TAKE CONTROL OF GREATER PERFORMANCE

Whether you're battling for bragging rights at your local track or going for TQ and 1st place at regional and national events, both the DEX8 buggy and DEX8T truggy are engineered to deliver the ultimate 1/8 scale racing experience.

DEX8

1/8 Scale 4WD Electric Competition Buggy Kit

TDR0302 DEX8 1/8 Scale 4WD Electric Competition Buggy Kit
Length: 20.6 in (522 mm)
Width: 12.1 in (307 mm)
Height: 7.3 in (186 mm)
Weight: 7.1 lb (3.2 kg)
Requires: motor, ESC, 2-channel radio system, high-torque steering servo, (2) 2S 7.4V LiPo batteries, compatible charger, tires, wheels, pinion gear

Loaded with high-performance upgrades!

- 3 mm chassis and 5mm front/rear shock towers are constructed from lightweight, milled 7075 T6 aluminum
- Innovative, patent-pending sliding gear mesh for rock-solid weight distribution, consistent braking and simplified maintenance
- Easy-access front/rear diff units minimize tune-up time
- Independent active caster inserts boost set-up flexibility
- Fully adjustable pivot ball suspension and hinge pin inserts provides more options for front-end mods; galvanized components protect against oxygenation
- Balanced front and rear geometry results in dependable handling
- 16 mm Big Bore aluminum shocks with vented shock caps and a choice of constant volume and emulsion bodies
- Front and rear gearboxes include an aluminum insert for input shaft bearings to increase bevel gear durability
- Ultra-lightweight differentials with composite cross shafts increase acceleration
- Easy-access center diff installs with only four screws for fast tuning
- Center universal joints minimize heat transfer and maximize drivetrain efficiency
- Ultra-tough composite and steel components for lasting performance
- Adjustable, four-position Ackermann

DEX8T

1/8 Scale 4WD Electric Competition Truggy Kit

TDR0402 DEX8T 1/8 Scale 4WD Electric Competition Truggy Kit
Length: 23.3 in (585 mm)
Width: 16.2 in (408 mm)
Height (approx.): 7.7 in (196 mm)
Weight: 7.7 lb (3.5 kg)
Requires: motor, ESC, 2-channel radio system, high-torque steering servo, (2) 2S 7.4V LiPo batteries, compatible charger, tires, wheels, pinion gear

Team Durango

From the Experts:

They're the premier racing kits for dominating the 1/8 scale competition, leading the way with sizzling speeds, super toughness and confident handling! Both the bold DEX8 buggy and aggressive-looking DEX8T truggy boast Team Durango innovations such as the patent-pending sliding gear mesh for consistent weight distribution. If you're a driver who demands top-notch technology, these electric off-roaders really deliver!

Long story short...

Both the DEX8 buggy and DEX8T truggy are the perfect platforms for racing success!

BUILT FOR THE FASTEST BATTLES

Winning intense big track SC competition is now easier than ever. Designed to be faster off your pit bench and faster on the track, the DESC10 is loaded with innovative new features and built with 1/8 scale durability. It's all to help you reduce your lap times and increase your speeds, right out of the box.

DESC10

1/10 Scale 4WD Electric Short Course Truck Kit

TDR0142 DESC10 1/10 Scale 4WD Electric Short Course Truck Kit

Length: 21.5 in (546 mm)

Width: 11.6 in (294 mm)

Weight: 7.5 lb (3.4 kg)

Approx. Height: 7.5 in (190 mm)

Requires: 550-size brushless motor, brushless ESC, 2-channel radio system, high-torque steering servo, (2) 2S 7.4V LiPo batteries, compatible charger, off-road tires, wheels, extra-long shank pinion gear, body shell

- Patent pending sliding gear mesh allows the motor to always stay in place, for fast, consistent settings and optimized weight distribution
- Hard anodized aluminum chassis, with shock towers milled to reduce weight
- Hard-anodized 3mm thick aluminum chassis, plus 5mm thick shock towers, suspension mounts, shock bodies, shock caps
- Front caster inserts work with the adjustable pivot ball suspension for super-efficient vehicle tuning; reactive caster delivers consistent handling on a wide range of track surfaces
- Front and rear gearboxes allow for quick access to the differentials, with an aluminum insert for shaft bearings to increase bevel gear durability
- The ultra-lightweight diffs include lightweight cross shafts for increased efficiency, reduced rotating mass, and long-lasting durability
- Center differential is accessed with just four screws
- Center universal joints offer super-efficient drivetrain operation with reduced heat transfer
- Center diff mount mounted on aluminum posts for easy maintenance and extra strength
- 16mm Big Bore shocks with vented shock caps can be used in constant volume or emulsion for set-up flexibility and superior performance
- A protective shock cap insert reduces impact damage during rollovers
- Fully-adjustable suspension geometry with hinge pin inserts on all four lower suspension mounts for superior "tunability"
- Adjustable Ackermann with four positions out of the box
- Galvanized suspension components for protection against oxygenation
- Ultra-strong 4mm rear outer hinge pins for long-lasting performance

From the Experts:

The DESC10 is the short course truck for drivers serious about winning. Loaded with innovative features such as the sliding gear mesh, this vehicle combines blazing speed with amazing durability. Weight has been trimmed wherever possible, and you can fine-tune the DESC10 to create a truly customized racing machine.

Long story short...

If you're ready to conquer the competition, the DESC10 is willing and able.

CRAZY FAST — CRAZY FUN!

E FIRESTORM FLUX

Ready-To-Run 1/10 Scale 2WD Electric Stadium Truck

77+
124+km/h **mph**

Experience even MORE power, performance and fun! Includes a 77-tooth spur gear and 35-tooth pinion for insane top speeds, plus a 3S battery strap to hold extra power and a wheelie bar to keep the truck under control!

- Pre-Built, Ready to Run 1/10th scale stadium truck
- Pre-painted racing body with spoiler
- Multi-spoke off-road racing wheels
- Multi-rib front tires and mini-pin rear tires
- 2.4GHz radio system for crystal-free, comfortable control
- Waterproof HPI Flux EMH-3S brushless speed controller
- HPI Flux MMH-4000kV brushless motor for superfast top speed
- Waterproof HPI SF-10W steering servo

- Waterproof receiver box
- Extra-tough long wheelbase composite chassis
- Super-reliable 2WD drivetrain
- Low-profile 2.6:1 ratio transmission features all-metal gears
- Oil-filled extra-long stroke coil-over shock absorbers
- Complete set of rubber-sealed ball bearings
- 4 "AA" batteries included for transmitter
- Handles up to 3S power for instant wheelies and massive top speeds!

