THE MONSTER TRUCK THAT BREAKS ALL THE RULES!

SAVAGE XL OCTANE

Gasoline-Powered 4WD Monster Truck RTR

Here's what's all new on this magnificent monster...

- 15cc gasoline-powered Octane engine
- 20+ minutes of runtime per tank
- Tuned pipe for maximum performance
- Metal shoe Quadra clutch
- Composite triple-disc brake system
- All-new highly detailed and aggressive Savage XL Octane body
- Extra-strength composite roll cage
- Massive 300cc fuel tank

...and that's in addition to these proven performance perks:

- Full-time shaft drive 4WD
- Proven 2-stage, oversized oil-filled Big Bore shocks
- Sealed all-metal differentials with bulletproof bevel gears
- Heavy-duty cam-type servo saver steering system
- All-terrain tires with standardized Savage 17mm hex hubs
- Savage XL 3-speed transmission
- Savage XL suspension uprights
- Machined steel spur gear
- High-torque metal gear steering servo
- 2.4GHz radio technology
- Front and rear bumpers for extra protection
- Durable slipper clutch for drivetrain security
- Rechargeable receiver battery pack and charger included
- Dual-stage air filter

HPID4900 Savage XL Octane RTR

Length: 23.8 in (580 mm)

Width: 17.5 in (445 mm)

Wheelbase: 15.7 in (400 mm)

Height: 10.6 in (270 mm)

From the Experts:

Get ready for a new breed of monster truck! The Savage XL Octane is all new from bumper to bumper, starting with a 15cc gasoline engine that produces run times of 20+ minutes per tank for maximum bashing and off-road fun!

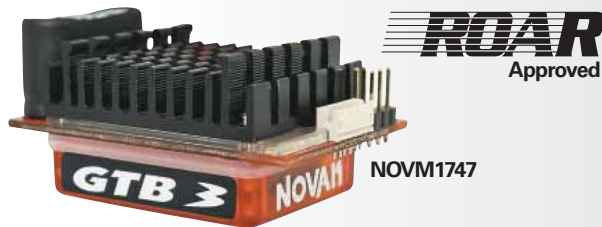

Long story short...

The Savage XL Octane RTR is a new breed of monster truck, with all the advantages of gasoline power!

NEWPRODUCT

POWERFUL PAIRINGS FOR RACE-WINNING CONTROL

GTB 3 Racing Brushless ESC w/X-Drive

ROAR
Approved

NOVM1747

- The ultimate non-timing spec racing ESC!
- One-Touch Set-Up™ for easy transmitter pairing
- NovaBrakes™ for incredible stopping power
- Complete on-board programming for quick trackside adjustments
- Race-proven X-Drive™ for ultra-smooth throttle response

The GTB 3 ESC is also available in two cost-saving combos with the Novak Vulcan motors

NOVC3126 GTB 3/Vulcan Mod 75T Race Combo
NOVC3127 GTB 3/Vulcan Spec 175T Race Combo

Pulse V2 Racing Brushless ESC w/X-Drive

NOVM1756

- The next generation in superior brushless performance!
- Super-Tuner™ interface with five customizable throttle profiles
- Dynamic Timing Advance™ can be adjusted in 1° increments or 10° steps
- Brake Power settings for easy, precise brake control
- Xtra-Timing™ algorithm for warp speeds

The Pulse V2 ESC is also available in three convenient combos — two featuring Vulcan motors and one with a vented Ballistic motor

NOVC3171 Pulse V2/Vulcan Mod 75T Race Combo
NOVC3172 Pulse V2/Vulcan Spec 175T Pro Race Combo
NOVC3173 Pulse V2/Vented Ballistic 550 4xSC BL System 4.5T

From the Experts:

From cost-conscience drivers to serious racers — as well as bashers of all levels — Novak ESCs deliver. The GTB 3 offers lots of versatility in an efficient design, while the Pulse V2 appeals to the racing enthusiast with many adjustable parameters and the ability to handle the heaviest loads. When combined with proven Novak motors, these ESCs make for an unbeatable team!

Long story short...

Novak's electronics expertise comes through with the GTB 3 and Pulse V2 brushless speed controls, especially when matched with state-of-the-art Novak motors!

COMING SOON!

All your favorite R/C paint colors!

