Weight: 6.25lbs (2.83kg)

For additional items see a complete list at www.GPDealer.com

From the Experts:

The Axial RR10™ Bomber is not just another plastic tube chassis Wraith update...from all that Axial learned from building the industry's first all plastic tube chassis rig, we went back to the drawing board and this time we went with some inspiration from Randy Slawson, Bomber Fabrication's owner and two-time King of the Hammers Champion! From the drawing board and mountains of inspiration from the enthusiast, we went to the next level! While visually, this rig is a race replica of the Bomber Fab KOH rock racing rig, one of the unseen features is the front mounted battery tray under the hood making for easy access and weight right where you asked for it! This makes swapping the batteries in this rig a quick and easy process.

Long story short...

New generation tube chassis rock racer in two-time King of the Hammers Championship winning livery!

GET ON THE FAST TRACK TO DRONE FLYING SUCCESS!

XIRO®

Xplorer RTF allows modelers to equip the drone with their choice of camera and gimbal

Xplorer G includes a 3-axis, video-stabilized gimbal with vibration absorbers that works well with GoPro Hero 3 or 4 cameras (sold separately)

Xplorer V comes complete with 3-axis gimbal and HD 1080p video/14.4 megapixel still digital camera

XPLORER

XPLORER G

XPLORER V

All Product Features Include...

- Factory-installed brushless power system
- Wi-Fi® capable, 5.8GHz transceiver with holder for iOS or Android™ smartphone
- Pre-program your Xplorer to fly to and shoot video at up to 16 locations with the Waypoints system
- One button activates Takeoff/Landing and Return-to-Home
- GPS Auto-Pilot with Position and Altitude Hold & Hovering
- Three automatic fail-safes for additional peace of mind
- 3 skill settings — Beginner, Amateur and Professional — let you match the Xplorer's performance capabilities to your comfort level
- 3S, 5200mAh "Smart" LiPo battery — safer, more reliable and lasts longer
- Intelligent charger for Smart Battery pack and controller
- Spare props and tools
- Xplorer G and Xplorer V also feature a Wi-Fi® range extender and "Follow me" and "Circle around me" flight modes for shooting 360° selfies

XIRE0100 Xplorer RTF — Standard Edition
XIRE0200 Xplorer G with Gimbal
XIRE0300 Xplorer V with Camera and Gimbal

A NANO DRONE, COMPLETE WITH CAMERA!

protoTMX^{vid}
READY-TO-FLY NANO-SIZED DRONE W/CAMERA

PERFECT FOR
INDOOR FUN!

EASY TO FLY!

Available in 2 colors

- Measures less than 2-1/2" across
- Record your flights with the 480p video camera
- Fly with complete confidence — Auto-Upright self-corrects to keep you in control
- 2.4GHz radio allows for several Proto-X Vid drones to fly at the same time

Bright LEDs provide orientation for tracking the Proto-X Vid, day or night.

The Proto-X Vid's compact size makes it perfect for indoor flying fun!

Capture any moment on video!

Comes with everything you see here: 4-channel controller, USB charge cord, 4 spare blades, memory card and card reader.

ESTE52** Proto-X Vid Nano-Sized RTF Drone w/Camera
Diagonal dimension: 60 mm (2.36 in)
Weight: 17 g (.6 oz)
Requires: 2 "AAA" batteries

From the Experts:

It's small enough to fly anywhere indoors, while also shooting amazing videos! The Proto-X Vid has the same quality construction as the other drones in the Proto lineup, and is just as easy to fly. Know anyone besides yourself who would love a nano-size drone with a camera? The Proto-X Vid would make a great holiday gift!

Long story short...

With the Proto-X Vid you can do more than just fly indoors — you can capture the moment on video!

elanview

The Cicada comes with fully assembled drone with lightweight ABS shell and 3-axis gyro, charger, two flight batteries, spare propellers and screwdriver.

Two 7.4V 1000mAh rechargeable LiPo batteries provide plentiful power, along with the capability of up to 30 minutes of flight time.

From the Experts:

The Cicada is a Great Planes exclusive, and it packs a lot of value into a compact drone. There are several different ways to pilot it using a device, and brushless motors deliver the power for smooth flying and stable hovering. It's just the right size to fly virtually anywhere indoors or out, and the built-in camera takes amazing videos and still photos!