COMPATIBLE

FLUX
brushless system

HPID2878 E-Firestorm Flux Brushless
2WD Stadium Truck RTR
Length: 16.7 in (425 mm)
Width: 12.8 in (325 mm)
Wheelbase: adjustable
Requires: 2S-3S LiPo or 6-7 cell NiMH
battery, compatible charger

Dual plate slipper clutch protects the drivetrain during hard landings.

Lightweight and durable composite nylon main chassis.

Strong alloy steel dogbones for simplicity and durability.

Waterproof electronics let you drive in rain, snow and mud.

High-performance suspension geometry and components from the Firestorm 10T.

Ground Assault taper pin rear tires and Front Line ribbed front tires deliver high traction and long life on nearly any surface.

From the Experts:

Right out of the box, the E-Firestorm Flux is the kind of big-time fun machine that you'll want to take everywhere! It hits blinding fast speeds, takes on huge jumps and pops on-demand wheelies with ease. Super-tough durability and waterproof electronics let you tackle any conditions. And the bonus Speed Pack ramps up the truck's performance potential even more!

Long story short...

Bashing and racing just got more intense, thanks to the E-Firestorm Flux!

SEE FLIGHT FROM A NEW POINT OF VIEW!

DROMIDA

OMINUS FPV

Ready-To-Fly Quadcopter
w/First Person View

Control your camera with your smartphone!

With the Ominus FPV, you don't need to buy a separate viewscreen or expensive headset. Simply download the FPVcam app, put your smartphone into the holder, and you have a sharply focused, first-person view of your flight. The Ominus includes a micro memory card and card reader, but you can also download photos and videos directly to your smartphone for sharing with friends or posting to your favorite social media sites.

FPV
First-Person
View

➤ Q200 radio with four flight modes for tailoring performance to your skill level, plus an auto-flip button, a single button for video and still photography, auto-linking and digital trims

➤ Wi-Fi-enabled high-definition digital camera with 1280 x 720 resolution and a 328 feet (100-meter*) range

➤ Taps your smartphone's capabilities to: provide a first-person view of your flight; turn camera on and off; adjust brightness; replay or delete videos; edit or delete photos - even manage data storage

➤ 700mAh 35C LiPo battery provides 10-12 minutes of flight time - and recharges from any handy USB port

*Maximum range. Assumes unobstructed view and "clean" radio environment.

The Ominus FPV comes with all this:

- Assembled airframe with finished body and color-coded LEDs
- Wi-Fi-enabled, HD digital FPV camera
- Micro memory card and card reader
- Smartphone holder with sun shade
- Interference-free Q200 2.4GHz radio system
- Rechargeable 1S LiPo battery & USB charger
- (4) "AA" batteries
- Extra set of blades
- Double-sided camera mounting tape

From the Experts:

With the Ominus FPV, you not only see your flight through a Wi-Fi-enabled digital camera - you can **operate it** using your smartphone or other mobile device*. All you need is your smartphone and the FPVcam app - an app you can download free of charge from Google Play™ or the Apple App Store™; everything else is included. It's easy to fly indoors or out, and amazingly aerobatic even when the camera is attached.

*Smartphone or other mobile device required for FPV flight; not included. Compatible with smartphones and other mobile devices for Apple or Android. Requires FPVcam app, available as a free download from the App Store and Google Play. Apple and the Apple logo are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc. Android™ and Google Play are trademarks of Google Inc. Wi-Fi® and Wi-Fi Alliance are registered trademarks of the Wi-Fi Alliance.

Long story short...

Get your Ominus FPV today...and see how exciting flying can be from a first-person point of view!

DIDE02 Ominus FPV Quadcopter RTF**
Diagonal Length: 9.4 in (238 mm)
Weight: 4.2 oz (120 g)
Requires: smartphone or other device for Android or Apple & FPVcam app

A SMART CHOICE FOR ANY PILOT

sensei FS

Electric Trainer w/WISE Flight Stabilization System

The tail section aligns itself automatically and is secured with just one screw.

The wing halves slide together onto a tube and are secured with two bolts.

Includes the versatile Star™ Plug!

Operate the "drop-door" from the 5th channel of your radio for in-flight deployment of a parachute or other creative payloads!

- The WISE Flight Stabilization System helps your Sensei FS maintain a safe flying attitude, so you can focus on flying without worrying about crashing
- You get everything you need with the RTF, including a quality Tactic TTX610 6-channel radio system and SLT receiver, LiPo flight battery and charger
- Fly the Rx-R version with your transmitter and receiver
- Flight-ready with minor screw-together assembly (no gluing); all onboard gear is already in place
- A hatch in the top of the plane provides easy access to the battery

FLZA3030 Sensei FS Electric Trainer w/WISE RTF
FLZA3034 Sensei FS Electric Trainer w/WISE Rx-R
Wingspan: 58 in (1475 mm)
Weight: 3.2 lbs (1450 g)
Length: 48 in (1220 mm)
Rx-R requires: radio and receiver with 4-5 channels; 2100-2200mAh 11.1V LiPo battery; compatible charger
RTF requires: nothing!

Equipped with the innovative WISE 3-axis stabilization system!

With the WISE stabilization system mastering R/C flight has never been easier — and it works with **any radio!** Just increase or decrease the throttle for confident control during takeoffs and landings. In the air, three flight modes allow you to learn flying skills at your own pace.

- **Beginner** — the Sensei FS maintains a gentle bank and climb/descent envelope, with the pilot able to return the plane to straight and level flight by simply releasing the sticks
- **Intermediate** — pilots will be able to fly with increased freedom, while still having the stick release function to fall back on
- **Advanced** — once pilots are comfortable with the basics, they can fly on their own without limits, but still with the benefits of gyro stabilization
- **Bailout Switch** — extra insurance that immediately returns the Sensei FS to straight and level flight from any orientation, in any of the 3 modes

Your success is guaranteed!