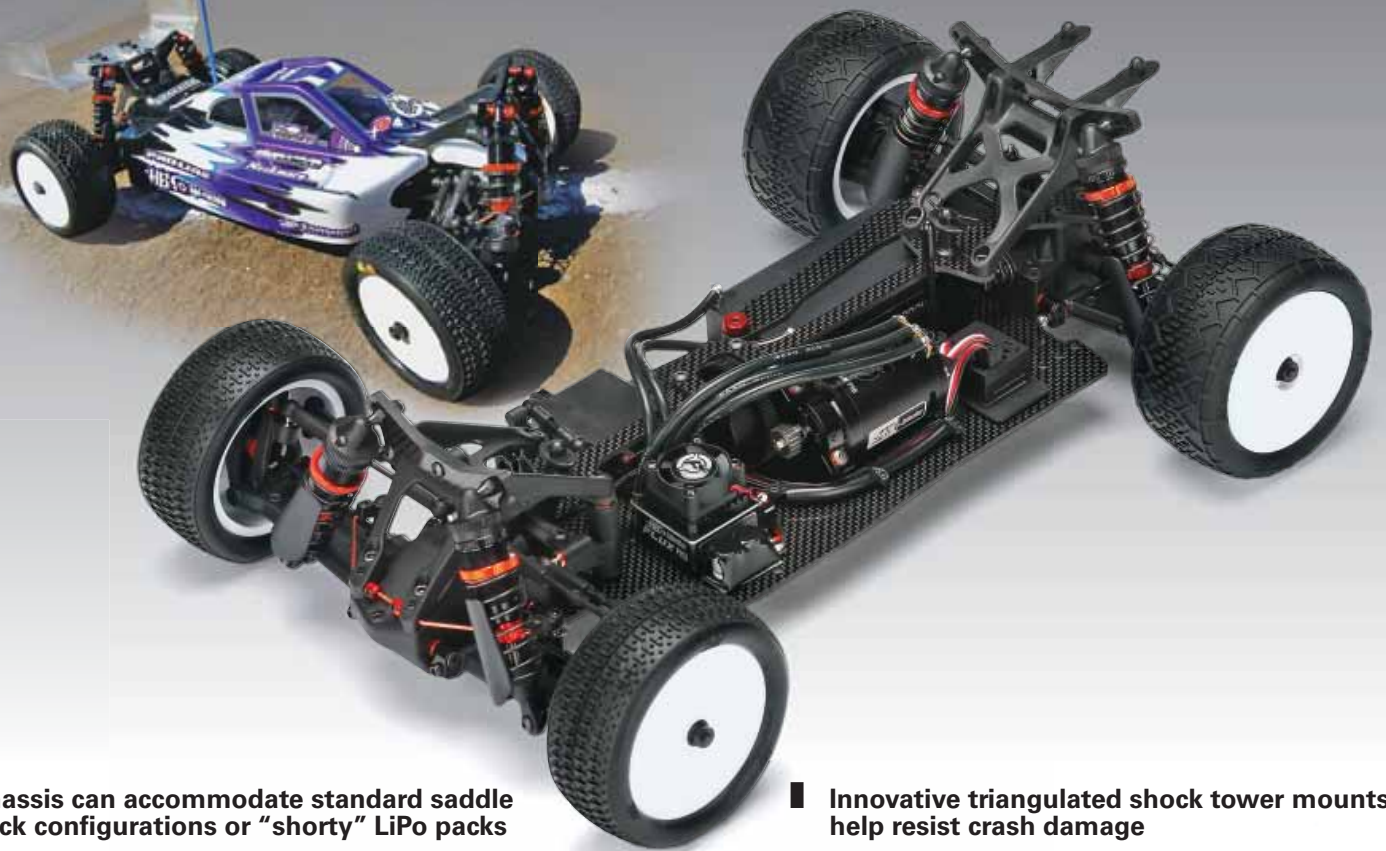

More details to come.

NEW PRODUCT

OWN THE 2013 NATIONAL CHAMPIONSHIP-WINNING & WORLD'S PODIUM HB D413!

HB D413 1/10 Scale 4WD Buggy Kit

- Chassis can accommodate standard saddle pack configurations or "shorty" LiPo packs
- Adjustable chassis allows drivers to change the balance front-to-rear
- Three compact, high-strength gear diffs for fine-tuning the overall chassis handling characteristics
- Highly adjustable suspension geometry (roll center, kick-up, anti-squat, camber and toe-in)
- 0.5" (12 mm) Big Bore shocks with threaded bodies and mud guards
- Innovative triangulated shock tower mounts help resist crash damage
- Versatile steering system with minimal bump-steer and Ackermann geometry for complete control
- HB monocoque suspension arms provide stiffness, strength and adjustability

From the Experts:

It's the latest version of the highly acclaimed D4 buggy, and it has already made a name for itself on the ROAR and World Championship stages! The D413 offers everything a serious racer could want, including race-proven adaptable suspension geometry, Big Bore shocks, versatile steering and one of the most adjustable chassis ever engineered. It's the only competition-level 4WD chassis with multiple balancing and battery layout options!

Long story short...

Ty Tessmann took the HB D413 to victory at the 2013 ROAR Nationals and a podium finish at the World Championships – find out what it can do for you in 2014!

HBSC2723 HB D413 1/10 Scale 4WD Buggy Kit

Width: 9.8 in (250 mm)

Wheelbase: 10.9 in (278 mm)

10J

10-Channel 2.4GHz Radio
w/R3008SB

TELEMETRY, MULTI-ROTOR PROGRAMMING AND MUCH MORE

The 10J is not just the first Futaba "J" series radio with telemetry; it's also the first "J" series radio that lets you download software to keep your radio up to date. A synthesized voice feature lets you hear telemetry as well as see it, and there's also a specialized programming menu for multi-rotor aircraft. On the back is a convenient port for programming S.Bus/S.Bus2 servos; easy-to-navigate controls for everything else are logically arranged on the front panel. With the 10J you get these innovations and much more for far less than you'd expect.

System Features:

- Telemetry
- Futaba T-FHSS, S-FHSS 2.4GHz security
- Four menus (Airplane, Heli, Glider and Multi-Rotor) — each with 6 programmable mixes plus many other functions
- 30-model memory
- Synthesized voice for telemetry data
- Vibration alerts for alarm conditions and low battery
- Built-in S.Bus programmer for S.Bus servos
- 10 channels (one variable knob, five 2-position switches, two 3-position switches, one momentary switch, two digital levers)
- Jog dial and 3 buttons for fast, easy programming

The large backlit LCD display helps make programming easy, as well as clearly showing the timers and telemetry data.

From the Experts:

The 10J takes the Futaba "J" series to a new level of advanced radio technology, with straightforward programming that will appeal to new modelers. 10 channels, synthesized voice output, vibration alerts, multi-rotor programming, built-in S.Bus servo programmer and telemetry are just a few of the outstanding functions this system has — and the 10J's price point is yet another reason to make it your "go-to" radio.

Long story short...

With a long list of cutting-edge features at an amazing price, the 10J is sure to be a top seller!

The R3008SB is a T-FHSS telemetry-capable receiver that features S.Bus and S.Bus2 compatibility and 8-pwm ports. The receiver also features an external battery voltage connector.

FUTK9200 10JA Airplane Radio w/R3008SBTx/Rx

Futaba®

WATERPROOF + BRUSHLESS = ULTIMATE OFF-ROADING EXCITEMENT!

