From the Experts:

Modelers of all skill levels will enjoy racing and bashing with these compact, brushless buggies and trucks! All are fully assembled and complete – even “AA” batteries are included for the transmitter.

Long story short...

*These super-fast, super-affordable
brushless vehicles are a super value!*

- Easy to drive for beginners
- Loads of fun for advanced drivers too
- Fully adjustable independent suspension
- Separate ESC, receiver and servo
- Big Bore oil shocks
- Shock towers with multiple mounting points
- High-traction tires with foam inserts

- Gear differentials
- 6V, 1300mAh NiMH rechargeable battery for extra-long run times
- AC wall charger & charge monitor
- Factory painted body with factory-applied decals
- Tough enough to bash outdoors, small enough to enjoy in a basement or on a garage floor
- Five different models to choose from

DT4.18 BL

Desert Truck w/LEDs
Shine bright with LEDs and desert truck looks!

Length: 11.9 in (302 mm)
Width: 6.9 in (176 mm)
Height: 5.1 in (129 mm)
Weight w/battery: 1.56 lb (709 g)
Requires: nothing!
DIDC0056

The Desert Buggy and Desert Truck come with high-intensity LEDs already installed, for racing and off-roading action day or night!

DB4.18 BL

Desert Buggy w/LEDs
Dominate the desert with speed, style and LEDs!

Length: 11.57 in (294 mm)
Width: 7.09 in (180 mm)
Height: 3.86 in (98 mm)
Weight w/battery: 1.52 lb (690 g)
Requires: nothing!
DIDC0055

SC4.18 BL

Short Course Truck
All-out off-roading fun!

Length: 11.4 in (290 mm)

BUILDER'S KIT
**WRAITH™ SPAWN
ROCK RACER**
1/10th SCALE • ELECTRIC • 4WD • #AX90056

NEWPRODUCT

- New Spawn body on full tube frame composite chassis with driver
- Officially licensed 2.2 Method IFD™ Beadlock Wheels
- 2.2 Maxxis Trepador Tires (S30 compound)
- WB8 HD Wild Boar driveline system, as simple as it is durable
- AR60 OCP-Axles (off-center pumpkin design)
- New waterproof receiver box

- Dual slipper clutch
- Aluminum machined lower links
- Icon Vehicle Dynamics aluminum shocks
- 4-link suspension - optimized to reduce axle steer & torque twist

AXIC9056 - Wraith™ Spawn
Length: 19.25" (490mm)
Width: 11.2" (285mm)
Height: 9.1" (232mm)
Wheelbase: 14" (355mm)
Ground Clearance: 2.8" (72mm)
Weight: 5.45lbs (2.47kg)

For additional items see a complete list at www.GPDealer.com

From the Experts:

The Axial Wraith™ Spawn is packed with performance features. This full bodied version Wraith retains many of the components that made this vehicle famous. The virtually bulletproof OCP60 axles are ready to take the Spawn through its paces whether blasting through the wide open desert or hammering its way through the toughest rock trails. The 2.2 Maxxis Trepador tires are a proven true grip standard, wrapped around industry proven Method Race wheels. Whether you are rock racing or backyard bashing, the Wraith™ Spawn is ready for action.

Long story short...

The latest version of the Wraith™ is sure to turn heads. The Spawn body shell and interior offer a completely different look for the vehicle while maintaining its traditional unreal off road abilities.

CRAZY FAST — CRAZY FUN!

E-FIRESTORM FLUX

Ready-To-Run 1/10 Scale 2WD Electric Stadium Truck

Experience even MORE power, performance and fun! Includes a 77-tooth spur gear and 35-tooth pinion for insane top speeds, plus a 3S battery strap to hold extra power and a wheelie bar to keep the truck under control!

High-performance suspension geometry and components from the Firestorm 10T.

Waterproof electronics let you drive in rain, snow and mud.

Dual plate slipper clutch protects the drivetrain during hard landings.

Lightweight and durable composite nylon main chassis.

Ground Assault taper pin rear tires and Front Line ribbed front tires deliver high traction and long life on nearly any surface.

Strong alloy steel dogbones for simplicity and durability.

PRO 5: A TOURING CAR FOR TRUE COMPETITORS

The best of everything in one unbeatable kit!

PRO 5

COMPETITION 1/10 SCALE 4WD TOURING CAR

**HBSC4500 does not come with body or tires*

HBSC4500 PRO 5 1/10 Scale 4WD Electric Competition Touring Car Kit
Length: 13.9 in (353 mm)
Width: 7.5 in (190 mm)
Wheelbase (adj.): 10-10.2 in (254-260 mm)
Requires: motor, ESC, radio, receiver, servo, body, pinion gear, paint, tires, wheels, CA glue

- Packed with premium parts: 2.25mm woven carbon fiber chassis, threaded aluminum Big Bore shocks, carbon fiber shock towers, 7075 aluminum bulkheads, bellcrank steering with dual alloy arms and more
- Fully adjustable: dial in settings to tackle any track
- All-new design for the motor and layshaft mount improves weight distribution and efficiency
- Woven carbon fiber floating servo and battery mounts for optimal chassis flex
- Orange-anodized aluminum color accents and metric hardware throughout

Long story short...

Over a year in development with the world-famous HB racing team, the PRO 5 is the ultimate touring car kit!

RACE LIKE A CHAMPION WITH THE D815!

Topped off with Ty Tessmann's Worlds-winning tweaks!

HBSC4615 D815 Tessmann Worlds Edition 1/8 Scale 4WD Nitro Buggy Kit

Length (adjustable): 18.9 in (480 mm)

Width (adjustable): 12.2 in (310 mm)

Wheelbase (adjustable): 12.9 in (327 mm)

Requires: engine, tuned pipe, fuel, radio, receiver, 2 servos, Rx battery, paint, tires, wheels, CA glue

- Extra-tough components range from a 3mm 7075 aluminum chassis with a steel rear skid plate to 16mm Big Bore threaded coil-over shocks to 43/13 spiral-cut diff gears
- Ultra-lightweight chassis braces, diff gears, shock towers, outdrives and a Pro-Line® rear wing add to the buggy's racing pedigree
- Monocoque suspension arms, stand-up servo mounting, woven carbon fiber steering arms and more keep you going in tough conditions
- Tuning options include steering blocks, rear hub carrier arms, sway bars and shock springs
- Orange anodized aluminum components add signature HB styling

"We've put a lot of work into developing the D815 so it has more grip in the rear end and it feels better at high speeds, so it does exactly what you want it to do."

– Ty Tessmann

Long story short...

The D815 is the most impressive HB buggy yet, combining the brand's trademark toughness with the winning features racers demand!

NEW PRODUCT

SAFEGUARD YOUR RADIO GEAR WITH STYLE!

Two choices. Premium protection.

FUTP1014
Metal Carrying Case 4PX

FUTP1021
Metal Double
Transmitter Case

- **Metal Carrying Case** is foam-lined with cutouts to exactly fit the contours of the 4PX transmitter; extra cutouts hold receiver, servos and other items
- Case features a handsome black brushed aluminum finish with black trim, rounded corners, carrying handle and lockable lid with two keys
- Plastic feet on the bottom and back allow the case to be placed upright or laid down without scratching
- Measures 14.6" L x 9.8" W x 8.3" H (370 x 250 x 210 mm)

- The **Double Transmitter Case** is a stand-up design with foam padding on the sides, top and bottom
- A center divider lets you carry up to two transmitters, with additional storage for chargers, batteries, tools and other accessories
- Measures 17.6" L x 7.9" W x 9.6" H (448 x 200 x 245 mm)

Futaba®

Long story short...

These Metal Cases provide the security and durability Futaba fans expect for their transmitters!

SLICE THROUGH THE SURF WITH THIS BIGGER BARBWIRE!

Barbwire XL Brushless RTR

- Self-righting, ballast-driven hull keeps this deep vee afloat, even if it flips
- Water-cooled brushless power system delivers blistering speed on command
- 2.4GHz radio system provides excellent, interference-free control
- Package also include an 11.1V (3S) 2200mAh 40C LiPo battery and 2-3S balancing charger

ATKB8008 Barbwire XL Brushless RTR
Racing Boat
Length: 24 in (620 mm)
Width/Diameter: 6 in (152 mm)

Long story short...

