I want

SOMETHING THAT DOES IT ALL. XPLORES

...this is perfect

- Extreme sports enthusiasts and adrenaline addicts of all kinds will love what this drone has to offer!
- The hands-free Follow Me function keeps the Xiro focused on recording the action while the user focuses on their sport.
- No experience needed— set your 16 waypoint flight path and minimal control input is required.
- Pulse-pounding video to prove all those “crazy stories” are true.

I want to
ADD HIGH-TECH TO MY BUSINESS.

X4 PRO
 REAL TIME FPV
 Ready-to-Fly FPV Electric
 Quadcopter with Camera
DELUXE

... this is perfect

- From farmers to real estate agents, the X4 Pro is ideal for everyone who needs pristine aerial photos to do their job best.
- Flight plan programming helps busy professionals monitor a large area comfortably and safely.
- Program a 32-point flight path and focus on getting clear pictures of a large area.
- The Deluxe version's transceiver is the ultimate, intuitive tool for business owners.

HBNE0010 X4 Pro Deluxe FPV RTF
HBNE0020 X4 Pro Low Edition FPV RTF
Size: 14.6 in (370mm)

I want to
CAPTURE THE MOMENT.

GHOST™

...this is perfect

- Perfect for athletic events, reunions and more—record the highlights of your family's life without taking yourself out of the picture!
- Incredibly easy to control from your smartphone, so you can focus on the moment.
- One-click commands so simple Grandpa can fly.
- Keep the camera centered on the action automatically with the auto follow feature.

I want to
SATISFY MY COMPETITIVE SIDE.

...this is perfect

- Racers, gamers, and pro pilots alike are going to love being right in the cockpit for riveting racing excitement.
- First Person View racing delivers high octane, obstacle-dodging thrills that put the action up close and personal.
- Not for the faint of heart, FPV flyers offer an experience that is unlike anything else in RC.
- Beginners can race the easily-repaired practice racer version while pros will love the carbon fiber body racer.

HMXE0861 250 FPV Drone Racer
HMXE0862 250 Class FPV Racing Quad
Size: 9.8 in (250 mm)

I want to

FULFILL MY NEED FOR SPEED.

VOLTAGE
500-3D

... this is perfect

- With some R/C heli or drone experience, you can cut loose with powerful, precise aerobatics.
- Voltage is the first 500-class drone with reversing motors — allowing a wide range of stunts, including inverted flight.
- Large size accepts big props for adrenalin-pumping 3D performance.

HMXE0864 Voltage 500 3D
Size: 19.7 in (500 mm)

helimaxrc.com

I want
ONE THAT WILL HANDLE HARD KNOCKS.

OMINUS™

OMINUS™ FPV

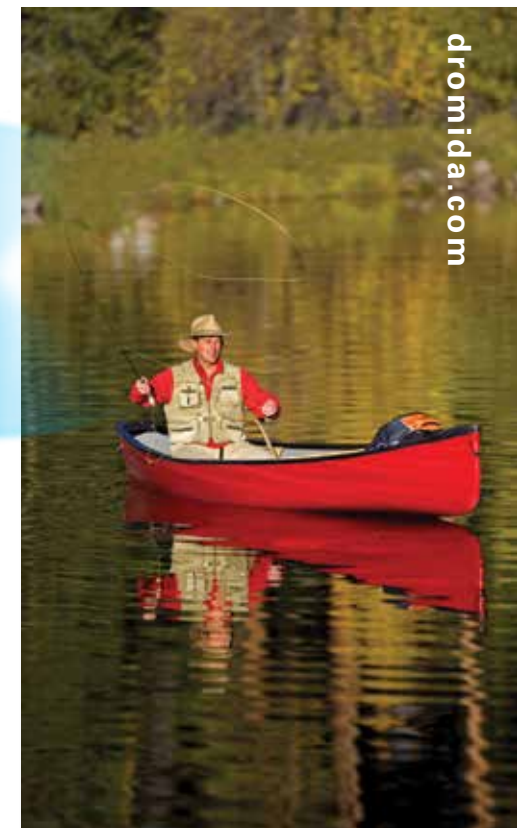

VISTA™ UAV

... this is perfect

- Conquer any outdoor obstacle with these dynamically durable drones. Great for all ages and skill levels!
- Fully equipped and easy-to-fly at backyard parties or family trips.
- Push the Auto-Flip button to execute exciting, pro-level flips.
- Ominus FPV adds a 720p HD Wi-Fi-enabled camera*, for shooting exciting First Person View videos and photos.

*The included HD camera is not designed for bashing. Please use caution while flying the Ominus FPV.

DIDE01** Ominus™ UAV
DIDE02** Ominus FPV
DIDE03** Vista™ UAV
Ominus UAV/FPV Size: 9.4 in (238 mm)
Vista UAV Size: 9.8 in (251 mm)

I want to HAVE FUN WITH AERIAL PHOTOGRAPHY.

KODO™

...this is perfect

- KODO keeps all ages entertained with easy (and nearly unbreakable) drone flying action.
- Experiment shooting videos and still photos — do aerial somersaults with push-button ease!
- Advance through Easy, Normal and Expert flight modes before trying more expensive drones.

DIDE0005 KODO Micro RTF
Size: 4.1 in (105 mm)

protoXTM FPV

...and this one too

- For anyone fascinated by next-level technology in a fun, affordable, ready-to-fly drone.
- Fly aerial recon with First Person View — follow on the controller screen what the Proto-X FPV sees from above.
- Capture HD flight video to share with friends and family.

ESTE4716 Proto-X FPV RTF
Size: 4.4 in (113 mm)

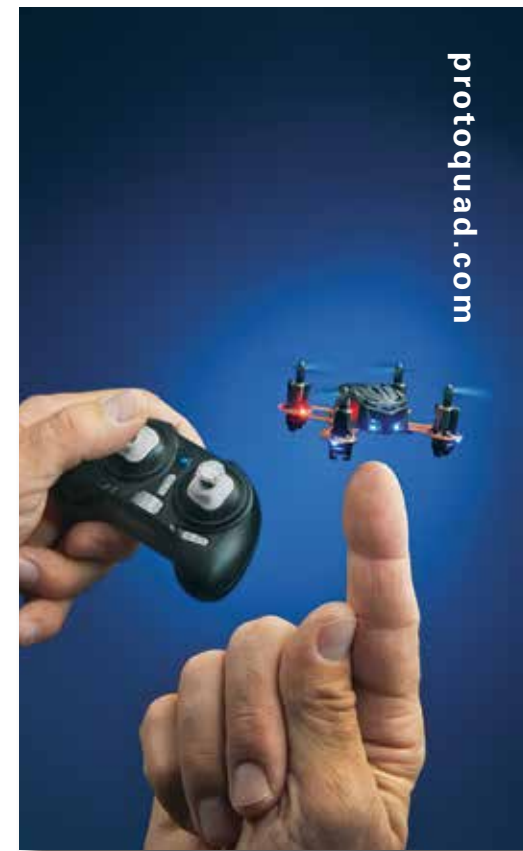

I want
AN ACTIVITY THE WHOLE FAMILY CAN SHARE.

protoX™

protoZ™

protoX^{SLT}™

... this is perfect

- Ideal for stocking stuffers!
- So easy to fly, no experience is necessary.
- Available in six eye-catching colors, the original nano-sized **Proto-X** is the perfect beginner's indoor drone.
- Do flips and more mild-to-wild maneuvers with the ultra-nano **Proto-N**, nano-sized **Proto-X SLT** and micro **Proto-Z**.

protoN™

ESTE48** Proto-X
ESTE49** Proto-X SLT
ESTE4611 Proto-Z

MORE DETAILS ON THE FPV PRODUCTS
COMING SOON IN GREAT NEWS.