E-Maxx Brushless 2.4GHz Monster Truck RTR

TRAD66** E-Maxx BLS 2.4GHz Monster Truck RTR

Length: 20.4 in (518 mm)

Width: 16.5 in (419 mm)

Weight: 7.2 lb (3290 g)

You'll find all of these performance perks on both vehicles:

- Waterproof MXL-6s ESC — unaffected by water, mud or snow
- 2200kV brushless motor
- 2.4GHz TQi radio system with Docking Base™ and telemetry sensors
- Revo-Spec slipper clutch
- Two digital waterproof steering servos
- Captured steering and toe linkages
- Heavy-duty 17mm splined aluminum hex hubs
- Tunable sealed differentials
- Bellcrank steering and servo saver
- Rubber-sealed ball bearings
- Two Traxxas Power 8.4V NiMH batteries
- Fully painted, trimmed, and decaled ProGraphix® body
- Heavy-duty Brushless Ready™ Transmission

E-Revo Brushless 2.4GHz Monster Truck RTR

TRAD73** E-Revo BLS 2.4GHz Monster Truck RTR

Length: 22.9 in (582 mm)

Width: 16.5 in (419 mm)

Weight: 9.5 lb (4330 g)

Brushless power systems put the E-Maxx BLS and E-Revo BLS ahead of the pack...fully waterproof components keep these beasts going in virtually any weather conditions! With their Castle® electronics and 2200kV motors these monster trucks are badder than ever, and they're ready to wreak havoc right out of the box!

TRAXXAS

Long story short...

Conquer the competition — and the outdoors all year round — with Traxxas's newest brushless E-Maxx and E-Revo monsters!

THE FIRST R/C CAR WITH A 10-YEAR WINNING TRADITION

RC10 World's Car Kit

1/10 Scale 2WD Electric Off-Road Competition Buggy Kit

Its looks replicate the vintage RC10 driven to victory by Brian Kinwald at the IFMAR World Championships — but underneath the classic buggy body are updates galore that bring the RC10 World's Car Kit into the 21st century. Speed, durability, handling, assembly ease...this intense off-roader has it all!

Photo shows items not included in kit.

ASCD6002 RC10 World's Car Kit

Length: 15 in (381 mm)

Width: 8.9 in (248 mm)

Weight: variable*

Wheelbase: 10.3-10.5 in (262.5-267.7 mm)

*Final weight contingent upon electronics and tires.

- Black, hard-anodized 6061 T-6 machined aluminum monocoque chassis
- Stealth 3-gear transmission with ball differential
- V2 slipper assembly with molded gear cover
- 16 precision ball bearings
- Turbo Mirage body, 5.5" wing and replica vintage decals
- V2 threaded hard anodized 6061 T6 aluminum coil-over shocks with molded bleeder caps
- Independent suspension with durable long front arms and refined geometry
- In-line aluminum front axles and 30° caster blocks
- Fiber composite shock towers and battery strap
- Graphite transmission brace
- Updated CVA axle drivetrain
- World's Car bellcrank steering
- 2.2" one-piece wheels
- Steel turnbuckles

Updated V2 hard-anodized threaded shock bodies and aluminum adjustment collars provide improved performance and adjustability.

The drivetrain features the famous Stealth 3-gear transmission with ball differential, CVA axles and V2 slipper to harness the power of modern brushless motors.

MORE THAN A GREAT MODEL — IT'S THE TOY OF THE YEAR!

The Proto-X Quadcopter steals the show at the Nuremberg and London Toy Fairs

Now the world knows what everyone in North America has known for the last several months: the Proto-X quadcopter delivers incredible fun for your hobby dollar! Branded in Europe under Revell/Germany as the Nano Quad, the Proto-X impressed judges at both the 2014 Nuremberg and London Toy Fairs with its technology, compact size, performance and value.

Proto-X takes the London Toy Fair by storm!

A panel of independent toy retailers at the London Toy Fair gave the Proto-X a Best New Toy Award in the Hobby division, citing it as a trendsetter in innovative products.

Proto-X earns another prestigious award at Nuremberg!

The same Proto-X quadcopter won in the Teenager & Family category at Nuremberg, where the experts stated that it "is completely in line with the 'Mini is King' trend."

With rave reviews like this, it's clear the nano-sized Proto-X quadcopter is HUGE! Get yours today — it's the "must-have" model for 2014!

Features:

- Ultra small size, so it can fly anywhere!
- Weighs less than half an ounce
- Beginner-friendly and fun for everyone
- Bright, built-in LEDs make it easy to see in low light
- Gyro provides smooth, stable flight
- Tough, high-tech, one-piece body
- Battery charges in less than 30 minutes using included USB charge cord

Comes with all this:

- 4-channel 2.4GHz transmitter with digital trims
- Four micro motors
- 3.7V 100mAh LiPo flight battery
- USB charge cord
- Four spare rotor blades

AXID9018 - Wraith Rock Racer
4WD RTR

Axial knows that crawling goes beyond standing around a pile of rocks. That's why we make vehicles for multiple purposes. Take the SCX10™, one of the most versatile R/C rig's available, capable of conquering the legendary Rubicon Trail where it's not about the checkered flag but more about enduring the adventure. Or the Wraith™, featuring the first and most realistic full tube-frame chassis design made for brutal rock racing where durability and speed are a must.

Axial is a company of enthusiasts for enthusiasts. The brand itself is a culmination of a top shelf design team coupled with an executive and marketing staff with their finger on the pulse of what is hot and trending in the world of motorsports. Our design team prides themselves on marrying real scale looks with top level performance. The Axial team encourages you to get outside and have some family fun.

Axial, going wherever your feet carry you.

See what the lifestyle is all about!

DETC410

1/10 Scale Electric Touring Car Kit

The DETC410: setting gold standards in a high-performance, value-added kit

Check out what's underneath the DETC410's sleek, stylish touring car body, and your adrenalin is sure to be pumping. Built to world-class kit specifications, the DETC410 comes loaded with difference-making high-performance upgrades throughout — sparing you the expense and effort of purchasing and installing aftermarket parts. Its degree of adjustability is unparalleled, allowing you to fine-tune nearly every aspect of the kit's speed and handling. And this race-winning, premium-quality kit comes at a price that's surprisingly affordable.

- Precision manufactured aluminum and carbon fiber structural parts are standard
- Gold anodizing adds eye-catching, professional looks
- The battery mounting system fits all ROAR-legal 2S LiPo cells

Length: 14.37 in (365 mm)
 Width: 7.3 in (185 mm)
 Wheelbase: 10.0-10.28 in (254-261 mm)
 Weight (approx.): 2.97 lbs. (1350 g)
 TDR0150

All of the DETC410's structural chassis parts are made of premium quality 7075-T6 aluminum, including the suspension hangers and lower bulkhead mounts. A belt tension gauge etched into the lower bulkhead makes fine-tuning the drive train quick and easy.