When it comes to performance, convenience and value, nothing beats the Barbwire XL!

MAKE A SPLASH WITH THE FUSION MICRO CATAMARAN RTR

A perfect blend of convenience and control!

- Innovative twin hull design with dual keel fins and rudders make the Fusion easy to enjoy
- Assembled masts and sails with detailed graphics allow you to be on the water within minutes
- Sails are made of ripstop nylon for extreme durability
- 2.4GHz radio system puts interference-free control at your fingertips
- Display stand included

STXB8009 Fusion Micro Catamaran RTR
Length: 15.7 in (400 mm)
Height: 28 in (710 mm)
Width: 10 in (255 mm)

Long story short...

Ready-to-run and impressively equipped, the Fusion is one cool catamaran!

DOMINATE THE SHORT COURSE CIRCUIT WITH THE SCT410.3 4X4 KIT!

Performance. Durability. Value.

**TKRC5507 SCT410.3 1/10 Scale
4x4 Electric Short Course Kit**
Length: 20.9 in (530 mm)
Width: 11.7 in (296 mm)
Wheelbase: 12.7-13.2 in (323-335 mm)
Weight (approx.): 6.6 lb (2994 g)
Requires: Motor, ESC, 2-channel radio system, high-torque steering servo, body, tires, wheels, pinion gear, 2S LiPo battery & charger

- Upgrades include an updated suspension geometry, tougher suspension arms and 4mm aluminum shock towers
- 4mm CNC anodized aluminum chassis features a short overhang for improved handling and jumping; fine-tune flex with the adjustable brace system
- Hard-anodized 16mm Big Bore shocks
- Ball bearing-supported steering with narrow pivot posts, plus adjustable bump-steer and Ackermann
- Adjustable long-travel suspension, low-CG motor mount, bevel gear diffs and more

Long story short...

Hardcore short course competitors will appreciate the SCT410.3 4x4's long list of upgrades and infinite adjustability.

TAKE THE LEAD WITH LIGHTWEIGHT SPEED!

EB48SL 1/8 Scale Superlight 4WD Electric Buggy Kit

**TKRC5005 EB48SL 1/8 Scale
Superlight 4WD Electric Buggy Kit**
Length: 20.5 in (522 mm)
Width: 12 in (306 mm)
Weight: 6.5 lb (2950 g)*
Wheelbase: 12.7-13.2 in (323-335 mm)
Requires: 2-3 channel radio, brushless motor, pinion gear, 1/8 scale buggy tires and wheels, 2S LiPo battery and compatible charger

*Approximate weight; can be decreased dependent upon required components used.

- "Purpose built" to be super-fast, with lightened diffs, driveline and aluminum parts
- Utilizes the SCT410.3 platform and suspension geometry, and shares 95% parts compatibility
- Super-narrow chassis design
- 16mm CNC machined aluminum shock bodies
- V2 hinge pin brace system for incredible adjustability

Long story short...

The EB48SL buggy is easy for anybody to get up to amazing speeds!

YETI™ 1/10th SCALE ELECTRIC
4WD #AX90026

BFGoodrich Tires and KRAWLER™ T/A® Trademarks are used under License from Michelin

- Hi-Lo transmission with all metal internal gears
- Independent front suspension and rear AR60 OCP-Axle™
- 3150KV 4-pole brushless motor provides massive amount of power
- 2.2 BFGoodrich Krawler™ tires (R35 compound)
- Officially licensed 2.2 Walker Evans Racing IFD™ Wheels
- Waterproof Vanguard ESC - 3S LiPo

- Waterproof receiver box integrated into bottom of chassis
- WB8 HD Wild Boar rear driveshaft with updated larger diameter design
- Adjustable aluminum shock bodies

AXID9026 - Yeti™
Length: 19.5" (495mm)
Width: 12.3" (312mm)
Height: 7.7" (195mm)
Wheelbase: 14.2" (360mm)
Ground Clearance: 2" (50mm)
Weight: 6.51lbs (2.9kg)

For additional items see a complete list at www.GPDealer.com

From the Experts:

The Yeti™ is a skillfully engineered rock racing vehicle with a solid rear axle and independent front suspension. Its distinct aesthetic and technical elements were inspired by full-size desert trucks. Its strategically engineered design supplies bashing stamina while delivering a high level of technical rock racing abilities without compromise in either category. It's powered by a 3150KV 4-pole brushless motor which provides the perfect amount of torque and speed. The long can design provides a massive amount of power, especially when powered by 3S. Precision machined aluminum shocks are standard equipment and deliver smooth suspension movement for consistent handling.

Long story short...

It's as serious as you want it to be, with true fun factor characteristics that make it a blast to drive. The Yeti™, dirt's new friend.

UNLEASH THE SPEED AND POWER OF THE GRANITE BLX!

Ready-To-Run 1/10 Scale 2WD Brushless Electric Monster Truck

GRANITE BLX

- One of the lowest centers of gravity in the Monster Truck class, for unrivalled handling on a wide range of surfaces
- The factory fitted BLX waterproof ESC can handle high-capacity 3S LiPo power with ease
- All-metal differential and waterproof radio box help keep you in the action, and off of the work bench
- Scale ride height gives the GRANITE BLX almost 2" of ground clearance; a short wheelbase maximizes steering capability
- Experience awesome traction on all surfaces with dBoots off-road tires
- The quick-access slipper clutch makes fine tuning a breeze
- Confident control is courtesy of an ATX100 2.4GHz transmitter with ARX100 receiver

60+*
MPH

*with 3S LiPo battery and higher gearing.

ARMA
DESIGNED FAST DESIGNED TOUGH

ARAD52** GRANITE BLX 1/10 Scale
2WD Electric Monster Truck RTR
Length: 16.5 in (420 mm)
Width: 13.5 in (342 mm)
Height: 7.87 in (200 mm)
Weight: 74 oz (2.1 kg)
Wheelbase: 11.3 in (287 mm)
Ground Clearance: 1.97 in (50 mm)

From the Experts:
With its high-quality aluminum and composite components, the GRANITE BLX is the unbeatable combination of performance and fun! The sturdy suspension arms, all-metal diff and waterproof electronics are just some of the features that add durability — while the BLX brushless power system and lower center of gravity deliver speed and handling that other Ready-To-Run monster trucks just can't match!

Long story short...
Whether it's blasting across the parking lot or thrashing through mud and dirt, the GRANITE BLX is a force to be reckoned with!

SET YOUR SIGHTS ON SHORT COURSE SUCCESS!

SENTON 6S/BLX

Short course racing is one of the most exciting forms of R/C competition — with high-performance trucks battling it out in close quarters in the turns and dueling fender-to-fender down the straightaways — and ARRMA has the short course truck that can take it as well as dish it out!

The SENTON 6S BLX is a brushless beast that's bent on conquering the competition. It stands up to the most extreme racing action, and can reach speeds of 60+ mph when equipped with a 6S LiPo battery. With its ARRMA pedigree, the SENTON 6S is designed to be one tough truck!

'ARRMA'
DESIGNED **FAST** DESIGNED **TOUGH**

- A long list of quality features!**
- 6S LiPo-ready* for blistering speeds
 - Fully waterproof electronics to take on any terrain in any conditions
 - Tunable suspension
 - Metal-gear servo with 208 oz/in of torque with an incredible speed of .12/60°
 - Three geared differentials that are lightweight and easily accessible
 - A battery that can be positioned for perfect balance
 - Heavy-duty drivetrain with fully sealed gearboxes and front CVDs
 - Super-tough 5mm aluminum shock towers with multiple mounting holes
 - Reinforced suspension hangers with inboard hinge pins that are less likely to pop out
 - Newly designed roll cage and tower
 - Side-impact bumpers
 - Easy access to the 2050kV motor, 180A ESC and ADS-1517 servo, with clips that eliminate tangled wires

*LiPo battery and charger not included.

