# SEE FLIGHT FROM A NEW POINT OF VIEW!

## DROMIDA

### OMINUS FPV

Ready-To-Fly Quadcopter  
w/First Person View

**FPV**  
First-Person  
View

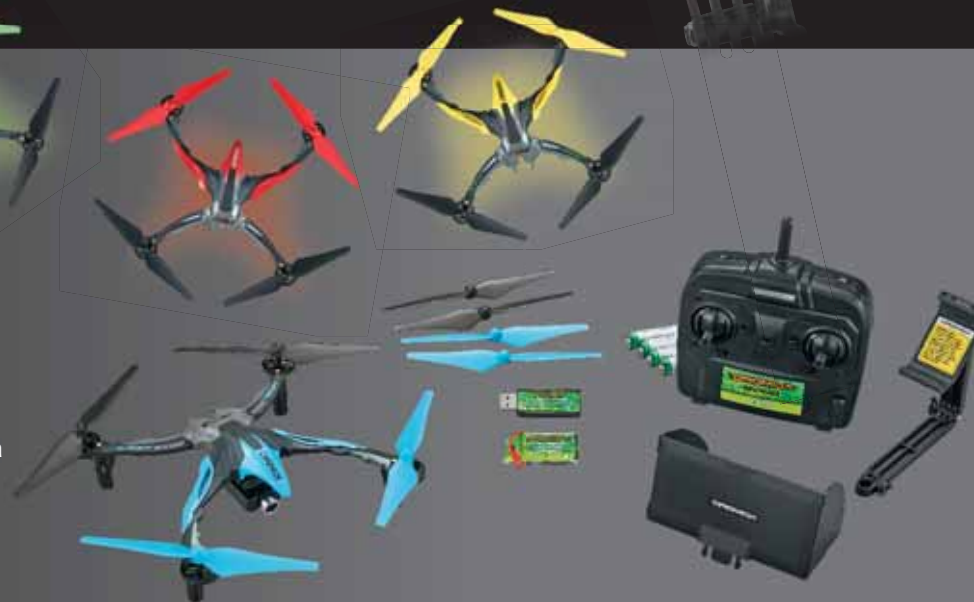

#### Control your camera with your smartphone!

With the Ominus FPV, you don't need to buy a separate viewscreen or expensive headset. Simply download the FPVCam app, put your smartphone into the holder, and you have a sharply focused, first-person view of your flight. The Ominus includes a micro memory card and card reader, but you can also download photos and videos directly to your smartphone for sharing with friends or posting to your favorite social media sites.

#### The Ominus FPV comes with all this:

- ▶ Assembled airframe with finished body and color-coded LEDs
- ▶ Wi-Fi-enabled, HD digital FPV camera
- ▶ Micro memory card and card reader
- ▶ Smartphone holder with sun shade
- ▶ Interference-free Q200 2.4GHz radio system
- ▶ Rechargeable 1S LiPo battery & USB charger
- ▶ (4) "AA" batteries
- ▶ Extra set of blades
- ▶ Double-sided camera mounting tape

▶ Q200 radio with four flight modes for tailoring performance to your skill level, plus an auto-flip button, a single button for video and still photography, auto-linking and digital trims

▶ Taps your smartphone's capabilities to: provide a first-person view of your flight; turn camera on and off; adjust brightness; replay or delete videos; edit or delete photos - even manage data storage

▶ Wi-Fi-enabled high-definition digital camera with 1280 x 720 resolution and a 328 feet (100-meter\*) range

▶ 700mAh 35C LiPo battery provides 10-12 minutes of flight time - and recharges from any handy USB port

\*Maximum range. Assumes unobstructed view and "clean" radio environment.

DIDE02\*\* Ominus FPV Quadcopter RTF  
Diagonal Length: 9.4 in (238 mm)  
Weight: 4.2 oz (120 g)  
Requires: smartphone or other device for Android or Apple & FPVCam app

#### From the Experts:

With the Ominus FPV, you not only see your flight through a Wi-Fi-enabled digital camera - you can **operate it** using your smartphone or other mobile device\*. All you need is your smartphone and the FPVCam app - an app you can download free of charge from Google Play™ or the Apple App Store™; everything else is included. It's easy to fly indoors or out, and amazingly aerobatic even when the camera is attached.

\*Smartphone or other mobile device required for FPV flight; not included. Compatible with smartphones and other mobile devices for Apple or Android. Requires FPVCam app, available as a free download from the App Store and Google Play. Apple and the Apple logo are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc. Android™ and Google Play are trademarks of Google Inc. Wi-Fi® and Wi-Fi Alliance are registered trademarks of the Wi-Fi Alliance.

#### Long story short...

## sensei FS

Electric Trainer w/WISE Flight Stabilization System

Includes the versatile Star™ Plug!

Operate the "drop-door" from the 5th channel of your radio for in-flight deployment of a parachute or other creative payloads!

The wing halves slide together onto a tube and are secured with two bolts.

The tail section aligns itself automatically and is secured with just one screw.

The WISE Flight Stabilization System helps your Sensei FS maintain a safe flying attitude, so you can focus on flying without worrying about crashing

You get everything you need with the RTF, including a quality Tactic TTX610 6-channel radio system and SLT receiver, LiPo flight battery and charger

Fly the Rx-R version with your transmitter and receiver

Flight-ready with minor screw-together assembly (no gluing); all onboard gear is already in place

A hatch in the top of the plane provides easy access to the battery

FLZA3030 Sensei FS Electric Trainer w/WISE RTF  
FLZA3034 Sensei FS Electric Trainer w/WISE Rx-R  
Wingspan: 58 in (1475 mm)  
Weight: 3.2 lbs (1450 g)  
Length: 48 in (1220 mm)  
Rx-R requires: radio and receiver with 4-5 channels; 2100-2200mAh 11.1V LiPo battery; compatible charger  
RTF requires: nothing!

### Equipped with the innovative WISE 3-axis stabilization system!

With the WISE stabilization system mastering R/C flight has never been easier — and it works with any radio! Just increase or decrease the throttle for confident control during takeoffs and landings. In the air, three flight modes allow you to learn flying skills at your own pace.

**Beginner** — the Sensei FS maintains a gentle bank and climb/descent envelope, with the pilot able to return the plane to straight and level flight by simply releasing the sticks

**Intermediate** — pilots will be able to fly with increased freedom, while still having the stick release function to fall back on

**Advanced** — once pilots are comfortable with the basics, they can fly on their own without limits, but still with the benefits of gyro stabilization

**Bailout Switch** — extra insurance that immediately returns the Sensei FS to straight and level flight from any orientation, in any of the 3 modes

### Your success is guaranteed!

The Sensei FS RTF is such a great way to learn to fly that it comes with a guarantee! Simply train at an AMA-chartered club with a qualified, club-designated instructor. If you crash before successfully learning to fly, we'll repair or replace your Sensei FS RTF...FREE! See your instruction manual for details.