Team Durango makes it easier than ever before to get the exact setup for any track condition. A fully adjustable insert system provides lots of fine-tuning options, and 7075-T6 gold anodized aluminum suspension hangers offer strong, lightweight mounting for inboard hinge pins.

The layshaft and pulley gear are specially designed for extremely efficient power transfer. They work with 7075-T6 aluminum layshaft gear holders to provide consistent operation regardless of track conditions.

Enjoy ultra-smooth power transfer and less driveshaft vibration with the DETC410's super-efficient front D-joint aluminum driveshafts. High-quality steel axles and gold anodized aluminum shafts help deliver consistent performance on all track surfaces.

EXPERIENCE THE AIRCORE ADVANTAGE!

Enjoy incredible value, outstanding detail and high-flying fun!

Once you've flown your first AirCore model you'll want to fly all of the other airframes in the squadron...and AirCore makes it easier and more affordable than traditional park flyers! Check out the comparison chart — each additional AirCore airframe costs consumers only \$45, while traditional park flyers cost much more. That's because all of the expensive components you usually have to buy with every new airplane are contained in a single Power Core* you switch between AirCore airframes. That's the beauty of the AirCore modular system, and a big reason why you get more with AirCore!

*Power Core sold separately.

- Fly any AirCore airframe with one easy-to-transfer Power Core
- Bigger, more durable and more powerful than micros
- Performance that's comparable to larger park flyers, while being easier to transport
- An AirCore LiPo battery is economically priced at \$5.99 — most larger park flyer batteries cost over \$20!
- Fly with any SLT transmitter

Check out the fun and ease of AirCore planes for yourself!

The Power Core is the heart of the system — buy one to share between AirCore planes.

7.4V 250mAh LiPo Battery
FLZA6401

MAKE 'N TAKE MAKES MODELING EASY!

Look for events at participating hobby shops

At Make 'n Take events, modelers build a plastic kit at their favorite shop and then take it home to keep. These events are a great way to get kids and their families building models together!

Make 'n Take benefits:

- Customers build modeling experience; stores build customer connections
- Early exposure to kit-building gets kids interested in other hobbies later
- Great for family bonding – the perfect Mother's Day/Father's Day activity
- Kids build motor skills and self-esteem, proudly saying "I Made That"!
- Ideal for birthday parties, scouting and church groups

All Make 'n Take cartons include:

- 24 bagged SnapTite® kits
- 1 boxed kit
- 24 decal sheets & instructions
- 2 event posters
- Event planner
- Pre-promotion timetable
- Sign-up sheet template
- Setup locations
- Theme/location suggestions
- Vehicle kits also include 12 screwdrivers

1/72 Scale SnapTite A-10 Warthog™ RMXS8569

1/25 Scale SnapTite Camaro™ Concept Car RMXS8733

1/72 Scale SnapTite F-117® Nighthawk® RMXS8705

1/25 Scale SnapTite HUMVEE® RMXS8741

I made that!

From the Experts:

Ask a participating hobby shop about their next Make 'n Take event – or get in on the fun by holding one with a favorite organization!

Long story short...

Make 'n Take events make model-building a breeze, with easy-to-assemble SnapTite kits that will spark every child's imagination!

www.revell.com

1/48 SCALE RAF VENTURA MKII

Lockheed legends

Lockheed Venturas were not the toughest planes in the sky during WWII. They couldn't fly the furthest or carry the most bombs, but when the RAF needed a reliable plane for recon and light bombing, the Ventura was there. Brave aircrews flew them low and fast into enemy territory brimming with fighters and bristling with AA guns. Many never made it home, but many more struck at the heart of the Third Reich and won us the war. **Kit features** Bolton-Paul style turret, open or closed bomb bay and separate wing tanks.

85-5533 RMXS5533 Total Parts: 142 Skill Level: 3 Wingspan: 16.4 in (416mm)

MONOGRAM NEW RELEASES

MONOGRAM® 1/48 SCALE DOUGLAS C-47 SKYTRAIN

Gooney Birds get the job done

An aluminum tube 63ft. long; unheated, unpressurized, unarmed, unarmored and carrying 32 men to war through flak and fighter fire. Gooney Birds, the C-47 Skytrain, were the workhorses and warhorses of the Allies throughout WWII. They carried paratroopers into combat, brought supplies to embattled soldiers and, at the end of the war, carried them home. No model collection is complete without at least one model of the humble yet mighty C-47 Skytrain! **Kit features** full interior detail, 9 paratroopers and 3 crew figures—side doors can be modeled open or closed.

MONS5637

REVELL OF GERMANY NEW RELEASES

1/72 SCALE WWII GERMAN INFANTRY, AFRICA CORPS

Rommel's raiders

It takes a special type of soldier to turn back the tide of a victorious and numerically superior enemy. The Africa Corps faced down heat, starvation, dehydration and a well-prepared enemy to reach for victory against all odds. German soldiers arrived in Libya in 1941 to bolster crippled Italian defenses. They reversed the gains of the British, forcing them back into Egypt. However, the German disadvantage in numbers and supply could simply not be overcome. The Corps was defeated twice at El Alamein and forced to withdraw. **Kit features** 50 unpainted figures.

02616 RVLS2616 Total Parts: 52 Skill Level: 1

1/35 SCALE WIESEL 2 LEFLASYS (3 KIT SET)

No safe place in the sky

The Wiesel armored weapons carrier was designed to give German paratroopers greater effectiveness against non-infantry threats. The three vehicles in the Wiesel 2 LeFlaSys (command vehicle, radar vehicle, Stinger missile carrier) allow a battery of Wiesels to detect and destroy enemy aircraft nearly 4 miles (6km) distant. Best of all, these vehicles are light enough to be deployed by aircraft anywhere the paratroopers need to go. **Kit features** three models (Ozelot, AFF, BF/UF), extensive detail, traversable weapons and radar and authentic decals.

