakes and optional custom or stock wheels and tires.

85-2811    RMXS2811    Total Parts: 176    Skill Level: 3    Length: 15.6 in (396 mm)

**1/25 SCALE '53 CHEVY PANEL RACER**  
 Cheap, fast, durable – A hot rodders dream

Panel trucks were originally designed for short-distance hauls of goods for small businesses. Once some of these vehicles made their way into service with automotive shops, it wasn't long before they were being modified into racers. With bigger engines and non-essential components removed, these trucks could go flat-out on the quarter mile. With straight axles and improved suspension, they were more than an equal for anything on any track. **Kit features** detailed parts including a 409 c.i. engine with supercharger or twin carbs, suspension and seating choices and soft tires.

85-4189    RMXS4189    Total Parts: 110    Skill Level: 3    Length: 7.5 in (190 mm)

**1/25 SCALE '49 MERCURY WAGON**  
 Plush, even when youre in a rush

In the late forties, rails linked the nation in a dense network unmatched by the railroads of today. To get from the station to your final destination, many companies employed "Station Wagon's"-wood sided cars with high passenger and cargo capacities. The '49 Mercury Wagon was the first of the type to be designed and built after the end of WWII. It reached record-breaking production numbers because of its combination of style, convenience and comfort. **Kit features** a detailed V-8, separate sun visor, factory stock bodywork and detailed interior.

85-4996    RMXS4996    Total Parts: 135    Skill Level: 3    Length: 8.5 in (216 mm)

**1/48 SCALE MESSERSCHMITT Me 410B-6/R-2**  
 Shredding ships into shrapnel

Late in the war, the B-6 variant of the Me 410 was introduced as a coastal anti-shipping weapon. This impressive machine retained the massive armament capacity of the originals and added a search radar in the nose which could be used to detect Allied shipping. Most ships didn't carry heavy enough armor on their tops to defend against the Me 410's 13 and 20mm guns or the two thousand pounds of bombs they carried. **Kit features** detailed array, seated pilot and standing crew figures and detailed decals.

85-5990    RMXS5990    Total Parts: 117    Skill Level: 3    Length: 11.3 in (286 mm)

### 1/25 SCALE SLINGSTER DRAGSTER

Racing this beauty is in no way a "drag"

In the late fifties, drag racing produced many different styles of cars. On rail dragsters, the engines were in front of the driver and the cars were much shorter than they are today. While the engines were all V-8s, they came in many different versions. The bodywork was different too and each dragster was unique. Build this Monogram Slingster Dragster your way. The possibilities are endless. **Kit features** 2 completely different engines, 3 different intakes and 3 different exhausts plus a Chopped and Sectioned Bantam coupe body.

85-4997    MONS4997    Total Parts: 107    Skill Level: 3    Length: 5.9 in (150 mm)

### 1/35 SCALE DINGO 2A2

Germany's off-road angel

To combat the numerous mines and IEDs in use in Afghanistan, the Germany Army's Dingo 2 has a V-shaped blast deflector that helps protect the vehicle. Although not foolproof, this system is currently the most effective anti-mine armor at weight of any military vehicle. The Dingo also supports an impressive upper-armor system that protects against small arms and artillery shrapnel. Even with the weight of its protection, the Dingo is able to sustain impressive speeds. **Kit features** detailed parts, interior, weapons station and decals for four vehicles.

03233    RVL3233    Total Parts: 224    Skill Level: 3    Length: 6.9 in (175 mm)

### 1/72 SCALE KI-61 HIEN "TONY"

Japan's high-speed heavy fighter

Unlike most Japanese aircraft, the Ki-61 was equipped with self-sealing fuel tanks, armor, and heavy weapons. Although this made the craft much less maneuverable than many Zero variants, it also improved the survivability of the craft and made it a significant threat to B-29 Superfortresses. With its Daimler-Benz derived Kawasaki Ha-40 engines, it was the one of the fastest aircraft anywhere at its first flight in 1941. **Kit features** structured surfaces, a pilot figure, rotating prop, detailed undercarriage and decals for a Japanese Air Force plane.

03982    RVL3982    Total Parts: 29    Skill Level: 3    Length: 4.8 in (123 mm)

### 1/48 SCALE TORNADO IDS

The famed Interdictor/Striker fighter-bomber!

The Tornado IDS was developed by the United Kingdom, West Germany and Italy in the mid-1970s. The Tornado IDS is also unique in that it can carry virtually every weapon in the NATO arsenal, including cluster bombs, Sidewinder missiles and nuclear weapons. With that range of weaponry, the Tornado can bring a storm of destruction on any target within its range. It fulfills multiple roles and reduces the variety of aircraft that are necessary in any Air Force.

