# PERFORMANCE FOR EVERY QUAD PILOT

**230Si**  
Ready-To-Fly Quadcopter

- Advanced technology allows anyone to fly successfully, indoors or outdoors
- Available with a HD camera for taking photos and videos
- Up to 15 minutes of flying per battery charge
- 3 modes of altitude control for stable, automatic hovering
- Precise control is provided by a Heli-Max TX465 transmitter
- (4) extra blades are included
- Fun for new pilots and pros!

### Maximum stability from 3 gyros and 3 accelerometers

TAGS-FX continuously keeps you in complete control. Sensor Fusion Technology integrates data received from dual sources — a 3-axis gyro and a 3-axis accelerometer — and compensates immediately for any actions except those you command. TAGS-FX corrects unwanted movement in yaw, pitch and roll while also preventing drift in any direction. You're more in control than ever before!

The 230Si's larger dimensions improve stability for both flying and for taking better photos and videos with the onboard camera.

Two versions of the 230Si are available. One includes an HD digital onboard camera, plus 2GB memory card for saving your images. The other does not, but the camera is available separately.

**HMXZ0001**  
Onboard camera is not to be used for commercial ventures. Be sure to fly in a safe environment and respect the privacy of others.

All of the 230Si's intelligent technology — including Return to Pilot, Altitude Management Systems, and TAGS-FX beginner/expert flight modes — is conveniently controlled right from its specially designed transmitter.

Both 230Si RTFs come with a large capacity, 1200mAh 1S LiPo battery and variable rate balancing AC LiPo charger. Fully charged, the battery provides flight times lasting up to 15 minutes.

HMXE0846 230Si Quadcopter RTF w/Camera  
HMXE0847 230Si Quadcopter RTF w/o Camera  
Rotor Diameter: 144 mm (5.7 in)  
Diagonal Dimensions: 230 mm (9.1 in)  
RTF Weight (without camera): 127 g (4.4 oz)  
RTF Weight (with camera): 132 g (4.7 oz)

# Heli-Max

## Everything about the 230Si is designed for confidence-building flight!

With **Altitude Control Management** you can automatically hover the 230Si at a preferred altitude or under 10 feet (3 meters), while you concentrate on mastering other aspects of control.

Turn on the **Actual Direction Control** and the 230Si goes in the same direction that you move the sticks — whether it's flying toward you or away from you.

**Return to Pilot** brings the 230Si back to its pilot automatically. Simply push a transmitter button; built-in sensors call the model "home".

### Fail-Safe

If the signal is lost while flying, the 230Si will enter Fail-Safe mode, holding its altitude at the time of signal loss and hovering before slowly descending.

### Beginner and Expert flight modes

Select Beginner or Expert flight modes from the transmitter. In Beginner mode, releasing the sticks lets the 230Si stabilize itself in flight — perfect when you're unsure of how to react. Expert mode turns off the TAGS-FX accelerometers, allowing greater maneuverability and the precision to execute perfect maneuvers.

### From the Experts:

Pilots looking for something bigger than "palm-sized" — but at a lower cost than 350-size machines — now have the perfect option. The ready-to-fly 230Si offers the stability, visibility and capability to fly outdoors. Built-in intelligent technology gives first-time fliers outstanding odds for success, and the 230Si is a satisfying choice for seasoned pilots, too. Plus, it's available with an onboard HD camera for taking in-flight videos and still photos.

### Long story short...

*The 230Si is the next generation in quadcopter technology, with performance features that let you focus on what's important — having fun!*

**From the Experts:**

Axial has once again boldly trail blazed into the wildly popular 1/10 Scale Trail market with the C/R Edition Jeep® Wrangler. Night runs on this trail machine will never be the same with the equipped fully functional Rigid Industries LED light bar. This vehicle is based on the full size Jeep® Wrangler that belongs to Axial sponsored driver Casey Currie and CRC brand. Expect maximum performance with this trail rig, featuring new CRC wheels and slightly oversized BFGoodrich® Krawler™ 1.9 tires.

**Long story short...**

*The fun doesn't stop at night with the C/R edition with featured LED lighting, making this vehicle the only choice for ready to go 24 hours a day action!*

# FAST. FUN. UNIQUE.

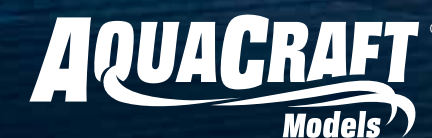

## GUNSLINGER™ P-27

Ready-To-Run 3S Crackerbox Racing Boat

- Crackerbox racing hull with quality ABS construction
- 28mm CNC water cooling jacket
- A 6-pole 28-56-1800kV brushless inrunner marine motor delivers
- 50A brushless controller with stutter bump warning system and low-voltage protection (3S LiPo only)
- 3mm straight shaft drive system
- Kick-back rudder
- Offset FRP propeller, with spare prop included
- Center-mounted skeg
- Foam floatation
- Aluminum motor mount
- Water-tight radio box
- Hull drain plug
- Molded driver figures and engine hatch
- Boat stand included
- The included Tactic 2.4GHz radio provides worry-free control, with Secure Link Technology

AQUB1815 P-27 Gunslinger 3S Crackerbox Racing Boat RTR  
**Hull Length:** 28 in (711 mm)  
**Overall Length:** 29.5 in (750 mm)  
**Height:** 6 in (152 mm)  
**Width:** 10.25 in (267 mm)  
**Weight (less battery):** 37.5 oz (106.5 g)

A large hatch offers easy access to the boat's on-board gear.

The purpose-designed hardware package includes aluminum trim plates for fine-tuning the Gunslinger's performance. The rudder flips up upon impact to lessen the chance of breaking.