03205 RVLS3205 Total Parts: 423 Skill Level: 5 Length: 5.1 in (129mm)

1/72 SCALE LKW 5T.MIL GL

German Army transport vehicle

Bacon, beans, bullets, bombs—if it's needed by a military force, you can bet the LKW 5t. mil gl transports it. These highly-capable 4x4 offroad trucks are responsible for delivering the supplies that the German Army needs to the front. With their V-8 engines, these trucks are both powerful and quick and their unique free-moving axles enable them to tackle more off-road terrain than nearly any other truck in the world. **Kit features** a detailed transmission, axles, driver's cab, internal fittings and surface detailing, plus fuel cans, spare tires and decals.

03300 RVLS3300 Total Parts: 110 Skill Level: 4 Length: 4.4 in (111mm)

1/144 SCALE SPACE SHUTTLE ATLANTIS

Last in space

Space Shuttle Atlantis successfully completed thirty-three missions, spending a total of over 300 days in space during its service. It docked with space stations, deployed satellites, conducted scientific research and always brought its crew home safely. After 26 years, Atlantis has been retired along with the rest of the shuttle fleet. You can visit it at the Kennedy Space Center Visitor Complex or build your own with this detailed kit! **Kit features** textured surfaces, optionally open cargo doors, extended or retracted landing gear, a laboratory, telescope, load arm, astronaut figure and full decals.

04544 RVLS4544 Total Parts: 64 Skill Level: 4 Length: 9.9 in (452mm)

1/28 SCALE SPAD XIII WWI BIPLANE FIGHTER

Ferocious French fighters

Compared to earlier fighters, the Spad XIII had more engine power, more maneuverability and stronger armament. All those changes brought the Allies up to parity with the aircraft of the Central Powers. Thousands of the aircraft took to the skies, filling both French and new American squadrons. These planes battered German flying forces, helping bring the war to a close. **Kit features** structured surfaces, detailed engine, moveable wheels and prop, twin Vickers machine guns, a pilot figure, two ground crew figures and two decal sets.

04730 RVLS4730 Total Parts: 80 Skill Level: 4 Wingspan: 11.7 in (298mm)

1/32 SCALE VOUGHT F4U-1A CORSAIR

11 to 1

Powered by a 2,000 hp engine and a massive 13' 4" (4 m) propeller, the F4U-1 Corsair was the fastest single-engine fighter of its era. This incredible speed was matched by supreme maneuverability and a total of six .50 caliber machine guns. All combined created a fighter with which the US Navy racked up an 11 to 1 kill ratio during WWII. Its popularity was so great that 12,571 were produced from 1942-1953. **Kit features** foldable wings, detailed cockpit and engine, pilot figure, rotating propeller and two sets of USN decals.

04781 RVLS4781 Total Parts: 68 Skill Level: 3 Wingspan: 15.3 in (388mm)

1/32 SCALE MESSERSCHMITT BF 109 G10 "BUBI HARTMANN"

Top pilot of all time

Erich "Bubi" Hartmann shot down 352 enemy aircraft. He was, is and most likely always will be the top scoring fighter ace of all time. His plane's famed livery, with the black petals streaking back from the prop, was so feared that Soviet pilots would avoid conflicts with him at all costs. The intense power of the Bf 109 favored his quick strike tactics, allowing him to strike and be gone before Russian planes could react. **Kit features** lots of details and options plus decals for two of Hartmann's aircraft.

04888 RVLS4888 Total Parts: 147 Skill Level:5 Wingspan: 12.2 in (310mm)

1/144 SCALE APOLLO SATURN V One small step

For thousands of years we looked up and wondered, but it wasn't until 1969 that the Saturn V finally carried humanity to the moon to discover what was there. This 300 foot tall rocket was designed by the same minds that developed the V-2 to rain death on London. Those same minds, bent to peaceful purposes, designed the first and so far only space vehicle capable of transporting people beyond low Earth orbit. **Kit features** launch pad, structured surface, lunar module, three figures and full decals.

04909 RVLS4909 Total Parts: 82 Skill Level: 4 Height: 30.5 in (775mm)

1/144 SCALE GERMAN U212A CLASS SUBMARINE

The unconventional conventional sub

In many ways, the U212A class harkens back to an earlier era of submarine warfare, but it's also one of the most advanced subs in the world. It is equipped with diesel and electric power instead of nuclear which shortens its endurance, but makes the ship virtually undetectable underwater. The "Seehect" torpedoes the vessel carries are also state-of-the-art. Equipped with fiber-optic wire guidance and 260kg of high explosive, these torpedoes are accurate and devastatingly effective. **Kit features** a detailed model with full equipment and decals for 4 German and Italian vessels.

05019 RVLS5019 Total Parts: 55 Skill Level: 3 Length: 15.6 in (390mm)

1/25 SCALE '05 CHEVY IMPALA POLICE CRUISER So sleek, it's almost criminal

Long, sleek, elegant and loaded with features, the '05 Chevy Impala is light and easy to steer with a toughened steel chassis, V6 engine, bucket seats, full rear bench, plenty of leg room and the power to rev from 0 to 60 mph (0-100 km/h) in 7.2 seconds. It's by far the best-looking, and best-performing, car you'll ever find yourself handcuffed and tossed in the back of. **Kit features** a pre-assembled and painted light bar, detailed interior, partition, one-piece chassis, authentic police wheel rims, instructions and decals for three variants.

07068 RVLS7068 Total Parts: 44 Skill Level: 3 Length: 8.2 in (208mm)

1/25 SCALE CORVETTE C5-R "COMPUWARE"

Powering to the podium

Corvette's designers have created lots of remarkable cars, but the C5-R is in a class all its own. This vehicle was designed on the basis of the C5 but upgraded with racing-specific upgrades like a 610 hp engine and improved suspension. These vehicles made a big mark on the LeMans racing series, sweeping 2nd and 3rd place in the GTS Class. **Kit features** detailed interior, a body-contoured seat, original tires/rims, detailed suspension, authentic bodywork with fine surface detail, detailed engine and two decal sets for the 2003 Le Mans race.