The SENTON 6S's race-tested geometry includes oil-filled big bore aluminum shocks, pivot balls, durable arms and links and adjustable camber and toe-in.

**60+
MPH**

*Maximum speed achievable with recommended gears and 6S LiPo battery.

From the Experts:

Competitive racing doesn't get more realistic than the SENTON 6S! With well-engineered components underneath a stylish body, this 4WD captures the thrills of short course racing like no other R/C truck, and it's ready for action virtually right out of the box. Drop in a 6S LiPo battery, and you'll definitely satisfy your need for speed!

Long story short...

Get behind the wheel of the SENTON 6S BLX, and get ready for all-out speed, handling and excitement!

*Terms Apply - Download Welcome Pack for Details

Weight: 27 oz (3.6 kg)
Requires: 4-6 Cell LiPo, charger and AA batteries

A SMART CHOICE FOR ANY PILOT

sensei FS

Electric Trainer w/WISE Flight Stabilization System

Equipped with the innovative WISE 3-axis stabilization system!

With the WISE stabilization system mastering R/C flight has never been easier — and it works with any radio! Just increase or decrease the throttle for confident control during takeoffs and landings. In the air, three flight modes allow you to learn flying skills at your own pace.

- **Beginner** — the Sensei FS maintains a gentle bank and climb/descent envelope, with the pilot able to return the plane to straight and level flight by simply releasing the sticks
- **Intermediate** — pilots will be able to fly with increased freedom, while still having the stick release function to fall back on
- **Advanced** — once pilots are comfortable with the basics, they can fly on their own without limits, but still with the benefits of gyro stabilization
- **Bailout Switch** — extra insurance that immediately returns the Sensei FS to straight and level flight from any orientation, in any of the 3 modes

Includes the versatile Star™ Plug!

Operate the "drop-door" from the 5th channel of your radio for in-flight deployment of a parachute or other creative payloads!

The wing halves slide together onto a tube and are secured with two bolts.

The tail section aligns itself automatically and is secured with just one screw.

- The WISE Flight Stabilization System helps your Sensei FS maintain a safe flying attitude, so you can focus on flying without worrying about crashing
- You get everything you need with the RTF, including a quality Tactic TTX610 6-channel radio system and SLT receiver, LiPo flight battery and charger
- Fly the Rx-R version with your transmitter and receiver
- Flight-ready with minor screw-together assembly (no gluing); all onboard gear is already in place
- A hatch in the top of the plane provides easy access to the battery

FLZA3030 Sensei FS Electric Trainer w/WISE RTF
 FLZA3034 Sensei FS Electric Trainer w/WISE Rx-R
Wingspan: 58 in (1475 mm)
Weight: 3.2 lbs (1450 g)
Length: 48 in (1220 mm)
Rx-R requires: radio and receiver with 4-5 channels; 2100-2200mAh 11.1V LiPo battery; compatible charger
RTF requires: nothing!

Your success is guaranteed!

The Sensei FS RTF is such a great way to learn to fly that it comes with a guarantee! Simply train at an AMA-chartered club with a qualified, club-designated instructor. If you crash before successfully learning to fly, we'll repair or replace your Sensei FS RTF...FREE! See your instruction manual for details.

From the Experts:

The Sensei FS electric trainer takes learning to fly to new levels of ease and excitement. The innovative WISE 3-axis stabilization system is just like having a flight instructor standing right next to you, ready to instantly take over if you lose control. A powerful brushless motor delivers the performance necessary for sport aerobatics as your skills improve, and the "drop-door" feature lets you deliver a "payload" of your choosing!

Long story short...

Learning to fly has never been so easy or so much fun, thanks to the Sensei FS!

SEE FLIGHT FROM A NEW POINT OF VIEW!

DROMIDA

OMINUS FPV

Ready-To-Fly Quadcopter
w/First Person View

FPV
First-Person
View

Control your camera with your smartphone!

With the Ominus FPV, you don't need to buy a separate viewscreen or expensive headset. Simply download the FPVCam app, put your smartphone into the holder, and you have a sharply focused, first-person view of your flight. The Ominus includes a micro memory card and card reader, but you can also download photos and videos directly to your smartphone for sharing with friends or posting to your favorite social media sites.

The Ominus FPV comes with all this:

- ▶ Assembled airframe with finished body and color-coded LEDs
- ▶ Wi-Fi-enabled, HD digital FPV camera
- ▶ Micro memory card and card reader
- ▶ Smartphone holder with sun shade
- ▶ Interference-free Q200 2.4GHz radio system
- ▶ Rechargeable 1S LiPo battery & USB charger
- ▶ (4) "AA" batteries
- ▶ Extra set of blades
- ▶ Double-sided camera mounting tape

▶ Q200 radio with four flight modes for tailoring performance to your skill level, plus an auto-flip button, a single button for video and still photography, auto-linking and digital trims

▶ Wi-Fi-enabled high-definition digital camera with 1280 x 720 resolution and a 328 feet (100-meter*) range

▶ Taps your smartphone's capabilities to: provide a first-person view of your flight; turn camera on and off; adjust brightness; replay or delete videos; edit or delete photos - even manage data storage

▶ 700mAh 35C LiPo battery provides 10-12 minutes of flight time - and recharges from any handy USB port

*Maximum range. Assumes unobstructed view and "clean" radio environment.

Diagonal Length: 9.4 in (238 mm)
Weight: 4.2 oz (120 g)
Requires: smartphone or other device for
Android or Apple & FPVCam app

From the Experts:

With the Ominus FPV, you not only see your flight through a Wi-Fi-enabled digital camera - you can **operate it** using your smartphone or other mobile device*. All you need is your smartphone and the FPVCam app - an app you can download free of charge from Google Play™ or the Apple App Store™; everything else is included. It's easy to fly indoors or out, and amazingly aerobatic even when the camera is attached.

*Smartphone or other mobile device required for FPV flight; not included. Compatible with smartphones and other mobile devices for Apple or Android. Requires FPVCam app, available as a free download from the App Store and Google Play. Apple and the Apple logo are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc. Android™ and Google Play are trademarks of Google Inc. Wi-Fi® and Wi-Fi Alliance are registered trademarks of the Wi-Fi Alliance.

Long story short...

Get your Ominus FPV today...and see how exciting flying can be from a first-person point of view!

SO MUCH FUN AND TECHNOLOGY IN SUCH A LITTLE QUADCOPTER!

protoX^{SLT}™

ESTE49 Proto-X SLT Nano Quadcopter RTF**
Dimensions: 1.8 x 1.8 in (45 x 45 mm)
Weight: 0.4 oz (11.5 g)
Requires: 4 "AAA" batteries

- Flies in any open indoor area
- The triple-axis, three-accelerometer gyro features an Auto-Upright system for self-correcting flight that keeps the Proto-X SLT stable in any flight condition
- The 2.4GHz controller links only to your aircraft, so multiple aircraft can fly together
- Link your Proto-X SLT to its 2.4GHz radio using the WaveLink™ feature. Just wave the heli to link!
- Comes with a USB charger and four spare rotor blades; just add four "AAA" batteries
- The included 3.7V 100mAh LiPo battery features charge and discharge protection
- Lights add to the fun when flying in the dark
- The colorful body is designed for easy LiPo battery installation and replacement
- With SLT protocol built-in, pilots can fly this cool quadcopter with popular radio systems like the Tactic® TTX650 (TACJ2650)

From the Experts:

Toss the Proto-X SLT Nano Quad in the air, and Auto-Upright Technology keeps it level — even beginners can fly it with complete success! Secure Link Technology provides pilots with a robust connection for ultra-precise control — plus compatibility with select radios featuring the SLT protocol. And its cool looks are enhanced by 6 LEDs!

Long story short...

Do flips, rolls and more mild-to-wild maneuvers with the nano-sized Proto-X SLT quadcopter!

THE FLIGHT SIM THAT GETS IT RIGHT!

RF7.5

REALFLIGHT

No other R/C simulator captures R/C flying as completely and accurately as RF7.5! Among RF7.5's innovations: a wireless transmitter interface; RealPhysics™ for multi-rotor aircraft; several new multi-rotor designs to fly, and much more. RF7.5 makes learning and honing R/C flying skills easy and fun, and because it's so true to life, you'll fly confidently and instinctively at the field!