The FRP prop is offset to maximize performance. The center-mounted skeg helps keep the boat under control through turns.

### From the Experts:

Until now, there's never been an R/C boat sporting a true crackerbox hull. Introducing the P-27 Gunslinger, a brushless, LiPo-ready racer that's the first of its kind. The unique hull design not only makes the P-27 Gunslinger fast on the water, it's also very responsive and lots of fun to drive. Power is provided by a 6-pole marine brushless motor and 50A controller, and the included Tactic radio system delivers secure, precise control.

### Long story short...

**Crackerbox boats are one of the most exciting classes of boat racing, and the P-27 Gunslinger is leading the way!**

The ProRally Qualifier Series 4WD Rally Car offers everything you need for getting into thrilling R/C racing with Associated quality at a low price!

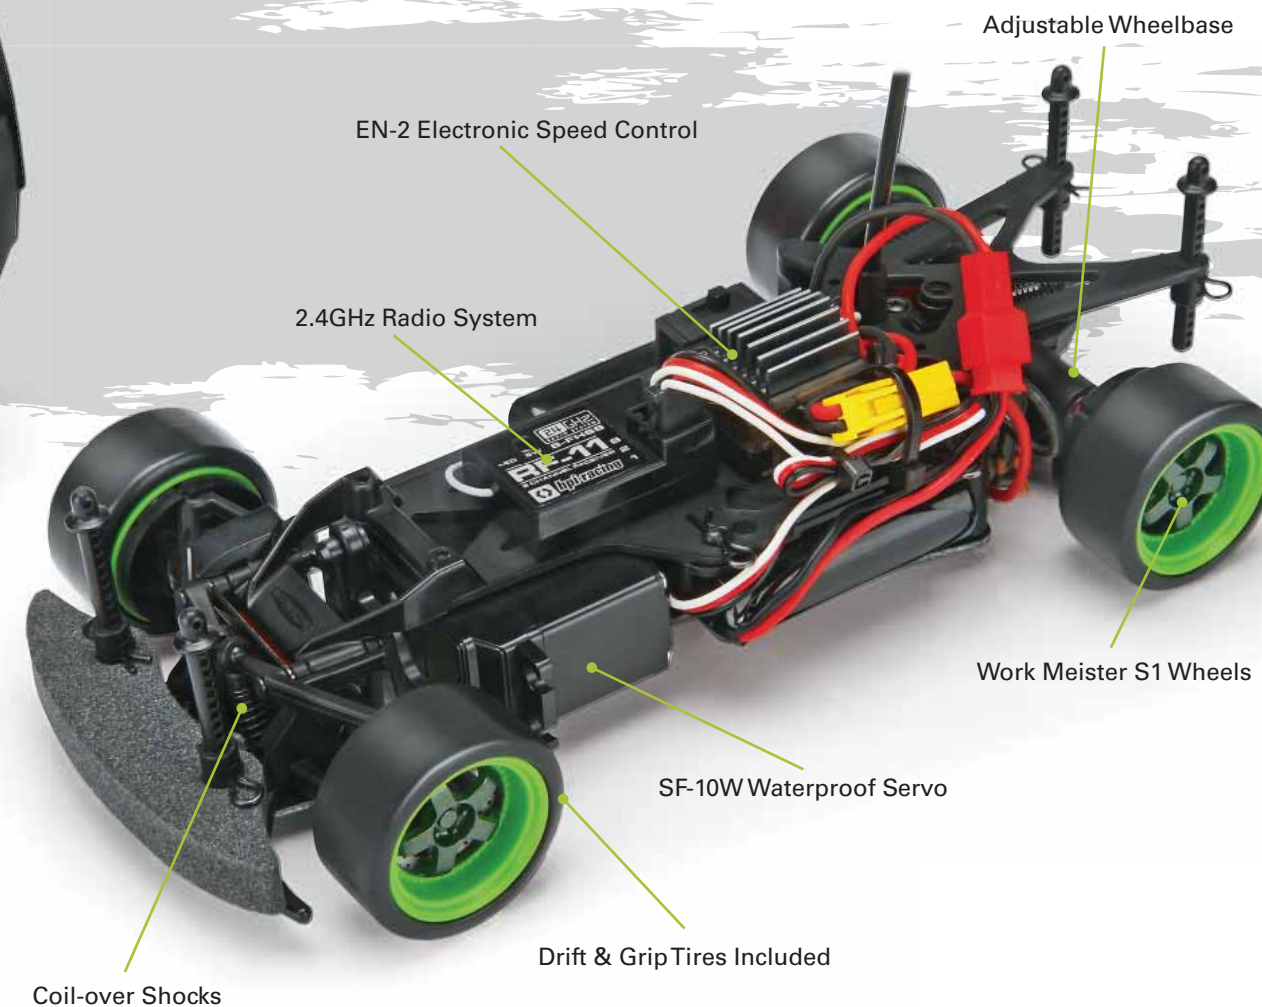

# OWN VAUGHN GITTIN Jr.'S "NEED FOR SPEED" MUSTANG!

## Micro RS4 '69 Mustang RTR-X 1/18 Scale Electric 4WD On-Road Car

*An HPI exclusive!*

- Officially licensed replica of Vaughn Gittin Jr.'s 1969 Ford Mustang RTR-X
- Two sets of wheels/tires included for Drift and Grip action!
- 4WD for maximum control and speed
- Belt drivetrain for efficient power transfer to front wheels
- Double-wishbone independent front suspension
- Coil-over inboard cantilever front shocks
- Front universal dogbones
- Rear straight axle for maximum drivetrain efficiency
- Fully equipped with ball bearings for maximum efficiency
- EN-2 electronic speed control for total control
- 2.4GHz radio system for long range reception, no frequency crystals needed
- 180-size motor for fast speeds and quick acceleration
- 6.0v 1200mAh battery for long driving times and plenty of power
- AC wall charger included for extra convenience
- 4 AA batteries included for transmitter

### Grip & Drift Tires and Wheels included!

This car features true-to-scale replica wheels, in authentic two-tone metallic green, taken directly off Vaughn Gittin Jr.'s one-of-a-kind 1969 Ford Mustang RTR-X! You get TWO sets of wheels and tires — one set for all-out racing and one for thrilling sideways drifting fun!