### From the Experts:

The Sensei FS electric trainer takes learning to fly to new levels of ease and excitement. The innovative WISE 3-axis stabilization system is just like having a flight instructor standing right next to you, ready to instantly take over if you lose control. A powerful brushless motor delivers the performance necessary for sport aerobatics as your skills improve, and the "drop-door" feature lets you deliver a "payload" of your choosing!

### Long story short...

*Learning to fly has never been so easy or so much fun, thanks to the Sensei FS!*

**Flyzone**

## L-39

### Receiver-Ready Electric Ducted Fan Jet

- Brushless power system and HyperFlow ducted fan
- Optimized ducting provides exceptionally clean airflow to boost takeoff performance and airspeeds
- Molded from tough, feather-light AeroCell foam
- The aileron servo and pushrods, as well as most of the electronics and hardware, are included and factory-installed
- Magnetically attached tip tanks add realistic good looks in the air, but will break free during rough landings to prevent damage
- The included display stand doubles as a convenient work platform

The fuselage section over the shroud and motor can be removed easily with gentle finger pressure, but holds tight in flight, even at top speed.

The realistic cockpit features twin instrument panels as well as two painted pilot figures. Magnets ensure a strong bond, but can be separated quickly for quick battery pack changes or maintenance.

Do low passes at  
**90+**  
MPH

L-39

**WARNING:** The L-39 requires advanced flying skills and is not suitable for beginning or intermediate pilots. It reaches speeds of over 90 mph (145 km/h) and should be flown only at an AMA-chartered club's flying site. Because it can quickly disappear from sight, pilots should remain focused on the plane at all times.

**FLZA3634 L-39 Albatros Electric Ducted Fan Jet Rx-R**  
**Wingspan:** 25 in (635 mm)  
**Weight Range:** 24-25 oz (680-710 g)  
**Length:** 31 in (780 mm)  
**Includes:** factory-installed ElectriFly Ammo 24-45-3790 brushless inrunner motor, 35A ESC, 56 mm HyperFlow fan, (3) micro servos  
**Requires:** 4-channel radio with micro receiver & 4S 2200mAh LiPo battery pack

#### From the Experts:

The L-39 is a jet that assembles the same way it flies: fast! The brushless power system pairs a 35A ESC with an Ammo 24-45-3790 inrunner motor, and the HyperFlow is the ultimate in ducted fan design. At just 25" from wing tip to wing tip, the L-39 is easy to carry and transport, yet delivers HUGE jet performance with a 4S LiPo pack.

#### Long story short...

Get up to speed in a hurry with the sleek-looking, fast-flying, easy-building L-39 Albatros EDF!

**Flyzone**  
how high will you soar™

# A BREEZE TO BUILD. A PLEASURE TO FLY.

## ESCAPADE™ Mx

Almost Ready-to-Fly 30-35 cc Gas/EP Sport Plane

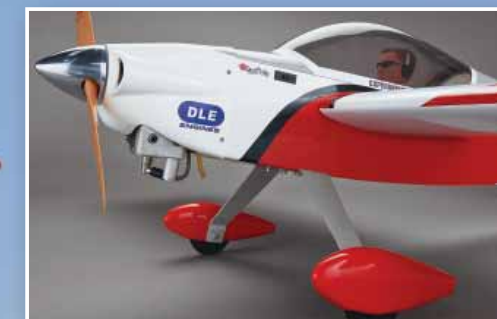

- Exciting aerobatics with gasoline or brushless electric power
- Low parts count for fast, straightforward assembly
- Two-piece wing simplifies construction and transport
- Aluminum spinner and pilot figure included
- The tail surfaces automatically self-align and the control surfaces come prehinged.

GPMA1210 Escapade MX 30-35 cc  
Gasoline/EP Sport ARF  
Wingspan: 80 in (2030 mm)  
Wing Area: 1184 in<sup>2</sup> (76.4 dm<sup>2</sup>)  
Weight Range: 12.8-13.8 lb (5.8-6.2 kg)  
Wing Loading: 25-27 oz/ft<sup>2</sup> (76-82 g/dm<sup>2</sup>)  
Length: 67 in (1700 mm)

Convenient, removable wing panels make it easy for pilots to store and transport the 30 cc-size Escapade MX.

A fiberglass cowl and wheel pants complement the Escapade MX's built-up, all-wood construction and colorful trim scheme.

### From the Experts:

Designed for 30-35 cc gasoline and electric power, the Escapade MX is a sport pilot's dream come true. Not only does it handle low-speed maneuvers with authority, it's also compatible with 63-62-250kV brushless motors like the RimFire 1.60 — making it capable of snap rolls, stall turns, inverted flight and every move in between.

### Long story short...

*Solid sport performance is yours with the Almost-Ready-to-Fly Escapade MX!*

# BLAST ACROSS THE BAYOU!

## CAJUN commander

*Ready-to-Run Brushless Airboat*

- 1800kV outrunner brushless motor
- Waterproof, air-cooled 50A ESC w/Star™ Plug
- Tactic 3-channel 2.4GHz SLT radio included
- The battery tray is sized to accommodate a 3S LiPo pack

The extra-tough metal propeller cage comes factory-painted for ultimate convenience.

A 12-piece LED spotlight system arrives factory-installed, and requires only two "AA" batteries.

Made of durable ABS plastic, the high-performance flat bottom hull provides the stability boaters need to pull off exciting maneuvers on water, snow or dry grass. The unique camo trim scheme is printed directly onto the plastic for lasting looks. Prolonged operation on abrasive surfaces will damage the hull.

The Cajun Commander is packed with realistic scale details, including a replica V-8 engine complete with headers, an air cleaner and exhaust system.

