Fly with friends

One-button flip!

ESTE44\*\* Proto-N Nano-Sized RTF Drone  
Diagonal dimension: 31 mm (1.2 in)  
Weight: 8 g (0.28 oz)  
Requires: 4 "AAA" batteries

**KNOWFLY**  
BEFORE YOU  
Unmanned Flight Safety Guidance  
[www.knowbeforeyoufly.org](http://www.knowbeforeyoufly.org)

Measuring 1-1/2 inches diagonally and weighing just over a quarter of an ounce, the Proto-N is one of the tiniest drones ever designed.

Fly the Proto-N in your favorite color: Green, Black, Red and White.

## From the Experts:

Talk about portable flying fun! The Proto-N is so tiny you can store it inside the transmitter you fly it with. With just a few minutes of practice anyone can be piloting this super-small drone — and looking like a pro while doing flips and barrel rolls. You've got to see it to believe it!

## Long story short...

*The Proto-N is the truly "take anywhere" drone that flies indoors when bigger drones are grounded!*

NEWPRODUCT

# FLIP-IT, FLY-IT FUN!

## DROMIDA

### Verso

Ready-To-Fly Inversion UAV Drone

- Flip the drone upside down and back with just the push of a button
- Advanced Flight Assistance Technology eliminates control reversal issues that can make inverted flying confusing
- Fly within your comfort zone: three selectable flight modes match up to your particular skill level

- The 3.7V 350mAh LiPo battery provides 5+ minutes of flight on a full charge
- Tough enough to take the routine dings that indoor flying dishes out

The drone you can  
**fly upside down**

You get all this: Ready-To-Fly Verso drone, Q205 transmitter, 3.7V 350mAh LiPo battery, USB charger, (4) "AA" batteries, extra blades, joystick and gamer-style stick ends.

Press the Invert/Flip button once to fly or land inverted, twice to bring the Verso upright again.

Available in four colors!

DIDE10\*\* Verso Inversion UAV Drone RTF  
Diagonal dimension: 110 mm (4.3 in)  
Weight: 34 g (1.19 oz)  
Requires: nothing!

**KNOWFLY**  
BEFORE YOU  
Unmanned Flight Safety Guidance  
[www.knowbeforeyoufly.org](http://www.knowbeforeyoufly.org)

### From the Experts:

Take the Verso up in the air, and see how much fun flying a drone can be! With just the push of a button you can switch from regular flight and inverted flight. And when the Verso is upside down, flight assistance technology eliminates the confusing control reversal that inverted flight usually entails.

### Long story short...

Add a whole new dimension to drone flight with the nimble, no-holds-barred Verso Inversion UAV!

# HUBSAN HAS THE DRONE

Drones are HOT, and Hubsan has 'em! Check out this lineup of flyer-friendly, ready-for-action UAVs, choose the one you like best, and get in on the fun of piloting a drone today!

## H107D+ FPV X4 PLUS DRONE RTF

The top-of-the-line in drone technology, with an HD camera featuring First Person View.

HBNE0050

The battery "snaps in" to place on the H107D+ (and H107C+) for quick installation.

Enjoy enhanced picture reliability and range with 5.8GHz video transmission.

Get real-time, First Person View (FPV) images on the transmitter's 4.3" LCD screen.

# YOU'RE LOOKING FOR

## H107P X4 PLUS DRONE RTF

Build confidence in your drone flying skills with the economical, super-stable H107P.

HBNE0070

Shown with rubber feet, sold separately.

- Also shares many of the same functions as the H107D+ and H107C+: Flips and Rolls, Altitude Hold, Indoor/Outdoor flight, USB charge cord and bright LEDs
- Blade covers help guard against less-than-perfect landings
- All three UAVs measure 113 mm (4.45 in) across diagonally

## H107C+ X4 CAMERA DRONE RTF

A value-packed, easy-to-fly drone, with the bonus of a camera for video adventures.

HBNE0060

- Has many of the H107D+'s features, including 360° capability, Altitude Hold, Indoor/Outdoor flight, USB charge cord and bright LEDs for night flying

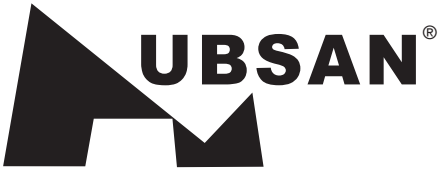

The lightweight controller is shaped to fit your hands for maximum comfort and control.

### From the Experts:

Whether you're just starting out or ready to move up, Hubsan offers quality-built drones that fit right into your skill and price level. If you just want to fly, there's the H107P. If using your drone to shoot video appeals to you, the H107C+ fills the bill. More advanced pilots looking for FPV capability will love the H107D+. Whichever one you choose, you win!