TACZ5150 – Tactic FPV-RM1 7 Inch Hi Def Monitor with Twin 5.8GHz Receivers

Frequencies: 22 total, 5.733 – 5.866GHz
Freq selection: auto-scan or manual setting
Resolution: 1024 x 600 pixels
Menu options: 9 menus
Hi def input: HDMI 1.3 jack
USB port: USB-mini B jack
Input power: 7.0 – 22.2V
Dimensions: 183 x 128 x 26mm (7.2 x 5.0 x 1.0") w/o antenna connections
Weight: 483g (17.0 oz) w/o antennas
Includes: 2S 1800mAh LiPo battery module, two RP-SMA antennas, detachable sun shield, battery charge cable with adapter, two A/V cables with RCA connectors

TACZ5005 – Tactic FPV-T2 5.8GHz 200mW Transmitter

Frequencies: 32 total, 5.645 – 5.945GHz
Output power: 200mW (HAM license required)
Dimensions: 27 x 21 x 8mm (1.1 x 0.8 x 0.3") w/o antenna or heat sink
Weight: 7.7g (0.3 oz)
Includes: RP-SMA antenna, camera USB-mini B adapter cable, one y-cable for video and power, battery adapter cable, heat sink (user install).

TACZ5000 – Tactic FPV-T1 5.8GHz 25mW Transmitter

Frequencies: 22 total, 5.733 – 5.866GHz
Output power: 25mW
Dimensions: 37 x 24 x 11mm (1.5 x 1.0 x 0.4") w/o antenna
Weight: 11.2g (0.4 oz)
Includes: RP-SMA antenna, camera USB-mini B adapter cable y-cable for video and power, battery adapter cable, plastic case.

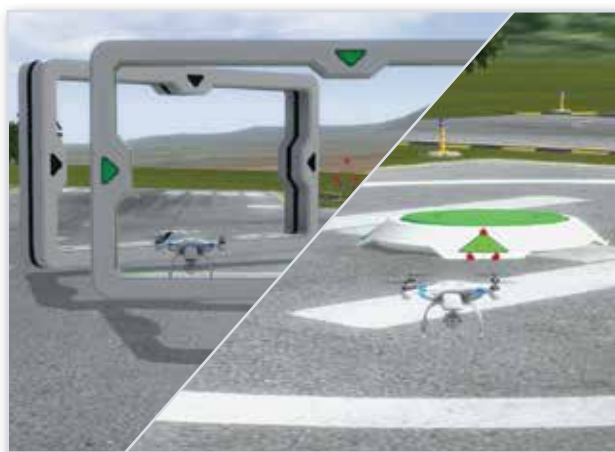

TACZ5010 – Tactic FPV-T6 5.8GHz 600mW Transmitter

Frequencies: 32 total, 5.645 – 5.945GHz
Output power: 600mW (HAM license required)
Dimensions: 35 x 22 x 8mm (1.4 x 0.9 x 0.3") w/o antenna or heat sink
Weight: 9.5g (0.3 oz)
Includes: RP-SMA antenna, camera USB-mini B adapter cable, y-cable for video and power, battery adapter cable, heat sink (user install).

MASTER YOUR MULTI-ROTOR

REALFLIGHT®
DRONE

Drone Simulator w/InterLink MD2

QuadTrials let you practice maneuvering your drone at high speeds — where crashes have no consequences.

- Hone your piloting skills risk-free with RealFlight — for more confidence when flying your real drone
- Fly any of 15 different drones — from small-sized racers to large aerial photography platforms, including quad-, 6- and 8-rotor designs
- Choose from 20 flying sites — providing a wide variety of environments
- Exclusive RealPhysics™ technology — recreates multi-rotor aircraft and flying sites with exceptional accuracy
- Try your hand at Challenges — making learning more fun by adding a competitive edge

In the Scavenger Hunt Challenge, you find and “collect” (by taking photos) specific items in a flying site.

Gain experience with FPV (First Person View) camera control, and become an accomplished aerial photographer.

Master the aerial camera.

...ON REALFLIGHT!

Features the proven InterLink Elite controller

**INTERLINK®
ELITE**
CONTROLLER
By **Futaba®**

The InterLink Elite controller works just like a real, high-quality drone transmitter, but requires no batteries or complicated setup. Already own an R/C transmitter? Fly your virtual drones using the InterLink Elite's built-in interface.

- Looks and feels like an actual R/C hobby flight transmitter
- Offers 8 channels for easy access to drone features
- Operates all software functions through the controller using QuickSelect — no juggling a mouse and keyboard
- Allows the interface and InterLink Elite controller to be used simultaneously in MultiMode — two pilots can fly together on the same PC

Reset/Rewind

After one flight ends, instantly start another just by pressing the Reset button. Holding the button down rewinds to any point of your last flight for a do-over.
U.S. Patent #7,010,628
U.S. Patent #6,482,804

Many of RealFlight's popular features are here:

- RealPhysics 3D, including multi-rotor physics
- FlexiField flying site editor
- Reactive 3D objects
- Unlimited combat
- Multiplayer
- MultiMode split screen
- Heads-Up Display (HUD)
- TrueView™ realistic lighting
- Virtual Flight Instructors

GPMZ4800
RealFlight Drone Simulator w/InterLink MD2

From the Experts:

With the drone market continuing to explode, it was a no-brainer for the world's best R/C flight simulator to create a version that focuses on multi-rotor models. Practice and perfect your flying skills on your PC day or night, in any weather — the extra “stick time” will prove invaluable when you're ready to take your real drone up.

Long story short...

It's the first “drones only” R/C flight simulator — and RealFlight recreates multi-rotor flight in every detail.

3-CHANNEL SLT RADIO

The TTX300 boasts many great features, including steering and throttle reverse and trims, steering rates, two-button control of the 3rd channel, a compact 3-channel receiver and much more.