Long story short...

The versatile Cicada adapts to the way you like to fly, and has the features you want most in a drone!

FLY THIS DRONE FOR ITS AWESOME VERSATILITY!

The Form500 has a substantial lifting capacity, enabling it to lift more than a kilogram of payload!

Remove a single screw from each arm to fold down for convenient transport and storage.

Camera not included.

Everything you see here is included with the FORM500 — and this utility drone is ready to fly just minutes after you take it out of the box.

- 100% preassembled and ready to perform any task
- Fly confidently with the Tactic TTX810TS radio system
- The four propellers are self-tightening
- Comes with a camera mount
- Power is provided by a 3S 5000mAh flight battery; a Li-24 balancing charger gets you back on the job in a hurry
- Lots of built-in flight assistance and safety features, including:
 - ✓ Intelligent orientation control
 - ✓ Return-to-home
 - ✓ Altitude hold
 - ✓ GPS lock
 - ✓ Low voltage return-to-home and auto-landing

FORM 500

Ready-To-Fly 500-Class Utility Drone

HMXE0863 FORM500 500 Class Utility Drone RTF
 Diagonal dimension: 500 mm (19.7 in)
 RTF Weight (w/battery): 1774 g (62.6 oz)
 Requires: Four "AA" batteries

HELI MAX®

From the Experts:

It's more than just a sport drone or aerial photography platform — MUCH more! The FORM500 adapts to what YOU want your drone to do, whether it's carrying a camera or some other payload or accessory. It exhibits stable flight characteristics and exceptional handling in a 500-class quad.

Long story short...

The FORM500 is a workhorse drone, designed for endless possibilities in transporting any number of accessory kits.

RULE THE STREETS WITH MUSTANG MUSCLE

BAJA 5R ON-ROAD

1/5 Scale Gasoline-Powered 1970 Ford Mustang Boss 302 RTR

- Heat up the pavement with the Baja 5R-inspired Ford Mustang Boss 302!
- The drivetrain is based on the Baja 5R desert buggy, so you know it's built super-tough; the suspension is customized for on-road performance
- Hear and feel the raw power of the pre-installed Fuelie 23cc 2-stroke gasoline engine
- An 8,000 rpm racing clutch delivers lots of wheel-spinning torque for top-end speeds
- Drive for up to 45 minutes before re-filling the 700cc fuel tank
- The detailed, officially licensed 1970 Ford Mustang Boss 302 body is factory-finished
- 8-spoke racing wheels add vintage looks; real rubber Tarmac Buster tires offer superior gripping power
- Just fill 'er up with standard gasoline and roll — all batteries, plus a charger, are included!

Width: 12" (305mm)
Height: 8.3" (210mm)
Wheelbase: 14.2" (360mm)
Ground Clearance: 1.7" (43mm)
Weight: 6.65lbs (3kg)

For additional items see a complete list at www.GPDealer.com

From the Experts:

The Yeti™ SCORE® Trophy Truck® RTR is THE ONE that Axial has been working towards for a long time! We've always wanted to build a Trophy Truck, but we first had to build a successful platform. For authenticity, it had to be solid rear axle versus the commonly accepted independent suspension all the way around. Some would consider this "going backwards." But Axial didn't just accept what the establishment said was the only way, we wanted true scale looks with the functionality to match. When we delivered the Yeti™ Rock Racer with its IFS front end and solid rear axle, we knew then we had the key ingredients to deliver the vehicle of our dreams - our very own solid rear axle trophy truck! And to top it off we went straight to Roger Norman, CEO/President of SCORE International for his blessing and for official licensing.

Long story short...

*Everyone dreams of driving a trophy truck!
We bring dreams to reality, just in scale form.*

Products for everyone!