**AQUB5722 Cajun Commander**  
Brushless Airboat RTR  
**Length:** 27.5 in (699 mm)  
**Beam:** 14.5 in (368 mm)  
**Height:** 12.5 in (318 mm)  
**Weight:** 4.6 lb (2.1 kg)  
**Requires:** 11.1V 2200-5000mAh LiPo battery, charger, 6 "AA" batteries

**AQUACRAFT**  
Models

Add even more scale detail with these 3D printable files:

**Length:** 25.75" (654mm)  
**Width:** 16.3" (414mm)  
**Height:** 11.1" (282mm)  
**Wheelbase:** 18.5" (470mm)  
**Ground Clearance:** 2.48" (63mm)  
**Weight:** 12.75lbs (5.78kg) including electronics

For additional items see a complete list at [www.GPDealer.com](http://www.GPDealer.com)

**From the Experts:**

Now in kit form, the Yeti™ XL monster buggy kit is a skillfully engineered truck with a solid rear axle and independent front suspension. Its distinct aesthetic and technical elements were inspired by full-size desert trucks. Its strategically engineered design supplies bashing stamina while delivering a high level of technical rock racing abilities without compromise in either category. This kit version will accept standard 1/8th scale brushless 4-pole systems and most major stick pack batteries. Precision Icon Vehicle Dynamics aluminum shocks are standard equipment and deliver smooth suspension movement for consistent handling. We've also included a rear sway bar (medium, 3.4mm), 3mm aluminum lower link plates, aluminum 17mm hex hubs and nuts, adjustable steel turnbuckles, and officially licensed 3.8 Falken WildPeak M/T tires in our S30 compound.

**Long story short...**

*The playground just got a lot smaller – YETI XL™*

# FLY BY THE COMPETITION!

**RC10  
B5M**  
FACTORY LITE

2WD Mid Motor Electric  
Competition Buggy Kit

This Factory Lite version optimizes the platform of the hugely popular RC10B5M to excel in classes requiring spec motors. It's also ideal for track conditions where the racer can take full advantage of the performance edge realized by the kit's reduced weight.

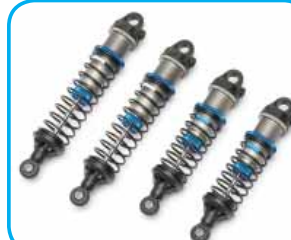

- Chassis fits ROAR-approved 2S saddle packs and 2S short packs using optional foam insert
- Heavy-duty rear axle for added strength
- Rear hubs feature larger bearings and easy-to-adjust camber link position and rear toe-in
- Team Associated B5M clear body and wing included

ASCD9000  
RC10B5M Factory Lite Kit  
Length: 15.2 in (385 mm)  
Width: \*  
Weight: \*  
Wheelbase: 11.0-11.1 in (280-282 mm)  
\*Final width and weight will vary with the actual electronics and tires used.

**ae**  
TEAM ASSOCIATED

Lightweight aluminum front axle/hex adapter and larger front wheel bearing

V2 12mm Big Bore threaded aluminum shocks with 3mm shafts and updated O-rings

Lightweight, hard-anodized aluminum chassis with centralized mass and mid-motor position to improve handling on high-grip off-road tracks

Aluminum rear ball stud mount for added strength

Factory Team upgraded ball bearing kit and titanium turnbuckles

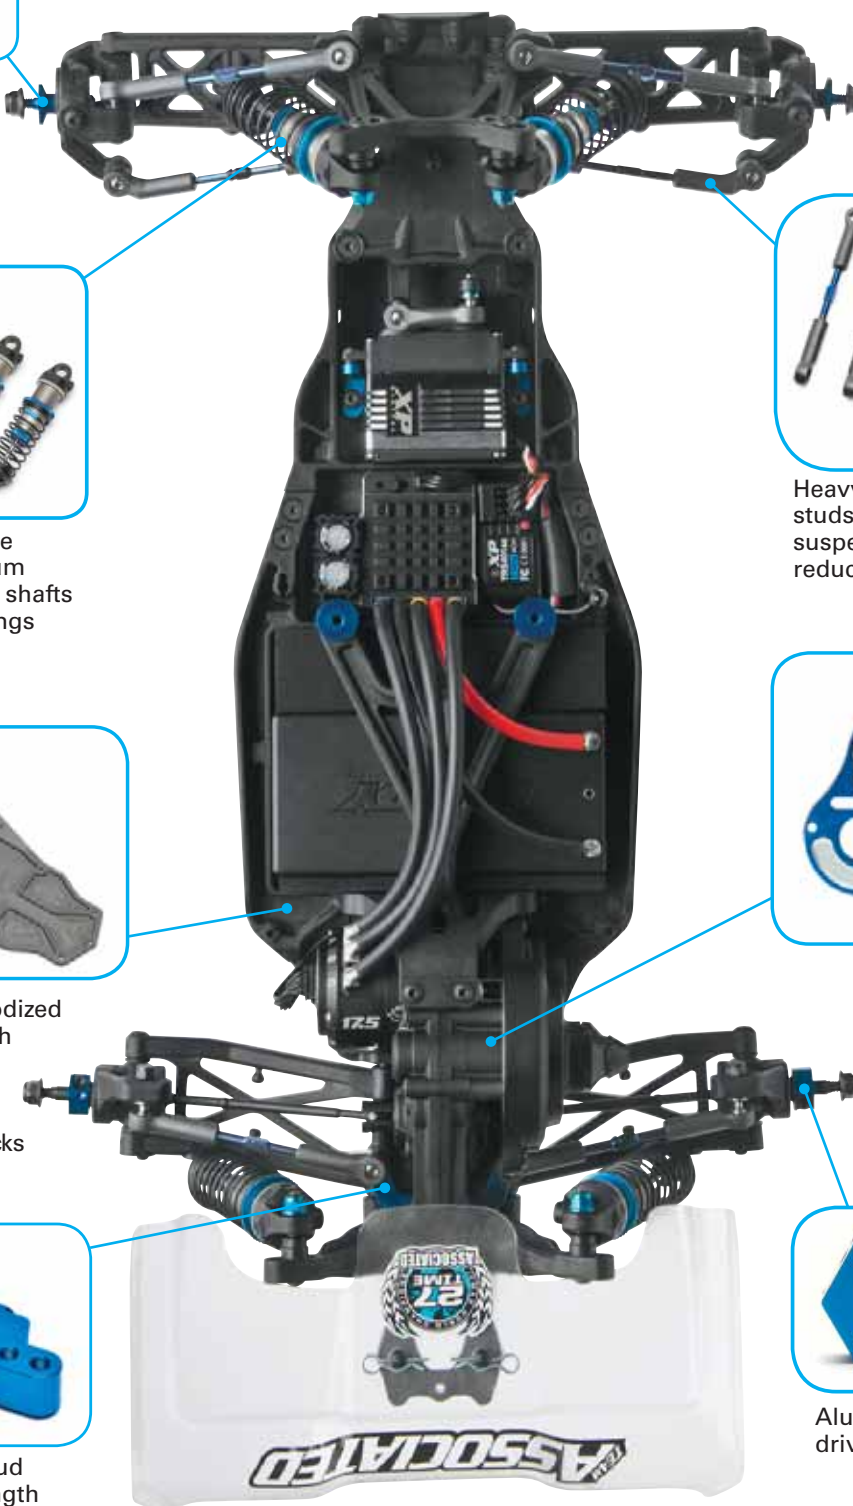

Heavy-duty ball cups and ball studs allow for maximum suspension travel while reducing binding and friction

New 3-gear transmission for lower rotating mass and extra acceleration, with a lightweight V2 aluminum top shaft included

Aluminum rear clamping drive hexes with laser etching

**Long story short...**

By shedding over 75 grams, the RC10B5M Factory Lite comes in at a fighting weight that's sure to make it a winner!