The Sensei FS RTF is such a great way to learn to fly that it comes with a guarantee! Simply train at an AMA-chartered club with a qualified, club-designated instructor. If you crash before successfully learning to fly, we'll repair or replace your Sensei FS RTF...FREE! See your instruction manual for details.

From the Experts:

The Sensei FS electric trainer takes learning to fly to new levels of ease and excitement. The innovative WISE 3-axis stabilization system is just like having a flight instructor standing right next to you, ready to instantly take over if you lose control. A powerful brushless motor delivers the performance necessary for sport aerobatics as your skills improve, and the "drop-door" feature lets you deliver a "payload" of your choosing!

Long story short...

Learning to fly has never been so easy or so much fun, thanks to the Sensei FS!

FLZA3034

BLAST ACROSS THE BAYOU!

CAJUNTM commander

Ready-to-Run Brushless Airboat

- 1800kV outrunner brushless motor
- Waterproof, air-cooled 50A ESC w/Star™ Plug
- Tactic 3-channel 2.4GHz SLT radio included
- The battery tray is sized to accommodate a 3S LiPo pack

The extra-tough metal propeller cage comes factory-painted for ultimate convenience.

The Cajun Commander is packed with realistic scale details, including a replica V-8 engine complete with headers, an air cleaner and exhaust system.

Made of durable ABS plastic, the high-performance flat bottom hull provides the stability boaters need to pull off exciting maneuvers on water, snow or dry grass. The unique camo trim scheme is printed directly onto the plastic for lasting looks. Prolonged operation on abrasive surfaces will damage the hull.

A 12-piece LED spotlight system arrives factory-installed, and requires only two "AA" batteries.

AQUB5722 Cajun Commander
Brushless Airboat RTR
Length: 27.5 in (699 mm)
Beam: 14.5 in (368 mm)
Height: 12.5 in (318 mm)
Weight: 4.6 lb (2.1 kg)
Requires: 11.1V 2200-5000mAh LiPo battery, charger, 6 "AA" batteries

AQUACRAFT
Models

Add even more scale detail with these 3D printable files:

- Duck call
- Foot rest
- Gun rack

Visit aquacraftmodels.com for 3D printable files and updates.

From the Experts:

The Cajun Commander arrives decked out with dynamic detail and scale realism! Made of durable ABS plastic, the high-performance flat bottom hull provides incredible stability for exciting maneuvers on water, snow or dry grass. Just add batteries and a charger, and you're ready to go!

Long story short...

Power across water and land with style, at the controls of the Cajun Commander airboat!

NEW PRODUCT

THE ULTIMATE RACE-WINNING COMBINATION

DNX8

1/8 Scale 4WD Nitro Buggy Kit

- Patent pending sliding gear mesh allows the engine position to be fixed, for constant, optimal weight distribution
- Ultra-light engine mounts are compatible with all engine brands
- Easy diff access for super-fast servicing in the pits
- Consistent handling and quick tuning is provided by a pivot ball front suspension
- Compact electronics placement for forward weight distribution and for adding a personal transponder
- Clunk style fuel tank avoids flame outs when the car is on its roof, and features extra wide gutter and spillage evacuation system
- Fuel tank cap is designed to allow the use of any fuel gun without issue
- Fully enclosed battery box for maximum protection and battery positioning flexibility
- Clips keep wire and fuel tube routing neat and in place

TDR0211 DNX8 1/8 Scale 4WD Nitro Buggy Kit

Length: 20.6 in (524 mm)

Width: 12.1 in (307 mm)

Height: 7.3 in (186 mm)

Weight: 7.1 lbs (3.2 kg)

Wheelbase: 12.8-13.0 in (325-329 mm)

Requires: race spec nitro engine, 2-channel radio system, high-torque steering servo, tires, wheels, pinion gear

From the Experts:

Faster, stronger, easier to service and tune, the DNX8 buggy kit is precision engineered to put you in control in the most challenging conditions. This innovative nitro-powered machine is designed to take you to the podium again and again — because it's the ultimate combination of speed, ease of adjustability and consistent performance. Put yourself at the controls of the DNX8, and re-define what it means to compete at your highest potential.

Long story short...

Fast, durable and consistent, the nitro-powered DNX8 is built to win.

TP2700-3SP+25 THPA1138
RC LiPo 3S 11.1V 2700mAh
ProLite+ Power Series 25C

15150 VNRE5150
DJI Phantom 2 Vision+ 3S
5500mAh 11.1V LiPo Battery

Venom® DJI Phantom 2 Vision+ 3S 5500mAh 11.1V LiPo Battery

Graduate to a smarter Phantom 2 battery!

- An onboard, low power consumption, digital display system provides valuable information
- Pushing a button brings up a backlit LCD screen for displaying statistics such as overall charge percentage and current mAh capacity, resting voltage and battery cycles
- During charging the display shows estimated battery charge time, current input amperage and overall pack and individual cell voltages
- After flying, the screen gives you discharge time, max current used and much more

0684 VNRP0684
Pro Charger 3 LiPo/NiMH
AC/DC Charger

Venom® Pro Charger 3 LiPo/NiMH AC/DC Charger

The next evolution in top-of-the-line Pro Charger technology!

- 100 watt circuitry supports charge rates up to 7.0 amps, and allows you to view individual cell voltages without having to start a new charge sequence
- Microprocessor controlled, fan cooled and capable of handling Lithium batteries up to 6S, 1-15 cell NiCd/NiMH batteries and Lead Acid batteries from 1-10 cells (2v to 20v)
- High-end features such as multiple discharge profiles and recallable memory profiles for up to five of your most commonly used batteries
- Continues the legacy of the Pro Charger line with its ergonomic case design, integrated power supply and on-board balance block
- Comes with 8 of the most popular charge leads, including XT60, Deans, EC3, EC5, Tamiya®, JST and alligator clips to many best-selling batteries

TWO FREE SERVOS MAKE THIS DEAL TWICE AS NICE!

TACJ2850 TTX850 8-Channel 2.4GHz SLT Radio System

When you purchase the Tactic TTX850, you know you're getting one of the best values in an R/C transmitter. That's because it has a long list of performance features, including:

- SLT reliability
- 30-model memory
- Fast, easy programming
- Large, backlit LCD screen
- Capability to fly virtually any aircraft, including multi-rotors

And now, you can add another great incentive for buying the TTX850: **two Tactic TSX35 standard sport servos at no extra charge!** This offer is good only through April 30, 2015, so see your participating hobby retailer today!