03987    RVL3987

### 1/144 SCALE AIRBUS A350-900

#### 115 tons and still flying

The Airbus A350 was developed in response to the emerging Boeing "Dreamliner". This exceptional aircraft includes many never before used innovations including all carbon-fiber reinforced wings and composite fuselages. Thanks to its powerful Trent XWB engines, the A350 also promises to operate at MACH .85, slightly faster than the competing Boeing 777. With room for 314 passengers in a 3-class arrangement, it also holds more passengers than the 787 with lower overall operating costs. **Kit features** detailed parts and decals.

03989    RVLS3989    Total Parts: 120    Skill Level: 4    Length: 18.3 in (464 mm)

### 1/144 SCALE SPACE SHIP TWO AND CARRIER WHITE KNIGHT TWO

#### Truly out of this world

With quadruple engines, twin fuselages and a wingspan of over 140 feet (43m), White Knight Two is capable of carrying Space Ship Two to an altitude of 50,000 feet (15,000m). There, Space Ship Two separates, the rocket boosters kick in and the vessel reaches 361,000 ft (110,000m). For five minutes passengers are weightless before the engines cut and the vessel begins its unpowered glide back to the spaceport. **Kit features** a highly detailed fuselage, accurately reproduced engine and structured wings, optional extended landing gear, display stand and decals. Model can be built as separate aircraft or as a composite with both aircrafts.

04842    RVLS4842    Total Parts: 114    Skill Level: 3    Length: 6.5 in (166 mm)

### 1/48 SCALE BRISTOL F.2B FIGHTER

#### Twin-seat terror of the First World War

For its combat debut, the Bristol F.2B had the misfortune of being flown by inexperienced pilots straight into the teeth of Richthofen's Flying Circus. Four of the six Bristols were destroyed and a fifth heavily damaged. Later experience would prove that tactics rather than technology were at fault. Repeatedly, Bristols proved that they were fully capable of taking on single-seat fighters and winning. It was also effective in recon and bomber roles thanks to its second seat and 240 lb. bomb load. **Kit features** decals for two RFC aircraft.

04873    RVLS4873    Total Parts: 168    Skill Level: 3    Length: 6.5 in (164 mm)

### 1/48 SCALE F/A-18C HORNET SWISS AIR FORCE

#### Helvetia's heroes

The necessarily limited size of the Swiss Air Force requires that all aircraft within the force must fulfill multiple roles. The F/A 18-C Hornet is an effective interceptor, ground-attack and air superiority fighter which makes it ideal for the Swiss. It was license-built in Switzerland from 1996 to 1999 and still serves as a primary component of the Swiss Air Force today. **Kit features** structured surfaces, detailed cockpit and undercarriage, missiles and decals with special tail fin markings for No. 17 and 18 squadrons of the Swiss Air Force.

04874    RVLS4874    Total Parts: 97    Skill Level: 3    Length: 14.1 in (359 mm)

### 1/72 SCALE F-4F PHANTOM JG-71 "LAST CALL" "Phantom Pharewell"

For over forty years, the F-4F Phantom served the German Air Force as a fighter and fighter bomber. The first Phantom, 37+01, was also the last in service. It retired to gate guard duty after 7,400 operational flight hours. Luftwaffe F-4Fs flew over 279,000 hours throughout their forty year service—roughly one hour of flight for every hour and a half of service. Phantoms set world records, served in several conflicts and formed a fanatical following. **Kit features** a decorative decal set with special livery for the "Phantom Pharewell".

04875    RVLS4875    Total Parts: 103    Skill Level: 3    Length: 10.7 in (271 mm)

### 1/1200 SCALE MS MIDNATSOL Forging past frozen fjords

MS Midnatsol (Midnight Sun) bears the dual roles of mail ship and cruise-liner as it travels the coastline of Norway from Bergen, a city of 400,000 in the south, to Kirkenes, a town of 4,000 in the north. It passes pristine fjords, coastal mountains and glacial peaks in a beautiful and dangerous trek performed in total darkness or total sun, depending on the time of year. **Kit features** a detailed vessel with swimming pool, detailed hull, decorative display stand and decals for the Midnatsol.

05817    RVLS5817    Total Parts: 42    Skill Level: 3    Length: 4.5 in (113 mm)

Foto: Vyvya

### 1/24 SCALE VOLKSWAGEN® T1 TRANSPORTER Venerable and venerated VW Van

Volkswagen's original passenger car was a marvel of ingenuity, simplicity and reliability. In the late 40s the company developed a van variant of the original car that took the light truck market by storm. The vehicle had a cargo capacity that nearly equaled its weight; all hauled by a fuel-efficient four-cylinder engine. The T1 remained on the market until 1975 and its successor types are still on the market today. **Kit features** detailed body work, interior and engine plus rotating wheels and decal options for two variants.