CHOOSE THE RF7.5 EDITION THAT FITS THE WAY YOU WANT TO FLY:

New for RF7.5:

Multi-Rotor Physics

Multi-rotor aircraft is the hottest category in R/C, and RF7.5 has a dozen different models for you to choose from!

Scavenger Hunt Challenge

Test your piloting skills using multi-rotor aircraft. Score points and complete stages to unlock more difficult levels!

Wireless SLT Transmitter Interface

Use the same SLT transmitter you take to the field! It's wireless, so you're not tethered to your PC!

"Ghost Run" Feature

Reach personal bests competing against "ghosted" images of previous flights — available on all Challenges!

RF7.5 still offers all this, and so much more:

- A total of over 140 aircraft, encompassing all types of airplanes and helis
- Over 40 flying sites to explore, in both PhotoField™ and 3D
- Game-like Challenges
- RealPhysics™ 3D
- TrueView™ realistic lighting
- Reset/Rewind on the InterLink Elite controller
- Multiplayer and MultiMode
- Onscreen camera controls
- Water takeoffs and landings
- Night flying
- Welcome Screen
- Real Rendering™
- AccuModel aircraft editor
- FlexiField™ flying site editor
- Wind Dynamics
- Blade stop autorotations
- Unlimited combat with any weaponry

FREE!

Software Upgrade is available FOR PURCHASE for those that have G4 through RF6.5. A download is available for free only to those that already have RF7.

- GPMZ4520 RF7.5 w/InterLink Elite Controller Mode 2
- GPMZ4524 RF7.5 w/Wireless SLT Interface
- GPMZ4525 RF7.5 w/Transmitter Interface
- GPMZ4526 RF7.5 w/TTX610 Transmitter & Wireless SLT Interface
- GPMZ4528 RF7.5 Software Upgrade from RealFlight G4 and Above

To see everything RF7.5 has to offer, visit realflight.com!

From the Experts:

Every year RealFlight is far and away R/C's best-selling flight simulator — and RF7.5 raises the bar even higher! A wireless SLT interface, Tactic TTX610 radio and more user-friendly Aircraft Editor are just some of the technical enhancements you'll find. If you like multi-rotor aircraft, RF7.5 has them — and they fly just as realistically as the actual models, thanks to meticulous refinements to the physics technology. And RF7.5 still has all of the extraordinary features that have made it the #1 seller for over 15 years!

Long story short...

The newest upgrades, the best features, the surest way to succeed in R/C flight — all of this and more make RF7.5 the top choice for flight simulation!

True to Life™

R/C Flight Sim

BLAST ACROSS THE BAYOU!

CAJUN commander

Ready-to-Run Brushless Airboat

- 1800kV outrunner brushless motor
- Waterproof, air-cooled 50A ESC w/Star™ Plug
- Tactic 3-channel 2.4GHz SLT radio included
- The battery tray is sized to accommodate a 3S LiPo pack

The extra-tough metal propeller cage comes factory-painted for ultimate convenience.

A 12-piece LED spotlight system arrives factory-installed, and requires only two "AA" batteries.

Made of durable ABS plastic, the high-performance flat bottom hull provides the stability boaters need to pull off exciting maneuvers on water, snow or dry grass. The unique camo trim scheme is printed directly onto the plastic for lasting looks. Prolonged operation on abrasive surfaces will damage the hull.

The Cajun Commander is packed with realistic scale details, including a replica V-8 engine complete with headers, an air cleaner and exhaust system.

AQUB5722 Cajun Commander
Brushless Airboat RTR
Length: 27.5 in (699 mm)
Beam: 14.5 in (368 mm)
Height: 12.5 in (318 mm)
Weight: 4.6 lb (2.1 kg)
Requires: 11.1V 2200-5000mAh LiPo battery, charger, 6 "AA" batteries

AQUACRAFT
Models

Add even more scale detail with these 3D printable files:

- Duck call
- Foot rest
- Gun rack

Visit aquacraftmodels.com for 3D printable files and updates.

From the Experts:

The Cajun Commander arrives decked out with dynamic detail and scale realism! Made of durable ABS plastic, the high-performance flat bottom hull provides incredible stability for exciting maneuvers on water, snow or dry grass. Just add batteries and a charger, and you're ready to go!

Long story short...

Power across water and land with style, at the controls of the Cajun Commander airboat!

LIGHTER IN WEIGHT, FOR FASTER FINISHES!

2WD Mid Motor Electric Competition Buggy Kit

This Factory Lite version optimizes the platform of the hugely popular RC10B5M to excel in classes requiring spec motors. It's also ideal for track conditions where the racer can take full advantage of the performance edge realized by the kit's reduced weight.

Aluminum rear ball stud mount for added strength

Aluminum rear clamping drive hexes with laser etching

V2 12mm Big Bore threaded aluminum shocks with 3mm shafts and updated O-rings

Lightweight aluminum front axle/hex adapter and larger front wheel bearing

FactoryTeam upgraded ball bearing kit and titanium turnbuckles

New 3-gear transmission for lower rotating mass and extra acceleration, with a lightweight V2 aluminum top shaft included

Lightweight, hard-anodized aluminum chassis with centralized mass and mid-motor position to improve handling on high-grip off-road tracks

Heavy-duty ball cups and ball studs allow for maximum suspension travel while reducing binding and friction

- Lightweight, hard-anodized aluminum chassis with centralized mass and mid-motor position to improve handling on high-grip off-road tracks
- Chassis fits ROAR-approved 2S saddle and short packs using optional foam insert
- V2 12 mm Big Bore threaded aluminum shocks with 3 mm shafts and updated O-rings
- New 3-gear transmission for lower rotating mass and extra acceleration, with a lightweight V2 aluminum top shaft included
- Heavy-duty rear axle for added strength
- Lightweight aluminum front axle/hex adapter and larger front wheel bearing
- Factory Team upgraded ball bearing kit and titanium turnbuckles
- Aluminum rear clamping hex
- Heavy-duty ball cups and ball studs allow for maximum suspension travel while reducing binding and friction
- Rear hubs feature larger bearings and easy-to-adjust camber link position and rear toe-in
- Team Associated B5M clear body and wing included

ASCD9000

Width: *
Weight: *
Wheelbase: 11.0-11.1 in (280-282 mm)
*Final width and weight will vary with the actual electronics and tires used.

DRIVE THE BEST, LEARN FROM A CHAMPION

Travis Amezcua is here for you!

For years he's been an R/C racing legend — and as Team Durango's North American Technical Representative, Travis Amezcua wants to help you get the most out of your R/C experience. He is a long-standing Team Durango member, with much success racing a wide variety of Team Durango vehicles at the highest levels of competition. Working from his southern California base, Travis will be traveling around the U.S., bringing top-notch trackside support to local club racers, Team Durango fans and R/C car dealers.

Questions? Opinions? Suggestions? Bring them on!

In addition to passing on what he's learned, Travis is looking forward to answering your questions, hearing what you have to say about Team Durango vehicles and gaining insight into what is happening at local tracks. He will be working closely with Field Communications Manager Brad Brucker to gather and relay feedback to Team Durango engineers. Travis will also be scouting for new racing talent in all classes, building a base of local drivers who will contribute to the design and development of future Team Durango products.

"I'm excited to have this opportunity to share my experiences with other aspiring drivers. After 22 years of racing R/C cars and learning from our industry leaders, now it's my turn to teach the next generation of racers."

— **Travis Amezcua**
Team Durango North American
Technical Representative

Travis will be sharing his passion for — and expertise with — Team Durango's exciting new lineup at races and venues all across the country in the coming months. Look for him at your local track, or email him at tamezcua@team-durango.com, for tips on driving, setups, maintenance and hop-up options for your Team Durango ride. Visit team-durango.com to see videos featuring Travis' race-winning exploits. And stay tuned for more news on how your local racing scene will benefit greatly from Team Durango Trackside Representatives!