©2015 — Hobbico®, Inc. This offer is available only to residents of the U.S. and Canada, and only from participating hobby retailers. Items are subject to availability with no substitutions. Ask your participating hobby retailer for details.

- AR60 OCP-Axles (off-center pumpkin design)
- New waterproof receiver box
- Dual slipper clutch
- AE-5 ESC w/ drag brake - 3S LiPo capable (waterproof)
- Adjustable coil-over shocks
- 4-link suspension - optimized to reduce axle steer & torque twist

NEW PRODUCT

INTRODUCING NEW ESTES BLURZZ!

Down to earth rocketry fun!

BLURZZ™

Red Menace

Green Mantis

Blue Storm

EVERY BLURZZ INCLUDES:

- 1 Rocket-Powered Dragster
- 90 ft (27 m) Race Track
- Launch Controller
- Carrying Case

9414 ESTT9414
BLURZZ

- Available in three fun colors
- Dragsters are fully assembled
- Equipped with all launch equipment
- Compatible with A10-PT engines (ESTT1505)

From the Experts:

Rocket powered dragsters take the fun of model rocketry to a whole new level. They come equipped with all necessary launch equipment and a handy carrying case. All you need to do to fire up your fun is pop in an A10-PT engine and let it rip!

Long story short...

Estes BLURZZ rocket powered racers deliver high-speed excitement that is fun for all ages!

ESTES CROSSBOW SST MODEL ROCKET

Fire it up!

Skill Level 2

Skill Level 2 kits require average building, painting, and finishing skills. This kit features laser-cut wood fins, plastic nose cone, waterslide decals, unfinished body tube and instructions.

Length: 15 in (38.1 cm)
Diameter: .74 in (19 mm)
Estimated weight: 1.1 oz (31.2 g)
Projected Altitude: 1600 ft (488 m)
 12 inch (30.5 cm) parachute recovery

7234 ESTT7234
 Estes Crossbow SST
 Model Rocket

Long story short...

The Skill Level 2 Crossbow rocket is a great builder kit and fun to fly. Get yours now and get a lift this spring!

AFX® BIG BLOCK BATTLERS WITH TRI-POWER PACK

Souped-up slot car competition!

- Easy-to-drive Mega G+ race system delivers the perfect balance of grip and speed for all skill levels
- Exclusive Tri-Power Pack lets drivers choose from three skill levels, so all ages can race with a flip of the switch
- 40' (12.2 m) track layout consists of 42 pieces – including a terminal track – plus 21 guard rails. Multiple configurations are possible
- Features new sixth-generation Chevy® SS and Ford® Fusion slot cars with colorful, highly detailed bodies
- Both AFX120 controllers are upgraded for easy drivability; EZ Plug Power Pack lets drivers change track direction by flipping a switch
- A digital lap counter and tune-up kit are also included.

21004 AFXW1004
 AFX® Big Block Battlers
 w/Tri-Power Pack

Long story short...

The upgraded Big Block Battlers Mega-G+ set has everything slot car racers need to get in on the action!

1/25 STONE, WOODS & COOK '41 WILLYS SSP

The original hot rod

The most famous of all drag racing "Gassers" is the original Stone, Woods and Cook Willys®. At the 1961 Winternationals, they won the B/GS class first time out with an 11.22 second time. The car continued to set records throughout the 1960s. They were the first of the "Gassers" to get into the 9 seconds bracket and to break the 150 miles per hour mark. **Kit features** opening hood, trunk and doors; position able front wheels, blown OHV V-8 engine, lots of chrome parts and soft black tires.

85-1287 RMXS1287 Total Parts: 155 Skill Level: 3 Length: 6.8 in (174 mm)

1/25 AUTO TRANSPORT TRAILER

A complete cavalcade of cars

Whether they are new cars going to be sold or old cars going to auction, cars stacked precariously on semi-trailers is a common sight on the nation's roads. Car companies load the maximum amount of cars possible onto the trailers, lending a jigsaw-puzzle look to the entire contraption. With this trailer kit you can load as many as six 1/25 or 1/24 scale kits and haul them with a 1/25 or 1/24 scale tractor (all sold separately). **Kit features** metal chain and vinyl tubing details, separate extendable rear ramps, and more.

85-1509 RMXS1509 Total Parts: 160 Skill Level: 3 Length: 23.6 in (600 mm)

1/24 PORSCHE BOXSTER

Think inside the Boxster

Introduced as a concept car in 1992, the Porsche Boxster exploded onto the world stage as a mid-engine two seater in 1996. The 986, as the Boxster was designated, was powered by a 2.5 liter flat 6 cylinder engine. High performance, a trademark feature of all Porsche models, drove demand for the Boxster high, making it the number one selling Porsche from 1996 to 2005. This easy to build, skill level 1 **kit features** parts molded in multiple colors, detailed chassis, detailed interior, and stick on decals.

85-1984 RMXS1984 Total Parts: 37 Skill Level: 1 Length: 7.1 in (181 mm)

REVELL OF GERMANY®

1/72 SCALE TIGER II AUSF.B. (PORSCHE PROTOTYPE TURRET)

King of the panzers

When it rolled onto the fields of Normandy in July 1944, the Tiger II was one of the most devastating weapons of land warfare ever devised. It had virtually impenetrable front armor, a lethal 88mm main gun, and a suspension design which was far less complicated than its predecessors. Fifty full production chassis were fitted with rounded and sloped prototype turrets and rushed into combat. Though they provided relatively equal protection to later turrets, the prototypes were harder to produce in quantity. **Kit features** extensive detailing, moveable turret, and two sets of decals.

03138 RVLS3138 Total Parts: 143 Skill Level: 4 Length: 5.6 in (142 mm)

1/72 SD.Kfz. 7/2

Bringing the fight to the fore

Originally designed as artillery tractors, later versions of the Sd.Kfz 7-8 tonne tracked infantry vehicle were used as mobile anti-aircraft platforms. Early in the war, German commanders were able to rely on near total air superiority in every attack. Attrition in the Luftwaffe, however, rapidly eroded the air advantage of Nazi Germany and necessitated the deployment of more and increasingly sophisticated anti-aircraft weapons. The armored cab and 37mm autocannon of the Sd.Kfz. 7/2 made for a lethal instrument of war, but it relied on pull-behind trailers for its ammo supply. **Kit features** detailed interior, one piece bendable injection molded track plus four German decal sets.