STRONGER & LIGHTER = FASTER

DETC410^{V2}

1/10 Scale 4WD Electric Touring Car Kit

- Optimize your driving skills with a touring car that's as serious about winning as you are!
- Approximately 10 grams lighter, for better power-to-weight ratio and faster laps
- Experience more precise handling, with stiffer V2 materials
- Spend more time on the track with all-new hardware mounting holes and redesigned materials that increase durability
- Fast and easy tuning options for increased performance on all tracks
- Retains many cutting-edge innovations from the DETC410, the elite touring car engineered to meet — and defeat — the competition at the highest levels

TDRC0152 DETC410v2 1/10 Scale 4WD Electric Touring Car Kit

Length: 14.4 in (365 mm)

Width: 7.3 in (185 mm)

Weight (approx.): 3 lbs (1350 g)

Wheelbase: 10.0-10.3 in (254-261 mm)

Requires: 2-channel radio, servo, brushless motor and ESC, tires, wheels, battery, charger, pinion gear, and body

From the Experts:

Sometimes shaving mere seconds off of your lap times can make all the difference. The DETC410v2 takes a proactive approach to building a faster, more responsive touring car by looking at every possible facet of improving the car's speed, handling and durability. The engineering involved was exhaustive and comprehensive — and well worth it!

Long story short...

No detail was too small in researching ways to improve every aspect of the DETC410v2's performance!

1/24 BRAD KESELOWSKI #2 BLUE DEUCE FORD FUSION

On track for victory

Sometimes controversial, but always competitive, Brad Keselowski is one of the leading stars in stock car racing. His racing achievements speak for themselves: 2010 Nationwide Champion and 2012 Sprint Cup Champion. He is one of a select few who have won races in all three of NASCAR's major racing categories. In 2010, Brad joined the famous Team Penske racing group. At the helm is Roger Penske, whose teams have won championships in most of the major racing categories. **Kit features** detailed racing interior and metal axles.

85-1472 RMXS1472 Total Parts: 35 Skill Level: New 2 Length: 8.19 in (208 mm)

1/24 JOEY LOGANO #22 SHELL PENNZOIL FORD FUSION

Grow the Logano legend

Joey Logano has the distinction of being the youngest driver to win races in both the Nationwide series and the Sprint Cup series. He made the transition to a full-time Sprint Cup driver in 2009. In that first year, he won Rookie of the Year honors. Then, in 2013, he joined Team Penske and he is at the top of his game. In 2014, Joey was one of the four Chase finalists who had a shot at winning the Sprint Cup Championship. **Kit features** detailed racing interior and metal axles.

85-1473 RMXS1473 Total Parts: 35 Skill Level: New 2 Length: 8.19 in (208 mm)

1/24 PORSCHE 918

Accelerated automotive elegance

Originally planned as a concept car, Porsche decided that a production 918 would demonstrate their advancements in hybrid technology. The power in the 918 comes from three different power systems working together. Sitting behind the driver is the main engine, a 4.6 liter V-8. Next, there is a 156 bhp electric motor mounted over the rear axle. Finally, there is a 129 bhp electric motor for additional power to drive the front wheels. The weight of these power units is distributed 43/57% front to rear. **Kit features** detailed motors and engine, open or closed top, and positionable front wheels.

85-4329 RMXS4329 Total Parts: 138 Skill Level: New 5 Length: 7.5 in (190.5 mm)

1/35 LEOPARD 2A5/A5NL

Up-armored for added aggression

The Leopard 2 is one of the most able main battle tanks in the world today. Despite well over forty years in service, these vehicles still provide able fire support against insurgent forces and are the cutting edge of the armed forces of many countries. The 2A5 variant incorporates additional arrowhead-shaped armor panels which increase the effective thickness of the turret front. The A5NL is a specialized design for the Netherlands. **Kit features** rotating turret, adjustable gun, and decals for four versions.

03243 RVLS3243 Total Parts: 242 Skill Level: 3 Length: 10.87 in (276 mm)

1/72 AVRO SHACKLETON Mk.3

Superior sub sinker

Designed after the end of WWII to help fill the gap left by returning Lend-Lease bombers, the Avro Shackleton found itself searching for an old ally during the Cold War. Assisting it in its task was a bewildering array of sensors that could pick up everything from radar signatures to diesel emissions. Once detected, the Shackleton could engage subs with 20mm cannons, bombs, depth charges, and even nuclear depth charges. After forty years of service, the Shackleton was withdrawn in 1991.