### Long story short...

Let Hubsan show you how easy and enjoyable flying a drone can be!

# ALL-OUT AMPHIBIOUS ADVENTURE

## Seawind

Receiver-Ready Select Scale Brushless Seaplane

**Rx-R**  
RECEIVER-READY

- Take off from the grass and land on water — or lift off from the lake and touch down on solid ground
- Get in the air quicker, thanks to the preinstalled brushless motor, ESC and servos
- Lots of scale touches, including Fowler flaps, detailed cockpit and working lights
- A twist-and-lock wing attachment system makes the Seawind Rx-R easy to transport, with no tools required
- Being Receiver-Ready, the Seawind assembles quickly, while offering flexibility on receiver, battery and charger options

### FLZA4054 Seawind Select Scale Brushless Seaplane Rx-R

**Wingspan:** 56.6 in (1438 mm)

**Wing Area:** 421 in<sup>2</sup> (272 dm<sup>2</sup>)

**Wing Loading:** 20.9 oz/ft<sup>2</sup> (63.7 g/dm<sup>2</sup>)

**Weight:** 61 oz (1729 g)

**Length:** 44.3 in (1125 mm)

**Requires:** 6+ channel radio and receiver, 3S 11.1V 2100mAh 25C LiPo battery and balancing LiPo charger

A built-in Speed Reduction Unit adds scale realism to the mechanical retracts. A water rudder deploys when the landing gear is up, and withdraws when the gear is down.

Open the canopy to admire the detailed cockpit interior, and to access the spacious battery compartment.

Working navigation and landing lights

Scale Fowler flaps give the Seawind Rx-R amazing authenticity while improving overall aerodynamics.

### From the Experts:

The Seawind's truly amphibious design means you don't have to choose between different environments, like with other seaplanes. Both land AND water can be your runway/landing strip! Plus, it flies like a dream and stands out from the other aircraft with its graceful looks.

### Long story short...

For a truly unique flying experience, nothing tops the Select Scale Seawind Rx-R!

# GROW YOUR FLYING SKILLS WITH THIS GIANT

**AVISTAR**™  
Almost Ready-to-Fly 30cc/EP Sport Trainer

Functional flaps are built into the wing, and are already pre-hinged. Use them to make your plane capable of slower takeoffs and "light as a feather" landing speeds.

Reduce noise with a brushless electric motor system. You'll also enjoy "instant" power — ideal if you plan to add floats and fly off water.

Equip your Avistar with gasoline power and you'll have a sport flyer that's economical to fly and requires minimal maintenance.

Expand your flying experiences with exciting accessories!

GPMA1676 Float Kit  
GPMA4568 Nose Gear Conversion Set  
GPMA4561 Nose Gear Wheel Pant  
GPMA4567 Sailplane Tow Release

Plane shown with optional floats. Main gear and steerable tailwheel assembly are included.

- From forgiving flight to sport aerobatics, with gasoline or electric power and several optional accessories, this plane is ready for almost anything!
- Built for strength and durability from top-quality balsa/ply, and highlighted by a fiberglass cowl and wheel pants, clear windows and a black ABS cockpit floor
- A spacious fuselage provides plenty of room for installing your power system and radio gear
- Access the battery compartment for fast, easy LiPo changes through the magnetically secured hatch

## GPMA1675 Avistar 30cc/EP Sport Trainer ARF

**Wingspan:** 90.5 in (2300 mm)  
**Wing Area:** 1448 in<sup>2</sup> (93.4 dm<sup>2</sup>)  
**Weight:** 16.5-17.5 lb (7.5-7.9 kg)  
**Wing Loading:** 26-28 oz/ft<sup>2</sup> (79-85 g/dm<sup>2</sup>)  
**Length:** 77.25 in (1962 mm)  
**Requires:** 4-6 channel radio with minimum 5 high-torque servos (additional standard servo for throttle when using gas power), 30-35cc gasoline engine OR 63-63-250kV electric motor, 60A ESC and two 4S 14.8V 5000mAh OR two 5S 18.5V 5000mAh LiPo batteries and charger

## From the Experts:

The Avistar 30cc/EP is perfect for giant-scale sport training — and from there you can use it to try optional flaps, floats and even sailplane towing. It's also the ideal introduction to gasoline engines or large electric power. And while it's definitely impressive in the air, this ARF is easy to fly for less experienced pilots, with power and maneuverability to satisfy seasoned fliers.

## Long story short...

Add the Avistar 30cc/EP to your hangar and you'll have an ARF that's as versatile as it is fun to fly!