# PROVEN, WORLD CHAMPION POWER

Speed B2101 Ty Tessmann Limited Edition Engine w/Pipe

OSMG2044 Speed B2101 Ty Tessmann  
Limited Edition Engine w/Pipe

**Displacement:** 0.211 cu in (3.46 cc)

**Stroke:** 0.646 in (16.40 mm)

**Bore:** 0.646 in (16.4 mm)

**Practical RPM range:** 4,000-42,000

**Output:** 2.61 hp @ 34,000 rpm

**Weight:** 12.42 oz (352 g)

*Ty Tessmann*

**Ty Tessmann, 2014 IFMAR 1/8  
Scale Off-Road World Champion**

"I compete in major races all over the world, in all kinds of conditions. Many things can go wrong, but I never worry about my O.S. engines. They're powerful, driveable and consistent."

**TY TESSMANN**   
*Edition*

- Tailored to Ty Tessmann's IFMAR-winning specs!
- Features special modifications such as a 21J carburetor, 5.8mm carb restrictor, T-2090SC tuned pipe and M2002SC manifold
- The M2002SC's added length increases low- and mid-range torque
- Ty's name is laser-etched on the crankcase, crankshaft and tuned pipe
- Lowered cylinder head and DLC crankshaft with balanced tungsten weights
- Efficient, reliable Type 21J carburetor

## From the Experts:

Ty asked, and O.S. delivered! Only a small number of this Speed B2101 engine are being produced, with special tweaks you won't find anywhere else — including a 5.8mm carb restrictor and a T-2090SC tuned pipe paired with an M2002SC manifold. The result is an engine with exceptional stability, predictable handling, instant response and rapid acceleration!

## Long story short...

**Power your ride with the same engine Ty Tessmann used to win the 2014 IFMAR 1/8 Scale Off-Road World Championships!**

# 6S BRUSHLESS POWER = ONE TREMENDOUS TRUGGY!

## TALION 6S BLX

Truggies combine the speed of a buggy with the power of a truck — and the ARRMA team has engineered the ultimate bashing/racing machine: the TALION 6S! When equipped with a 6S LiPo battery, this awesome off-roader can reach incredible speeds of over 60 mph, and it's built to take whatever you can throw at it and come back for more. Ready to dominate the truggy competition? Take to the track with the TALION 6S Speed Truggy!

### Loaded with high-performance upgrades!

- Factory-assembled chassis and finished, trimmed body
- 6S LiPo-ready\* for blistering speeds
- Fully waterproof electronics to take on any terrain in any conditions
- Super-tough 4WD drivetrain for awesome traction on dirt, grass, mud and asphalt
- Race-proven anti-roll bar
- Aluminum motor mount
- Adjustable hook-and-loop battery straps
- Massive off-road tires for aggressive handling
- Aluminum servo horn for fast, responsive steering
- ARRMA 2050kV brushless motor with waterproof 180A ESC and built-in cooling fan

\*LiPo battery and charger not included.

Red anodized aluminum shocks tame the toughest terrain, with power provided by a BLX 2050kV brushless motor and waterproof BLX180 ESC.

The TALION 6S features a pivot-ball suspension system that allows for easy camber adjustment. The CVD driveshafts are super-durable and easy to maintain.

### 60+<sup>+</sup> MPH

\*Maximum speed achievable with recommended gears and 6S LiPo battery.

### RTR READY TO RUN

Requires: 4-6 Cell LiPo, charger and AA batteries

See the full list of included performance extras at [arrma-rc.com](http://arrma-rc.com)!

### From the Experts:

Whatever the conditions, whatever the surface, the TALION 6S Speed Truggy conquers them all! Durable four-wheel drive and fully waterproof electronics keep you running strong when others are in the pits, and the TALION's speed potential is really accelerated when you drop in 6S LiPo batteries. You get all this, plus Ready-To-Run convenience!

### Long story short...

*The TALION 6S BLX Speed Truggy is super-fast, ultra-tough...and the most fun you can have for racing and bashing!*

## ARRMA

DESIGNED FAST DESIGNED TOUGH

# SET YOUR SIGHTS ON SHORT COURSE SUCCESS!

## SENTON 6S BLX

Short course racing is one of the most exciting forms of R/C competition — with high-performance trucks battling it out in close quarters in the turns and dueling fender-to-fender down the straightaways — and ARRMA has the short course truck that can take it as well as dish it out!

The SENTON 6S BLX is a brushless beast that's bent on conquering the competition. It stands up to the most extreme racing action, and can reach speeds of 60+ mph when equipped with a 6S LiPo battery. With its ARRMA pedigree, the SENTON 6S is designed to be one tough truck!

The SENTON 6S's race-tested geometry includes oil-filled big bore aluminum shocks, pivot balls, durable arms and links and adjustable camber and toe-in.

### A long list of quality features!

- 6S LiPo-ready\* for blistering speeds
- Fully waterproof electronics to take on any terrain in any conditions
- Tunable suspension
- Metal-gear servo with 208 oz/in of torque with an incredible speed of .12/60°
- Three geared differentials that are lightweight and easily accessible
- A battery that can be positioned for perfect balance
- Heavy-duty drivetrain with fully sealed gearboxes and front CVDs
- Super-tough 5mm aluminum shock towers with multiple mounting holes
- Reinforced suspension hangers with inboard hinge pins that are less likely to pop out
- Newly designed roll cage and tower
- Side-impact bumpers
- Easy access to the 2050kV motor, 180A ESC and ADS-1517 servo, with clips that eliminate tangled wires

\*LiPo battery and charger not included.