04920 RVLS4920 Total Parts: 180 Skill Level: 4 Length: 14.5 in (369 mm)
Wingspan: 20 in (508 mm)

1/48 TORNADO GR. Mk.4

The RAF's upgraded, up-rated strike aircraft!

One of the most versatile NATO weapons platforms around, the Tornado GR 4 is equipped with ALARM-guided missiles and large 2,250 liter drop tanks. Tornados are famous for their long-range capabilities, and the GR4 makes a big impact when it gets there with Paveway laser-guided bombs. **Kit features** fully detailed cockpit and ejection seat, separate slats, detailed undercarriage, moveable swing-wings, detailed jet exhaust, moving wing pylons, 1 ECM pod, 2 large auxiliary fuel tanks, 2 standard auxiliary fuel tanks, and decals for two RAF versions.

04924 RVLS4924 Total Parts: 280 Skill Level: 3 Length: 14.17 in (360 mm)
Wingspan: 11.26 in (286 mm)

1/32 UH-72 A LAKOTA

Training to fight terror

Purchased in 2006 to replace the ageing fleet of American LUHs, the UH-72A is primarily used for Homeland Security operations as well as training and light transport. It is a militarized version of the Eurocopter EC145, one of the premier executive transport helicopters in the world. Though it has frequently been suggested as the basis for the Armed Aerial Scout role, it is not rated for combat operations, partially due to poor hot and dusty conditions performance.

04927 RVLS4927 Total Parts: 175 Skill Level: 5 Length: 13 in (331 mm)

1/144 FLOWER CLASS CORVETTE (EARLY)

WWII Atlantic Escort

It's over 3,000 miles from New York to London, and, in 1942, vessels were in danger from Nazi wolfpacks virtually every inch of the way. Allied naval forces were stretched thin across the entire globe, and millions of tons of supplies had to be moved. The Flower Class Corvette was developed as a cheap convoy escort. They helped support the over-stretched destroyer forces, keeping a watchful eye on the waves.

05132 RVLS5132 Total Parts: 330 Skill Level: 5 Length: 17 in (434 mm)

1/24 MANTGX XLX

Heavy-hauling heaven

MAN makes some of the most modern semi trucks in the world, many of which come with the amenities of a small home for the long-haul truckers. Its distinctive bluff appearance and cab-over-engine configuration makes it instantly recognizable on the road.

07426 RVL57426 Total Parts: 140 Skill Level: 5 Length: 9.7 in (247 mm)

1/24 SCHLINGMANN HLF 20 (MANTGM EURO 6)

Where's the fire?

When lives are on the line you can't afford even momentary breakdowns, so Schlingmann focuses on delivering the highest quality machines to firefighting services across the European Union. The HLF 20 operates as a fire-fighting platform with a rescue ladder, fire pumps, and stowage room for all the gear firefighters need! These engines are also equipped with first-responder equipment for dealing with traffic accidents on the autobahn and tense scenes everywhere.

07452 RVL57452 Total Parts: 250 Skill Level: 5 Length: 14.3 in (363 mm)

1/200 P-8A POSEIDON "VP-45 PELICANS"

Next-gen naval aircraft

Introduced in November 2013, the P-8A Poseidon is the latest multi-mission maritime aircraft traditionally flown by the US Navy. In contrast to the piston engine-powered P2V Neptune and the turboprop-powered P-3 Orion, the P-8A is propelled by twin high-bypass turbofan engines. Each engine is equipped with an electric generator to power the P-8A's extensive array of onboard electronics. This limited edition **kit features** two marking options: 1. US Navy VP-45 "Pelicans" CO, Code: LN434, 2015 and 2. US Navy VP-45 "Pelicans," Code: LN440, 2015.

10814 (Limited Edition) HSGS0814 Total Parts: 82 Skill Level: 3 Length: 7.8 in (197.5 mm)
Wingspan: 7.5 in (190 mm)

1/72 LANCASTER B Mk.1 "NO.617 SQUADRON SPECIAL MISSION"

Redesigned for bigger bombs

At 12,000 pounds each, Tallboy bombs needed specially-modified Lancasters to transport them to target—and the Tallboys were actually the lighter of the two special weapons England deployed to stop the V-weapons program. At 22,000 pounds, "Grand Slam" bombs were the most powerful conventional bombs deployed in WWII. These weapons were designed to damage hardened structures through earthquake-like vibrations. They were used to great effect against submarine pens, fortifications, and tunnels. **Kit features** a Tallboy and Grand Slam bomb plus the Lancaster with decals for three versions.