HPID2468 1/18 Scale Micro RS4 '69 Mustang RTR-X  
 Length: 8.6 in (220 mm)  
 Width: 4.1 in (105 mm)  
 Height: 3.2 in (80 mm)  
 Wheelbase: 5.5 in (140 mm)

### From the Experts:

It may be small in size, but this RS4 is BIG on fun! Just like its 1/10 scale big brother, it comes with TWO sets of wheels and tires — one for drifting and one for racing! The licensed 1969 Ford Mustang body is painted and trimmed, and a 2.4GHz radio is included, for right-out-of-the-box action. Performance is premium as well, with an HPI 180-size motor, ESC, full-time 4WD belt drive and waterproof steering servo.

### Long story short...

*It's a spot-on replica of Vaughn Gittin Jr.'s "Need For Speed" street machine, ready to shred asphalt and slide into the turns!*

NEW PRODUCT

# THE MONSTER TRUCK THAT BREAKS ALL THE RULES!

Gasoline-Powered 4WD Monster Truck RTR

## Here's what's all new on this magnificent monster...

- 15cc gasoline-powered Octane engine
- 20+ minutes of runtime per tank
- Tuned pipe for maximum performance
- Metal shoe Quadra clutch
- Composite triple-disc brake system

### HPID4900 Savage XL Octane RTR

Length: 23.8 in (580 mm)

Width: 17.5 in (445 mm)

Wheelbase: 15.7 in (400 mm)

Height: 10.6 in (270 mm)

## ...and that's in addition to these proven performance perks:

- Proven 2-stage, oversized oil-filled Big Bore shocks
- Sealed all-metal differentials with bulletproof bevel gears
- Heavy-duty cam-type servo saver steering system
- All-terrain tires with standardized Savage 17mm hex hubs
- Savage XL 3-speed transmission
- Savage XL suspension uprights
- Machined steel spur gear
- High-torque metal gear steering servo
- Durable slipper clutch for drivetrain security
- Rechargeable receiver battery pack and charger included

## From the Experts:

Get ready for a new breed of monster truck! The Savage XL Octane is all new from bumper to bumper, starting with a 15cc gasoline engine that produces run times of 20+ minutes per tank for maximum bashing and off-road fun!

## Long story short...

*The Savage XL Octane RTR is a new breed of monster truck, with all the advantages of gasoline power!*

# Got paint?

Now when you need paint for your projects, you can depend on Duratrax. Custom-blended in all of the most popular colors, Duratrax paints deliver excellent coverage and spray patterns for polycarbonate R/C car bodies. These high-quality paints also come with a great price per ounce and larger can sizes. Look for the Duratrax paint display at your local hobby retailer! Product label is subject to change.

## NEW PRODUCT

# ADVANCED ELECTRONICS FOR THE RACE-WINNING EDGE

## Power Station Pro Multi-Distributor

- One of the world's smallest multi-port power supplies!
- Features four output ports and two 5V 2A USB ports that support smart phones and other devices
- Measures a very compact 1.9 x 3.8 x 1.2 in
- Three connectors come with switches and blue LEDs, and can be used for units up to 10A
- One connector comes without a switch, and can be used for high current units up to 20A

MMRP1065 Black  
MMRP1066 Blue

## LED Setup Board

- Like having an extra pair of eyes when tuning camber, ride height, etc.!
- LED lights with diffuser lens plugs into a power supply and brightly illuminates the underside of your vehicle
- Measures 19 x 14.2 x .5 in
- Comes with a padded carrying case for transportation ease

MMRR3001

## Tweak Master

- A quick and easy way to check chassis flex for on-road cars!
- Features a tempered glass base plate with rubber feet and carbon fiber tube with anodized aluminum end caps
- Included carrying case allows for at-the-track convenience

MMRR3002

### From the Experts:

Designed for the serious competitor, Muchmore Racing products are tested, used and endorsed by top drivers the world over. The Power Station Pro, Tweak Master and LED Setup Board are all special accessories that will improve every racer's odds of making it to the podium!

### Long story short...

*Muchmore Racing electronics are the choice of champions everywhere!*

# GET READY TO WIN!

## Team Durango is here to help you hit the track running!

The summer racing season is almost here...what better way to take on the off-road competition than with a kit that has been driven by none other than Ryan Lutz and Travis Amezcua?

If you aspire to be a top-level competitor, it pays to race cars that have won multiple prestigious events, such as the Chi-Town Shootout. Team Durango has made it easier than ever before, with fully adjustable kits that boast race-winning pedigrees and a design philosophy backed by a decade of innovation. Team Durango will take you straight to the winner's podium and beyond!

### DEX410<sup>v4</sup>

1/10 Scale Electric 4WD Buggy Kit  
TDRC0122

#### Superior Handling

Strength and superior handling on a wide range of track surfaces are what 4WD racers need, and the DEX410v4 delivers. It's the latest evolutionary edition of the 2013 IFMAR WorldsTO car, refined to race and designed to win.