03207 RVLS3207 Total Parts: 140 Skill level: 4 Length: 5.9 in (150 mm)

1/35 ZIL-131

Constant Communist comrade

In war zones just getting things from here to there often presents massive difficulties. Knowing this fact, Russia designed the ZIL-131 to be its prime mover, infantry transport, and cargo truck. A V-8 engine powers all six wheels to give this machine the muscle to haul everything from bread to SCUD missiles. These trucks were used by the Soviet and later Russian armies as well as the East German Army and many former Soviet Bloc countries. **Kit features** detailed engine, chassis, suspension, and interior plus decals for Soviet, East German, and Russian versions.

03245 RVLS3245 Total Parts: 229 Skill Level: 5 Length: 7.8 in (198 mm)

BRITISH 4X4 OFF-ROAD VEHICLE SERIES III (109/LWB)

In it for the long haul

Britain is no stranger to fighting wars in inhospitable terrain, so it's no surprise that they required one of the most versatile off-roading vehicles ever designed for their Army. The Land Rover, originally designed in 1948 and subsequently upgraded, is one of the most rugged vehicles in the world. It features the capability of switching between two and four wheel drive, a powerful engine, and the option for a long wheelbase version. **Kit features** detailed interior, toolbox, and decals for British, Dutch, and Danish Army versions.

03246 RVLS3246 Total Parts: 89 Skill Level: 4 Length: 5.2 in (131 mm)

1/72 MIG-21 F.13

Still fighting

The supersonic MiG-21 first flew in 1959, yet it is still in service with many countries today. Wars in Vietnam, Indonesia, India and Pakistan made the MiG-21 one of the most active fighter aircraft since the end of WWII. Impressive supersonic speeds and their use of early air-to-air missiles made them impressive aircraft. This combination of agility and firepower allowed them to be routed in for quick surprise attacks and escape unscathed. **Kit features** detailed cockpit, ejection seat, undercarriage, and exhausts, 30mm cannon, rocket pods, and decals for German and Soviet versions.

03967 RVLS3967 Total Parts: 83 Skill Level: 3 Length: 8.5 in (215 mm)

1/72 HANDLEY PAGE VICTOR K2

Strategic strike inbound

Projecting defensive power from the British Isles all the way down to the Falkland Islands is no mean feat. To pull it off, the British employed nearly a dozen Victor K2 refueling tankers along with a pair of Vulcan bombers flying in relay refueling groups. Only the Victor's 91,000 lb fuel capacity and its ability to both re-fuel and be re-fueled made the strikes possible. **Kit features** cockpit with pilots, wing tanks, positionable landing gear, refueling tanks and probes, access ladder and decals for two RAF aircraft.

04326 RVLS4326 Total Parts: 108 Skill Level: 5 Length: 18.9 in (481 mm)

1/32 ARADO AR196B

Watching the waves

Operating from lakes, rivers, and ship-borne catapults, the Arado Ar196B was one of the most powerful of all single-engine seaplanes used in WWII. Its low wing positioning, long range, and relatively heavy weapons load made it a significant danger to shipping and enemy bombers or reconnaissance aircraft. Long after the German surface navy was largely eliminated, the Arado Ar196B was still to be found flying long-range missions off the coasts. **Kit features** detailed steel tube framework, cockpit, radio operator's panel and rear machine gun position. Wings can be modeled folded or extended and one set of decals is included.

04922 RVLS4922 Total Parts: 190 Skill Level: 5 Wingspan: 15.5 in (393 mm)

1/72 UH-60A TRANSPORT HELICOPTER

Black Hawk inbound

Since the HUEY was retired, few military vehicles have been as instrumental to the success of the US Armed Forces as the UH-60. From Grenada to the Middle East, thousands of American soldiers have been borne into combat by the Black Hawk. In addition to their usual transport role, the UH-60 can be equipped with stub wings to carry rocket and missile launchers for ground support. **Kit features** detailed cockpit, cargo space with seats, rotating rotors, optional stub wings and door guns, rocket pods, Hellfire missiles, and two sets of US Army decals.

04940 RVLS4940 Total Parts: 128 Skill Level: 4 Length: 8.3 in (212 mm)

1/1200 HMS PRINCE OF WALES

Beleaguered British battleship

From her launch in January of 1941 to her sinking in December 1941, HMS Prince of Wales never caught a break. Very shortly after her launch she was engaged in the failed attack on the German Battleship Bismarck. After being repaired she was sent around the horn of Africa to help protect Singapore, was caught without air cover, and sunk by swarms of Japanese torpedo bombers. Through it all, her crew fought valiantly remaining onboard until the abandon ship was ordered only five minutes before she sank. **Kit features** detailed aircraft catapult and full decals.

05135 RVLS5135 Total Parts: 45 Skill Level: 3 Length: 6.9 in (175 mm)

1/350 RUSSIAN WWI BATTLESHIP GANGUT

Break ice on the Baltics

The Gangut's 1911 launch marked the Imperial Russian Navy's first-ever battleship. An icebreaker bow allowed it to be used on the Baltic Seas. While she didn't see much WWI combat, the Gangut was used in numerous battles during WWII. **Kit features** a detailed hull with fittings, a waterline hull option, a structured main deck, detailed deck superstructures, twelve 305 mm L/52 naval guns, sixteen 120 mm L/50 naval guns, a detailed bridge, lifeboats, two masts, authentic drive and rudder units, a Russian Imperial Navy decal set and a display stand.

05137 RVLS5137 Total Parts: 432 Skill Level: 5 Length: 20.5 in (520 mm)

1/24 AUDI® R8®

An all-wheel-drive legend

Based off the famous Le Mans racer, the Audi R8 became an instant legend when it was introduced in 2006. From the light metal alloy construction to the powerful V-8 engine and the innovative, electronically adjustable suspension system, the R8 is a winner from every angle. **Kit features** a highly detailed, multi-part eight-cylinder engine with separate exhaust system, a detailed interior with authentic instrument panel and textured seats, a detailed suspension, a textured chassis, an opening hood, rotating wheels, chrome rims and comprehensive decals with multiple international registration options.