### 1/12 SCALE YAMAHA® YZR500 TECH-21 '89 Burn rubber with Tadahiko Taira

From 1973-2002, the Yamaha YZR500 led four 500 cc Grand Prix riders to ten separate world championships. One of the most famous riders to take the helm of the YZR500 was Japans Tadahiko Taira. For the 1989 season, Sarron rode for the Tech-21 team; scoring 39 points to earn a fourteenth-place finish overall. This limited edition **kit features** new chamber and fender parts and one decal marking option: 1. Tech-21 Racing Team 1989 WGP 500, 14th place Rider: Tadahiko Taira.

### 1/72 SCALE J-15 "FLYING SHARK"

Sucking all the good tech out of the Sukhoi-33

The PRC J-15 fighter is a copy of the Sukhoi-33, made in violation of international copyrights and agreements. The carrier the J-15s are launched from was also bought and upgraded under false pretenses. Apparently, you can do what you want when you own sixteen of the most powerful jet fighters in the world. After all, who's going to get in the way of a super-sonic fighter carrying 12 air-to-air missiles and a 30mm autocannon? This limited edition **kit features** decals for Chinese Peoples Liberation Army Navy Code: 554.

02066 (Limited Edition) HSGS2066 Total Parts: 204 Skill Level: 3

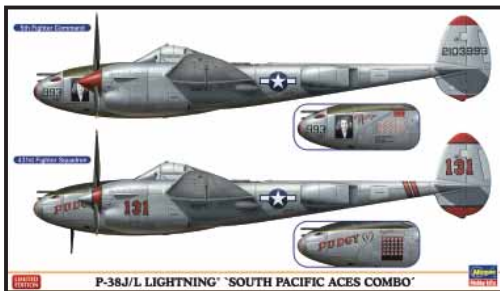

### 1/72 SCALE AH-1S COBRA CHOPPER TWO KIT COMBO

Sink your fangs into a "Kisarazu Special"

Cobras are the Japan Ground Self Defense Forces key attack helicopters. Crews and ground crews take great pride in their helis, often giving them extensive detailing for special occasions. Its easy to see why the J.G.S.D.F values the Cobra so highly; its a veritable whirlwind of destruction. The Cobras 20 mm Gatling-style cannon, TOW missiles and 38 70 mm rockets will mess up your whole day. This limited edition **kit combo** features two complete Cobra kits with decals for the 45th anniversary of the 4ATH.

02067 (Limited Edition) HSGS2067 (Two Kit Combo) Total Parts: 78 X 2 Skill Level: 3

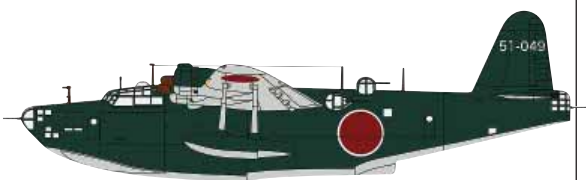

### 1/72 SCALE P-38J/L LIGHTNING PACIFIC ACES COMBO

Lightning them up with the Lightning

Richard Bong and Thomas McGuire were the top scoring American fighter aces of WWII with 40 and 38 kills. Each earned the Medal of Honor for their heroism during the war and both of them flew the P-38 exclusively. P-38 Lightnings were ideal for the Pacific. Their long range, high speed and heavy armament let U.S. forces successfully engage Japanese planes wherever they might be. With aces behind the controls, victory was all but assured. This limited edition **kit combo features** two models and decals for the ace's aircraft.

02068 (Limited Edition) HSGS2068 (Two Kit Combo) Total Parts: 63 x 2 Skill Level: 3

### 1/72 SCALE KAWANISHI H8K2 TYPE 2 FLYING BOAT "851ST FLYING GROUP"

The I.J.N.s exceptional "Emily"

Nicknamed "Emily" by the Allies, the Kawanishi H8K2 was first developed in June of 1943. The H8K2 boasted many advantages over the H8K1, most notably Mitsubishi® MK4Q engines and an upgraded tail gun turret. Later versions lacked side gun blisters; these featured Air-to-Surface-Vessel search radar. These improvements helped make the H8K2 a favorite with pilots in the I.J.N.s 851st Flying Group. This limited edition **kit features** one decal marking option: 1. I.J.N. 851st Naval Flying Group, Code: 51-049, early 1944, plus extra decals featuring alternate registration numbers: 51-086 and 801-77.