07069 RVL57069 Total Parts: 98 Skill Level: 4 Length: 7.4 in (189mm)

HASEGAWA NEW RELEASES

1/200 SCALE AIR DO BOEING® 767-300

The passenger plane, perfected

21.1 feet (6.4 m) longer than the 767-200, the 767-300 first flew as part of the Japan Airlines fleet in 1986. The popular Japanese airliner Air Do currently has two Boeing 767-300s in its fleet, both of which can carry up to 270 passengers apiece. While it isn't as prominent in the U.S., the 767-300's increased size and performance have made it a popular choice for high-density passenger flights in Europe and Asia alike. This **kit reissue features** one new marking option: 1. Air Do, Code: JA601A.

10720-5 HSGS0720 Total Parts: 39 Skill Level: 3

1/72 LOCKHEED MARTIN® F-35A LIGHTNING II

The fighter of the future

In years to come, aerial warfare will change as more sophisticated weapons emerge. The F-35 is an airframe intended to counter improvements in detection and engagement systems. It is a multi-role fighter designed with stealth capabilities which are intended to improve its survivability in a world swarming with SAM batteries. A few hurdles remain, however. Primarily the 1.5 trillion dollar sticker price for the program and the 20 million lines of code that remain to be written for its incredibly sophisticated software. **Kit features** USAF "Green Bats" decals.

01572 HSGS1572 Total Parts: 68 Skill Level: 3

1/12 SCALE YAMAHA® YZR500 (0WA8)

"SONAUTO YAMAHA 1989"

Burn rubber with Christian Sarron

From 1973-2002, the Yamaha YZR500 led four 500 cc Grand Prix riders to ten separate world championships. One of the most famous riders to take the helm of the YZR500 was France's Christian Sarron. For the 1989 season, Sarron rode for the Sonauto Yamaha team; scoring 165 points to earn a third-place finish overall. This limited edition **kit features** new disk cover and fender parts and one decal marking option: SONAUTO YAMAHA Team WGP500 1989, 3rd place rider, No.4, Christian Sarron.

21709 (Limited Edition) HSGS1709 Total Parts: 171 Skill Level: 3

1/72 SPITFIRE MK IXC & BEAUFIGHTER MK X (2 KITS) Overwatch for Operation Overlord

In the lead up to D-Day, German ships, ground forces and aircraft were arrayed to make an amphibious landing very costly. Fortunately, the RAF had the Spitfire and Beaufighter. The Spitfire was a renowned dogfighter and one of the best daytime fighters of the war. The Beaufighter was a juggernaut loaded with one of the heaviest weapon loads of any WWII fighter. Together, these fighters helped scour sky, sea and soil of enemies and pave the way for Allied victory. This combo **kit features** detailed interiors and decals for two versions each.

02087 (Limited Edition) HSGS2087 (2 kits) Total Parts: 45 + 130 Skill Level: 3

1/72 SCALE F-4EJ KAI PHANTOM II (AIR COMBAT MEET 2013)

Decades of aerial domination

Japan's fighter squadrons operate Phantom II aircraft out of bases all over Japan. For forty years, these Phantoms have been responsible for keeping Japanese Airspace clear of hostiles. Even after forty years, the Phantom's armament, speed and maneuverability still make it a dire threat to modern aircraft. Air Combat Meets keep pilots sharp and ready. In addition, the airframe's versatility allows it to accomplish many types of missions, making it essential for smaller air forces. This limited edition **kit features** decals for two JASDF squadrons.

02089 (Limited Edition) HSGS2089 Total Parts: 117 Skill Level: 3

1/72 SCALE SHENYANG J-11 FIGHTER (PLAAF) China's finest fighter

Although it's based on the Sukhoi Su-27, the Chinese J-11 is a bird all its own. The old Russian design has been updated with Chinese-made engines, avionics and weapons that make it roughly equal in fighting prowess to the American F-15 Eagle. Although the cloak of secrecy is drawn tighter around the J-11 than virtually any other military aircraft in the world, one thing is certain. The J-11 is becoming a more versatile and potent weapon with every passing day. This limited edition **kit features** decals for a PLAAF fighter.

02090 (Limited Edition) HSGS2090 Total Parts: 142 Skill Level: 3

1/24 SCALE LANCIA® STRATOS HF "1981 MONTE CARLO RALLY" "High Fidelity" rally racing

Introduced in 1972, the Lancia Stratos HF (or "High Fidelity") has the distinction of winning the World Rally Championship three consecutive times (1974, 1975 and 1976). The Monte Carlo Rally serves as the first round of the WRC. In 1981's race, France's Bernard Darniche drove his Lancia Stratos HF toward a sixth place finish. This limited edition **kit features** upgraded fender parts, plus one decal marking option: 1. 1981 Monte Carlo Rally 6th Place Team Chardonnet Car No. 4, Driver: Bernard Darniche.

20261 (Limited Edition) HSGS2261 Total Parts: 145 Skill Level: 3

1/700 SCALE JMSDF CHOKAI (DDG-176) The latest Kongo-class destroyer

Like all Kongo-class destroyers, the Chokai is named after one of Japan's most famous mountains. And like the other Kongo-class destroyers, the Chokai is propelled by four gas turbines which produce a top speed of 30 knots (56 km/h). Its crew complement is 300 members of the Japan Maritime Self-Defense Force, and the rear deck can accommodate incoming helicopters. This kit reissue features new antenna parts, as well as one decal marking option: 1. Guided Missile Destroyer Chokai, Code: 176.

49030-7 HSGS4930 Total Parts: 158 Skill Level: 3

1/48 SCALE MESSERSCHMITT BF 109E-7 "JAPANESE ARMY"

German muscle makes its way to Japan

The Bf 109E-7 first fought on the front lines in August of 1940. The E-7's biggest advantage over earlier variants was that it could carry drop tanks and bombs. In 1941, the Imperial Japanese Army Air Force purchased a fleet of five Bf 109E-7s (without armament) to be used for flight testing. The IJAAF's knowledge of the Bf 109E-7's liquid-cooled, inverted V-12 engine resulted in the Kawasaki® Ki-61 Hien. This limited edition **kit features** one decal marking option: 1. IJAAF Experimental Division, Code: White-1, Kagamihara AF, 1941.