## NEW PRODUCT

## GET YOUR SPEED FIX!

## RAIDER XL BLX

Ready-To-Run 1/8 Scale 2WD Brushless  
Electric Desert Buggy

- Based on the hugely popular 1/10 scale RAIDER chassis — and 20% larger
- Uses many parts from other ARRMA vehicles, for maximum parts efficiency
- An aluminum Twin Vertical Plate chassis provides superlative strength and durability; aluminum front kick-up and mounting plates aid in performance
- Light pods on the front and roof enhance the RAIDER XL's scale looks, and are compatible with third-party LED light sets
- Adjustable spacers on the oil-filled heavy-duty shocks allow for fine-tuning the RAIDER XL's ride height
- The waterproof radio box features a gasket system for effectively keeping dirt and moisture away from electrical components
- Silky smooth, super-tough and maintenance-friendly, the all-metal differential is the ideal match for the BLX power system
- A sturdy front wheel hub assembly with captured steering links make the RAIDER XL as strong as it is fast
- The super-durable slipper clutch with aluminum motor mount plate assists in heat dissipation; a 57T spur gear and 15T pinion gear deliver the perfect balance of speed and torque
- Adjustable rear camber links and rugged rear driveshafts boost performance and keep your RAIDER XL in the action and out of the pits
- Designed to easily accept hardcase LiPo batteries

ARAD86\*\* RAIDER XL 1/8 Scale BLX  
2WD Electric Desert Buggy RTR  
Length: 18.3 in (465 mm)  
Width: 11.8 in (300 mm)  
Height: 6.1 in (154 mm)  
Weight: 69 oz (1.95 kg)  
Wheelbase: 13 in (330 mm)  
Ground Clearance: 1.57 in (40 mm)

### From the Experts:

It's the biggest, baddest RAIDER yet! ARRMA engineers have created a larger platform that's more stable and forgiving — that makes for more confident handling, and the RAIDER XL's potent brushless power system offers the potential for top-end speeds in excess of 60 mph! Larger dimensions also mean more scale looks, so you'll stand out among all the other buggies!

### Long story short...

*The RAIDER XL is built for high-speed action in any conditions, from the beach to your backyard — and beyond!*

**ARRMA**  
DESIGNED FAST DESIGNED TOUGH

## AKA 1/10 Scale Chain Link Off-Road Tires

*Designed and track tested by Gil Losi and Mark Pavidis!*

- Bi-level, interlocking tread pattern creates extra support for consistency through the corners and on-throttle stability
- The perfect combination of forward drive and side bite, ideal for hard-packed or blue groove, indoor and outdoor tracks
- Manufactured to the highest tolerances for more uniform thickness and the best possible balance
- Available in Soft, Super Soft and Clay compounds, for 1/10 scale stadium trucks or for the EVO buggy
- Proudly designed and made in the USA

*The perfect upgrade for RTR ESCs!*

- A robust design that installs in most 1/10 scale buggies, stadium trucks and short-course trucks
- Splash-proof for maximum durability
- Fully proportional brakes
- Durable case with aluminum heat sink
- Pre-wired cooling fan
- LiPo low-voltage cutoff protection and auto-detect
- Heavy-duty silicone wires
- Low-resistance T-plug connector

# TWO FREE SERVOS MAKE THIS A SUPER DEAL!

TACJ2850 TTX850 8-Channel 2.4GHz SLT Radio System

## TTX850

8-CHANNEL SLT COMPUTER RADIO

When you purchase the Tactic TTX850, you know you're getting one of the best values in an R/C transmitter. That's because it has a long list of performance features, including:

- SLT reliability
- 30-model memory
- Fast, easy programming
- Large, backlit LCD screen
- Capability to fly virtually any aircraft, including multi-rotors

And now, you can add another great incentive for buying the TTX850: **two Tactic TSX35 standard sport servos at no extra charge!** This offer is good only through April 30, 2015, so see your participating hobby retailer today!

## TWO TSX35 Servos — **FREE!**

- The muscle modelers need for total control and total confidence
- Ideal for many sport models
- Includes universal connector

A retail value of  
**\$12.99** each!

TACM0235

©2015 — Hobbico®, Inc. This offer is available only to residents of the U.S. and Canada, and only from participating hobby dealers. Items are subject to availability with no substitutions. Ask your participating hobby retailer for details.

# GET A FREE SERVO WITH A FUTABA SYSTEM YOU CAN TRUST!

Futaba radios are among the most dependable systems in the industry, trusted by modelers the world over. And for a limited time select Futaba radios will come with the bonus of a FREE servo!

Purchase any of the radios listed below — which include FASST, FHSS and T-FHSS spread spectrum technologies — by April 30, 2015, and you'll also receive an S3004 standard servo, the super-versatile servo that can be used in a wide variety of applications. Ask your participating hobby retailer about this limited-time offer today!

## 3PL

Versatile, affordable surface control with three proportional channels and a fourth for special mixing. FUTK1300

## 4YF

Ideal for entry-level pilots, with convenience and performance at a very economical price. FUTK4200

## 4PLS

Features user updatable software, 40-model memory — and the huge racing data advantage of telemetry. FUTK1410

## 3PM-X

A value-packed, all-in-one system equipped to handle racing, crushing, crawling, bashing and boating. FUTK2021

## FREE!

### S3004 Standard Servo

- Precise fit throughout the geartrain
- Three pole motor
- Single ball bearing
- Ideal for many applications

# ANOTHER GREAT REASON TO BUY RF7.5!

# RF7.5

REALFLIGHT®

One of the best reasons to buy the RF7.5 Tactic TTX610 Radio Edition is that you can learn and hone flying skills on your PC, and then use that same transmitter to fly your real R/C aircraft at the flying field. And for a limited time, RealFlight will make the transition from virtual to actual flight even easier — by including a FREE Tactic receiver when you purchase the RF7.5 edition with TTX610 radio!

That's right...when you buy the TTX610 edition of RF7.5 from now through April 30, 2015, you'll get a Tactic TR624 receiver absolutely FREE! If you've been thinking about getting RF7.5, NOW is the perfect time! Check it out at your participating hobby retailer!

- All of the cutting-edge features that have made RealFlight the #1 best-selling flight simulator
- The TTX610 transmitter can fly every plane in RF7.5, plus any aircraft with an SLT receiver
- Features a wireless transmitter interface

**Recommended Engines:** C11-3

(First Flight), D12-5

**Requires:** 3/16" (5 mm) Maxi™

Launch Rod (ESTT2244)

ESTT7235

**Mercury Redstone and Odyssey also require:**

- Tools
- Glue or plastic cement
- Paint
- Finishing supplies

### Long story short...

*This triumphant trio has something to offer rocketeers of all ages and skill levels!*

### 1/25 SHOWBOAT WITH FIGURE

#### TV Tommy's tire-smoking terror!

Tommy Ivo was the first to break the nine second mark in the quarter mile with a twin engine rail dragster. However, he wasn't content with being an ordinary drag racer. He wanted to be famous, so "TV Tommy" as he became known, added two additional engines onto his twin-engine dragster to create the "Showboat". While Tommy was never able to race the "Showboat", his demonstration runs roused crowds across the country. **Kit features** fully painted Tommy Ivo figure, four complete engine assemblies, and tube frame with separate body panels.