02069 (Limited Edition) HSGS2069 Total Parts: 182 Skill Level: 3

### 1/72 SCALE F-15K SLAM EAGLE South Korean special

Sixty specially modified F-15E fighters were transferred to the Republic of Korea with improved engines, avionics, electronic warfare suites and target acquisition systems. All those improvements are needed to offset the substantial numerical advantage of North Korea with which South Korea has been at war since the 1950s. These improvements are backed by the solid performance and massive (23,000 lb 10,400 kg) ordinance capability that is present in all F-15s. This Limited Edition **kit features** two sets of decals for the Republic of Korea Air Force 11th Fighter Wing.

02070 (Limited Edition) HSGS2070 Total Parts: 160 Skill Level: 3

### 1/72 SCALE KAWASAKI T-4 "BLUE IMPULSE" TWO KIT COMBO Join the J.A.S.D.F. Demonstration Team

Japans Air Demonstration Team, "Blue Impulse", amazes crowds of spectators with stunning feats of aerobatics in their T-4 trainer aircraft. These subsonic planes are perfect for the precise maneuvers that the team has to pull off, such as drawing logos across the sky with the planes smoke pumps. From the Olympics to the FIFA World Cup, the birds of the Blue Impulse team are an infrequent but much adored sight in the Japanese sky. This limited edition **kit combo** features six separate decal sets for the Blue Impulse team.

02071 (Limited Edition) HSGS2071 (Two Kit Combo) Total Parts: 67 x 2 Skill Level: 3

### 1/72 SCALE A-37B DRAGONFLY "BLACK EAGLES" TWO KIT COMBO Republic of Korea Air Force Aerobatics Team

Koreas Air Demonstration Team, "Black Eagles", amazed crowds of spectators with stunning feats of aerobatics in their A-37B Dragonfly aircraft from 1994 to 2007. These straight-winged, subsonic planes were unusual choices for a demonstration team; however, they proved perfect for the teams precise maneuvers. The twin engines of these Cessna-built aircraft also made them more reliable than the average jet, leading to a lower average of fatalities for the extremely dangerous demonstrations. This limited edition **kit combo features** decals for the Black Eagles team.

02072 (Limited Edition) HSGS2072 (Two Kit Combo) Total Parts: 61 x 2 Skill Level: 3

### 1/700 SCALE J.M.S.D.F DDG KONGŌ GUIDED DESTROYER Lethal defenses in every inch

Guided Missile Destroyers like the DDG Kongō can destroy targets on the sea, on land, in the air and beneath the waves. They are packed with long-range radar, laser guided missiles, torpedoes, anti-ballistic missile defense batteries, heavy artillery and rotary-barrel automatic cannons. Thanks to sophisticated radar and guidance systems, the Kong can unleash an unstoppable fusillade of metal at targets far beyond visual range; shredding ships, planes and flesh in an instant. This **kit features** the most up-to-date decals for the Guided Missile Destroyer Kongō, Code: 173.

04927 HSGS4927 Total Parts: 158 Skill Level: 3

### 1/72 SCALE SU-33 FLANKER-D "ACE COMBAT" YELLOW 13

The carrier-capable Sukhoi standout

Sukhoi Su-33s are direct descendants of the Su-27, made carrier-capable for use as fleet defense interceptors. Su-33s are also capable of in-flight refueling. The range, armament and avionics of the Su-33 are all impressive and easily match or exceed American fighters of the same time period. All of the aircraft's features caught the eye of Ace Combat designers, who placed the Su-33 in their game. This limited edition **kit features** a Su-33 with decals for "Yellow 13" from "Ace Combat Assault Horizon".

SP312 (Limited Edition) HSGS5212 Total Parts: 204 Skill Level: 3

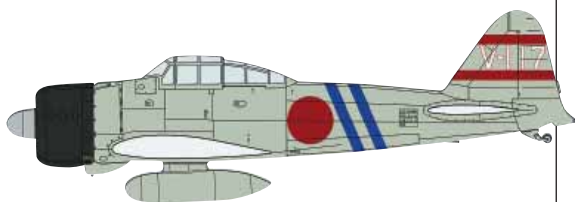

### 1/1500 SCALE SPACE PIRATE BATTLESHIP ARCADIA 2

One ship against the galaxy

Captain Harlock pilots the Battleship Arcadia in ferocious resistance to the encroachments of an alien race, the Mazon. His semi-sentient ship is one of the few remaining hopes for humanity's survival. Pulsar cannons bristle from the sleek decks, prepared to turn warships into cosmic dust. Grapple launchers stand ready to drag prey into Arcadia's lethal clutches. Even without ever seeing the movies or mangas, this ship is a piece of lethal art which deserves a proud place in your display case. This limited edition **kit features** new gun turret parts.