TRAVIS RAVES ABOUT THE NEW TEAM DURANGO LINEUP...AND SO WILL YOU!

Travis is pumped about taking on the competition with the DNX8 nitro buggy — which shares many innovations with Team Durango's electric kits. Look for them at your favorite R/C hobby retailer and join the winning team!

Spring to the sky!

Easy to Assemble

E2X

No paint or special tools are required. Parts are pre-colored and easy to assemble. Just glue together, apply decals and attach the recovery system.

Includes:

- Plastic fins
- Plastic nose cone
- Recovery parachute
- Self-stick decals

Requires:

- Engines
- Starters
- Recovery wadding
- Launch pad
- Launch controller

Generic E2X

Decorate to your delight

Max. Altitude: 1100 ft (335 m)

Height: 13.5 in (34.3 cm)

Diameter: .98 in (25 mm)

Weight: 1.3 oz (36.9 g)

Recommended Engine: 1/2A6-2, A8-3 (First Flight), A8-5, B4-4, B6-4, B6-6, C6-5, C6-7

Skill Level: E2X

ESTT2008

Long story short...

If you dream it, you can design it on this Easy to Assemble basic rocket!

1/25 FAST AND FURIOUS™ HONDA® CIVIC® SI COUPE

The super-sport import

Staying one step ahead of the law isn't easy but in the high octane world of Fast and Furious, cars like the nimble Honda Civic Si Coupe help keep you out in front. This limited production hi-performance coupe gets the standout crime crew around in style and at speed. Get your slice of the action with this cool kit! It **features** three different wheel design options, optional front and rear bumpers, plus chrome plated parts and soft black tires.

85-4331 RMXS4331 Total Parts: 106 Skill Level: 2 Length: 7 in (178 mm)

1/32 P-51B MUSTANG

Stalking Nazi skies

North American Aviation designed the P-51 Mustang to fill a Lend-Lease order from the British. With their supercharged Rolls-Royce engines, these aircraft achieved incredible range and speed. Through hard fights and attrition they came to dominate the skies over Europe, escorting bomber groups into the heart of Nazi-occupied territory. They fought in every theatre of WWII and continued in service with dozens of countries for decades thereafter. **Kit features** a detailed V-12 engine, seated pilot figure, multi-part canopy, and decals for two versions.

85-5535 RMXS5535 Total Parts: 64 Skill Level: 2 Length: 11.9 in (302 mm)
Wingspan: 13.6 in (345 mm)

1/32 SHERMAN M4A1 "SCREAMING MIMI"

Smash the landscape

Sherman tanks were noted for their efficiency and reliability, but not necessarily their power. To address this deficiency, many different weapons were mounted on the basic Sherman. One of the most psychologically devastating of these was the Sherman 'Calliope'. The T-34 'Calliope' mounted sixty 4.5" rockets in tubes above the tank. Though not particularly accurate, these fin-stabilized rockets, when fired en masse, created one heck of a mess downrange. **Kit features** a Sherman you can build with or without the launcher, as well as a driver and two crewmen figures.

85-7863 MONS7863 Total Parts: 133 Skill Level: 2 Length: 7.25 in (184mm)

REVELL OF GERMANY®

1/72 SET BATTLE OF WATERLOO, 1815

June 18, 1815 - June 18, 2015

Two hundred years after the last gun fell silent, the Battle of Waterloo is still one of the most famous armed conflicts in history. This final struggle decisively ended Napoleon's dream of a revived French empire aligned behind him. Despite the crushing nature of the defeat, the battle was actually extraordinarily close, with several moments where the outcome could have been changed dramatically. This **kit features** 107 figures with which you can reconstruct a portion of the legendary Battle of Waterloo, just in time for the 200th anniversary!

02450 RVLS2450 Total Parts: 126 parts, 107 figures

1/35 WWI GERMAN, FRENCH, BRITISH INFANTRY SET

The single greatest waste of modern times

Millions of young men fought in mud-filled, blasted trenches from Belgium, to Russia, to Gallipoli from 1914 to 1918. The first, rapid advance of the German Army was halted outside Paris and British, French, German, and Austrian troops settled in for a war of attrition. Millions, soldiers and civilians, perished in what historians describe as the greatest catastrophe of the 20th century. Now, reconstruct 1914 with these British, French, and German infantry. They feature period equipment and uniforms, authentic poses, and finely detailed faces.

02451 RVLS2451 Total Parts: 451 parts, 12 figures

1/72 M60 A3

Armored artillery

Designed in 1960, the M60 was still taking it to the enemies of the United States in 1991. This 50+ ton beast was the US answer to Soviet tanks which were rapidly adding more armor and larger guns. The 105mm rifled gun of the M60 was a devastating tool and, when coupled with the laser rangefinder and ballistic computer of the A3 version, made for a truly lethal tank. In wars throughout the Middle East, the M60 has proven that it is capable of knocking out virtually anything. **Kit features** traversing turret and cupola, injection-molded tracks and four sets of decals.

03140 RVLS3140 Total Parts: 183 Skill Level: 4 Length: 5.2 in (131 mm)

1/32 FOCKE-WULF FW190 F-8

Higher, faster, more lethal

Designed with an improved compressor to add to the type's speed at low altitudes, the F8 version of the Focke-Wulf Fw 190 was one more attempt by the Germans to extend the service life of their most favored airframe. Despite the improvements and the technical superiority of the F8, the tide of the air war was rapidly turning against Germany by the time the F8 was introduced. As millions of tons of bombs rained across the German industrial heartland, fewer and fewer new aircraft made it to the front lines.

04869 RVLS4869 Total Parts: 230 Skill Level: 5 Length: 11.1 (282 mm)
Wingspan: 12.9 (327 mm)

1/48 AC-47D GUNSHIP

Shredding and soaring

Close air support is tricky—maintaining speed, accuracy, and target saturation is difficult in a dangerous combat environment. One of the most effective close air support aircraft in history was the AC-47D Gunship. The ruggedly constructed, WWII-era, AC-47D could absorb an inordinate amount of punishment and its low flying speed allowed it to loiter over targets. Its armament was 3 miniguns—enough firepower to pour out nearly four hundred pounds of lead in one minute. **Kit features** detailed cockpit and navigation/radio room, optional open cargo door, rotating props, detailed engines, ammo boxes, 3 miniguns, flare dispensers, and two sets of decals.

04926 RVLS4926 Total Parts: 118 Skill Level: 4 Length: 15.9 (404 mm)
Wingspan: 23.6 in (601 mm)

1/48 BELL AH-1W SUPERCOBRA

Heavy hitting heli

For taking out highly mobile armored targets, there's nothing better than a SuperCobra. Tanks and APCs are their favored prey. These lethal machines are a virtual whirlwind of destruction, equipped with a three-barreled 20mm cannon, rockets, TOW, Hellfire, and Sidewinder missiles, plus a suite of powerful electronics. Many AH-1W SuperCobras have been upgraded to the AH-1Z variant standard, but the SuperCobra, a mainstay of the USMC since 1986, is not going anywhere. **Kit features** twin rotor blades, detailed cockpit, moving rotors, weapons, sensors, and three decal sets.

04943 RVLS4943 Total Parts: 128 Skill Level: 4 Length: 11.3 in (288 mm)
Wingspan: 12 in (306 mm)

1/125 GERMAN SUBMARINE U-47 WITH INTERIOR

Gone without a trace

Revell Germany brings one of the greatest mysteries of the sea to light with their model of U-47. Amongst the most successful of Germany's WWII submarines, the U-47 sank a British battleship along with tens of thousands of tons of merchant shipping before quietly and mysteriously disappearing in 1941. No trace of the vessel was ever found and no Allied warships claimed her sinking. **Kit features** detailed, open interior, torpedoes, instrument panel, diesel engines, sleeping quarters, crew figures, detailed conning tower, 88mm deck gun, and full decals for U-47.