From the Experts:

When you pair up the exciting Motley Crew catamaran with Tactic's TTX300 3-channel radio, you've got a sure-fire winner! You'll enjoy secure, interference-free control of this FE class racing boat that features a brushless power system. And whether the Motley Crew is in or out of the water, the licensed trim scheme is sure to turn heads!

Long story short...

Now that it's rockin' the TTX300 radio, the Motley Crew is primed to be an even bigger seller!

APEX PERFORMANCE, RTR CONVENIENCE, LEXUS STYLE

APEX Lexus RC F Brushless 4WD Performance Coupe RTR & LiPo Combo

QUALIFIER SERIES

- All-wheel-drive chassis that accepts NiMH or LiPo batteries
- Powerful Reedy 3300kV 540 brushless motor
- Water-resistant brushless ESC with high current T-plug connector
- Adjustable fluid-filled coil-over tuned shocks
- All-metal gear transmission with sealed differentials
- Steel CVA drive axles front and rear
- Metric hardware and ball bearings throughout
- Lexus RC F 20-spoke replica wheels mounted on high-grip racing tires
- Factory finished Lexus RC F performance coupe replica body
- Fully assembled and Ready-To-Run

Lexus and all associated marks, emblems and designs are the intellectual property of Toyota Motor Corporation and are used with permission.

30118 ASCD10** APEX Qualifier Series
Lexus RC F Brushless 4WD RTR

30118C ASCD18** APEX Qualifier Series
Lexus RC F Brushless 4WD RTR LiPo Combo

Length: 17.5 in (445 mm)

Width: 7.5 in (190 mm)

Weight: 3.9 lb (1760 g)

Wheelbase: 10.2 in (259 mm)

The LiPo Combo (ASCD18) adds even more performance and convenience!**

In addition to all of the RTR's noteworthy features, the LiPo Combo adds the awesome advantage of a WolfPack 7.4V 3300mAh 30C LiPo battery (#751) and Reedy 423-S 35W Compact Balance Charger (#616).

Long story short...

The sleek Lexus RC F body gives street cred to this APEX on-road machine!

THE WORLD'S FASTEST MINI MONSTER TRUCK. PERIOD.

SAVAGE XS FLUX

Ready-To-Run 4WD Brushless Mini Monster Truck

RAPTOR SVT

65⁺₊ mph

*when equipped with 3S LiPo battery.

- Factory assembled and Ready-To-Run
- TVP (Twin Vertical Plate) chassis for exceptional durability
- Powered by a Flux MMH-4000kV brushless motor and Flux EMH-3S brushless ESC
- Full-time 4WD shaft drive
- HPI pistol-grip 2.4GHz radio system
- SF10W waterproof servo
- Aluminum hex hubs
- Tough 4-gear differentials
- Complete set of ball bearings
- Officially licensed, prepainted and detailed Ford SVT Raptor truck body
- Universal body mounts allow for a wide range of optional bodies

Ford Motor Company Trademarks and Trade Dress used under license to HPI Racing, Inc. www.FordMotorCompany.com.

The enclosed, waterproof receiver box keeps onboard electronics dry and protected.

Composite oil-filled threaded shocks aid in ground control.

The battery box fits standard LiPo and 6-cell NiMH batteries.

High-grip monster truck tires provide massive traction.

115125 HPID1216 Savage XS 4WD Brushless Mini Monster Truck RTR w/Ford Raptor Body
Length: 14.1 in (360 mm)
Width: 11 in (280 mm)
Wheelbase: 8.8 in (225 mm)

From the Experts:

It has the speed, durability and innovative TVP technology that has made the Savage Flux an R/C legend...and at 2/3 the size the compact Savage XS goes where the standard size Savage can't! A brushless power system gives this mini monster plenty of zip, and the detailed Ford SVT Raptor pickup truck body with "digital mud" graphics is the perfect complement!

Long story short...

The Savage XS with Ford SVT Raptor body packs everything you know about Savage Flux engineering into a fun-sized performance package!

GET THE JUMP ON THE COMPETITION!

Ready-To-Run 1/10 Scale 2WD Electric Monster Truck

WATERPROOF!

HPID1216 Jumpshot 2WD EP
Monster Truck RTR
Length: 16.6 in (423 mm)
Width: 12.9 in (330 mm)
Wheelbase: 10.5 in (267 mm)

- Tough, proven Twin Vertical Plate (TVP) chassis system
- HPI Flux SC-3SWP2 waterproof LiPo-ready ESC
- Enclosed receiver box
- Battery box fits 7-cell NiMH stick packs and 2S LiPo packs
- Battery easily accessible from bottom of chassis
- Oil-filled shocks
- Double-wishbone suspension
- Sturdy body mounts
- Durable gear differentials
- Standard 12 mm hex hub wheel fittings
- Full ball bearings
- Large all-terrain tires
- Chrome 6-spoke wheels
- Handsome pickup truck body with black, orange and silver trim scheme
- NiMH battery, wall charger and "AA" batteries included

From the Experts:

Take the Jumpshot out for a spin, and take the fight to whatever the elements can throw at you! The modular chassis design not only stands up to rugged off-roading, it also simplifies maintenance, so you're bashing more and repairing less. And the Jumpshot's impressive performance and durability is matched by its rugged pickup truck profile with eye-catching trim scheme!

Long story short...

Strong and reliable, the Jumpshot MT is the perfect introduction to unstoppable monster truck fun!

TWIN POWER WITH ELECTRIC EASE

TWINSTAR EP ARF
Almost-Ready-to-Fly Electric Twin Motor Sport Plane

- TWO motors, for twice the excitement
- The nacelles are positioned near the centerline for added stability
- Brushless electric power is convenient, easy to set up and reliable
- Made with quality balsa and ply construction
- Flight-ready in just a few hours, and professionally precovered in genuine MonoKote film with an attractive trim scheme

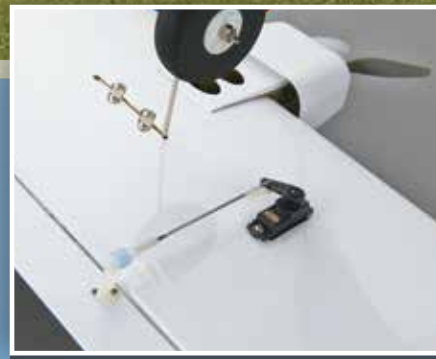

Two motors add an extra level of excitement to flying, and you don't have to tune them together perfectly like glow engines.

A large, magnetically-attached hatch makes for quick access to on-board gear.

The tricycle landing gear is a breeze to install, and offers better ground handling than a taildragger.

The ailerons are operated by individual mini-size servos. They're easy to install, and allow for fine-tuning of the ailerons and flaperon mix.