### DETC410

1/10 Scale Electric Touring Car Kit  
TDRC0150

#### High Performance

For drivers who favor the highly competitive Touring Car class, Team Durango offers the already record-breaking DETC410. With its awesome tuning parameters and straight-from-the-box performance, the DETC410 is the perfect partner in your racing success.

### DEX210<sup>v2</sup>

1/10 Scale Electric 2WD Buggy Kit  
TDRC0011

#### Infinite Setups

2WD off-road racing demands finesse and flexible set-up options — two key design characteristics of the DEX210v2. Packed with high-quality parts, the DEX210v2 is capable of winning at your track and beyond, right out of the box.

# SAME GAME, ALL-NEW PLAYERS!

**Max. Altitude:** 1150 ft (351 m)  
**Height:** 19.3 in (49 cm)  
**Diameter:** .98 in (25 mm)  
**Weight:** 1.4 oz (39.7 g)  
**Recommended Engines:** A8-3, B4-4, B6-4, C6-5 or C6-7

### ESTT2481 Power Patrol™

**Max. Altitude:** 1100 ft (335 m)  
**Height:** 20.5 in (52.1 cm)  
**Diameter:** .98 in (25 mm)  
**Weight:** 1.6 oz (45.4 g)  
**Recommended Engines:** A8-3, B4-4, B6-4, C6-5 or C6-7

### ESTT2485 L.G.M. 0095™

**Max. Altitude:** 650 ft (198 m)  
**Height:** 21 in (53.3 cm)  
**Diameter:** 1.33 in (34 mm)  
**Weight:** 2.7 oz (79.5 g)  
**Recommended Engines:** B4-2, B6-2, B6-4, C6-3 or C6-5

All require engines, launch pad, launch controller, recovery wadding, starters, and "AA" batteries (for the launch controller)

Recommended for ages 10 and up. Adult supervision recommended for modelers under 12.

**Long story short...**

**Start the summer off right with rockets that assemble in minutes and reach great height, flight after flight!**

www.revell.com

### 1/24 MCEWEN '57 CHEVY® FUNNY CAR

Set the Mongoo\$e loose!

In 1988, legendary top fuel and funny car drag racer Tom "Mongoo\$e" McEwen introduced his fans to something really new. His new ride featured the classic body shape of the '57 Chevy® on a modern funny car chassis. With runs at less than 6 seconds, this funny car could claim to be the fastest '57 Chevy in the world. Molded in white and clear with chrome plated parts and soft black tires. **Kit features** one-piece flip up body, detailed dual-magneto engine, tube frame, separate rear wing and chrome wheelie bars.

85-4305    RMXS4305    Total Parts: 84    Skill Level: 2    Length: 9.25 in (235 mm)

### 1/25 SCALE 1958 CORVETTE® ROADSTER

America's sports car

Other sporty two-seaters have come and gone, but Corvettes have made American hearts thump for decades. Their combination of performance and elegance makes every generation timeless. The 1958 Vette™ was a distinctive part of the "solid axle generation" that sported substantial modifications. Among the most notable of these mods were hood louvers and trunk lid spears, changes only found on the 1958. **Kit features** separate frame, opening trunk lid, multi-position front wheels and detailed V-8 with choice of fuel injection or carburetors.

85-4325    RMXS4325    Total Parts: 149    Skill Level: 3    Length: 6.9 in (175 mm)

### 1/48 A-7A CORSAIR II®

Precision is power

Corsair II® aircraft were developed during the bloodiest days of the Vietnam War. Once deployed, they served as close air support aircraft. Sophisticated electronics, including the first ever Heads-Up-Display, allowed the Corsair II to land hits with more precision than had ever before been possible. Coupled with the Corsair's massive 15,000 lb ordnance capacity, this precision meant that Corsairs became planner's strike craft of choice. **Kit features** an optional open or closed canopy, wing-mounted weaponry, and detailed cockpit and landing gear.

85-5484    RMXS5484    Total Parts: 67    Skill Level: 2    Length: 11.5 in (292 mm)

REVELL OF GERMANY®

### 1/32 SCALE GERMAN INFANTRY WWII

Achtung! Links, zwei, drei, fier. Links, zwei, drei, fier.

For six years, the thump of German boots echoed from the shores of the English Channel to the doorstep of Moscow and from Egypt to the Arctic Circle. Discipline and determination pushed them on in the face of superior numbers. Germany accomplished the near-complete subjugation of Europe, but at great cost. Their armies were bled dry and the nations they had pressed rose up and rolled back the nightmare of the National Socialist Third Reich. **Kit features** fifteen unpainted German Infantry figures.

02630    RVLS2630    Total Parts: 15    Skill Level: 1

**1/72 SCALE RUSSIAN BATTLE TANK T-90A**  
Russia's unstoppable main battle tank

The T-90A is perfectly suited to combat on the modern battlefield. Its three-tier defense system consists of conventional armor, explosive-reactive armor and an electronic jamming system that detects and diverts incoming missiles. Tests of this impressive defense system have concluded that the T-90A is virtually invulnerable to most kinds of ground-to-ground munitions, even at very close ranges. Field reports also show that the T-90A is highly resistant to the threats of urban combat, the traditional downfall of tanks. **Kit features** two-piece track, rotating turret and four decal sets.

03301    RVLS3301    Total Parts: 160    Skill Level: 5    Length: 5.6 in (142 mm)

**1/72 SCALE BLOHM & VOSS BV222 VIKING**  
Germany's aluminum albatross

The Six-engine BV222 Wiking or "Viking" was one of the largest flying boats ever constructed. It was designed before WWII as a passenger plane capable of trans-Atlantic flights. For the time, this was a truly staggering distance for a plane to travel. The BV222 was capable of making the trek because of its 151ft (46m) wingspan. During the war, the plane was militarized with gun turrets and used for cargo transport and reconnaissance, roles at which it excelled. **Kit features** detailed interior, rotating gun turrets and decals for two versions.