64709 (Limited Edition) HSGS6709 Total Parts: 164 Skill Level: 3 Length: 13.2 in (336 mm)

### 1/48 SCALE MITSUBISHI A6M2B ZERO FIGHTER TYPE 21 "RABAUL"

No chance for New Guinea

When the Japanese attacked Rabaul in 1942, there was never any question of who the victors would be. The RAAF contingent on the island consisted of just fourteen outdated aircraft while the vessels sent against them could carry ten times that number. In a display of extreme courage, the RAAF launched its planes into the path of the Zeros attacking the island. In the following moments, the Zero's effectiveness was proven beyond a reasonable doubt as the RAAF forces were obliterated. This Limited Edition **Kit features** two sets of decals.

07359 (Limited Edition) HSGS7359 Total Parts: 69 Skill Level: 3

### 1/48 SCALE JUNKERS JU87G-2 STUKA "RUDEL"

Germany's most famous Stuka ace

Hans-Ulrich Rudel was one of World War II's most impressive pilots. By the war's end, he'd flown 2,530 missions, with 2,000 targets destroyed in all. These impressive stats resulted in Rudel earning the Knights Cross of the Iron Cross with Golden Oak Leaves, Swords and Diamonds, the highest German military decoration. This limited edition **kit features** two decal marking options: 1. Luftwaffe SG 2 Kommodore Oberst Hans-Ulrich Rudel, Code: 494110, Germany, May 1945 and 2. Luftwaffe SG 2 Kommodore Oberst Hans-Ulrich Rudel, Code: T6 + AD, Hungary, September 1944.

07360 (Limited Edition) HSGS7360 Total Parts: 113 Skill Level: 3

### 1/48 SCALE F/A-18A HORNET "R.A.A.F. NO. 77 SQN. 70TH ANNIVERSARY"

"Swift to Destroy" for seven decades

The Royal Australian Air Force's No. 77 Squadron was established on March 16, 1942 at R.A.A.F. Base Pearce. During WWII, it protected its nation from enemy air raids with a fleet of P-40 Kittyhawks. The squadron, who converted to the F/A-18 Hornet in 1987, celebrated its seventieth anniversary in 2012. All seventy-one of their F/A-18As were revamped to commemorate the occasion. This limited edition **kit features** new antenna parts as well as one decal marking option: 1. Royal Australian A.F., No. 77 Sqn., 70th anniversary special marking, Code: A21-49, 2012.

07361 (Limited Edition) HSGS7361 Total Parts: 226 Skill Level: 3

### AMT® 1/25 Scale '65 Ford Galaxie Stock Car

*Fred Lorenzen's famous Ford*

For much of the sixties, Fred Lorenzen dominated the racing world. He racked up wins in his Ford Galaxie so fast that in 1963, he became the first racer to win more than \$100,000 in a single season. In 1965, he won the Daytona 500, Virginia 500, World 600 and National 400 championships. In 1971, Lorenzen was injured in a crash and never again won a national-level race. He is still one of the most popular NASCAR drivers in history. **Kit features** opening trunk, detailed parts and full decals.

723/12 AMTS0723 Skill Level: 2

## Plastic Models

### AMT® 1/25 Scale '69 Chevelle® SS® 396 Convertible

*Legendary muscle, classic style*

The SS 396 was a high-performance masterpiece with more speed and style than virtually any other vehicle of its era. It was the last model with the stylish lines of previous editions before the boxy rebuilds of '71 and '72. This, combined with the comparative low production of the SS 396 variant, makes these cars highly sought-after collector's items. You won't be able to cruise with the top down in this model, but you can always dream. **Kit features** optional custom or stock build.

823/12 AMTS0823 Skill Level: 2

### AMT® 1/25 Scale Iron Man® Stock Car

*Dont worry Tony, this one's a no-brainer*

This kit is quick and easy to build, requires no glue or paint and includes vivid, comic book-like sticker decals that are easy to apply and look great. It's an ideal model kit for beginners. It's also a trophy case worthy tribute to one of the most enigmatic and controversial superheroes of all time. **Kit features** snap-together construction, parts molded in yellow, black and grey, pad-printed tires and a colorful sticker sheet with Iron Man markings.

856/12 AMTS0856 Skill Level: 1

## Airfix® 1/48 Scale Gloster Javelin

*All-weather RAF interceptor*

In many ways, the Gloster Javelin was far ahead of its time. It first flew in 1951 but, even at that early date, it carried advanced infrared homing missiles and possessed remarkable radar sensors. The plane was fully capable of finding an adversary in total darkness and destroying it with a combination of missiles and 30mm ADEN cannon fire. Its only fault was its speed. Topping out at 710 mph, it was roughly half as fast as the contemporaneous F-104. **Kit features** many building options, accessories and three decal options.