MONOKOTE
COVERING

GPMA1609 Twinstar Electric Twin Motor Sport ARF

Wingspan: 47.5 in (1205 mm)

Wing Area: 392 in² (25.3 dm²)

Weight: 4.0-4.25 lb (1.81-1.93 kg)

Wing Loading: 24-25 oz/ft² (73-76 g/dm²)

Length: 42.5 in (1080 mm)

Requires: 4-6 channel radio, 4 servos, (2) 35-30-1250kV brushless motors, (2) 25A brushless ESCs, 3S 11.1V 3800mAh (minimum) LiPo battery, 3S balancing LiPo charger, (2) 8 x 8 propellers

From the Experts:

Flying with twin motor power is unique and exciting, and the TwinStar EP ARF is the ideal choice for making it happen. The brushless electric motors are easy to set up, and because it's Almost-Ready-to-Fly, you can have this quality-constructed, professionally pre-covered model in the air in just a few hours.

Long story short...

The Twinstar Electric ARF makes it easy to enjoy double-barreled flying fun!

THE ELECTRIC EQUIVALENT OF THE RC8B3 HAS ARRIVED

1/8 Scale Electric 4WD Off-Road Competition Buggy Kit

80916 ASCD0916 RC8B3e 1/8 Scale Electric 4WD Off-Road Competition Buggy Kit
Length: 19.2 in (488 mm)
Width: *
Weight: *
Wheelbase: 12.9 in (327 mm)
Requires: 2-channel radio, 1/8 scale speed control, motor and pinion, high-torque steering servo, 1/8 scale buggy wheels and tires, 4S LiPo battery and charger, transmitter batteries
**Actual width and weight will vary depending on the motor, battery, electronics, wheels and tires used in the finished kit.*

- 7075-T6 hard anodized aluminum chassis with optimized weight bias layout for better handling and improved stability
- Front suspension with pillow ball uprights
- Gearboxes with 3.38:1 internal gear ratio with easy-access differentials
- Six universal drive shafts for efficient power delivery and maintenance ease
- 7075-T6 aluminum 16mm Big Bore threaded shocks with TiN coated 3.5mm shafts

- 7075-T6 aluminum shock towers front and rear
- Refined suspension geometry with lower hinge pin inserts for quick roll center adjustments
- Lightweight, one-piece wing mounts with adjustable height/forward positioning
- Two-piece sliding motor mount for easy gear mesh adjustment
- Pro-Line® RC8B3e clear body and Team Associated molded wing

Front suspension with pillow-ball uprights

7075-T6 anodized aluminum chassis

7075-T6 aluminum 16mm Big Bore threaded shocks

2-piece sliding motor mount

Six universal drive shafts

Refined suspension geometry with lower hinge pin inserts

Gearboxes with a 3.38:1 internal gear ratio

Lightweight one-piece wing mounts

Long story short...

The RC8B3e is a brushless electric powerhouse designed with one thing in mind: to win!

NEWPRODUCT

MORE SCALE BATTLE TANKS TO DISPLAY AND COMMAND!

1/24 Scale King Tiger Porsche Desert Camo & Japanese Type 10 NATO Battle Tanks

VSKC3026

1/24 Scale King Tiger Porsche
Desert Camo Battle Tank

VSKC3032

1/24 Scale Japanese Type 10
NATO Battle Tank

- The King Tiger Porsche Version with Desert Camo trim scheme complements the Henschel version introduced last year
- The Japanese Type 10 is brand new to the VS Tank lineup, and comes with authentic NATO markings
- Both feature incredible detail, including molded scale accessories and working hatches
- Proportional forward, reverse and turning speeds
- All-wheel suspensions and flexible tracks tackle inclines of up to 35°
- Infrared battle systems allow for tank-to-tank combat and hit scoring
- The interference-free radio lets you do battle with up to 15 other VS Tanks at the same time!

From the Experts:

VS Tank continues to produce scale replica tanks worthy of display — while also capable of infrared armored combat! Advanced radio systems offer precise control of their direction, speed and functions, including infrared cannon fire for scoring points in mock battles!

Long story short...

Engage in wireless warfare with these realistic looking — and operating — VS Tanks!

A VERSATILE RECEIVER FOR TODAY'S AIRPLANES

R3006SB T-FHSS 2.4GHz S.Bus Receiver

FUTL7683
R3006SB T-FHSS 2.4GHz
S.Bus Receiver

- Features bi-directional communication with a T-FHSS Air 2.4GHz Futaba transmitter using S.Bus compatibility
- Standard 6-channel PWM slots as well as S.Bus/ S.Bus2 output ports
- High Voltage capacity
- Dual Antenna Diversity for a strong, solid signal
- The R3006SB receiver can use S.Bus as the main link/communication to the servos or a combination of S.Bus and the conventional outputs together

Power Requirement: 4.8V-7.4V
Dimensions: 1.7 x 0.98 x 0.35 in (43 x 25 x 8.8 mm)
Weight: 0.3 oz (8.5 g)

Futaba®

Long story short...

The R3006SB S.Bus Receiver delivers performance and reliability in a variety of capacities!

AN AWESOME TOOL FOR IN-FLIGHT INSTRUCTION

GYA460 6-Axis S.Bus Gyro-Air

FUTM0790
GYA460 6-Axis S.Bus Gyro-Air

- 3-axis gyro sensors and 3-axis accelerometer sensors, for the ultimate in flight control
- Three selectable flight modes, including Beginner mode that provides automatic horizontal level return control and flight attitude angle control
- Gyro mode assists pilots learning inverted flight and aerobatics, while Gyro Off mode puts flyers in complete control
- Separate sensitivity adjustments for aileron, elevator and rudder
- Easy to set up, and S.Bus compatible
- A low profile design, compact in size and light in weight

Futaba®

Long story short...

By controlling a plane's attitude, the GYA460 gyro takes the fear out of flying!

Hitec® X2 AC Pro Charger

The reliable charger that can do it all!

- Dual-port unit delivers 200 watts of AC power, and up to 300 watts of total DC output
- Can store and quickly recall 20 charge/discharge profiles
- Works with all battery chemistries, including LiPo and LiHV
- Built-in 60W soldering iron with temperature range from 400-840°F (200-450°C) is a real convenience at the field as well as at home
- Optional Wi-Fi Module lets you configure and monitor charge progress with your smartphone or PC

Also Available:

HRC4228 44228 Wi-Fi Module for X2 AC Pro Charger

44238 HRC4238
X2 AC Pro Charger

Castle® Creations Mamba Monster X Waterproof ESC & Combos

The complete power system for serious racers

- Designed for 1/8 scale vehicles and 1/10 scale monster trucks up to 15 lbs
- Features a heavy-duty, adjustable 8A peak BEC
- Runs on 2S LiPo up to 6S LiPo, with an output of 4.5 AMP continuous and 8 AMP peak
- Data logging allows for recording and measuring important power system information during use, including battery voltage, motor RPM and ESC temps
- The AUX WIRE function is enabled through Castle Link™ and lets drivers make parameter adjustments "on the fly"
- Sensored motor-compatible (sensor harness available separately)
- Mamba Monster X ESC can also be purchased in powerful pairings with Neu-Castle 2200kV or 2650kV brushless motors

Also Available:

CSEC4502 4502 Mamba Monster X ESC Combo w/2650kV Motor

CSEM4500 4500 Mamba Monster X Waterproof ESC

4501 CSEC4501
Mamba Monster X ESC
Combo w/2200kV Motor

Futaba® SBS-01RB Brushless Motor RPM Sensor

Monitor RPM data to maximize performance!