07057 RVLS7057 Total Parts: 106 Skill Level: 3 Length: 7.2 in (184 mm)

1/24 PORSCHE® CARRERA® RS 3.0

To the victor go the spoilers

The first Porsche Carrera models appeared in 1972; the racing-optimized RS 3.0 version debuted two years later. An air-cooled 3-liter engine delivered 149 mph (240 km/h) top speeds, while the large, "whale tail" rear spoiler gave the RS 3.0 a super-sleek profile. **Kit features** an authentically reproduced chassis, a multi-part six-cylinder engine with separate air filter, a multi-part Spartan interior with authentic dashboard, a one-piece body, separate bumpers, a rear spoiler, a detailed hood, filigree shock absorbers and wheel suspension, assorted chrome parts and decals with international markings.

07058 RVLS7058 Total Parts: 84 Skill Level: 4 Length: 6.9 in (174 mm)

1/25 MARMON CONVENTIONAL "STARS & STRIPES"

Nothing "conventional" about this big rig

The last Marmon semi left the factory in 1997, yet these handmade masterpieces continue to have a cult following to this day. This custom Conventional was based off a Peterbilt® 359, which Marmon modified with a turbocharged Cummins diesel engine, a custom cabin and assorted chrome hop-ups. **Kit features** a separate, opening hood, a multi-part cabin, a fully detailed Cummins® diesel engine with twin turbochargers, opening doors, a multi-part sleeping compartment, steerable front wheels, ten tires, assorted chains and hoses, various chrome parts and a large-format decal set.

07429 RVLS7429 Total Parts: 317 Skill Level: 5 Length: 12.8 in (326 mm)

1/200 OFF-SHORE OIL RIG "NORTH CORMORANT" Primed to pump petroleum

The North Cormorant off-shore oil rig can be found 100 miles (160 km) northeast of the Shetland Islands. Twenty-eight steel nails are used to anchor the rig to the seabed. Forty pipes transport up to 24,000 tons of oil and gas to temporary stores and the mainland every day. This limited edition **kit features** a waterline with detailed substructure, modular platform structures, a detailed drilling rig, supply cranes with movable loading arms, multiple containers, lifeboats, a heli platform, detailed staircases, forty pipes, railing and decals.

08803 (Limited Edition) RVLS8803 Total Parts: 615 Skill Level: 5 Length: 27 in (685 mm)

1/72 UP-3D ORION 91ST SQUADRON Silence subs with the 91st Squadron

Used for decades in pursuit of hostile subs, the P-3 Orion is one of the most successful maritime observation aircraft of all time. They have been used by nations the world over and seen service in more conflicts than most any other plane. Even today, the JMSDF relies on the Orion to carry out patrols over its extensive maritime holdings. The aircraft's long endurance, high speed, and tail-mounted sensors make it perfect for patrolling the huge expanses of the Pacific. This limited edition **kit features** new resin parts and decals for one JMSDF aircraft.

02140 HSGS0213 Total Parts: 149 Skill Level: 3

1/72 MITSUBISHI® F-2B "JASDF 60TH ANNIVERSARY" The versatile "Viper Zero"

The Mitsubishi F-2B may not be the most famous fighter around, but it is certainly one of the most impressive. The F-2 has the distinction of being the first military aircraft equipped with Active Electronically Scanned Array (AESA) radar. Its wing area is also 25 percent larger than other fighters in its class. Currently, there are 61 single-seat F-2As and 21 F-2B two-seat trainers flying worldwide! This limited edition **kit features** one marking option: 1. JASDF 8th AW, 60th anniversary special marking, Code: 129 (43-8129), Tsuiki AB, November 2014.

02141 (Limited Edition) HSGS0214 Total Parts: 129 Skill Level: 3

1/72 KAWASAKI® T-4 "JASDF 60TH ANN." COMBO Subsonic superstars

Powered by twin turboprop engines, the Kawasaki T-4 is the trusted trainer of the world-famous Blue Impulse aerobatic team. The T-4 can travel at top speeds up to 645 mph (1,038 km/h) – which is quite impressive for an intermediate subsonic trainer! This limited edition **kit combo features** two Kawasaki T-4 kits with two marking options: 1. JASDF 13th FTW, 60th anniversary special marking, Code: 789, Ashiya AB, November 2014 and 2. JASDF 13th FTW, 60th anniversary special marking, Code: 806, Ashiya AB, November 2014.

02142 (Limited Edition) HSGS0215 Total Parts: 66 x 2 Skill Level: 3

1/200 SCALE ANA® BOEING® 787-9

The definitive Dreamliner®.

The Boeing 787 Dreamliner marks a turning point in commercial air travel. The 787 is among today's most fuel-efficient aircraft, consuming 20 percent less energy than the popular 767. It is constructed of composite materials throughout, making the 787 far lighter than other similarly-sized aircraft. The 787-9 features further improvements including a lengthened fuselage, increased fuel capacity, and increased maximum takeoff weight. The -9s range is so great that it is used on nonstop flights from Los Angeles to Melbourne. **Kit features** decals for a single ANA aircraft.

Skill Level: 3

1/72 EA-18G GROWLER "CVW-5"

Take flight with the "Shadowhawks"

Established in 1987, VAQ-141 (nicknamed the "Shadowhawks") transitioned to the EA-18G Growler in 2010. The "Shadowhawks" were the second active squadron to fly the aircraft, and the first to fly the EA-18G in carrier-based combat. Currently, VAQ-141 is part of the U.S. Navy's Carrier Air Wing 5 (CVW-5) on the USS George Washington (CVN-73). This limited edition **kit features** one marking option: 1. US Navy, USS George Washington, VAQ-141 "Shadowhawks" CAG, Code: NF500.

Skill Level: 3

1/72 F-15J EAGLE "JASDF 60TH ANNIVERSARY PART 3"

Soaring into the stratosphere

The F-15J Eagle stands apart from most contemporary fighters, thanks to its improved avionics support, AN/APG-63(V)1 radar and AAM-4 missile capabilities. Today, the JASDF has a fleet of 165 F-15J Eagles, complemented by an additional, smaller fleet of 48 F-15DJ two-seat trainers. In honor of the JASDF's sixtieth anniversary in 2014, select F-15Js were decorated with a special, commemorative livery. This limited edition **kit features** one marking option: 1. JASDF 8th AW, 304th Sq., JASDF 60th anniversary special marking, Code: 865 (62-8865), Tsuiki AB, November 2014.