12007      ARXS1207      Total Parts: 222      Skill Level: 3      Length: 15.8 in (402 mm)

## Airfix® 1/72 Scale De Havilland Mosquito MkII/VI/XVIII

*Britain's Birch and Balsa Bomber*

The Mosquito had a whole host of advantages over other bombers of its day. It was made from wood rather than strategic materials like steel or aluminum, it handled better and was more versatile than most bombers of its time and it was extraordinarily fast. Its range and bomb load was that of the four-engine B-17 and its higher service ceiling and speed improved the Mosquito's survivability. In addition to the bomber role, it served as a fighter, night fighter and reconnaissance aircraft. **Kit features** three type and decal options.

03019      ARXS03019      Total Parts: 97      Skill Level: 3      Length: 9 in (228 mm)

## Airfix® 1/72 Scale Folland Gnat T.1 Yellowjacks Starter Set

*The 'Jacks are back*

In distinctive yellow planes that roared across the sky, the Yellowjacks set a standard of excellence in aerobatics that demonstration teams across the globe have been trying to live up to ever since. Folland Gnat fighters were the groups primary aircraft when they formed in 1963. These small, swept-wing trainers were capable of attaining speeds just short of the sound barrier and their mobility rivaled that of front-line fighters. Eventually, the Yellowjacks were renamed as the Red Arrows. **Kit features** four paints, brush, glue and decals for the RAF Yellowjacks squadron.

55112      ARXS5112      Total Parts: 49      Skill Level: 1      Length: 6.1 in (155 mm)

## Airfix® 1/400 Scale U-Boat Type VIIC Starter Set

*Death from below*

Britannia may rule the waves, but from 1939-1945 Germany ruled everything just beneath them. Submarines were Germany's cloak and dagger, and they wielded them quite well in World War II. After routing Allied forces in France, Germany found itself at the Channel with no way to cross. They decided to starve the Brits into submission. U-boat wolfpacks sent thousands of ships to the bottom as they strove to choke off the flow of supplies to Britain. It was all for nothing. For every ship the subs sank the Allies built three. **Set features** model, paints, glue and brush.

55113      ARXS5113      Total Parts: 36      Skill Level: 1      Length: 6.5 in (166 mm)

## Airfix® 1/72 Scale Fw190A-8/Hawker Typhoon Dogfight Double Gift Set

*Lethal competitors in the struggle for Europe*

By 1944, the German Luftwaffe was a shadow of its former self. Losses could not be replaced. However, the pilots still in the air were the most experienced and lethal airmen the world has ever seen. Many flew the Fw 190, a plane that easily outperformed any Allied aircraft then in service. To counter this threat, the British deployed the Hawker Typhoon. At low altitudes the aircraft were closely matched, precipitating some of the most intense dogfights of the war. **Kit features** eight paints, two brushes, glue and two kits.

50136      ARXS5136      Total Parts: 127      Skill Level: 1  
 Focke Wulf Fw - 53      Length: 4.9 in (125 mm)  
 Hawker Typhoon - 74      Length: 5.3 in (134 mm)

## Airfix® RAF Benevolent Fund BAE Hawk

*Flying for the fund*

BAe Hawks are extremely agile jet-engine trainer aircraft favored by the "Hawk" display team for its impressive aerobatic displays. The lush "Union Jack" livery on this plane was used by the Hawks during an airshow to help drum up support and funds for the RAF Benevolent Fund. The Fund provides services for serving and past RAF personnel and their dependents. **Kit features** six paints, two brushes, glue and a BAE Hawk model kit. For each kit purchased, Airfix donates 50p to the Royal Air Force Benevolent Fund.

50155    ARXS5155    Total Parts: 91    Skill Level: 1    Length: 6.4 in (163 mm)

## Airfix® Hawker Siddeley Harrier Gr.1

*VTOL for all*

Harrier "Jump Jets" are capable of vectoring their engine nozzles to achieve vertical and/or much shortened takeoffs. This ability lets Harriers operate from in the same tactical theatre as helicopters while maintaining the speed, agility and weapons load of jet fighters. These aircraft proved their worth in the Falkland Islands War and with the U.S. Marine Corps in the close support role. Even as late as 2006, the Harrier was still in use with the Thai Air Force. **Kit features** six paints, two brushes, glue and a Harrier kit.

55205    ARXS5525    Total Parts: 89    Skill Level: 1    Length: 7.6 in (193 mm)

## MPC® 1/100 Scale Titan IIC Rocket

*Never mistaken for a bird or a plane*

Look! Up there! In the sky! Its a liquid-fueled, multi-stage rocket with a pair of solid fuel rocket boosters! Designed to rain death on whole countries as ICBMs, the Titan Rockets of the sixties instead became the vehicles for the most significant leaps forward in science and communication of the 20th century. These towering rockets propelled research and communications satellites into orbit and beyond. For the first time in 35 years, MPC is offering this unique kit. Build complete or as stages. **Kit features** complete instructions and waterslide decals.