04383    RVLS4383    Total Parts: 282    Skill Level: 5    Wingspan: 25 in (634 mm)

**1/32 SCALE HAWKER HUNTER FGA.9/MK.58**  
Sixty years, and still going strong

The Hawker Hunter was originally developed in the 1950s as a high-altitude interceptor. It was intended to counter the emerging threat of high-speed, high-ceiling strategic jet bombers. In order to complete this task, it carried a pack of four 30mm ADEN revolver-cannon and later models could deploy guided missiles as well. Going into its sixth decade after development, the Hawker Hunter is still on active duty with third-world air forces. **Kit features** parts for two variants, detailed cockpit, external fuel tanks, rocket pods and two sets of decals.

04703    RVLS4703    Total Parts: 207    Skill Level: 5    Wingspan: 12.6 in (321 mm)

**1/28 SCALE SOPWITH F.1 CAMEL**  
Field a front-line favorite

First flown by the Royal Naval Air Service's No. 4 Squadron in June 1917, the Camel proved to be a formidable counter to Germany's Albatros. This highly-maneuverable and incredibly fast plane was a late addition to the British Arsenal, but it quickly became the fighter of choice for aces. Today, the Sopwith Camel remains one of WWI's most iconic aircraft. **Kit features** detailed structures with cloth texture, moving prop and wheels, 9-cylinder engine, detailed cockpit, ground crew figure, twin Vickers guns, cord for wires and two decal sets.

04747    RVLS4747    Total Parts: 56    Skill Level: 3    Wingspan: 12.4 in (314 mm)

www.revell.com

### 1/144 SCALE LAUNCH TOWER AND SPACE SHUTTLE WITH BOOSTER ROCKETS

Countdown to awesome: Zero

The space shuttle itself was an engineering marvel, but the support systems and transporters for it, which get little attention, were masterpieces. This set lets you build the full launch platform, shuttle, boosters, even the transporter. **Kit features** a launch tower with lattice construction, 12 working platforms, lighting gantry, moveable access arms for supplies, moveable astronaut gangway, rotating hammer-head crane, Space Shuttle and booster rockets with external fuel tank, and solid rocket boosters, mobile launch pad and decals for Atlantis, Discovery and Endeavor, plus decals for Enterprise pre-1988.

04911 RVL54911 Total Parts: 316 Skill Level: 5

### 1/350 SCALE GERMAN WWI LIGHT CRUISERS (2 KITS) SMS Emden and SMS Dresden

The twin ships Emden and Dresden were built just prior to WWI and saw most of their success in commerce raiding in the Indian and Pacific Oceans. Emden was especially devastating to Russian and British shipping; sinking or capturing a total of 25 vessels, including two warships, in just three months. With home far away and limited supplies available, both the Emden and Dresden were eventually hunted down and destroyed by the British Navy. **Kit features** a pair of light cruisers with guns, life boats, masts, funnels, moveable rudder and decals.

05500 RVL55500 Total Parts: 282 Skill Level: 4 Length: 13.3 in (339 mm)

### 1/24 SCALE MINI COOPER Winner of the 1964 Monte Carlo Rally

The MINI Cooper's legendary reputation is based on ingenious, compact design and racing success. One thousand MINI Cooper "S" types, with a more powerful 71 bhp engine, were built to compete in Group 1 rallies. An all-British driving team won the 1964 Monte Carlo Rally with a Cooper S. Patrick Hopkirk and his co-driver Henry Liddon finished the race as overall winners, their victory became a milestone in the history of rally sport. **Kit features** opening hood, detailed four-cylinder engine, detailed interior, movable wheels and decals for the '64 Rally car.

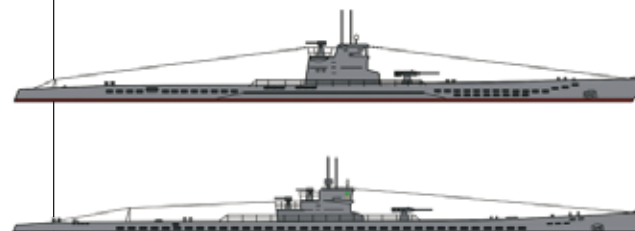

07406 RVL57064 Total Parts: 146 Skill Level: 4 Length: 5.2 in (131 mm)

### 1/700 SCALE GERMAN U-BOAT TYPE VIIC/IXC (2 KITS) Aces of the ocean

The exploits of fighter pilots during WWII are flashy and well documented. By comparison, the efforts of U-Boat crews during the war are little talked about. This set honors four of the war's most effective U-Boat commanders. Together, Schnee, Topp, Merten and Emmermann sank well more than 500,000 tons of Allied shipping. Their skill, luck and the qualities of their boats were so great that all four also survived the war. Limited edition **kit combo features** two types of submarine with decals for the vessels of the four U-Boat "Aces".

30034 (Limited Edition) HSGS0034 (2 Kits) Total Parts: 17 x 2 Skill Level: 3

### 1/200 SCALE VC-25A "AIR FORCE ONE"

America's pride as an executive ride

"Air Force One" is technically any airplane that the President boards; but with the VC-25A, this call sign has a more distinct definition. This Boeing® aircraft is a modified 747, equipped with telephones, televisions, two galleys, med center and more—all topping the price out at \$325 million per. Everything has to be state-of-the-art for the Head-of-State. Along with this tech-heavy bird, a squadron of fighters and a horde of cargo planes travel with the President wherever he goes. Limited Edition **kit features** decals for both "Air Force One" aircraft.