02177 (Limited Edition) HSGS2177 Total Parts: 190 Skill Level: 3
Length: 11.8 in (300 mm) Wingspan: 17 in (431.5 mm)

1/72 F/A-18E SUPER HORNET "VFA-27 ROYAL MACES"

Heavy hitters of Carrier Air Wing Five

For fifty years VFA-27 "Royal Maces" have flown America's aircraft in defense of American interests. They are forward based at Naval Air Station Atsugi. The F/A-18E Super Hornets the Royal Maces fly are some of the most reliable and effective aircraft in the US arsenal. They incorporate a 20mm cannon and hardpoints for several air-to-air and air-to-ground munitions. **Kit features** special decals for USN USS George Washington VFA-27 "Royal Maces".

02178 (Limited Edition) HSGS2178 Total Parts: 118 Skill Level: 3
Length: 10 in (255 mm) Wingspan: 7.2 in (184 mm)

1/72 P-3C ORION "US NAVAL AVIATION CENTENNIAL"

Celebrate a century of naval aviation

On January 28, 1911, Lt. Theodore G. "Spuds" Ellyson became the first-ever US Naval aviator. In honor of the centennial of naval aviation in 2011, the US Navy decorated select P-3C Orions with special "100th Anniversary" markings. VP-9, the Golden Eagles and Fleet Air Reconnaissance Squadron 2 (VQ-2) were two of the squadrons who took part in the celebration. This limited edition **kit features** two marking options: 1. US Navy VP-9 USN Aviation 100th Anniversary, Code: PC9, 2011 and 2. US Navy VQ-2 USN Aviation 100th Anniversary, Code: 21, 2011.

02179 (Limited Edition) HSGS2179 Total Parts: 153 Skill Level: 3
Length: 19.4 in (493 mm) Wingspan: 16.5 in (420 mm)

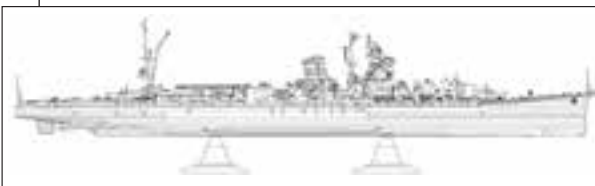

1/350 IJN LIGHT CRUISER YAHAGI

"BATTLE OF LEYTE GULF"

Central to the effort

Yahagi was part of the "Center Force" in the Battle of Leyte Gulf when the Japanese tried to draw apart the American Navy and destroy it in detail. Thanks to a mixture of good seamanship, radar, and blind luck, however, the US Navy managed to defeat each of the attacking forces while protecting the landing forces. Despite the heavy combat it was involved in, Yahagi sustained almost no damage at Leyte and was expended with the rest of the fleet in Operation Ten Go. **Kit features** searchlight parts and photo etched parts.

40092 (Limited Edition) HSGS4092 Total Parts: 496 Skill Level: 3
Length: 19.6 in (498.5 mm)

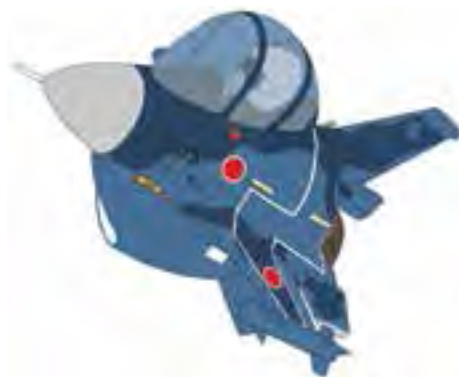

EGG PLANE F-2 FIGHTER

The JASDF's multirole must-have

The Mitsubishi F-2A's highly maneuverable wing design is taken from the proposed F-16 Agile Falcon tactical fighter. An onboard electronics package with advanced Active Electronically Scanned Array (AESA) radar makes it virtually impossible to detect in the air. **Kit features** three marking options: 1. F-2A: JASDF 3rd AW, 3rd Sq., Code: 505 (03-8505), Misawa AB; 2. F-2A: JASDF 3rd AW, 8th Sq., Code: 524 (43-8524), Misawa AB and 3. F-2A: JASDF 8th AW, 6th Sq., Code: 530 (43-8530), Tsuiki AB.