05060 RVLS5060 Total Parts: 124 Skill Level: 4 Length: 20.9 in (531 mm)

1/24 BMW® Z1

A dream on wheels

Created as a concept car in 1986, the BMW Z1 was greeted with rapturous enthusiasm at the 1987 Frankfurt IAA. The doors of this unusual sports car attracted great attention because they slid down into the bodywork. The Z1 had a 170 hp 6-cylinder engine that delivered a top speed of 225 kmph. Despite initial popularity, by June 1991 only 8000 in total had been built. The success of the Z1 made the car into the trailblazer for a veritable tidal wave of roadsters. **Kit features** detailed bodywork and interior, multi-part engine, and authentic decals.

07361 RVL57361 Total Parts: 104 Skill Level: 4 Length: 6.6 in (167 mm)

1/72 TIGER I/PANTHER G VS. SHERMAN/CHAFFEE COMBO

Recreate the Allies' Rhine crossing

During the final days of World War II, Allied troops crossed the Rhine in order to complete their invasion of western Germany. The Allies took control of the last remaining Rhine bridge, Remagen, on March 7, 1945. Of course, the Allies' success was made possible by the M4A3E8 Sherman and M24 Chaffee. This limited edition kit combo **features** four 1/72 tank kits: 1. Tiger I, 2. Panther G, 3. M4A3E8 Sherman and 4. M24 Chaffee, each with markings representing each tank as it appeared in Western Europe, circa March 1945.

30035 (Limited Edition) HSGS0035 (Includes 4 Kits) Total Parts: 69/66/84/73 Skill Level: 3

EGGPLANE F-15 EAGLE "JASDF 60TH ANNIVERSARY PART 2" COMBO

Soaring into the stratosphere

The F-15 Eagle stands apart from most contemporary fighters, thanks to its improved avionics support, AN/APG-63(V)1 radar and AAM-4 missile capabilities. Today, the JASDF has a fleet of 165 F-15J Eagles, complemented by an additional, smaller fleet of 48 F-15DJ two-seat trainers. In honor of the JASDF's sixtieth anniversary, select F-15Js were decorated with a special, commemorative livery. This limited edition kit combo **features** two sets of special 60th anniversary decals.

60511 (Limited Edition) HSGS0511 (2 Kits) Total Parts: 21 x 2 Skill Level: 3

1/72 POLIKARPOV I-153 FINNISH AIR FORCE COMBO

Finnish first and second!

Designed by the Soviet Union in the lead up to WWII, the Polikarpov I-153 was one of the world's last successful biplane fighters. They combined the tremendous maneuverability of all biplanes with high speeds and four machine guns. Thousands were produced and ten made their way into Finnish hands where they were used against their creators. Finnish Air Force pilots flying their Soviet-built I-153s claimed numerous Soviet aircraft during WWII. Limited edition kit combo **features** two sets of Finnish Airforce decals.

02144 (Limited Edition) HSGS2144 (2 Kits) Total Parts: 76 x 2 Skill Level: 3

1/72 MV-22B OSPREY "JMSDF"

The future of flight

The MV-22B Osprey has defied convention from day one. Although it flies like a heli, the Osprey cruises with the speed and range of a turboprop plane. Their speed, range, and carrying capacity makes them perfect for the JMSDF and the Japanese Ministry of Defense approved procurement of seventeen. It is estimated that Japan will have a total of seventeen Ospreys by 2019. This limited edition **kit features** one marking option: 1. JMSDF 51st SQ. Code: 61 (8461) Atsugi AB (imaginary marking).

02146 (Limited Edition) HSGS2146 Total Parts: 140 Skill Level: 3

1/72 SCALE F-4EJ PHANTOM II JASDF 60TH ANNIVERSARY

Six decades of superiority

For sixty years now, ever since the end of WWII, the JASDF has been responsible for defending Japanese airspace. For forty of those years, Phantoms have been on the front lines. Their armament, speed and maneuverability still make the Phantom II a dire threat to modern aircraft after forty years in service. In addition, the airframe's versatility allows it to accomplish many types of missions, making it essential for smaller air forces like the JASDF. Limited Edition Kit Features decals for JASDF 60 year anniversary special marking Code: 301 (17-8301) Gifu A.B. Nov. 2014.

02147 (Limited Edition) HSGS2147 Total Parts: 117 Skill Level: 3

1/72 LOCKHEED MARTIN® F-35A LIGHTNING II JASDF

The fighter of the future

In years to come, aerial warfare will change as more sophisticated weapons emerge. The F-35 is an airframe intended to counter improvements in detection and engagement systems. It is a multi-role fighter designed with stealth capabilities which are intended to improve its survivability in a world swarming with SAM batteries. Over one hundred have already rolled off production lines and into training units in the US and abroad. More than forty have been ordered by Japan for an 'in-service' of 2016. **Kit features** decals for JASDF ADTW Code: 301 (77-8301) Gifu A.B. (imaginary marking).

02148 HSGS2148 Total Parts: 68 Skill Level: 3

1/72 F-15J EAGLE "204SQ 50TH ANNIVERSARY"

Fifty years in flight

Improved avionics, specialized air-to-air missiles and a AN/APG-63(v)1 radar make the F-15J Eagle one of the most powerful birds in the air. The JASDF fields a fleet of over 200 F-15Js. Many of those fighters are part of the 204th Squadron which operates out of Naha Airbase in Okinawa. To honor fifty years of defending Japanese airspace, a F-15J Eagle was decked out in this special regalia. Limited edition **kit features** special 50 year anniversary decal for 83rd AG, 204th SQ Code: 920 (02-8920) Naha AB Dec., 2014.

02153 (Limited Edition) HSGS2153 Total Parts: 138 Skill Level: 3

1/72 AICHI E13A1 TYPE ZERO (JAKE) "LIGHT CRUISER YAHAGI"

The catapult- and float-equipped favorite

Nicknamed "Jake" by the Allies, the Aichi E13A floatplane made long-range recon possible for the IJN throughout World War II. The Light Cruiser Yahagi had two E13A1s and a catapult as part of its extensive arsenal. This limited edition **kit features** a catapult, plus one marking option: 1. IJN 2nd Fleet, 2nd Torpedo Sq., Light Cruiser Yahagi, Code: 220-01, 220-02, April 1945.

02154 (Limited Edition) HSGS2154 Total Parts: 93 Skill Level: 3

1/24 LANCIA STRATOS HF "1977 MONTE CARLO RALLY"

The "HF" stands for "High Fidelity"

The Lancia Stratos HF remains one of the most iconic World Rally Championship vehicles ever to hit the track. In addition to Monte Carlo Rally victories in 1975, 1976 and 1977, the Lancia Stratos HF also scored championship titles in 1974, 1975 and 1976. During the 1977 Monte Carlo Rally, Christine Dacremont earned a sixth-place finish for Team Esso Aseptogyl. This limited edition **kit features** markings for the 1977 Monte Carlo Rally, Car No. 14, 6th place driver, Christine Dacremont.

20268 (Limited Edition) HSGS2268 Total Parts: 145 Skill Level: 3

1/48 F6F-5 HELLCAT "THE REVENGE THAT WAS BURIED IN THE MOUNTAIN"

A must for manga enthusiasts

The F6F-5 Hellcat's speed, armor and impressive armament made it the U.S. Navy's favorite Pacific Theater fighter plane. Manga artist Leiji Matsumoto's passion for World War II-era aircraft provided the basis for "The Cockpit," which featured the F6F-5 in "The Revenge that Was Buried in the Mountain." This limited edition **kit features** the F6F-5 Hellcat as it appeared in manga creator Leiji Matsumoto's "The Revenge that Was Buried in the Mountain," from "The Cockpit," plus two marking options: 1. US Navy Pilot: Leichardt, Code: 8 and 2. IJN Pilot: Oyamada.

64715 (Limited Edition) HSGS4715 Total Parts: 98 Skill Level: 3

1/72 SHIDEN KAI/HIEN/ZERO TYPE 21 KIT COMBO

A true triple threat, mined from manga

If you're a manga fan, chances are you're no stranger to the works of Takeshi Nogami. "Shidenkai No Maki" — one of Nogami's craziest creations — **features** high school girls fighting against each other with famous WWII aircraft. Featured warbirds include the N1K2-J Shiden Kai, the Ki-61 Hien and the Zero Type 21. This limited edition kit combo **features** three models based on the popular Japanese manga, "Shidenkai No Maki," with markings for 1. Student Pilot Maki Hagoromo, Shiden Kai; 2. Kei Kogarashi, Hien and 3. Miyabi Amakasu, Zero Fighter Type 21.