10805 (Limited Edition) HSGS0805 Total Parts: 68 Skill Level: 3

### 1/144 SCALE YS-11 "JMSDF 61ST SQ."

The 61st Squadron's trusted turboprop transport

In the late 1950s, seven leading Japanese manufacturers teamed up to develop a short-range replacement for the DC-3. The YS-11 was the end result. While it was designed to be a commercial transport, the JMSDF have used YS-11s for moving troops and anti-submarine patrol training. Today, three YS-11s remain in service. This limited edition **kit features** new radome and antenna fairing parts, plus two marking options: 1. YS-11M (Transporter): JMSDF 61st Sq., Code: 9042, Atsugi AB and 2. YS-11T (Anti-Submarine Patrol Trainer): JMSDF 205th Training Sq., Code: 6901, Shimofusa AB.

10806 (Limited Edition) HSGS1086 Total Parts: 48 Skill Level: 3

### 1/72 SCALE P-38J LIGHTNING AND B-26 MARAUDER (2 KITS)

Clearing the coast for D-Day

For Operation Overlord, the Allies needed total dominance of the sea, the land and the air. For the sea the Allies relied on the Royal Navy. To clear both air and land, the Allies had the Lightning and the Marauder. Lightnings were capable of shredding enemy planes with their heavy armament, perfect for clearing the skies over France. The B-26 Marauder was ideal for mid-level bombing of strategic targets including railheads, V-2 sites and gathering points for troops. Limited edition **kit combo features** two sets of decals for each plane.

02091 (Limited Edition) HSGS2091 (2 Kits) Total Parts: 63 + 174 Skill Level: 3

### 1/72 SCALE F-15SG STRIKE EAGLE "SINGAPORE AIR FORCE"

Singapore's ferocious all-weather fighter

The F-15 Strike Eagle has one of the most storied histories of any currently operational American fighter aircraft. These fighters served with distinction in the Middle East, and its broad range of mission profiles encouraged Singapore to import it for use in their Air Force. Twenty-four of these aircraft have been purchased by Singapore so far. Their improved avionics allow them to engage targets in virtually any weather conditions. This limited edition **kit features** new antenna parts and decals for two Singapore Air Force aircraft.

02092 (Limited Edition) HSGS2092 Total Parts: 166 Skill Level: 3

### 1/72 SCALE MV-22B OSPREY "VMM-162 GOLDEN EAGLES"

Providing assault support since 2006

The latest US Marine Corps troop transport, the MV-22B Osprey combines the functions of a heli with the speed and range of a turboprop airplane. In 2006, Marine Medium Tiltrotor Squadron 162 (VMM-162) became the USMC's second operational Osprey squadron. Also known as the "Golden Eagles," VMM-162's achievements have included carrying U.S. Presidential candidates through Iraq in 2008 and helping Haiti after its tragic 2010 earthquake. This limited edition **kit features** display stand parts, plus one decal marking option: 1. US Marine VMM-162 "Golden Eagles," Code: YS01, YS00.

02093 (Limited Edition) HSGS2093 Total Parts: 140 Skill Level: 3

### 1/72 SCALE SHIN MEIWA US-1 "RESCUE IVORY"

All set for amphibious rescues

Like the earlier PS-1, the US-1 and US-1A are STOL (Short Takeoff and Landing) aircraft. However, while the PS-1 featured on-board beaching gear for anti-submarine warfare, the US-1 and US-1A are amphibious search-and-rescue aircraft. From 1976-1999, the US-1A saved 550 lives in 500+ rescue missions. Shin Meiwa only built six US-1s and fourteen US-1As for the JMSDF in all, but they're still being flown today! This limited edition **kit features** resin parts, plus two decal marking options: 1. US-1A: JMSDF 71st Sq., Code: 9090 and 2. US-1: JMSDF, Code: 9071.

02094 (Limited Edition) HSGS2094 Total Parts: 137 Skill Level: 3

### 1/72 SCALE F-16BM FIGHTING FALCON "JSF TEST SUPPORT"

A surplus of support

The F-16BM is the result of a Mid-Life Update package developed by the USAF and European Partner Air Forces. The Royal Danish Air Force initially received 61 F-16BMs; within a few years, it received a second shipment with 59 more aircraft. Some surplus F-16BMs were sold to Pakistan, Chile and Jordan; others became Joint Strike Fighter test support aircraft for the newer F-35 Lightning II. This limited edition **kit features** one decal marking option: 1. Danish AF, 461st FTS, Code: ET210.

02095 (Limited Edition) HSGS2095 Total Parts: 97 Skill Level: 3

### 1/72 SCALE MITSUBISHI G3M3 "NELL" BOMBER Japan's do-all dragon

In accordance with the expansionist policies of Imperial Japan, the G3M was designed for maximum range and speed. It was intended to project Japanese power from bases in Japan to the Asian mainland and out into the Pacific. Maxing out the range and speed of the "Nell", however, entailed not including protective armor or self-sealing fuel tanks. This lack of protection led to the G3M and the subsequent G4M being excessively vulnerable to damage. This limited edition **kit features** new torpedo parts and decals for five aircraft.