60137 HSGS6137 Total Parts: 17 Skill Level: 1
Length: 3.3 in (85 mm) Wingspan: 4.1 in (105 mm)

1/48 SCALE AH-64E APACHE GUARDIAN

Upgraded fire power

The AH-64 Apache has been unleashing blistering firepower upon its enemies since 1983, but the E-variant only emerged in 2012. This new variant incorporates new technology, the ability to control UAVs, more powerful engines, and new composite rotor blades. Couple all that with the AH-64's vaunted ability to withstand major battle damage while delivering precision strikes, and there's no question the AH-64E is the most lethal variant yet. This limited edition **kit features** new exhaust pipe and sensor parts plus two sets of US Army decals.

07414 (Limited Edition) HSGS7414 Total Parts: 316 Skill Level: 3
Length: 14.4 in (367 mm)

1/48 LAVOCHKIN LaGG-3 "JAPANESE ARMY"

The Soviets' best, put to the test

The Lavochkin LaGG-3 was distinguished by wood-laminate construction, which added durability, plus two 12.7 mm Berezin UBS machine guns that delivered more burst mass than any other Soviet fighters of its era. The Imperial Japanese Army managed to get their hands on one LaGG-3, which was used exclusively for testing purposes through the remainder of the war. This limited edition **kit features** one marking option based on the LaGG-3 that was captured by the IJA for testing in 1942.

07417 (Limited Edition) HSGS7417 Total Parts: 67 Skill Level: 3
Length: 7.2 in (184 mm) Wingspan: 8 in (204 mm)

1/720 ADMIRAL GRAF SPEE

Out to sea with the Graf Spee

Just before the commencement of hostilities with England and France, Admiral Graf Spee—a massive heavy cruiser—was shipped into the south Atlantic to commence raiding. In so doing, Germany hoped they could starve Britain. For the first months of the war the ship was massively successful. She sank three times her register in merchant shipping and successfully fought off three British cruisers single handedly. However, trapped in Uruguay with moderate damage and little ammunition, it was decided to scuttle the ship and save the crew. **Kit features** full decals.

0502S ITAS0502 Total Parts: 162 Skill Level: 2 Length: 10.15 in (258 mm)

1/72 MC-130H COMBAT TALON I

Special Ops standout

An innovation on the massive cargo-carrying C-130, the MC-130 is equipped with a large terrain-following radar in the nose section to provide pilots with an accurate picture of their surroundings for flying low-level night missions. This enables them to evade radar, insert and extract teams, and be gone before the enemy knows they were there. Things are rarely that simple in practice, but the MC-130 has an outstanding record of reliability and mission success. **Kit features** three sets of decals.

1369 ITAS1369 Total Parts: 242 Skill Level: 3 Length: 16.6 in (422 mm)
Wingspan: 22.1 in (561 mm)

1/24 VOLVO® FH16 520 SLEEPER CAB

The future of heavy hauling

The Swedish-designed Volvo FH series is one of the most efficient and powerful trucks to hit the market in recent decades. In fact, it received the "Truck of the Year" award for the 12-liter engine version in 1994, the year after it was introduced. The FH16 is the 16-liter engine version, fitted in the same aerodynamic chassis as the FH12. Though the engine is a carry-over from earlier models, it features multiple improvements from the 12-cylinder and exceptional power. **Kit features** full decals.

3907 ITAS3907 Total Parts: 260 Skill Level: 3 Length: 9.4 in (240 mm)

1/72 BATTLE OF BASTOGNE DECEMBER 1944

Battlefield recreation

Outnumbered by as much as 5 to 1, starving, freezing, and low on ammunition, American forces inflicted one of the most shocking reversals in modern military history on the encircling German forces. Every attack by the armored spearheads of the Germans was thrown back with little more than sheer tenacity. With this set, you can relive the heroism of the 101st Airborne and all America's heroes. **Kit features** German and American soldiers, Flak 88, Pak 40, American and German tanks, wrecked house, walls, ruins, and battlefield accessories.