- Can be used with any Futaba telemetry transmitter/receiver
- Easy installation
- Information can be viewed live on the transmitter
- Ideal for planes, helis, gliders and cars with brushless motors

FUTM0857
SBS-01RB Brushless Motor

RF7.5

REALFLIGHT

Every edition of RF7.5 has all this — and a whole lot more:

- Over 140 aircraft, encompassing every design imaginable
- Over 40 PhotoField™ and 3D flying sites
- Game-like Challenges
- RealPhysics™ 3D
- TrueView™ realistic lighting
- Reset/Rewind on the InterLink Elite controller
- Multiplayer and MultiMode
- Onscreen camera controls

Full details and rebate request forms are available on hobbico.com and realflight.com.

With 4 different editions to choose from, RF7.5 offers more exciting ways to experience the absolute best in simulated R/C flight — and now you can get even more for your money when you buy RF7.5!

Through December 31, 2015, your purchase of any of the four versions of RF7.5 will get you a certificate worth up to \$30 towards quality products from any of over 30 respected R/C manufacturers. Redeem it at the store where you bought your RF7.5 and enjoy bonus merchandise at no extra charge!

RF7.5 w/Wireless SLT Interface Edition

Plug the dongle into your computer's USB port to create an unbreakable link with your SLT transmitter that's wireless so you'll have more freedom of movement to enjoy all of the features RF7.5 has to offer.
GPMZ4524

\$20 Mail-In Merchandise Certificate

RF7.5 w/Transmitter Interface Edition

Fly with your favorite transmitter using the interface that incorporates the popular Reset/Rewind button and features a setup window for quick configuration.
GPMZ4525

RF7.5 w/InterLink Elite Controller Edition

The state-of-the-art in flight sim controllers, with 8 channels, the convenience of QuickSelect and a built-in interface for using your own transmitter.
GPMZ4520

\$30 Mail-In Merchandise Certificate

RF7.5 w/Tactic TTX610 Radio Edition

Features an actual Tactic TTX610 6-channel transmitter for use with RF7.5 that can also be used to fly any SLT receiver-equipped aircraft at the flying field.

TRACK TESTED, RACE PROVEN

Do you have what it takes to be a champion? Just as importantly, is your vehicle designed to maximize your driving skills? If it's a Team Durango kit, you can rest assured that you have every advantage possible for reaching the podium.

That's because Team Durango utilizes input from R/C legends such as Stuart Lewis to engineer racing machines of the highest caliber. And each vehicle

is extensively tested under extreme competitive conditions to verify its speed, toughness and maintainability.

More and more racers are discovering: if you're not driving Team Durango vehicles, you're chasing them. Make sure you're on the winning team: check out the Team Durango lineup at your hobby retailer today.

You can count on Team Durango vehicles to:

- be super-durable
- be easy to maintain
- allow for easy access for quicker pit stops
- deliver consistent lap times
- offer advanced tuning options for even greater performance

CHECK OUT THE RECENT SUCCESSES OF TEAM DURANGO DRIVER STUART LEWIS!

Stuart Lewis

July 25, ROAR Region 2 Event
@ The Mushroom Bowl RC Raceway

RESULT: Top Qualifier, finished 2nd Place

"The track was super-rough and hot. The weight of the ROAR-legal 4-pole 540 motor caused the truck to struggle early, but it excelled in the rough sections. I was able to make up ground on the leaders but ran out of time before I could pass the last guy."

July 18, Summer Sizzler Series, Race #3
@ Trains & Lanes Hobbies

RESULT: Qualified 2nd, finished 1st Place

"The track layout was new, with medium bite rough. The truck handled great, it was dialed-in and super-fast. I stayed right behind the leader and kept the pressure on him until he made a mistake in the corner and I took advantage."

May 23, Summer Sizzler Series, Race #1
& Trains & Lanes Hobbies

RESULT: Top Qualifier, finished 1st Place

"It was my first time at this track and I arrived late and missed practice. However, the truck was spot on and I didn't have to make any changes. Traction was great and it soaked up all the bumps. After TQ-ing the first heat I just stayed in the groove and drove to victory in the A-main."

THE FORCE IS STRONGER THAN EVER

STAR WARS™

Revell is pleased to announce their exciting lineup of Star Wars™ SnapTite® Build & Play™ scale plastic model kits based on *Episode VII: The Force Awakens*, 2015's most-anticipated blockbuster!

Each of these plastic models were developed in conjunction with the prop studio that designed *The Force Awakens'* full-size vehicles. Revell had access to the CAD data used in the making of the film. The final results speak for themselves: authentic models that capture all the detail and nuance of the vehicles as they appear on the silver screen.

Look for Revell SnapTite Build & Play plastic models in stores this fall, and be sure to see *The Force Awakens*, coming to theaters all over the galaxy December 18, 2015.

1/25 KENWORTH® W-900 WRECKER HISTORIC SERIES

A truck to tug trucks

Breakdowns do happen, and when they happen to the biggest semis you can expect to see the Kenworth W-900 getting it back to the shop. Although called “Conventional”, this truck is anything but. It has been in production for over fifty years and comes equipped with a powerful diesel engine ranging in size from 9 liters to up to 16 liters for hauling the truly massive movers. **Kit features** a detailed, turbocharged diesel engine, telescoping wrecker crane, opening front engine cover, and tons of detail.

85-2510 RMXS2510 Total Parts: 411 Skill Level: 5 Length: 14 in (356 mm)

1/25 1972 OLDSMOBILE® INDIANAPOLIS 500® PACE CAR

Starting it off right—turning left.

For the 56th running of the Indi 500, the cars were led to the starting line by a very specially modified Oldsmobile Cutlass™ and the First Lady of Motor Sports “Miss Hurst” Linda Vaughn. This model kit celebrates that iconic seventies moment with the First Lady of Motorsports. **Kit features** a detailed Rocket 455 cu.in. engine, rear spoiler, convertible top you can model up or down, and full special edition pace car graphics.