64720 (Limited Edition) HSGS4720 (Includes 3 Kits) Total Parts: (per kit): 36/39/46 Skill Level: 3

1/48 NAKAJIMA C6N1 SAIUN (MYRT) "HIGASHI-KARORIN FG"

The IJN's "iridescent cloud"

When it came to speed and recon, only the F6F-5 Hellcat could match the Nakajima C6N1. This three-seat aircraft was nicknamed the Saiun or "Iridescent Cloud" by Japan, while the Allies referred to it as "Myrt." The C6N1 was a carrier-based aircraft, but since many carriers were destroyed by 1945, the IJN deployed them from land bases like Truk Island and Ominato. This limited edition **kit features** two marking options: 1. IJN Higashi-Karorin NFG, Code: HK-72, Truk Island, Aug. 1945 and 2. IJN Nagoya NFG, Code: Nako-02, Ominato, June 1945.

07402 (Limited Edition) HSGS7402 Total Parts: 119 Skill Level: 3

1/32 FW 190D-9 LATE VERSION "JG 2"

The last of the "Long-Nose Doras"

While it was originally designed as a high-altitude heavy bomber, the Fw 190D-9 proved to be more effective in fighter-versus-fighter and ground-attack missions. JG 2 (Jagdgeschwader 2) received its first Fw 190D-9s in late 1944. Just before the war's end, all JG 2 pilots were using Fw 190D-9s to advance against the Allies. This limited edition **kit features** new vertical tail wing parts, plus two marking options: 1. Luftwaffe III./JG 2 Black-6, Germany, May 1945 and 2. Luftwaffe 7./JG 26 Brown-4, Germany, April 1945.

08240 (Limited Edition) HSGS8241 Total Parts: 110 Skill Level: 3

1/72 SHORT STIRLING MK. 1

Big bad bomber

First amongst the four-engined heavy bombers that would rain death on Nazi Germany during WWII was the British-built Short Stirling. Designed by the Short Brothers Company from scaled-down, four engine air boats, the Short Stirling was capable of carrying 14,000 lbs of bombs. It had a long range with lighter loads and was heavily defended with machine guns. Later aircraft could fly higher and faster, but the Short Stirling was the first four-engine to strike for freedom. **Kit features** photo-etched parts and six sets of decals.

1335 ITAS1335 Total Parts: 350 Skill Level: 5 Length: 14.5 in (369mm)

1/72 ANTONOV AN-2

Unbelievable biplane

Many aircraft boast exceptional maneuverability, but few besides the Antonov An-2 can actually be flown backwards. Capable of carrying 12 passengers, supplies, paratroopers, you name it, the Antonov An-2 flies on a single engine, can be equipped with skis and land on unprepared runways with ease. It is the aircraft you want for getting in and out of really inhospitable terrain. Over ten thousand of the original were made, but there's only one place to get a really realistic scale model—right here! **Kit features** decals for six versions.

1367 ITAS1367 Total Parts: Skill Level: 2 Length: 7 in (177mm)

1/72 S.E. 5A AND ALBATROS D.III

Dogfight duo

It is 1917, and thousands of feet above the chaos and carnage of the land war raging below two fighters soar through the frigid air. For the moment, muffled as they are against the prop wash and 100mph winds, the pilots have not yet spotted each other. In a moment, machine guns will chatter to life as the British S.E. 5a and German Albatros D.III duel to the death. This kit combo **features** two models with two sets of decals for each.

1374 ITAS1374 Total Parts: 19 & 20 Skill Level: 3 Length: 3.5 and 4 in (89 and 102mm)

1/24 PETERBILT 378-119

Highway horse

Designed to move a whole world of material, the Peterbilt 378 is a standout in a long line of powerful prime movers. Thousands of semi-trucks ply the roads of the United States, but the distinctive Peterbilt 378 does so with a style that is truly unmistakable. **Kit features** an incredibly detailed and authentic Peterbilt 378 with unique decals.

3894 ITAS3894 Total Parts: 335 Skill Level: 3 Length: 12.7 in (322mm)

1/24 REEFER TRAILER

Cool cruising

This latest-generation semitrailer is representative of much of Europe's on-road haulage vehicles. Featuring an efficient braking system, side impact protection, and a considerable load capacity, these trailers are used extensively and are produced by at least ten or so specialized companies, which provide a comprehensive range of variants to meet the specific needs of individual customers.

3904 ITAS3904 Total Parts: Skill Level: 4 Length: 23.1 in (587mm)

1/56 PZ.KPFW. VI TIGER I

Set to shred

Mid-way through the Second World War, the Tiger I rumbled onto the field of battle and altered the course of the war. This massive tank was heavily armored and armed with the 88mm KwK 36, the most powerful tank gun of the day. It was fully capable of taking out its contemporary adversaries from two to three times their effective range with relative impunity. However, although Tigers could destroy enemy tanks 1on1, the high cost and low production of Tigers ensured that numerically equal conflicts were rare. **Kit features** 2 sets of decals.

5755 ITAS5755 Total Parts: Skill Level: 1 Length: 4.2 in (107mm)

1/72 NAPOLEON'S GENERAL STAFF

Made for war

Even after two hundred years, the innovations of Napoleon's command structure are relevant to modern war. The intricately organized General Staff of Napoleon's Grande Armée allowed Napoleon to turn the half a million-strong force into a living extension of his will. Their mobility and discipline turned the tide of innumerable battles. In the General Staff, and in this kit, you will find Napoleon's aides-de-camp, Marshal Berthier (a major general), the Chasseurs a Cheval, the colorfully dressed Mameluks and the emperor himself. **Kit features** plastic figures both mounted and afoot.

6016 ITAS6016 Total Parts: Skill Level: 1

1/72 NAPOLEONIC WARS PRUSSIAN CAVALRY

Victory through speed

The weaponry and tactics of the Napoleonic Wars made the use of cavalry the decisive element in many combats. Though not as famed as the incredibly tenacious Prussian infantry, the Prussian Cavalry was instrumental in many victories. Included among these victories was the battle at Möckern where a Prussian Cavalry charge forced back French infantry and helped open the way to Leipzig. Victory at Leipzig lead directly to Napoleon's first exile. **Kit features** cavalry models molded in a variety of positions.

6081 ITAS6081 Total Parts: Skill Level: 1

1/72 BATTLE OF BERLIN, 1945

Rending of the Third Reich

After six years of destructive warfare, the forces of Nazi Germany were on their last legs. Shattered remnants of units formed defensive lines in and around Berlin and prepared for their last stand. Old men and young boys were conscripted to bulk the ranks. Outnumbered by more than three to one and suffering from supply shortages, the German forces were broken at every turn by the unstoppable Russians. This set **features** German and Russian artillery, vehicles, and infantry plus a detailed Berlin House.

6112 ITAS6112 Total Parts: 135 Skill Level: 1
Length: House dimensions: 9.4 x 9.4 x 6.7 in (240 x 240 x 170mm)

1/72 BERLIN HOUSE

Last ditch defense

Solidly built and arranged in impeccably straight lines, the houses of Berlin became fortresses in 1945. As Soviet troops swarmed into the city, snipers, machine gun teams, and panzerfaust-toting tank killer teams lurked in the large row houses of Berlin. Deadly house-to-house fighting claimed the lives of tens of thousands, but in the end Soviet forces obliterated the Nazi defenders and forced a final, unconditional surrender. The remaining houses of Berlin would spend decades under Soviet rule. **Kit features** a detailed model Berlin House.

6173 ITAS6173 Total Parts: 51 Skill Level: 3
Length: House dimensions: 9.4 x 9.4 x 6.7 in (240 x 240 x 170mm)

1/35 M4A2 76MM "WET" SHERMAN

Rolling out for Russia

Diesel engine-equipped Sherman tanks were primarily shipped to America's Lend Lease partners during WWII. Thousands went to Russia where they were thrown into combat against the advancing German armies. At the front, these American-built tanks helped turn the tide against Germany and sped their eventual fall. The 76mm gun-equipped Sherman compared favorably with the T-34 and was a dangerous opponent to the Panzer IV. Eventually, whole Russian divisions were equipped with the Sherman. **Kit features** decals for one Soviet Army version.