790/06    MPC50790    Skill Level: 2

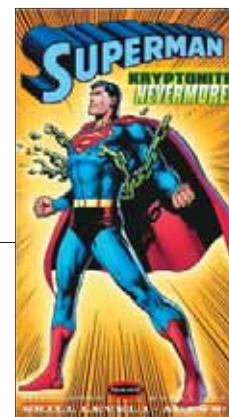

## Polar Lights® 1/8 Scale Superman®

*Americas first-and-favorite superhero.*

When Jerry Siegel and Joe Shuster debuted Superman in 1938, little did they know how many "Man of Steel" fans there would be seventy-five years later. Today, Superman remains the most popular of all the superheroes, inspiring comic book fans with an idealistic pursuit of "truth, justice and the American way". It's no wonder many consider Superman to be the greatest superhero of all time! This easy-to-build **kit features** snap assembly, brand-new tooling recreating the iconic "Kryptonite Nevermore" comic book cover, blue plastic molding, plus logo stickers and decals.

POL900    PLLS0900    Skill Level: 1

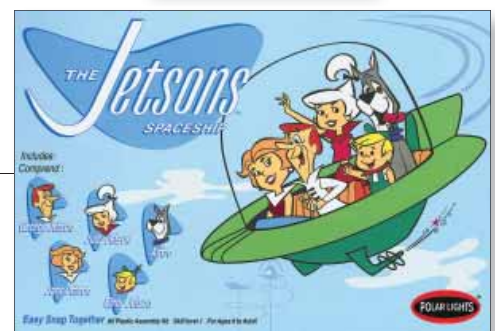

## Polar Lights® 1/25 Scale The Jetsons® Spacecraft

*The Space Ages answer to The "Flintstones®".*

"The Jetsons" made their American television debut on September 23, 1962. Series creators William Hanna and Joseph Barbera designed the show to be a futuristic counterpart to the Flintstones' Stone Age-inspired antics. Surprisingly, the show lasted only one primetime season, but it became a Saturday morning staple. By the mid-1980s, the Jetsons were back on TV in an updated series, followed by a big-screen adventure in 1990. **Kit features** easy snap assembly, green and clear plastic molding, new painted George Jetson and Astro figures, plus a base and display stand.

POL913    PLLS0913    Skill Level: 1

## Polar Lights® 1/24 Scale Spider-Man® VW® Beetle® *Web-slinging fun with Spidey® and the Beetle!*

One's a compact classic. The other's a crime-fighting superhero. Put them together, and what do you get? The Spider-Man VW Beetle, of course! This crazy concoction combines the beloved "Bug" with Peter Parker's web-slinging alter-ego, to create a fun kit-building experience for car and comic fans alike. **Kit features** easy snap-together assembly, a red plastic body, a black chassis with clear and chrome parts, an opening trunk, an opening hood with complete engine, free-rolling wheels, newly tooled option parts and Spider-Man stickers.

POL927      PLLS0927      Skill Level: 1

## Trumpeter® 1/200 Scale USS Missouri (BB-63) "Big Mo" Battleship

*Last of the legendary ladies*

USS Missouri was the last and most storied of American battleships. She served in World War II, the Korean War and the Gulf War. Her most famous service was as the ship on which the Japanese signed the instrument of surrender, officially ending the Second World War. After fifty years of exemplary service, she was stricken from the naval register and transferred to Pearl Harbor, Hawaii. She stands guard over the Arizona Memorial and serves as a museum ship for thousands of tourists every year. **Kit consists of** over 1573 parts including 11 photo-etched frets for handrails, ladders, radar parts, etc. Includes 2-piece hull, 2-piece deck, multiple guns, two SC-1 reconnaissance seaplanes, display stand and name plate. Completed kit measures a whopping 53" long!

3705      TSMS3705

## Trumpeter® 1/144 Scale Russian Sukhoi Su-27 Flanker B

*Ferocious fourth-generation fly-by-wire fighter*

Sukhoi® started developing the Su-27, a one-seat, Mach-2 class jet fighter, in 1969. It was designed as a response to the U.S. Air Force's F-15 Eagle. It was the Soviet Union's first jet aircraft with a fly-by-wire control system, making the Su-27 incredibly agile and easy to control at any speed or angle. This versatile plane most often flies air superiority missions, but it's able to perform virtually all combat operations. Its combination of speed, maneuverability and impressive armament make it a credible threat, even to much more modern fighters.