85-4197 RMXS4197 Total Parts: 143 Skill Level: 5 Length: 8.19 in (208 mm)

1/25 PORSCHE 914/6 2N1

Standout sixties six-cylinder

In collaboration with Volkswagen, Porsche developed the 914 to expand their lineup in the late sixties. It was a sporty mid-engine car that was exceptionally low slung and came with a Targa top. The standard 914 came with a 4-cylinder engine while the 914/6 was powered by an exceptionally robust 6-cylinder. The 6-cylinder version won topped its class in the 1970 24 Hours of Le Mans and placed 6th overall. Either version was sophisticated, sporty, and stylish. This **kit features** factory stock and road race versions, detailed 6-cylinder engine, removable Targa top and engine cover.

85-4378 RMXS4378 Total Parts: 97 Skill Level: 3 Length: 6.25 in (159 mm)

1/25 “FAST AND FURIOUS” BRIAN’S MITSUBISHI ECLIPSE

The “Fast” in “Fast and Furious”

At the beginning of “The Fast and Furious” film franchise, Detective Brian O’Conner is sent to investigate a band of high-speed thieves and underground road racers lead by Dominic Toretto. To fit in with the illegal racing crew, Brian needs a solid racing car—his custom-built Eclipse. With it, he is able to work his way deeper into the trust of the Toretto team. **Kit features** a detailed DOHC 16-valve 2-liter turbo engine, choice of wheels, interior detailing, nitrous bottle, and soft black tires.

85-4384 RMXS4384 Total Parts: 91 Skill Level: 2 Length: 6.88 in (175 mm)

1/48 B-29 SUPERFORTRESS

Bringing "The Bomb"

Seventy years ago, a Silverplate-modified B-29 Superfortress flew over the city of Hiroshima and dropped the world's first operationally-deployed atomic bomb. Only the stretched fuselage of the Silverplate bombers, with the massive power of the B-29's engines could carry the immense bombs over the vast distances of the Pacific Theater. With Soviet and American forces closing in, invasion of the home islands imminent, and an additional nuclear strike, Japan surrendered. **Kit features** two atom bombs, full interior detail, and two propeller styles.

85-5718 MONS5718 Total Parts: 243 Skill Level: Length: 25.3 in (643 mm)

REVELL OF GERMANY®

1/72 GERMAN PAK 40 WITH SOLDIERS

The backbone of the German anti-tank gun forces

One shot from this 75mm anti-tank gun could fairly easily crack open the armor of any Allied tank at a range of 500m or less. They formed the backbone of the Axis anti-tank forces in the late war period with over 20,000 produced from mid-1942 to the end of the war. Advancing tanks had the advantage of being highly maneuverable, but the Pak 40 was frequently dug in and well camouflaged by its crews. This lead to many tanks being put out of action before they even saw their attacker. **Kit features** gun and twelve figures.

02531 RVLS2531 Total Parts: 32 Figures: 12

1/48 F-15E STRIKE EAGLE AND BOMBS

Freeing up some firepower

The F-15E multi-purpose fighter carries a broad range of munitions which allows it to execute both close support and counter-air missions. The aircraft is viewed as one of the most powerful air superiority fighters in the US inventory today. Successor aircraft like the F-22 Raptor will have exceptionally large shoes to fill if they ever think to measure up to the F-15E. **Kit features** cockpit with ejector seats, detailed under carriage, four Sidewinders, four bombs, and a full USAF decal set.

03972 RVLS3972 Total Parts: 70 Skill Level: 3 Length: 5.2 in (132 mm)
Wingspan: 3.23 in (82 mm)

1/72 HANDLEY PAGE HALIFAX MK. III

The heavies on hand

Over a dozen versions of the Handley Page Halifax flew during WWII, the Mk. III variant's main distinction being its more powerful Bristol Hercules engines. Unlike their US counterparts, British bombers mainly conducted night bombing runs to help keep casualties low. However, this didn't mean the British had an easy time of it. Anti-aircraft artillery and radar-vectorred night fighters made the skies over Germany a very dangerous place for anything flying the RAF Roundel. **Kit features** detailed interior, bombs, rotating turrets and props, two sets of decals.

Wingspan: 17.2 in (437 mm)

1/700 HMS ARIADNE

Destruction in her wake

At first glance, minelayers appear to be amongst the weakest ships in any navy; however, their destructive potential far surpasses their gun count. Vessels like HMS Ariadne lay sea mines in important shipping lanes and harbors to disrupt enemy shipping. The number and variety of mines is staggering and they are difficult to detect and disarm. In fact, it is entirely possible that some of the cargo Ariadne left for the Kriegsmarine in 1944 are still active today. **Kit features** waterline hull, lifeboats, gun turrets, detailed deck, and full decals.

05134 RVL5134 Total Parts: 76 Skill Level: 3 Length: 7.13 in (181 mm)

1/72 150 YEARS DGZRS HERMANN MARWEDE

A savior at sea

For 150 years the German Maritime Search and Rescue Service (DGzRS) has been saving people from the sea. They operate nearly fifty vessels, the largest of which is the 46m cruiser Hermann Marwede. Based out of Heligoland, Hermann Marwede is able to extend the group's efforts far out into the treacherous North Sea. Remarkably, the group is funded entirely by private donations—fully independent from any government entity. **Kit features** one-piece hull, twin bow props and rear tri-props, searchlights, deck details, winch, helicopter deck, crane, display stand, and daughter boat "Verena".

05220 RVL5220 Total Parts: 318 Skill Level: 5 Length: 25.20 in (640 mm)

1/24 JTCC AUTO TECH BMW 318i

Laying down rubber

The All Japan Touring Car Championship (JTCC) was a prestigious race of the eighties and nineties. In touring car races, vehicles are tested as much on endurance and handling as simple speed—making them some of the most demanding races in the world. It was primarily dominated by Japanese cars, but for one very special year the German BMW 318i came through as the winner. **Kit features** decals for the 1994 Auto Tech Racing Team, car number 30—Driver: Andrew G Scott.

1/200 JAL® B787-9

The latest flier in the JAL fleet

The 787 is among today's most fuel-efficient aircraft, consuming 20 percent less energy than the popular 767. The 787-9 features further improvements including a lengthened fuselage, increased fuel capacity, and increased maximum takeoff weight. It is constructed of composite materials throughout, making the 787 far lighter than other similarly-sized planes. JAL currently operates one B787-9 and has nineteen on order for future flights. **Kit features** parts for a longer fuselage, antenna and display stand, plus one marking option: 1. JAL, July 2015, Code: JA861J.