6113 ITAS6113 Total Parts: 378 Skill Level: 2

1/72 ITALIAN 90/53 GUN WITH CREW

Anti-aircraft and anti-tank weapon

The much less known companion to the German 88 was the Italian 90/53. This powerful gun was one of the most successful anti-aircraft weapons of the war, with an effective ceiling of 39,000 feet. It was also a highly efficient anti-tank weapon, capable of destroying virtually any Allied tank at long ranges. Fortunately for the Allies, Italian heavy industry was simply in no position to produce weapons of this caliber in great numbers—only 500 were produced in its 4-year production run.

1/35 AS 42 SAHARIANA

Smash through with the Sahariana

Designed for the unique challenges faced by the Italian Army in North Africa, the Sahariana was a swift and mobile gun platform quite capable of making a mess of other reconnaissance vehicles. Unfortunately for the Italians, it was also complicated and expensive to produce. By the time it reached the front in anything approaching significant numbers, the tides of war had firmly shifted against the Axis. **Kit features** full decals and two armament options: a 20mm Breda anti-aircraft gun and a 47mm anti-tank gun.

**ITALERI® 1/9 TRIUMPH**

Win the war with a TRIUMPH

World War I and World War II saw an expanded need for the motorcycles of the Triumph Company. At first, they were used as quick transportation for couriers. Later, WWII would see motorcycles pressed into service for Military Police, couriers, reconnaissance teams, and motorized battalions. Through it all, the British Triumph Corporation delivered reliable cycles, some examples of which could hit 100mph on level ground. Triumph cycles also made their way into popular culture through numerous depictions in movies with famous actors. **Kit features** nine decal sets.

**ITALERI® 1/72 1/4 TON 4X4 TRUCKS**

Accelerate your army!

In the accelerated lead up to WWII, automotive designers were given just eleven days to submit proposals for a very stringent set of specs demanded by the government. After many reverses, they got the Jeep—over 600,000 of them, in fact. It was the single most maneuverable and versatile vehicle to hit the field of war since the horse and it massively boosted the ability of Allied forces to conduct operations. **Kit features** two jeeps with three sets of decals.

Minicraft Models 1/72 PBM-5A Mariner USN WWII

Riding wind and waves

Long range patrols over the Pacific and Atlantic oceans required aircraft with exceptional performance and the ability to protect themselves without fighter escorts. The Martin PBM-5 Mariner was capable of sustained flights of up to 3,000 miles. It carried a load of 4,000 lbs of bombs or depth charges for dealing with U-Boats and small craft. For defense and strafing, the Mariner carried a total of eight Browning .50 caliber machine guns.

Kit features recessed panel lines, detailed twin engines with positionable cowl flaps and control surfaces, and markings for the PBM-5 "Nightmare".

Minicraft 1/144 EC-135C USAF w/2 Marking Options

Watching the world burn

In the event of a full scale nuclear exchange—with all ground control centers knocked out of operation—the EC-135C aircraft of "Operation Looking Glass" were tasked with transmitting launch codes to waiting ICBMs for a retaliatory "Second Strike". From 1961 to 1998 at least one EC-135C was aloft 24 hours a day, 7 days a week, 365 days a year. Waiting. Three more EC-135Cs were kept on standby in Maryland to transport the President out of DC. **Kit features** recessed panel lines, re-fueling boom, poseable landing gear and unique EC-135 communications equipment. Decals will feature the EC-135C when operating with the Strategic Air Command.

Moebius® 1/350 Lost In Space Derelict

Mystery and majesty in outer space

The first colonizers to leave the surface of the planet and head for Alpha Centauri could never have prepared themselves for what they found when the hyperdrive blasted them into the depths of space, off course. Especially not when one such discovery is a derelict spacecraft, left here by an unknown entity at an unknown time. Friend? Foe? A way home? You decide, when you build the Lost In Space Derelict! **Kit features** detailed hangar doors that may be assembled in open or closed position, and a miniature, in-scale Jupiter 2T, the kit includes a display stand and a bonus, optional printed hangar bay interior.