**Length:** 22.4" (570mm)  
**Width:** 11" (280mm)  
**Height:** 9" (230mm)  
**Wheelbase:** 14.75" (375mm)  
**Ground Clearance:** 2.8" (72mm)  
**Weight:** 6.25lbs (2.83kg)

For additional items see a complete list at [www.GPDealer.com](http://www.GPDealer.com)

- Full tube frame chassis with front mounted battery tray
- WB8 HD Wild Boar™ driveshafts
- Bonus AR60 rear output differential cover

**From the Experts:**

The Axial RR10™ Bomber is not just another plastic tube chassis Wraith update...from all that Axial learned from building the industry's first all plastic tube chassis rig, we went back to the drawing board and this time we went with some inspiration from Randy Slawson, Bomber Fabrication's owner and two-time King of the Hammers Champion! From the drawing board and mountains of inspiration from the enthusiast, we went to the next level! While visually, this rig is a race replica of the Bomber Fab KOH rock racing rig, one of the unseen features is the front mounted battery tray under the hood making for easy access and weight right where you asked for it! This makes swapping the batteries in this rig a quick and easy process.

**Long story short...**

**New generation tube chassis rock racer in two-time King of the Hammers Championship winning livery!**

# TWO AWESOME BUGGIES, ONE

# ULTIMATE GOAL: VICTORY

## DEX210F

DEX210F 1/10 Scale 2WD Electric Front-Motor Buggy Kit

Length: 15.75 in (400 mm)

Width: 9.9 in (250 mm)

Wheelbase: 11.2-11.37 in (285-289 mm)

Requires: 2-channel radio, motor, ESC, steering servo, pinion gear, tires, shock oil, 2S LiPo battery and compatible charger

TD102037 TDR0015

## GO FORWARD, AND GET FASTER

- Pushing the motor further forward and lowering the CG allows the DEX210F to stick to today's high-grip track surfaces like glue
- Testing has shown that these modifications can shave over a second off of your lap times — that can be the difference between winning and losing!
- Two center driveshafts are included, one for use in the ROAR-required saddle pack layout and the other for the faster shorty pack configuration

## DEX410v5

DEX410v5 1/10 Scale 4WD Electric Buggy Kit

Length: 16 in (407 mm)

Width: 9.9 in (250 mm)

Wheelbase: 11.38-11.7 in (289-298 mm)

Requires: 2-channel radio, motor, ESC, steering servo, pinion gear, tires, shock oil, 2S LiPo battery and compatible charger

TD102036 TDR0124

## 4-WHEEL DRIVING MADE EASIER

- Enjoy smoother power delivery and better traction with the DEX410v5's center differential with adjustable slipper clutch
- A longer wheelbase and wider chassis creates consistent stability in all conditions
- Revised rear geometry adds rear grip, which translates into more forgiveness

## BOTH BUGGIES ARE PACKED WITH CUTTING -EDGE INNOVATIONS!

### An R/C industry first: the Multi-Axle Driveshaft!

The patent-pending Multi-Axle Driveshaft is an effective way to "square up" the vehicle's power, by changing the length of the driveshaft. Both kits come with a medium length 60mm driveshaft; optional Short (57.5mm) and Long (62.5mm) driveshafts fit in different holes in the same axle.

### Re-position the motor without the need for any option parts!

With the Easy Mesh system the motor is attached to a plate that slides into the motor mount. The plate is then locked in place by screws top and bottom.

### Change the battery layout to redistribute weight and improve handling!

Both chassis are designed to accept saddle packs or shorty packs in multiple configurations.

### Mount any 12mm wheels on the front and rear hubs!

These kits accept standard wheels, so your options are greatly expanded. But don't worry: fittings are included for mounting existing Team Durango wheels as well.

### Put less wear and tear on the driveshaft!

A molded composite blade is incorporated into the driveshaft design, and has been proven to reduce stress on the metal parts. 8 blades are included with each buggy: that's significant savings over replacing the driveshaft or slipper outdrive.

### Adjust wing mounts in a snap!

Just two screws secure the wing mounts, which feature an opposable wedge for quickly adding or removing downforce.

### From the Experts:

Get behind the wheel of the DEX210F or DEX410v5, and you'll be a permanent resident on the podium! That's because Team Durango engineers have left no stone unturned in finding new ways to squeeze even more speed, handling and durability out of these top-of-the-line racing machines. The proof is in their performance!

### Long story short...

After a couple of laps around the track with the DEX210F or DEX410v5, you'll be a believer!