10722 HSGS0722 Total Parts: 65 Skill Level: 3 Length: 12.36 in (314 mm)

1/12 HONDA® NSR500 “elf HONDA” 1989 WGP500 Muscle for miles

The Honda NSR500 was already a champion by the time it was revamped for the 1989 season. Top speed exceeded 190 mph (310 km/h); horsepower was rated at 165 hp (123 kW) at 12,000 rpm. With so much muscle per mile at his disposal, it's no wonder the Honda NSR500 carried Dominique Sarron to a fifteenth-place finish that season! This limited edition **kit features** new wheel parts, plus one marking option: 1. Team “elf Honda,” 1989 WGP500, 15th place rider: Dominique Sarron.

1/72 MITSUBISHI® G4M1 TYPE 1 ATTACK BOMBER MODEL 1

Demilitarized for delegations

After Japan's surrender to the U.S. in August 1945, two G4M1s were demilitarized to carry eight of the country's emissaries to the official ceremony in Iejima. P-38 Lightnings and B-25 Mitchells served as their escorts. The Imperial Japanese flags that originally adorned G4M1s were replaced by green crosses as a way for the U.S. to determine that the delegates were, in fact, on board. This limited edition **kit features** two marking options: 1. Green Cross 2nd Plane, August 1945 and 2. Green Cross 1st Plane, August 1945.

1/72 F-35A LIGHTNING II “RAAF” Australia's all-weather stealth fighter

The F-35A Lightning II is the latest fifth-generation jet fighter to enter the global arena. The F-35A's manufacturer claims its overall air-to-air performance is 400 percent more effective than the previous generation of fighters. They were first ordered for the Royal Australian Air Force in 2009. The RAAF received its first two operational F-35As in 2014; they currently have 70 more on order. This limited edition **kit features** two marking options: 1. Royal Australian AF, Code: A35-002, A35-001 and 2. Royal Netherlands AF, Code: OT F-001, OT F-002.

02168 (Limited Edition) HSGS2168 Total Parts: 68 Skill Level: 3
Length: 8.58 in (218 mm) Wingspan: 5.82 in (148 mm)

1/72 EA-6B PROWLER “VMAQT-1” Radar about to be... jammed.

The four-seater EA-6B Prowler is one of the oddest aircraft in the American Armed Forces inventory. Its crew consists of a pilot and three electronic warfare officers responsible for jamming radar, disabling SAM batteries and generally wreaking havoc on the enemy's command and control equipment. From its introduction in 1971 until now, the Prowler has made an appearance in virtually every major American conflict despite the fact only 170 have ever been built. **Kit features** decals for two US Marine versions.

02169 (Limited Edition) HSGS2169 Total Parts: 83 Skill Level: 3
Length: 11.30 in (287 mm) Wingspan: 8.78 in (223 mm)

1/72 FW 190D-9 & ME 262A-1A

A manga-inspired spin on combat classics

Fans of Leiji Matsumoto's mangas and anime films are aware of his affinity for World War II aircraft. Nowhere is this more apparent than in "The Cockpit," which features several WWII aircraft, including the Fw 190D-9 and the Me 262-1a. His work isn't limited to the printed page – "The Cockpit" became an anime in 1993. This limited edition **kit combo** features two warbird kits: a Me 262A-1 and an Fw 190D-9, along with markings inspired by Leiji Matsumoto's "Black Knight of Berlin" battlefield manga, which was featured in "The Cockpit."

64727 (Limited Edition) HSGS4727 (2 Kits) Total Parts: (Per Kit): 41 & 51 Skill Level: 3
Length: 5.55 in (141 mm) Wingspan: 5.66 in (144 mm)
Length: 5.83 in (148 mm) Wingspan: 6.89 in (175 mm)

1/72 Su-33 FLANKER D "ACE COMBAT® SCARFACE"

Flight sim fury

The carrier-capable Su-33 made its "Ace Combat" debut in the series' second installment, released in 1997. The game's main character, Scarface One, flies the Su-33 for the fictional Ucean Nations Air Force. As the game progresses, players help Scarface One become a true combat ace. Future "Ace Combat" titles feature a squadron named after this popular character. This limited edition **kit features** display stand parts and markings inspired by the "Ace Combat" combat flight simulator series: 1. Ucean Nations AF, 37th AF, 18th FG, Special Tactical Unit Squadron, "Scarface."

Length: 12.04 in (306 mm) Wingspan: 8.11 in (206 mm)

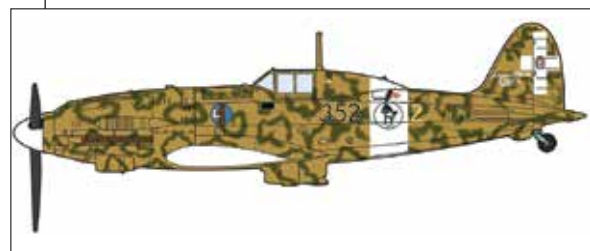

1/48 MACCHI C.205 VELTRO "155 GRUPPO"

The full bore Folgore

The Macchi C.202 Folgore helped eliminate the Italian Air Force's performance shortcomings, but the Italians knew they were still not packing enough punch to bring big fighters and bombers down. Their solution was to equip a substantially redesigned C.202 airframe with a powerful new DB 605 engine, two .50 cal (12.7 mm) machine guns and two 20mm cannons, creating the C.205. With that much muscle behind it, the Veltro was considered by its designers to be a match for the P-51 Mustang. Unfortunately for the Italians, they simply couldn't get enough Veltros in the air. Only 262 were produced. **Kit features** two sets of decals for "155 Gruppo".

07405 (Limited Edition) HSGS7405 Total Parts: 75 Skill Level: 3
Length: 7.28 in (185 mm) Wingspan: 8.70 in (221 mm)

1/48 MESSERSCHMITT Bf109E-4 JG77 BLITZ

Everywhere above the rest

Jagdgeschwader 77 fought everywhere: North Africa, Norway, over the Channel during the Battle of Britain and the Blitz, in Italy, in the Caucasus, over Greece, over Crete and the Mediterranean, and in the gray skies over the Soviet Union. Everywhere they went, the wings of Messerschmitt Bf 109s darkened the sky and Allied planes fell burning to earth. By May of 1942, over 2,000 kills had been claimed by JG77. As the war wore on, however, the best pilots of the unit were slowly eliminated by rising Allied air superiority. **Kit features** two sets of decals.

Length: 7.28 in (185 mm) Wingspan: 8.11 in (206 mm)

1/48 NAKAJIMA E8N1 TYPE 95 RECON SEAPLANE MODEL 1

Watchers over the water

Nakajima E8N1 Type 95 Seaplanes were used as spotters and recon aircraft for virtually all of the Japanese capital ships in the Second Sino-Japanese War and World War II. In an era before radar, they were the eyes and ears of the entire fleet. Spotting enemy ships and directing artillery fire were their main tasks, however they also frequently bombed enemy shipping and were used to chase off enemy scout planes. **Kit features** decals for a plane aboard IJN Battleship Kirishima plus two pilot figures. Separate photo-etched parts set available!