07369 (Limited Edition) HSGS7369 Total Parts: 61 Skill Level: 3

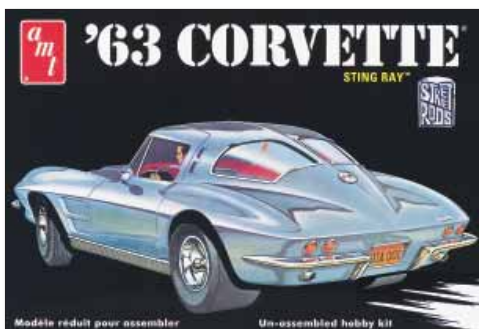

1/48 SCALE NAKAJIMA KI-27 TYPE 97 (NATE) "1ST FR"

Out-strafe Soviets with the IJAAF

The Ki-27 was developed by Nakajima in 1935 to replace the Kawasaki® Ki-10 fighter biplane. What the Ki-27 lacked in speed and climbing ability, it made up in maneuverability. In 1939's Battle of Khalkhin Gol, Ki-27s squared off against Soviet I-15 biplanes and I-16 monoplanes. When faster I-16s appeared, Ki-27s no longer cut it. As a result, they were relegated to being bomber escorts during WWII's early days. This limited edition **kit features** one decal marking option: 1. IJAAF 1st FR, 2nd Company, Capt. Keisuke Yamada, Kagamihara AF, June 1939.

07370 (Limited Edition) HSGS7370 Total Parts: 46 Skill Level: 3

Plastic Models

AMT® 1/25 Scale '63 Chevy Corvette

One fast fish

The Corvette Stingray was and is one of the most distinctive cars in automotive history. It was formed for luxury and looks but packed the performance to back it all up. The '63 featured a lot of style elements that were deleted on later models, including the split back windshield and dummy hood vents. The vehicle was popular and its performance led to it being modified for street racing with bigger tires and even more powerful engines. **Kit features** a retro-deluxe edition kit you can build stock, custom or drag.

AMT861/12 AMTS0861 Skill Level: 2

AMT® 1/25 Scale '51 Chevy® Bel Air®

The '50s standout Chevy

The 1950s brought us such immortal icons as James Dean, Marilyn Monroe and Elvis Presley. Car fans, however, think the 1951 Chevrolet® Bel Air surpasses them all. Sporting a refined, Cadillac®-inspired design, chrome accents and beautiful rounded lines, the '51 Bel Air lives on as the decade's most-desired car. **Kit features** a 2-in-1 model you can build stock or drag, pre-lettered M&H Racemaster vinyl drag slicks, stock and chrome wheels, full decals and vintage illustrated packaging.

AMT862/12 AMTS0862 Skill Level: 2

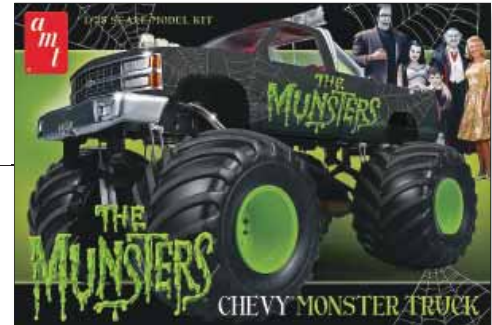

AMT® 1/25 Scale Chevy® Munster® Truck

Everyone's favorite monster family has a new addition

It's big, it's bad, it's scary and it's the perfect addition to the Munster's family. This car-crushing dirt flinging beast is just what the mad doctor ordered. It's a beast with a big blown motor jutting through the hood and a larger-than-life image that's the perfect fit for the freakiest family in the San Fernando Valley. **Kit features** a detailed Chevy Silverado™ monster truck with a high-power blown motor, huge wheels, roll bar, light rack and full Munsters decals.

AMT863/12 AMTS0863 Skill Level: 2

Dragon Models® 1/72 Scale Panzerfähre Föhrendeck mit Gepanzerter

Armored ferry for the Eastern Front

To defeat vastly numerically superior Russian forces, German troops had to stay mobile. The bitter Russian winters and countless water obstacles slowed the German Army and made moving tanks and equipment nearly impossible. To cross these rivers, the German Army devised the Panzerfähre—two Panzer IV hulls converted to be amphibious with a flat barge between them for transporting tanks. Only two prototypes were constructed before it was discovered that the barge's carrying capacity was too low for new tanks. **Kit features** the ferry and LWS tractor with open/closed hatches.

7509 DMLS7509

Lindberg Models® 1/48 Scale Winnie Mae

"Around the world in eight days"

With Wiley Post behind the controls, the Winnie Mae circumnavigated the globe in 8 days 15 hours and 51 minutes. Even today that's a significant time, but in 1931 it beat the previous record by 13 days. Just two years later, Post beat his time by 21 hours, this time flying solo! Post was later killed in a flying accident, but his aircraft was preserved first at the Smithsonian and now at the Steven F. Udvar-Hazy Center. **Kit features** a detailed plane with pilot figure plus moveable ailerons, elevators and rudder.

HL502/12 LNDS5020 Skill Level: 2

Lindberg Models® 1/48 Scale 1920 Bleriot Monoplane & Puzzle

Piece together a piece of history

"Britain is no longer an island." —The Daily Express. For millennia, the English Channel separated the British Isles from their European neighbors, sheltering them from the worst of the strife on the continent. In just thirty minutes, in 1920, that illusion was shattered when Bleriot flew his namesake Monoplane across the English Channel. It was the first flight to make the distance, but it was the first of many. **Kit features** a detailed Bleriot Monoplane, along with a 48-piece puzzle of the model.

HL503/12 LNDS5030 Skill Level: 3

Lindberg Models® 1/48 Scale Martin-Handasyde Monoplane & Puzzle

Fly a dragonfly

The Martin-Handasyde Dragonfly was a revolutionary aircraft for its time. It had a 37-foot wingspan, incorporated control features from numerous other aircraft and carried a powerful engine. It was one of the most revolutionary aircraft of its era, but demand was simply not there. Only one Dragonfly was produced and the Martin-Handasyde company closed after a factory fire. **Kit features** a detailed model of the Dragonfly and a 48 piece illustrated puzzle of the model.