EGGPLANE F-2 JASDF 60TH ANNIVERSARY 2 KITS

Sixty years of service!

Designed by the JASDF in 2000, the Mitsubishi F-2 is a powerful plane. Cooperatively designed by Japan and the US, the F-2 is based on the F-16 Fighting Falcon but includes improved electronics, larger span wings, and other improvements to increase its usefulness. Though the F-2 has never seen combat, it has been used twice to turn back Russian aircraft which strayed into disputed airspace. Limited edition **kit combo features** full decals.

HSGS6060

Total Parts: 17 x 2

Skill Level: 1

1/48 LAVOCHKIN LA-7 "156 IAP"

Packed with piston power

The Lavochkin La-7 held its own against German fighters, thanks to an impressive top speed of 411 mph (661 km/h) and a maximum of three 20 mm cannon placements. In 1947, the Soviet Air Force phased out the La-7, while the Czechoslovak Air Force continued flying them for three more years. This limited edition **kit features** two marking options: 1. Soviet Union AF, 156 IAP CO, Lt. Col. SF Dolgushin, Code: 93, 1945 and 2. Soviet Union AF, 32 Gv. IAP, Maj. V. Orekhov, Code: 23, 1944.

07398 (Limited Edition) HSGS7398 Total Parts: 76 Skill Level: 3

1/48 NAKAJIMA B5N2 TYPE 97 KATE MODEL 3

Japan's deadliest bomber

A bomb from a B5N2 caused half the casualties at Pearl Harbor when it detonated the forward magazine of the battleship Arizona. As the war progressed, the bomber sank three American carriers and numerous other vessels. Near the end of the war, this three-seat bomber was used in kamikaze strikes against Allied shipping at Okinawa, causing massive damage and casualties. Not a single B5N2 survived the war intact, but you can own this limited edition kit that features three sets of decals!

07399 (Limited Edition) HSGS7399 Total Parts: 127 Skill Level: 3

1/700 JAPANESE NAVY LIGHT CRUISER TENRYŪ

Swift spear of the IJN

Tenryū and her sister ship Tatsuta were tough Japanese light cruisers commissioned just after the First World War and used in WWII. Tenryū fought at Wake Island, off Guadalcanal, and extensively in the waters around New Guinea before falling prey to USS Albacore in late 1942. The vessel itself was a new design intended to lead destroyer flotillas. It was long, thin, and fast for a cruiser, but carried lighter armor and armament than other cruisers. **Kit features** two sets of decals.

49357 HSGS9357 Total Parts: 100 Skill Level: 3

1/700 JAPANESE NAVY LIGHT CRUISER TATSUTA

Iron lance of the IJN

Tatsuta and her sister ship Tenryū were tough Japanese light cruisers commissioned just after the First World War and used in WWII. Tatsuta followed Tenryū into the Second Sino-Japanese war then, during WWII, fought at Wake Island, off Guadalcanal, and extensively in the waters around New Guinea before catching a torpedo from USS Sand Lance in 1944. The vessels of the Tenryū class were new designs intended to lead destroyer flotillas. Long, thin, and fast for cruisers, their only flaws were in their light armament. **Kit features** two sets of decals.

49358 HSGS9358 Total Parts: 100 Skill Level: 3

1/72 F-5 E/N TIGER II

Swift Swiss strikers

Where other fighters might boast of being the biggest, the fastest, or the most heavily armed, it is arguably the F-5 which is the best fighter in the world arsenal. It boasts incredibly low operating costs, low maintenance needs, high operational availability, and the speed and lethality necessary to make it a significant threat to aircraft three decades its junior. All those advantages and more make it the fighter of choice for the Swiss Air Force and their aerobatic team. **Kit features** decals for four versions.

1/35 ELCO 80' PT BOAT CREW

Craziest crewmen of the US Navy

Service aboard any US Navy warship during WWII was dangerous, but the crews of PT boats were vulnerable to considerably more threats. Friendly fire incidents, larger and more heavily armed enemy ships, and the uncomfortable tendency of the aviation gas for PT boat engines to explode when damaged made shipping out in a PT boat rather risky. In return, the PT boat enabled the USN to inflict drastic, disproportionate losses on Japanese supply vessels. Your PT boat won't go anywhere without crewmen gutsy enough to sail her. **Kit features** 10 figures in various poses.

1/72 WWII AMERICAN INFANTRY

Roll on with "Big Red One"

Sent into North Africa as part of Operation Torch in early 1943, the US First Infantry Division would subsequently participate in the invasion of Sicily, the Normandy landings, and eventually the invasion of Germany itself. The division was nearly continuously embroiled in combat for two years, suffering nearly 20,000 casualties. In the end, it wasn't the M1 Garand, or the BAR, or the bazooka that won the war. It was the grim resolve with which the infantry fought on. **Kit features** fifty infantry figures in various poses and is wargames approved.

6046

ITAS6046

Skill Level: 1

1/35 US INFANTRY ON BOARD

One bumpy ride

It's June 6th, 1944. Shells are roaring overhead, bomb bursts are echoing across the water, and machine guns are chattering death, but all you can think about is trying to keep breakfast down. Wonks up the line have been talking up the Higgins. Frankly, they can keep this chunk of plywood you're bouncing around in, turning greener by the second. One of the Navy boys shouts. His voice gets lost in the tumult, but he can only be saying one thing. Almost time to go.

6522S

ITAS6522

1/35 PZ KFW.I AUSE.B

Training for the coming terror

Equipped with thin armor and an extremely light armament of two low-caliber machine guns, the Panzer I was far behind the tank designs of Germany's neighbors. However, it was a necessary step towards the later development of Nazi Germany's elite tank forces. Despite its drawbacks, the Panzer I saw service in most of the fronts Germany fought on. Continuous improvements, modifications, and role changes extended the service life of the design far past the initial training role envisioned for it.

AMT® 1/25 1932 Ford Victoria

Back on the track!