02103 (Limited Edition) HSGS2103 Total Parts: 122 Skill Level: 3

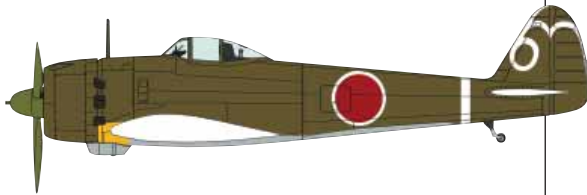

### 1/72 SCALE F-104J/DJ STARFIGHTER "207TH SQ. COMBO" (2 KITS)

Two kits for two decades of supersonic glory

For twenty years, the Japanese Air Self-Defense Force flew the Starfighter. A Mitsubishi®-built dual-control trainer, the F-104DJ, served with particular distinction. These specially made two-seat aircraft were used to train pilots from seven different JASDF squadrons, including the 207th Hikotai. Training in these aircraft allowed pilots of the F-104J air-superiority fighter to keep Japan's airspace clear. Following two decades of supersonic glory, the starfighter was retired in 1986. This limited edition **kit combo** features an F-104J and a F-104DJ with a total of four decal marking options.

02104 (Limited Edition) HSGS2104 (2 Kits) Total Parts: 101 + 114 Skill Level: 3

### 1/48 SCALE NAKAJIMA KI-43-III HAYABUSA (OSCAR) Emperor of the air

In side profile, the Ki-43 looked exactly like the Japanese Zero. Both planes were light, fast and lethal, but it was the Ki-43 which shot down the most Allied aircraft. The plane's high speed and maneuverability made it a favorite of several Japanese Army Air Force aces, but its lack of armor made it vulnerable to counter fire. The Ki-43-III was an experimental design which used a larger engine and drop tanks to extend the fighter's range. Limited edition **kit features** resin engine parts and two IJAAF decals from 1945.

07371 (Limited Edition) HSGS7371 Total Parts: 82 Skill Level: 3

### 1/48 SCALE 21ST KOKUSHO A6M2-K ZERO TYPE 11 (LATE) "302ND FG" Japan's top-notch combat trainer

Produced in small numbers, the A6M2-K Zero was an upgraded, two-seat trainer version of the celebrated Japanese aircraft. This variant was distinguished by an additional seat and controls for a second pilot, as was a full canopy and fins on the fuselage sides. Early versions were built at Japan's 21st Naval Air Depot; later models were assembled by Hitachi®. This limited edition **kit features** resin parts and two decal marking options: 1. IJN 302nd FG, Code: Yo D-501 and 2. IJN 343rd FG, Code: 343-01.

07372 (Limited Edition) HSGS7372 Total Parts: 117 Skill Level: 3

### 1/48 SCALE MITSUBISHI® T-2 "FOREST (F-1) CAMOUFLAGE"

Japan's souped-up supersonic trainer

Inspired by the SEPECAT Jaguar, the Mitsubishi T-2 was the first Japanese aircraft to break the sound barrier in level flight. After their 1975 debut, T-2s became popular for their role in "Blue Impulse" aerobatic stunt shows. Until their 2006 retirement, two-seat T-2s were often painted to resemble single-seat, camo-clad F-1 fighters in simulated combat. This limited edition **kit features** three decal options: 1. JASDF 3rd AW, 3rd Sq., Code: 186, 2. JASDF 4th AW, 21st Sq., Code: 191 and 3. JASDF 4th AW, 22nd Sq., Code 190 & 192.

07374 (Limited Edition) HSGS7374 Total Parts: 159 Skill Level: 3

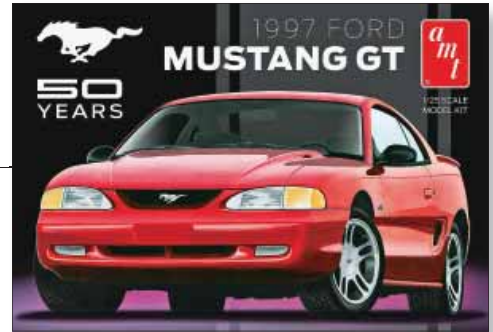

## AMT® 1/25 Scale 1997 Ford® Mustang GT

*50 years on the road*

For fifty years, the Mustang has been the exemplar of American muscle. And, with the redesign of the line in 1993, the "Fourth Generation" Mustangs regained their place as style icons as well. Through it all, the Mustang GT has been available as an option for drivers in need of serious muscle. The GT has always featured more powerful engines, but for the 1997 GT it mounted a supreme 4.6L V8 rated at 215 bhp. Salute five decades of riding the roads with this exquisite model kit!

AMT864/12 AMTS0864

## AMT® 1/25 Scale 1962 Chevy Bel Air Super Stock

*Joe Gardner's "Northwind" is blowing in!*

The Chevy Bel Air is built for comfort and style, but that doesn't mean you can't make it into a high-performance monster! Drop a 409 horsepower Turbo-Fire engine in just about anything and it will roar like a freight train, put one in a Chevy Bel Air and it will go "like the wind". Joe Gardner turned his Bel Air into a Super Stock drag racer and went on to wow crowds everywhere. **Kit features** a 2-in-1 model you can build as a drag racer or a show model.

AMT865 AMTS0865 Skill Level: 2

## AMT® 1/25 Scale 1968 Camaro Z/28

*Vintage style, impressive muscle*

There are few vehicles as iconic as the original Camaro, but the Z/28 variant is even more sought after. These cars were an amazing sight in the showroom, on the street, and especially at the drag strip! Now you can build a model Z/28 in one of two configurations. Build it as a stock, fresh from the factory model or as a souped-up street custom with twin velocity stacks, side pipes and mag wheels! **Kit features** many building options, pre-lettered tires and full decals.