6483 ITAS6483 Total Parts: Skill Level: 3 Length: 6.7 in (169mm)

1/35 PANZER KAMPFWAGEN I AUSF.B

Training for the coming terror

Equipped with thin armor and an extremely light armament of two low-caliber machine guns, the Panzer I was far behind the tank designs of Germany's neighbors. However, it was a necessary step towards the later development of Nazi Germany's elite tank forces. Despite its drawbacks, the Panzer I saw service in most of the fronts Germany fought on. Continuous improvements, modifications, and role changes extended the service life of the design far past the initial training role envisioned for it.

6523 ITAS6523

1/72 M4A2 SHERMAN III FAST ASSEMBLY

Forces of the freedom fighters

Even after their homes were occupied or destroyed, remnants of the French and Polish Armed Forces fought on alongside the Allies. With all manufacturing facilities in the hands of the Axis, these homeless formations relied on equipment and supplies donated by the remaining Allied forces. Chief amongst the tanks supplied by the west was the M4A2 Sherman. Light, fast and lethal, the Sherman helped infantry deliver the decisive strikes that let the Polish and French soldiers finally go home. **Kit features** Free French, Polish, and US decals.

7511 ITAS7511 Total Parts: Skill Level: 1 Length: 3.2 in (82mm)

1/72 T-34/76 MOD. 42 COMBO

Rolling into the Reich

Tens of thousands of T-34s rolled off Soviet assembly lines and onto the fields of WWII. There they provided a terrible shock to Nazi German forces. The armor on these Soviet tanks was far too thick for the standard German tank and anti-tank guns which allowed the T-34 to wreak considerable havoc amongst German formations. Before the war was over, the T-34 had pushed Germany from the gates of Moscow all the way back to Berlin. **Kit features** two T-34 kits with decals.

7523 ITAS7523 (2 Kits) Total Parts: 15 (x2) Skill Level: 1 Length: 3.7 in (93mm)

AMT® 1/25 Piranha Spy Car

Say U.N.C.L.E. and you win

On the silver screen, being a spy seems to have an awful lot of benefits—and one of those benefits is almost always have a ridiculously expensive, flashy, and memorable car stuffed with gadgets. The Piranha CRV Super Spy Car is that sweet ride. Its unique body style and gull wing doors make it eye-catching, but all the spy goodies it's loaded with make it a real knockout! Get your Cold-War cruiser and catch some bad guys today! **Kit features** opening gull wing doors, fully detailed motor, authentic interior, and a Retro Deluxe bonus mini box.

AMT900

AMTS0900

Skill Level: 3

AMT® 1/25 1953 Chevy® Corvette®

The future on four wheels

Set on delivering a sports car that returning American GIs could love, Chevrolet incidentally developed one of the most enduring brands of cars on the road. The first Chevy Corvette was a plastic-bodied, stock-part constructed, six-cylinder anyman's sports car... and it tanked. Performance, critical reception, and sales all fell far short of expectations. In spite of the rough start, GM revised their design, up-gunned the engine, included a manual transmission, and turned the Corvette into a top performer that has lasted into today.

AMT910/12

AMTS0910

Dragon Models® 1/700 USS Arizona BB-39 (1941)

Bring the great gray lady back from the deep

To this day, the remains of over a thousand US Servicemen rest in the sunken hulk of the USS Arizona. But you can build BB-39 as she was on December 6th, 1941—the day before the world changed forever. Build this kit as a tribute to the great vessel and the brave men who served aboard her. This Premium Edition **kit features** newly tooled lower hull, bridge and crane parts, 14-inch guns with slide-molded barrels, lifeboats, photo-etched parts, Cartograf decals, new box art, and a display stand.

Lindberg 1/32 1940 Ford Convertible

Designed to drive you

An icon of the golden age of automotive history, the 1940 Ford Convertible was the final model of the 1937 Ford line. It sported extensive chrome highlighting, satisfying contouring, and a potent, compact V-8 engine. At between \$800 and \$900, the 1940 convertible was not a cheap car. However, it was accessible to enough of the working public that original production models are still available on the antiques market today.

HL119/12

LNDS0119

Lindbergh Vanguard Satellite

Sputnik sputtered, Vanguard leads the way

After over fifty years in space, the Vanguard I satellite is still orbiting the Earth, still actively tracked by scientists, and still teaching us things about our world that we never knew. This tiny, grapefruit-sized satellite was the first ever solar powered satellite put into space, the fourth satellite of any type. It helped map out the globe in a totally new way, taught us about the effects of atmospheric drag, and raised our awareness of solar radiation. Most remarkably, Vanguard I is expected to remain in orbit for nearly two hundred more years.

HL603

LNDS0603

Lindberg 1/25 Flintstones Car SNAP Kit

YABBA DABBA DOOOOOOO!!!!

Life in prehistoric times is a little bit easier when you can pedal on over to the Bedrock Bowl for a couple of frames of pin-smashing fun; or, when you can get Brontosaurus ribs on the go while cruising about with your best gal! So don't delay, stop in and get Fred's Flinty Ferrousarri today! **Kit features** an easy to build snap-together version of the car from the incredibly popular Flintstones animated series.

HL604 LNS0604

Moebius® 1/72 BSG Viper MkVII (2 Pack)

Saving humanity—two ships at a time

Featured in the recent Battlestar Galactica reboot, the Viper MkVII is the galaxy's most advanced fighter. MkVII's are far more agile than earlier Viper variants. Their navigational systems are fully networked, with user-intuitive, software-based controls. Weapons include three kinetic energy weapons and two missile launchers. **Kit features** two downsized versions of the Moebius 1/32 scale Viper along with display stands.

958 MOES0958 Total Parts: 29 x 2 Skill Level: 3 Length: 5.5 in (140 mm)

Moebius® 1/72 Interstellar Film Ranger

Searching for salvation

Despite regressing to an agrarian society and facing the total annihilation of the human race, the plotline of Interstellar tells us that humanity still has the technology to launch a mission far beyond the explored reaches of space—to the zone around a massive black hole where there are three potentially habitable planets. The descents to these planets will be made about the Ranger—an able futuristic spacecraft capable of conveying four crew between planet and ship. **Kit features** a detailed model based on the successful Sci-Fi Film!

960 MOES0960 Total Parts: 40 Skill Level: 3 Length: 10.5 in (267 mm)

Moebius® 1/25 1971 Ford Ranger Pickup

Top of the line

From the base model of the Edsel line to the top-notch of the Ford F-Series, the Ranger name took a major turn for the better in the early sixties. The Ford Ranger of this time was a full-size pickup with all the trim and style package considerations available for the F-series. Build your seventies classic with this incredible kit!

1208 MOES1208 Total Parts: 134 Skill Level: 3 Length: 8.25 in (210 mm)

Moebius® Models 1/25 1965 Plymouth® Belvedere

Drag race devil, on-road angel

The 1965 Plymouth Belvedere was available as a sedan, hardtop, or even a station wagon. It was a vehicle nearly anyone could afford and anyone would love to drive. But the Belvedere had another side as well. It was a force to be reckoned with on the drag strip. With custom parts, high-performance engines, and big slick tires, the Belvedere could leave just about anything far behind in the dust. **Kit features** detailed parts and full decals.

Polar Lights® 1/9 Executive Officer Kane Figure (Alien)

He had the special...

Somewhere in the spacefarer's handbook there has to be a section entitled, "Do not directly, physically interact with any alien life form in any capacity". Unfortunately, Officer Kane never read said handbook and suffered the world's worst case of indigestion because of it. All joking aside, this kit represents one of the most poignant tipping points in cinema history—a defining moment that tells you, without a doubt, that you aren't watching Star Wars. This **kit features** intricately detailed resin parts, engineered to allow realistic lighting effects to be installed.