One of the most popular rides of the Mafia, the 1932 Ford Victoria was also extremely popular with the hot-rodding crowd and remains a top model sought by automotive collectors to this day. This kit is a 'Retro-Deluxe' remake of a sixties original dragster kit. It has been restored to better than original condition with many retooled parts and awesome decals! **Kit features** retooled wheels, motor parts, and custom fenders; plus clear or tinted windows, pad printed drag slicks, deluxe vintage decal artwork, and bonus mini display box.

AMT® 1/48 Stinson Reliant SR-9

Blast from the past!

The Stinson Reliant SR-9, with its curved windshield, high wing positioning, and gull wings, was one of the most distinctive aircraft of the thirties. With seats for four to five people, fully enclosed cockpit, and impressive air capabilities, it was a great leap forward in aircraft design. Over a thousand were produced and later variants of the Reliant were adopted as trainers by the USAAC. This is a great kit for anyone to build, from beginners to experts! **Kit features** full decals, vintage packaging, and clear windows.

AMT905/12 AMTS0905 Skill Level: 2

AMT® 1/25 1964 Chevrolet® Impala™

Sixties standout

One of the best selling and most popular lines of the sixties, the Chevy Impala combined radical styling, high performance, and exquisite comfort into one exceptional vehicle. To this day the sixties Chevrolet Impalas are popular as collectors' items, show cars, and parade pieces, often running for more than modern cars! If a full-scale original isn't in the cards, build a beautiful model to compensate. And if you can get the full-scale car, get a model to try out cool designs with!

Lindberg 1/1200 Tabletop Navy 2-pack #2 WWII Japanese Ships

Designed to devastate

Two of the biggest and best warships ever constructed, the aircraft carrier Zuikaku and battleship Yamato were designed to give Imperial Japan a qualitative edge over the numerically superior United States Navy. From Pearl Harbor to Okinawa, the ship's records, taken together, are a timeline of the Pacific War's most critical battles. In the end, neither the fierce Zuikaku nor the formidable Yamato were able to turn the tide, but that shouldn't stop you from reliving the greatest naval battles in history with this incredible 2-pack set!

Moebius® Elvira Mistress of the Dark

Death's darling dame

By far the most beautiful of all ghouls, Elvira is the iconic hot horror hostess of your sweetest nightmares. Though she has been in books, comics, movies, games, and more, it is her breakthrough role as the voluptuous, presumptuous, and incredibly sumptuous television hostess that is represented in this first ever Elvira plastic model. Can you get the sparkle of her eyes just right and perfect the tone of those tempting tresses? **Kit features** the famous screening couch, candelabra, 'pets', and, of course, Elvira herself.

918 MOES0918

Moebius® 1/32 Scale Battlestar Galactica SD Viper MKII

Yolk the strength of the Colonial Fleet

After the Cylons cracked the Colonial Fleet's codes and smashed their ships, humanity was left scrambling to a few dozen old crates in which they fled the fiercely flying foe. Only one Battlestar remained, an aging bird named the Galactica that went from being on permanent roost to being the cock of the walk. Fortunately, this ship had dozens of Colonial Vipers aboard and, between them, the Galactica and Vipers were able to consistently shoo away the Cylons that constantly pecked at the fleet. **Kit features** an "egg plane" Viper MKII with stand.

944 MOES0944

Moebius® 1/72 Battlestar Galactica® Cylon Raider (2Kits)

Twice the mechanical menace

Featured in the 2003-2009 reboot of "Battlestar Galactica," the Cylon Raider isn't just an enemy attack fighter. It's a living creature that's capable of regeneration if it crashes or gets destroyed in combat. Cylon Raiders are also equipped with "Faster-Than-Light" (FTL) propulsion drives for instant intergalactic travel. Raiders can protect themselves from enemy attacks with kinetic energy weapons and nuclear missiles. Cylon Raiders are more effective in swarms, that's why this kit contains two! **Kit features** two 1/72 scale Cylon Raider kits and stands.

Minicraft 1/48 Beechcraft T-34A/B & C Mentor

Perfecting pilots since the forties

After the end of the Second World War, America needed a trainer aircraft with more performance than the existing ones to keep up with the rapid pace of aircraft development. They got the Beechcraft T-34. It was a very popular design, used by most aviation arms within the US Armed Forces, and many forces abroad. Even though the type was phased out in 1959 in favor of the T-6 Texan, you can still see flying examples of the T-34 today. **Kit features** all new tooling, detailed cockpit with sliding canopy, position-able landing gear and full decals.

11671

MMIS1671

Minicraft 1/48 P-38J USAF

Twin-boom triumphs

Developed just in time for WWII, the USAF P-38 Lightning was the first American fighter to down an enemy aircraft, the aircraft flown by America's highest scoring ace, and also one of the few fighter aircraft to possess the capacity for long range escort operations early in the war. Its lethal combination of speed, performance, range, and extreme firepower made it a dire threat to Axis aircraft throughout the war. **Kit features** new decals for two Pacific Theatre aircraft.

11683

MMIS1683

Minicraft 1/144 KC-135A USAF SAC

Anywhere, anytime

A close relative of the Boeing 707, the KC-135A has been in service with the USAF for fifty years. It was initially designed to keep strategic (nuclear) bombers in the air longer via aerial refueling, but it has since shifted its role to refueling of strike fighters, long range transports, and other aircraft. Hundreds of thousands of gallons of aviation fuel are carried onboard, allowing whole squadrons of aircraft to be refueled and routed to targets. **Kit features** refueling boom, operator's position, pose-able landing gear, and decals for two Strategic Air Command aircraft.

14707

MMIS4707

MPC® 1/25 MACK® DM600

Heavy duty hauling

Designed, like all MACK trucks, to get the job done, the DM600 is built on a tradition of excellence that dates back to 1900. It boasts a powerful engine, robust drive train, and the hauling capacity it needs to shift whatever load owners can think to load on. Get yours and hit the road to building something awesome today.

MPCS0819

Plastic Models

Pegasus Hobbies 1/32 T-800 Endoskeletons

It is back.

Even after the world is purged with nuclear fire, hellish automatons of metal and wire stalk across the blasted, blighted landscape, destroying the last of humanity with cold, calculated, ruthless efficiency. The last human resistance knows these monstrosities as the T-800, the endoskeleton-only version of the Terminator infiltration units. They are the foot soldiers of Skynet, the genocidal global computer network which seeks to eradicate us. They are tough, and this won't be easy, but with enough tenacity and firepower, they can be destroyed.