Bandai Gundam Wargreymon Digimon

Digital dino-might

Evolved from Tai's Agumon in the original Digimon, Wargreymon and his Dramon Killer gauntlets are perfect for bringing the biggest beast down—and for making your home or office display exceptionally astounding. In addition to his gauntlets, this Wargreymon is equipped with the Crest of Courage shield and a terra force attack effect part.

64583 BANS4583 Height: 5.51 in (140 mm)

Bandai Gundam Kamen Rider Agito Ground Form

Masked motorcyclists to the rescue

Insectoid in appearance and great on a motorcycle, the Kamen Rider series have been running for over forty years in Japan and have made an impact in America as well. Fans of the series as well as people interested in superheroes in general will love this cool display model.

96461 BANS6461 Height: 5.51 in (140 mm)

Bandai Gundam V2 Gundam Victory Gundam

Built to battle BESPA

Entrusting the defense of the entire planet to a thirteen year old boy and a gargantuan robot sounds like a really bad idea—unless that boy is Uso Ewin, and the robot is the Victory 2 Gundam. With this massive mobile suit, Uso is able to continuously stymie BESPA and halt their efforts to destroy the world. Build yours and become the protector of your slice of the planet.

66588 BANS6588 Height: 5.51 in (140 mm)

Bandai Gundam 1/144 High Grade Build Fighters Leopard Da Vinci Gundam

Bristling with Barrels

A customized version of the Gundam Leopard from Gundam Build Fighters Try appears in HG Form! Featuring remodeled proportions different from its original Gundam X design, it contains numerous mounting points over its body to be used for its weapons. Two hyper beam Gatling cannons, beam rifle, two missile pods, two dual beam cannons and eight runners are included.

196718 BANS6718 Height: 5.51 in (140 mm)

Bandai Gundam Nico Yazawa Love Live

Asian Idol

Nico has the strongest desire to become an idol out of everyone in μ 's (pronounced "Muse"), and has tirelessly worked in order to achieve her goal. She formed the Idol Research Club, which Honoka and her friends ask to use as μ 's base of operations. She has a tendency to act like a big shot and craves attention, but is deeply caring. Unlike the other members of the group, she has an idol persona, and tends to invoke her catchphrase, "Nico Nico Smile" with an accompanying pose.

97419 BANS7419 Height: 4.72 in (120 mm)

Dragon Models® 1/72 Sherman Tank M4A1 (76) W

Up gunned and ready for action

German tank designs were rapidly evolving—adding more armor, bigger guns, and better all-around performance at an astounding rate. America's answer was to keep the same tank design and add a 1mm larger gun with much-improved anti-tank performance. This update kept the Sherman competitive against the Panzer IV and Stug Assault guns in the crucial days of 1944. Though still no match for the heaviest German tanks, the 76mm gun enabled Shermans to stay in the line and keep the Allies moving forward. **Kit features** open/closed hatches, slide-molded turret and hull, detailed VVSS system, slide-molded 76mm gun, and bonus aluminum barrel.

DML7304 DMLS7304 Skill Level: 3

Dragon Models® 1/72 IJA Type 95 Ha-Go Light Tank Philippines 1942

Crafted to carve an empire

In 1935 the Type 95 was one of the most effective light tanks in the world—fully capable of keeping up with the infantry it was tasked with supporting, knocking out enemy hard points with its 37mm gun, and even tangling with opposing tanks. By 1941, however, tank design had left the Type 95 far behind. It was still being used in combat, though—frequently with success. American and British forces in the Pacific did not believe that tanks could operate in the dense jungle. They could, and the Ha-Go proved it. **Kit features** realistic weaponry, open/closed cupola, slide-molded lower hull, detailed suspension and sprocket wheels.

DML7394 DMLS7394 Skill Level: 3

Dragon Models® 1/72 M103A1 Heavy Tank

Built for the war that got away

The M103A1 was designed for a conventional, full-scale war between the US and the Soviet Union. They were designed with a powerful 120mm gun and immensely heavy armor so that they could combat the heaviest Soviet tanks head on. Fortunately, the Cold War stayed cold and the M103A1 stayed dormant until it was replaced in front line duties by the M1 Main Battle Tank. **Kit features** precision-engineered parts division and full decals.

DML7519 DMLS7519 Skill Level: 3

Minicraft® 1/72 B-24D USAAF Formation Ship

Leading the liberators

Organizing the massive flights of bombers into tight defensive formations and organizing them all for the long run into Germany was no easy task. To assist in gathering the groups—old, battle-damaged birds were painted in bright, garish colors and patterns to uniquely distinguish which squadron should follow which plane. Once all the bombers were in the air and off, these formation ships or “Judas Goats”, as they came to be called, would land and wait for the next mission. **Kit features** a B-24D formation ship with two marking options.

Minicraft® 1/144 C-130J-30 Super Hercules USAF

Legendary lifter

One of the world's largest and longest-flying military aircraft, the C-130R was introduced in the mid-fifties and is still in service today. It is capable of carrying multiple armored vehicles, seven pallets, 64 paratroopers, or roughly anything that weighs less than 45,000 pounds and can be crammed into the cargo bay. Although a transport aircraft first, the Hercules is also the only aircraft able to deliver the two heaviest non-nuclear weapons in the world—the “Daisy Cutter” and “MOAB”.

14700 MMIS4700 Total Parts: 80 Skill Level: Length: 9.5 in (241 mm)
Wingspan: 11 in (279 mm)

Minicraft® 1/144 Bf-110 Messerschmitt

All-purpose aggression

Messerschmitt Bf-110s were one of the few aircraft capable of fulfilling virtually every task that can be assigned to an aircraft. These twin-engine marvels flew night fighter, day fighter, bomber escort, bomber interception, ground attack, maritime patrol, and even recon missions. They were equipped with a bewildering array of weapons throughout their variants from simple rifle-caliber machine guns to under-wing 37mm autocannons and an assortment of bombs and rockets. Of the thousands of aircraft built, only two survive to today.

14720 MMIS4720 Total Parts: 25 Skill Level: Length: 3.25 in (83 mm)
Wingspan: 4.5 in (114 mm)

Minicraft P-47D USAAF with 2 Marking Options

Bringing the thunder

At 10,000 pounds empty—double the weight of a Spitfire—the P-47D was a behemoth of an aircraft. It was designed to be a juggernaut—heavily armed, heavily armored, and effective in high speed, high altitude attacks. It excelled at extremely high altitudes where other aircraft's performance drops off, and its heavy armor also made it exceptionally effective as a ground attack aircraft. Its eight .50 caliber machine gun armament was one of the heaviest weapons loads of any single-engine fighter.

14722 MMIS4722 Total Parts: 23 Skill Level: Length: 3 in (76.2 mm)