MPC® 1/48 Scale Space: 1999 Eagle Transporter

Protect Moonbase Alpha from aliens!

If you're a fan of classic science fiction, you'll no doubt recognize the Eagle Transporter from the TV series "Space: 1999." During its brief but influential run on British TV, "Space: 1999" starred Martin Landau and Barbara Bain as inhabitants of a lunar-based research center launched into deep space following a thermonuclear explosion. **Kit features** spring action landing foot pads, pilot figure and measures almost 22 in. in length. Combine with the AMTS0014 below for more detail.

MPC825 MPCS0825 Total Parts: Nearly 300 Skill Level: 2 Length: 22 in (559 mm)

AMT® Eagle Deluxe Accessory Pack

Great addition to the Space: 1999 Eagle Transporter

Authentically detailed add-on parts modelers the ability to take their new 22" Space:1999 Eagle Transporter (MPCS0825) model kit to the next level. These machine-turned aluminum parts feature exquisite quality that can't be approached in injected styrene. The parts are precision tooled to exact in-scale detail and have been polished to a semi-gloss sheen. **Kit includes** replacement parts for the four primary landing gear struts, four vertical takeoff and landing engine bells, four VTOL lab pod engine bells and four main engine bells.

0014 AMTS0014 Total Parts: 16 Skill Level: 2

MPC® 1/8 Honda 750 Four Motorcycle

The original superbike

An overhead camshaft, 750cc inline four-cylinder engine gave the Honda 750 Four a top speed of 125mph. They made waves on international race circuits and subsequently took the market by storm—with some sources listing as many as 400,000 sold worldwide.

Kit features vinyl tubing for motor detail and brake lines, color decals with option striping, retro deluxe packaging and over half of the kit's parts are chrome plated.

Tamiya® German Horch Type 1a

Standard issue

The Horch 1a was developed in accordance with the pre-WWII "Einheits Program," which intended to streamline vehicle production. The soft-top vehicle could carry 8 crew members, and had an 80hp V8 engine. Its range was 400km with a full, 120-liter tank. It had an oversized radiator to help it keep its cool in North Africa. Around 2,900 were produced between 1937 and 1940; the Type 1a was used heavily in the early stages of WWII.

32586 TAMS2586

Tamiya® 1/35 US Light Tank M24 Chaffee

A long time coming

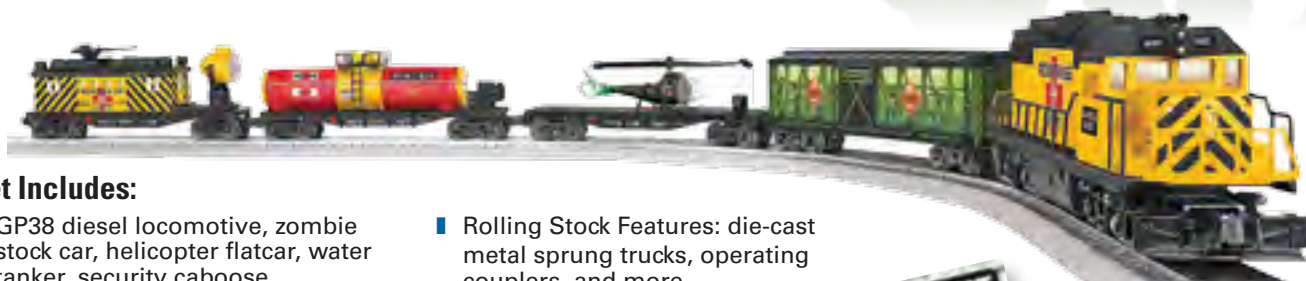

The US Armed Forces fought through virtually all of WWII using the M3 Stuart Light tank—a design that was obsolete well before 1941. It was only in 1944 that the M24 Chaffee made it to Europe, and once there it took time to be deployed in numbers. Nevertheless, crews of the Chaffee loved it—especially its improved suspension and 75mm gun. The type fought on through the end of WWII, and served in Korea as well. **Kit features** an Italeri model with figures and accessories from Tamiya.