85-1285    RMXS1285    Total Parts: 214    Skill Level: 3    Length: 6.75 in (171 mm)

### 1/24 PORSCHE BOXSTER

#### Think inside the Boxster

Introduced as a concept car in 1992, the Porsche Boxster exploded onto the world stage as a mid-engine two seater in 1996. The 986, as the Boxster was designated, was powered by a 2.5 liter flat 6 cylinder engine. High performance, a trademark feature of all Porsche models, drove demand for the Boxster high, making it the number one selling Porsche from 1996 to 2005. This easy to build, skill level 1 **kit features** parts molded in multiple colors, detailed chassis, detailed interior, and stick on decals.

85-1984    RMXS1984    Total Parts: 37    Skill Level: 1    Length: 7.1 in (181mm)

### 1/25 SURFITE WITH FIGURE

#### Set out for a surfite of surf with the Surfite

Tool down to the beach in the Surfite, set up your Tiki Hut, sack out, and wait for the big one. This is the perfect set of wheels for the supreme surfer dude and it comes with a tiki hut and a figure of "Big Daddy" Ed Roth himself. If, wherever you are, sand and surf calls to you, then this model is for you. **Kit features** pre-painted Ed Roth figure, Tiki Surf Hut, and three surfboards.

85-4347    RMXS4347    Total Parts: 104    Skill Level: 3    Length: 3.75 in (95 mm)

### 1/25 1959 CADILLAC® ELDORADO™ HARDTOP

#### Crank up a cool Caddi

The longest, the lowest, and the most ostentatious of all car designs, the 1959 Cadillac was the dream ride of anyone who wanted to make a big impression. It was top of the line, top rated and top dollar, with the Seville® ringing in at \$7,401 (roughly 60 grand in today's money). Less than a thousand of these vehicles were produced, but they left an indelible mark on automotive designers. **Kit features** a detailed 390 c.i. engine with three two-barrel carburetors, whitewall tire inserts, textured vinyl top, plus cruise control and suspension air bags.

85-4361    RMXS4361    Total Parts: 154    Skill Level: 3    Length: 8.9 in (227 mm)

## 1/25 '40 FORD STANDARD COUPE

Nothing 'standard' about it

The groundbreaking 1940 Ford Coupe set the bar for car production far higher than any previous vehicle. It was one of the first automotive designs to incorporate consumer influences in its design. Its high power, sleek shape, and comfortable styling would influence car design for years to come. Unfortunately, production of and improvement on the two styles of 1940 coupe was severely curtailed by America's entry into WWII. **Kit features** detailed factory stock flathead V-8, separate frame and rear fenders, and whitewall tire inserts.

85-4371 MONS4371 Total Parts: 143 Skill Level: 2 Length: 7.6 in (192mm)

REVELL OF GERMANY®

## 1/24 TRABANT 601 UNIVERSAL

We are one people

The Trabant 601 was the East German counterpart to the Volkswagen Beetle, a vehicle designed for the masses. Originally, like many things during the Cold War, it was meant to represent the power of Communism. However, unlike the Beetle, the Trabant design stagnated, leaving it with an under-powered, inefficient engine and an aging design. It became a symbol of the stark separation of east and west, so it's fitting here that the Trabant becomes a symbol of the 25th year after the fall of the Berlin wall. **Kit features** a Trabant with unique decals.

02014 RVLS2014 Total Parts: 150 Skill Level: 3 Length: 5.9 in (149mm)

## 1/48 SEPECAT JAGUAR GR.1A

Strike from the sky

Nuclear capable strike aircraft are some of the most terrifyingly lethal weapons in the world arsenal, and the SEPECAT Jaguar is one of the most potent tactical aircraft still in operation. The GR.1A variant of the Jaguar is equipped with a navigation system, electronic countermeasures, and Sidewinder air-to-air missiles. The Jaguar formed a large part of the British and French air Forces for decades and is still in service with the Indian Air Force. **Kit features** detailed cockpit and undercarriage, air brakes, external fuel tanks, recon pod, sidewinders, bombs, and two RAF decal sets.

04996 RVLS4996 Total Parts: 128 Skill Level: 4 Length: 13.8 in (350mm)

## 1/12 YAMAHA YZR500 (0WA8) "MARLBORO 1989"

A world-class bike for a World Champion

From 1973-2002, the Yamaha YZR500 led four 500 cc Grand Prix riders to ten separate world championships. One of the most famous riders to take the helm of the YZR500 was former World Champion Freddie Spencer. In the 1989 season, Spencer placed sixteenth with the Marlboro Agostini Yamaha team, scoring 33.5 points overall. This limited edition **kit features** new carbon disc, chamber and front fender parts, plus one marking option: 1. Marlboro Yamaha Team, 1989 WGP500, 16th place, no. 19 rider: Freddie Spencer.

21712 (Limited Edition) HSGS1712 Total Parts: 170 Skill Level: 3

### 1/72 SU-35S FLANKER PROTOTYPE

Fitting further features to the 'Flanker'

Technically, the Su-35 is just a modified Su-27. But since the Su-35 is loaded with improved avionics, vectored thrust engines, additional hardpoints for weapons and more, it's practically a whole new airplane. Its Mach 2.25 speed and over 17,000 lbs (8,000 kg) of ordnance capacity is extremely impressive. Even with all its impressive performance, the Su-35S is only intended as a stopgap for until Russia's fifth generation fighter is released. **Kit features** new fuselage and pitot tube parts plus decals for two Russian Air Force aircraft.

02134 (Limited Edition) HSGS2134 Total Parts: 299 Skill Level: 3

### 1/72 F-15J EAGLE "JASDF 60TH ANNIVERSARY"

Celebrating the JASDF's 60th birthday

With over 100 victories and no losses in air-to-air combat, the F-15 Eagle has ruled the skies since the late 1970s. In Japan, 139 F-15J aircraft were produced by Mitsubishi® for JASDF service. To celebrate the JASDF's six decades of service, select F-15Js were decorated with a special 60th anniversary livery in 2014. This limited edition **kit features** one marking option: 1. JASDF 6th AW, 306th Sq., JASDF 60th Anniversary special marking, Code: 960 (72-8960), Komatsu AB, July 2014.

02139 (Limited Edition) HSGS2139 Total Parts: 138 Skill Level: 3

### 1/700 IJN HEAVY CRUISER FURUTAKA

The full measure of Furutaka

In the chaotically confused battle off Cape Esperance, a group of Japanese warships including the Furutaka ran into American warships in the darkness. In the ensuing combat, both commanders thought their ships were firing on friendlies and both were, in part, correct. Furutaka sustained over ninety direct gunnery hits and one torpedo hit. Despite horrific damage, Furutaka was able to limp out of the melee under its own power, saving most of the crew. This limited edition **kit features** new full hull, display stand, and photo-etched parts.