AMT868 AMTS0868 Skill Level: 2

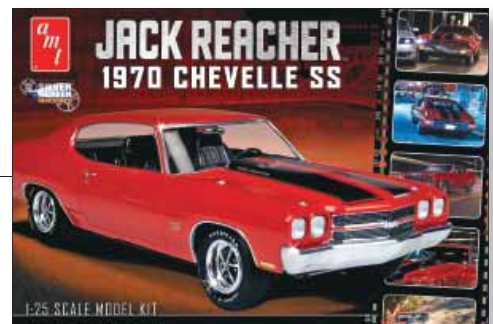

## AMT® 1/24 Scale "Jack Reacher™" 1970 Chevelle® SS

*Breaking all the right rules in all the right ways*

Jack Reacher doesn't own a car; in fact, he doesn't even have a license. But if he did have a car it would probably be a 1970 Chevelle SS. Why? Because it's big, it's powerful, it's tough and it has the smooth, no-frills, pure mechanics that a man like Reacher would love. Would he paint one hot-rod red, cover it in sparkling chrome and give it black racing stripes... probably not. Then again, drifters can't always be choosers. **Kit features** two engine options and full decals.

AMT871/12 AMTS0871 Skill Level: 2

## Dragon Models® 1/72 Scale Sd.Kfz.232

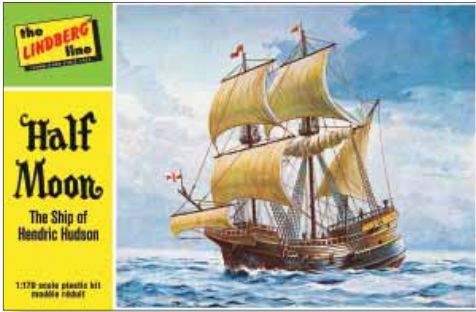

**1st Division Poland, 1939**

*The Third Reich's rapid reconnaissance ride*

These vehicles were essential for keeping fast-moving armored attacks informed of both the position of the enemy and orders from headquarters. They were equipped with eight wheel steering for excellent mobility and a large antenna to facilitate long-distance communication. Another significant innovation was the inclusion of dual driver's controls. These enabled the vehicle to make contact with the enemy and exit the area without taking time to turn around. **Kit features** a detailed model with hexagonal turret, 20mm cannon and full decals.

60585 DMLS0585

## Lindberg Models® 1/200 Scale "Half Moon" Sailing Ship

*The Netherlands' North American nau*

Captained by Henry Hudson, the "Halve Maen" (Half Moon) sailed from Amsterdam in 1609 looking for a "Northwest Passage" to the Indies. Hudson never found this shortcut to riches and fame, but he did locate Manhattan, the Hudson Bay and Newfoundland for the Europeans. His ship was perfectly suited for the task. It was fast, shallow on the draft and able to carry supplies and crew for lengthy voyages. This model is perfect for people interested in the early history of "the Americas". **Kit features** full deck and hull details.

HL208/12 LNDS0208 Skill Level: 2

## Lindberg Models® 1/168 Scale USS Carronade IFS-1

*Covering the charge*

Amphibious landings can be some of the most difficult and costly of all military maneuvers. To break up shore defenses and help the assault get a foothold, the US Navy designed the Inshore Fire Support Ship. This vessel carried 8 twin-tube automatic rocket launchers capable of saturating an area with 240 rockets every minute. This volume of fire is intended to clear defenders from the area. The USS Carronade served in the Vietnam War as part of the "Brown Water Navy", she was scrapped in 1974.

HL403/12 LNDS0403

## Lindberg Models 1/160 Scale Landing Craft Infantry

*Shoring up amphibious offensives*

The Landing Craft Infantry was larger, heavier and more seaworthy than the smaller LCA (Landing Craft Assault) boats. They also carried more troops and supplies, but they had one major disadvantage. Disembarking troops from an LCI was slow and therefore dangerous. Despite this disadvantage, the LCI was still used in first wave assaults on beaches from Normandy to the Philippines. These ships kept soldiers supplied and reinforced until harbor facilities could be seized. **Kit features** a detailed LCI with decals.

HL404/12 LNDS0404 Total Parts: 53 Skill Level: 2 Length: 12 in (305 mm)

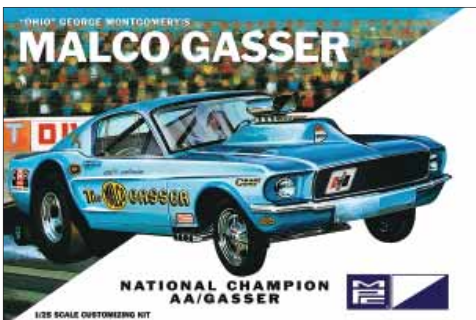

## Moebius® 1971 Ford® Ranger™ Pickup

*Ford's fifth generation "F" series*

The Ranger line became a separate trim level from the normal "F" series of pickups in 1967. Rangers were typically equipped with better extras than their counterparts but still maintained the rugged durability and high work-load of the entire Ford truck line. "Rangers" were so popular with their users that the line moved from being simply an upgrade of the line to a completely independent line in 1983. This Moebius model perfectly reflects the durable vehicles that were a staple of the early seventies.

1208 MOES1208

## MPC® 1/25 Scale 1967 Mustang Malco Gasser

*"Ohio George" Montgomery's Mustang miracle*

In this highly-modified Mustang, "Ohio George" won the National Championship and solidified his position as one of the most memorable racers of the 1960's. After extensive backdating and tooling upgrades, MPC is ready to re-release this kit in all its vintage glory! **Kit features** a newly tooled '67 flip front end, fully-detailed racing chassis, detailed interior, Halibrand drag wheels with factory pre-lettered slicks, wheelie and pushbar setup, a blown drag motor and full decals, all in vintage packaging available for the first time in decades. Also available with a white body (MPCS0800).

MPC804/12 MPCS0804 Skill Level: 2