3909      TSMS3909      Total Parts: 60

## Trumpeter® 1/144 Scale French Rafale M Fighter *France's multi-role fighter of the future*

After withdrawing from several international fighter production agreements, the French decided to design a fighter all their own--the Rafale. The Rafale's SPECTRA system sets the Rafale apart from other modern fighters by actively scanning for and negating threats to the aircraft. If that doesn't work, the Rafale carries a significant weapons load including air-to-air, air-to-ground, air-to-surface missiles and/or variable yield thermonuclear weapons. Its combat radius is an impressive 1,158 miles (1,852km) without aerial refueling, a distance far enough to launch from Paris and destroy targets in the Ukraine.

3914      TSMS3914      Total Parts: 50

## Trumpeter® 1/35 Scale Russian T-90A Main Battle Tank *Say 'please' or they'll tank you*

The T-90A is no joking matter, it's a veritable whirlwind of destruction wrapped in steel, composite and explosive-reactive armor and sporting a 125mm smoothbore gun that fires fragmentation, high-explosive anti-tank and armor-piercing fin-stabilized rounds plus guided anti-tank missiles. It'll mess up your whole day. If a T-90 appears, there are only two things you can do: one is cry and the other shouldn't be discussed in a reputable publication. Fortunately, there are only 1,667 of these metal monstrosities currently in the world so one isn't likely to be around.

5562      TSMS5562

AFX® Giant Raceway

### Long story short...

With the Giant Raceway set, you are ready for a slot car experience that will make you feel like a racing legend from the very first lap.

# CONSTRUCTO 1/205 SCALE JUAN SEBASTIÁN ELCANO

Training sailors for future circumnavigations

Long before the metal-hulled, engine-powered, 371 ft. long Juan Sebastián Elcano was laid down in 1927, her namesake had already circumnavigated the globe in a succession of leaky, wood-hulled, sail-powered ~70 ft. long carracks. The ship J.S. Elcano is still used today as a training vessel for the Spanish Navy. Because it is primarily sail powered, it is perfect for training young midshipmen the fundamentals of seamanship in the most trying circumstances available.

- Detailed wood and metal kit
- Solid Hull
- Detailed instructions with step-by-step photos
- Length: 23 in (580 mm)

80622

# IT'S NEVER TOO EARLY TO START A MASTERPIECE

Get started on next year's Pinewood Derby® car today

The motto of the Boy Scouts of America is "Be Prepared"! Now is the time to get ready for next year's Pinewood Derby® competition right now for all types of Pinewood Derby® enthusiasts! This year, skip the prefabricated bodies and create a racer that you can proudly say is 100% yours. Revell has the wood; the tools, the paints, the wheels and axles. All that is needed for a truly impressive racer is your imagination!

# PINEWOOD DERBY®

## Designed for domination

## Let's get started!

**RMXY9632 Basic Racer Kit**

Today it's a block of wood, but with time and effort, this will be your race winner.

**RMXY9648 Carving set**

A pocket knife will only get you so far. The Revell Carving Set can give you the precise shape you've always wanted.

**RMXY8664 Axle Alignment Tool**

Once you've shaped the body—make sure the alignment of your axles is perfect with the Alignment Tool.

**RMXY9609 Official BSA® Wheel & Axle**

You won't get far without wheels! Revell has the only wheels that are BSA-approved for Pinewood Derby® races.

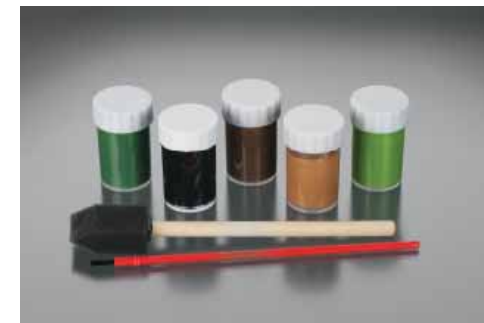

**RMXY9614 Graphite Powder**

Keep those wheels turning smooth with Graphite Powder! Lowering friction will increase your speed.

**RMXY9410 BATMAN™ Car Wrap Decal**

**RMXY9425 Camouflage Deluxe Paint & Brush Set**

You put a lot of effort into your racer's shape—now, make a statement with how it looks. Will you use a wrap or go fully-customized with paints?

**RVXY8673 Dry Transfer Decal I**

**RMXY8681 Peel & Stick Decal I**

Decals can add an impressive level of precision to your car's look!

## Finishing touches help you finish first!

**RMXY9647 Scale Set** Car Not included

Make sure your vehicle is at the rules-specified weight.

**RMXY9603 Stick On Chassis Weight**

Apply weights as needed to get you past the weight threshold and balance your car.

## See you at the track!