43165 (Limited Edition) HSGS3165 Total Parts: Skill Level: 3

### 1/700 IJN HEAVY CRUISER AOBA

Sail the indomitable Aoba

Despite being hit with naval gunnery, strafed, bombed, torpedoed, and colliding with another warship, the Japanese Heavy Cruiser Aoba continued to put up a fight until the day it was finally, irrevocably sunk. Along the way, Aoba participated in some of the most famous conflicts of the war—at Guam, Wake, Guadalcanal, and Coral Sea—plus countless smaller convoy escort missions. Now, Hasegawa is offering an elegant, full-hull version of this mighty warship. This limited edition **kit features** new hull, rudder, screw shaft and display stand plus photo etched parts.

43166 (Limited Edition) HSGS3166 Total Parts: Skill Level: 3

### 1/48 "SHINDENKAI NO MAKI" MITSU A6M2B ZERO Takeshi Nogami's craziest creation

Manga and anime enthusiasts all over the world are familiar with writer Takeshi Nogami's crazy creations. His craziest one yet is "Shindenai No Maki," which features high school girls piloting World War II's most famous aircraft – including the Mitsubishi® A6M2b Zero – in dogfights to the death. Whether you're a manga fan or a warbird buff, this unique kit has something for everyone. This limited edition **kit features** a design based on Takeshi Nogami's popular Japanese manga, "Shindenai No Maki," with markings representing pilot Miyabi Amakasu, Ishigami Girls High School.

64719 (Limited Edition) HSGS4719 Total Parts: 69 Skill Level: 3

### 1/48 "EIEN NO ZERO" MITSU A6M5 ZERO TYPE 52 A classic warbird. A modern miniseries

In 2014, the controversial World War II drama "Eien No Zero" (or "The Eternal Zero") grossed about 7 billion yen during its seven-week theatrical run. It's no surprise that it is being adapted into a three-part television miniseries. It is reported the program will feature sequences from Naoki Hyakuta's original novel that weren't included in the film. This limited edition **kit features** two marking options: 1. IJN Carrier Zuikaku, Code: 312-73, Pilot: Kyuzo Miyabe, early 1944 and 2. IJN 721st NFG, Code: 721-51, Pilot: Kyuzo Miyabe, Kanoya AB, Aug. 1945.

52126 (Limited Edition) HSGS5226 Total Parts: 71 Skill Level: 3

### 1/48 "EIEN NO ZERO" A6M2B ZERO COMBO Two ways to build "The Eternal Zero"

Naoki Hyakuta's novel, "Eien No Zero" centers on the lives of WWII Japan's Zero pilots. No doubt, this bestseller's popularity will continue to grow with TV Tokyo's 2015 miniseries. This limited edition **kit combo features** two A6M2b Zero kits and four marking options: 1. IJN 721st NFG, Code: 721-37, Kyuzo Miyabe, Kanoya AB, Aug. 1945; 2. IJN Tainan NFG, Code: V-125, Kyuzo Miyabe, Rabaul AB, summer-autumn 1942; 3. IJN Carrier Akagi, Code: AI-116, Kyuzo Miyabe, December 1941 and 4. IJN 204th NFG, Code: 9-141, Kyuzo Miyabe, Rabaul AB, autumn 1943.

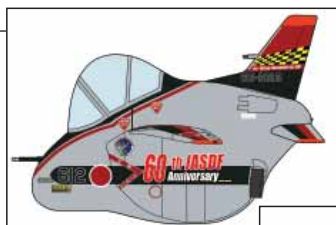

52127 (Limited Edition) HSGS5227 Total Parts: 46 Skill Level: 3

### EGG PLANE T-4 JASDF 60TH ANNIVERSARY COMBO (2 KITS) From flightless to fighter pilots

For five dozen years the JASDF flock has defended the airspace above their roosts in Japan. For much of that thyme, emerging pilots have been at the drumstick of the T-4. The trainer has been turning feckless flappers into fighter pilots for 219,000 flips of the egg timer (since 1985). It's no spring chicken, but it's still the cock of the walk. Even the Blue Impulse aerobatic team hand pecked the T-4 as their Grade-A bird. If you're boiling to scramble a whole squadron of big, bold birds, build this brace of beauties!

60509 (Limited Edition) HSGS6059 Total Parts: 35 x 2 Skill Level: 1

### 1/48 F-16C FIGHTING FALCON "BLACK KNIGHTS"

Republic of Singapore Air Force standouts

The Republic of Singapore Air Force is unlike the Air Force of any other nation in that the aircraft of the RSAF can cross the entire landmass of their nation in just thirteen minutes. Without the benefit of large maneuvering areas, any attack on Singapore or its airspace has to be shut down immediately or the war is lost. Possibly because of that fact, Singapore maintains one of the most highly trained and well equipped militaries in the world. Limited edition **kit features** decals for the "Black Knights".

07395 (Limited Edition)

HSGS7395

Total Parts: 121

Skill Level: 3

### 1/48 F-4EJ PHANTOM II "AIR SUPERIORITY CAMOUFLAGE"

Over the opposition

The F-4 Phantom II is a big, exceptionally fast and incredibly lethal fighter in service since the early sixties. The EJ variant is a model retrofitted to a purely air superiority role for the JASDF. Throughout its career, the Phantom II set several world records, chalked up air to air kills, destroyed ground targets, and conducted vital aerial reconnaissance. With the JASDF, the Phantom II has rarely had to exhibit its characteristic might but its flight records are impressive. This limited edition **kit features** decals for two JASDF planes.

07396 (Limited Edition)

HSGS7396

Total Parts: 132

Skill Level: 3

### 1/32 KAWANISHI N1K2-J SHIDENKAI PROTO

Flying with the rising sun

With the N1K2-J, Kawanishi did the impossible; turning a float plane into a dogfighter that could stand up to the best America had to offer. "George" fighters were quite capable of shooting down Hellcats, Corsairs and, in the hands of expert pilots, even the vaunted B-29 Superfortress. In larger numbers the N1K2-J could have had a massive effect on the war, but only 428 were built. By comparison 12,000 Corsairs, comparable to the N1K2-J, were produced by the U.S. This limited edition **kit features** new cowlflaps and decals for prototype #6.

08239 (Limited Edition)

HSGS8240

Total Parts: 148

Skill Level: 3

### 1/35 ZUNDAPP KS750 WITH SIDECAR

Racing for the Reich

Since the Treaty of Versailles forbade most war production, the quietly rebuilding armies of Germany relied heavily on civilian transportation early in the war. Among these 'civilian' vehicles were around 18,000 Zundapp KS750 motorcycles. Rugged, easy to produce, and highly versatile, the KS750 helped give equipped units unprecedented mobility. Unfortunately for the Heer, even with the huge number of Zundapp cycles produced, there were never enough to go around. By 1943 the cycles had largely been replaced. By wars end, they had all but vanished. **Kit features** a cycle and three figures.