HL504/12 LNDS5040 Skill Level: 3

Lindberg Models® 1/48 Scale 1911 Avro Biplane with Puzzle

Get the whole picture on early flight

The Avro Biplane was revolutionarily easy to fly. Pilots with little to no flight experience found it easy to hop into the Avro and, with a few minutes of instruction, find themselves in the air. Broad double wings, low weight, easy controls and a comparatively powerful engine all combined to make the Avro phenomenally easy to handle. This ease of handling caught the eye of many and the Avro was converted to a float plane and later types went to the Royal Flying Corps. **Kit features** model and 48-piece puzzle.

HL505/12 LNDS5050 Skill Level: 3

Lindberg® Models 1/48 Scale 1911 Deperdussin Monoplane with Puzzle

Put together one of the world's first warplanes

Originally designed in 1910, the Deperdussin Monoplane was one of the first truly successful monoplane designs in the world. It set speed and endurance records both unloaded and with passengers. It also had the dubious distinction of being one of the first monoplane aircraft to mount a forward-firing machine gun. The frenetic advances in aircraft design throughout the First World War soon saw the Deperdussin consigned to history, but its advances influence aeronautics to this day. **Kit features** detailed kit and 48-piece puzzle.

HL506/12 LNDS5060 Skill level: 3

Minicraft® 1/144 Scale Spitfire Mk Vb (RAF/USAAF)

Two options for dogfighting derring-do

The Mk Vb was the most abundant of the Mk V Spitfires, featuring Merlin 45 series engines which were equipped with a single-stage, single speed supercharger and delivered 1,440 hp at take-off. While most famous for their heroic exploits with the Royal Air Force, Spitfires were also flown by the U.S. Army Air Force's 4th Fighter Squadron until early 1943. **Kit features** two Cartograf® decal options representing the RAF and another representing the early Spitfire Mark Vb with USAAF markings.

14704 MMIS4704 Skill Level: 2

Minicraft® 1/144 Scale B-17G "USAAF"

Make your mark with "The Mighty Eighth"

The USAAF's Eighth Air Force was designated the United States Strategic Air Forces in Europe on February 22nd, 1944. During "The Mighty Eighth's" debut – a series of attacks on German aircraft known as "Big Week" – over 1,000 B-17s were sent out to take on the Luftwaffe, successfully crippling their airplane-manufacturing operations. **Kit features** in-flight and on-the-ground building options, authentic nose art and Cartograf® decal markings for two USAAF aircraft: 1. "Mercy's Madhouse," 358th BS, 303rd BG, 8th AF and 2. "Screaming Eagle," 545th BS, 384th BG, 8th AF.

14712 MMIS4712

Moebius® Models 1/32 Scale Battlestar Galactica® Original Cylon Raider

Gun down Galactica!

Featured in the original "Battlestar Galactica," the Cylon Raider is an attack fighter loaded with directed energy weapons and piloted by emotionless killing machines. Their numbers are beyond counting and they are all unified in the purpose of destroying humanity. It's a formidable foe that the Viper pilots of Galactica only manage to overcome with skill and improvisation. **Kit features** a 1/32 scale Cylon Raider from the original series.

941 MOES0941 Skill Level: 3

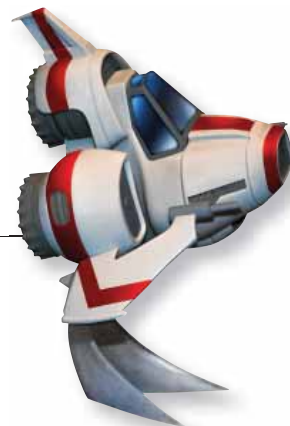

Moebius® Models 1/32 Scale Battlestar Galactica SD Viper MKII

Yolk the strength of the Colonial Fleet

After the Cylons cracked the Colonial Fleet's codes and smashed their ships, humanity was left scrambling to a few dozen old crates in which they fled the fiercely flying foe. Only one Battlestar remained, an aging bird named the Galactica that went from being on permanent roost to being the cock of the walk. Fortunately, this ship had dozens of Colonial Vipers aboard and, between them, the Galactica and Vipers were able to consistently shoo away the Cylons that constantly pecked at the fleet. **Kit features** an "egg plane" Viper MKII with stand.

944 MOES0944

Moebius® '65 Mercury Comet Cyclone

Definitive muscle car of the '60s

Mercury Comet Cyclones first hit the market in 1964 as a high-performance option for the Mercury Comet. Over 12,000 of these vehicles were produced and sold in the first year. Their popularity warranted their introduction as an independent vehicle in 1965. It's easy to see why. With 200 hp engines, bucket seats and a long list of performance-boosting features, the Comet Cyclone was one of the better muscle car offerings on the market.

1210 MOES1210

Moebius® '61 Pontiac Ventura

It's a boat with wheels

Long, low, sleek, huge—the Pontiac Ventura was everything the 1960s loved in a car. With a ten foot wheelbase, the full-size Pontiac Ventura had more than enough leg room for the whole family. Even with all the weight entailed in such a massive car, however, the Ventura's engine had more than enough power to really move it. The low-slung body and extremely flat front and rear deck made it register less wind resistance than contemporary vehicles.

1211 MOES1211

Moebius® '56 Chrysler 300B Tim Flock

America's first NASCAR® hero

Tim became a part of NASCAR history when he finished fifth at the first ever Strictly Stock NASCAR race in North Carolina in 1949. He went on to become one of the biggest names in NASCAR, with 39 wins and a 20.9% win rate overall. His top-of-the-line Chrysler 300B was equipped with one of the most powerful engines of the day—the FirePower 300hp Hemi V-8. He swept many races before being banned by corrupt NASCAR officials. **Kit features** a specialized Chrysler 300B with decals and parts for Flock's racer.

1212 MOES1212

Moebius® Munster's House Finished

Your favorite Monster abode, now complete!

Take three classic horror movie monsters, put them in a house in America, add in a little romance, a little conflict and a lot of humor and you get—one of the most underrated television shows in American history. The Munsters was a masterpiece from minute one. An homage both to classic horror and family values television. The characters were great, and the creepy, creaky house at 1313 Mockingbird Lane was the ultimate monster madhouse. Now you can own a completed miniature Munster mansion! Model is pre-built, no assembly required.