0317S

ITAS0317

Skill Level: 2

Length: 2.6 in (66 mm)

## 1/24 IVECO STRALIS HI-WAY EURO 5

**Latest of the heavy haulers**

With a completely redesigned cabin, improved, integrated electronics package, and the power and safety people have come to expect from all Stralis semi-trucks; the new Iveco Stralis Hi-Way Euro 5 is set to become one of the most popular new trucks in Europe. Its completely new powertrain minimizes fuel consumption and maintenance costs, maximizes power output, and keeps the whole package in line with Euro 5 anti-pollution laws. As a testament to the revolutionary design, the Iveco Stralis Euro 5 won the 2013 "International Truck of the Year" award.

3899

ITAS3899

Skill Level: 5

Length: 10 in (254 mm)

## 1/35 ROADBLOCK AND US SOLDIERS

**Holding the line**

Controlling enemy troop movements, providing secure rest spots and supply depots, maintaining control of important road hubs and transportation networks—roadblocks are incredibly important to military strategy. Unfortunately, they are also typically isolated, thinly manned, and lightly fortified. This set is perfect for designing the ultimate Roadblock diorama. It can stand alone, or you can incorporate in other light armor and truck models. **Kit features** four figures, check point, barricades, and accessories.

6521

ITAS6521

Skill Level: 2

## 1/72 SD.KFZ.161 PZ. KPFW. IV AUSEF1/F2 (2 KITS)

**The long and short of it**

All variants of the Panzer IV were revolutionary for their time, but the pace of tank evolution in World War II was so great that nearly continuous changes had to be made to the Wehrmacht's vehicles. One of the greatest leaps was the distinction between the F1 and F2 variants of the Pz. IV. Like previous variants, the F1 mounted a 75mm short barrel gun that fired low-velocity high-explosive shells—totally useless against the T-34. The F2 made tank to tank combat a priority with a long-barreled, high velocity 75mm anti-tank gun.

7514S

ITAS7514

Skill Level: 1

Length: 3.2 in (82mm)

## 1/72 KFZ. 184 PANZERJÄGER ELEFANT

**Giant guns and grinding gears**

Weighing as much as ten flesh and bone African Elephants, the Panzerjäger Elephant was a massive machine designed to carry one of the most lethal anti-tank guns in history. This 88mm gun fired a shell which could reliably blast through 150mm of rolled steel armor at ranges of over a mile. Though it was incredibly lethal to enemy armored vehicles, the Elephant suffered from a lack of serious anti-infantry armament and an exceedingly low top speed. From a total of 91 produced Elephant tanks, only two vehicles survived the war.

## AMT® 1/25 1969 Mercury Cougar Eliminator White

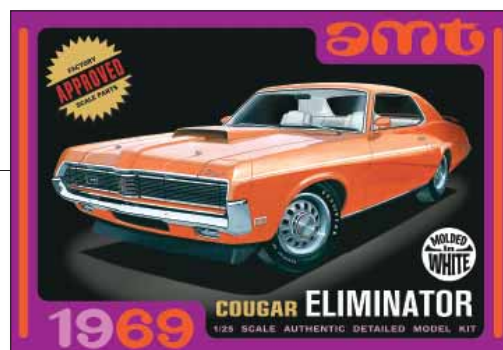

**Eliminate the competition**

Sleek, powerful, stylish—the Mercury Cougar was everything a good sixties-era muscle car should be... and it was more. The Eliminator package had a snarling 351cc 4-barrel V-8 under the hood, sport styling and striping throughout, plus the good lines and unique light setup that had made all Cougars the most striking thing on the road. You can get this superior model of the original molded in white or in orange! **Kit features** fully detailed chassis, motor, and interior plus optional striping decals, factory pre-lettered tires, bonus mini display box, and vintage packaging. Also available in orange (AMTS0912)

## AMT® 1/25 Gas Master '37 Chevy Coupe

*Build stock, custom, or drag gasser versions!*

No beans about it, the 1937 Chevy Coupe 'Gas Master' is made to pass. A unique wedge nose and tapered body gave the Chevy Coupe unique wind resistance characteristics as well as truly aggressive style. Its unique shape, coupled with a big growling engine under the hood, made it a top drag strip competitor for its day. **Kit features** three build options, retooled bench seat, pad printed tires, original decals, and vintage packaging.

## AMT® 1/32 Nestle Crunch® Chevy Monster Truck SNAP

*It's Crunch time*

Here's a fun model building experience you can sink your teeth into! The Chevy® CRUNCH Monster Truck is molded in color, easy to snap together and loads of fun for all ages. Expert modelers can take a break from their 1/5 scale Bismarck and build a quick, fun project with a less experienced modeler. No paint is required, just snap the parts together and apply the full-color Nestle Crunch stickers. **Kit features** easy snap-together construction, pre-colored parts, and full sticker sheet.

## AMT® 1/650 and 1/1000 Star Trek USS Enterprise Build2gether Set (2 Kits)

*Boldly build what your pop just built before*

Dads. They really are the greatest. Teach you what you need to know, give you what you need to grow—Superhero, starship captain, and secret agent rolled into one. Or at least that's what a son thinks. Be a hero to your kid and get in some quality bonding time with the AMT Build-2-gether series. This **set features** two Star Trek Enterprise NCC-1701 models, one a detailed glue kit and the other a simplified, snap-together model perfect for novice modelers.

## Bandai Gundam 1/144 #14 Strike Freedom Gundam

*Let mega mecha mangling ensue*

A stories tall, bulletproof, flying, mobile gun platform that is capable of operating in zero gravity and equipped with enough high-tech weapons to turn its single pilot into a one-man armada? What's not to like? I'd take two, but unfortunately the technology for them, first dreamed up by Tomino in 1979, still hasn't manifested in 2015. Until the real one becomes available, keep the mayhem-laced dreams alive by building this impressively detailed and incredibly customizable model kit from Bandai Gundam.

## Lindberg Models 1/1200 Table Top Navy 2 Pack #1 US WWII Ships

*Big bad boats of WWII*

USS North Carolina, a battleship launched in 1940 and USS Intrepid, a carrier launched in 1943, both made sterling contributions to the war effort. North Carolina served in most major campaigns of the Pacific War, bombarding enemy strong points and providing anti-aircraft fire. Intrepid launched aircraft in support of the Island Hopping campaign and was instrumental in winning some of the most significant battles of the war. **Kit features** two warships with full hull or waterline hull options.