## NEW PRODUCT

## IMPROVING UPON A PROVEN WINNER

DEX210<sup>V3</sup>

1/10 Scale 2WD Electric Buggy Kit

**An R/C industry first:  
the Multi-Axle Driveshaft!**

The patent pending Multi-Axle Driveshaft is a very effective way to "square up" the DEX210v3's power, by allowing for different length driveshafts. A medium length 62.5mm driveshaft is included with the kit; an optional 65mm (long) driveshaft fits in different holes in the same axle.

- Continuing the evolution of the DEX210, which staked its claim to fame by winning the 2014 European Championships!
- Refinements include improvements to the buggy's overall looks, durability and tunability
- Designed to compete and win against rear- and mid-motored buggies on low and medium grip track conditions
- Mount any 12mm wheels on the front and rear hubs
- Retains the patented rear and mid, 4- and 3-gear layout options

**TD102042 TDRC0012 DEX210v3 1/10 Scale  
2WD Electric Buggy Kit**

**Length:** 14.5 in (368 mm)

**Width:** 9.6 in (245 mm)

**Wheelbase:** 10.8-11.1 in (274-282 mm)

**Requires:** 2-channel radio, motor, ESC, steering servo, pinion gear, tires, shock oil, 2S LiPo battery and compatible charger

***From the Experts:***

The upgrades found on the DEX210v3 may seem subtle at first, but out on the track you'll really appreciate the technology that Team Durango engineers have invested in this buggy. Having more adjustability at your fingertips will pay off when you encounter unforeseen conditions that'll have the other drivers scratching their heads.

***Long story short...***

***With the DEX210v3 you'll be the best-prepared competitor at your track!***

# THESE AWESOME OFF-ROADERS COME WITH \$50 IN FREE MERCHANDISE!

With cutting-edge innovations such as the patent-pending sliding gear mesh, Team Durango's 1/8 scale 4WD racers are dominating the competition. Whether you prefer the cat-quick acceleration of the electric DEX8 buggy or DEX8T truggy, or the realistic growl of the nitro-powered DNX8, you can look forward to owning the podium. And for a limited time you'll enjoy another bonus when you purchase one: \$50 in FREE MERCHANDISE!

Through February 29, 2016, purchase any of the 1/8 scale kits shown below and you'll receive a certificate worth \$50 that you can redeem at the store where you bought your vehicle. It's a great way to stock up on batteries, fuel, parts, or any other quality R/C products from over 35 top brands!

## 1/25 2013 CAMARO® ZL1™

### Style and speed supremacy

The 2013 Camaro ZL1 is the most technologically advanced Camaro ever made. In 1969, the original ZL1 was a custom-built COPO ordered car with an all-aluminum 427 c.i. engine. It was a bold move for its time. Stepping ahead more than 40 years, the 2013 ZL1 is even more robust, with a 6.2 liter supercharged V-8 pumping out 580 horsepower. **Kit features** choice of stock or custom hoods, detailed engine, stock or custom wheels, and soft black tires.

85-4370    RMXS4370    Total Parts: 60    Skill Level: 4    Length: 7.5 in (190 mm)

## 1/25 FORD MUSTANG GT

### Mustang muscle for miles and miles

Since its start in 1964, the GT has been the top of the line performance model of the famous Mustang. Fifty years later, the 2014 is the final year of the 5th generation of Mustangs. The Mustang still provides the best "Bang for the Buck" of any performance car around. The proof is in the performance! Just look at its statistics: 0 to 60 mph in 4.7 seconds and lapping the 1/4 mile in just over 13 seconds. **Kit features** stock and custom hoods, detailed engine, stock and custom wheels, and soft black tires.

85-4379    RMXS4379    Total Parts: 60    Skill Level: 4    Length: 7.5 in (190 mm)

## 1/25 FOOSE™ CORVETTE® STINGRAY™

### Get fully vetted

In their own way, both Chip Foose™ and the Corvette® Stingray™ are something special. While Chip Foose is America's leading custom car designer, the Corvette® is one of America's leading sports cars. In 2014, Chevrolet® introduced the 7th generation of the famous Corvette, with a stunning new design. Now Chip Foose takes it one step further in a way that only he can. **Kit features** custom wheels, detailed engine, Foose inspired painted body, and soft black tires.

85-4397    RMXS4397    Total Parts: 57    Skill Level: 3    Length: 6.9 in (176 mm)

## 1/25 FOOSE™ CHALLENGER SRT8

### Challenge the course

The original Dodge Challenger was Chrysler's entry into the "Pony Car" muscle car wars of the 1960s. The Dodge Challenger of today, while having very familiar styling, is a very different car. Its technology is very modern and so is its performance, 0 to 60 mph in 4 seconds. Now Chip Foose™, the famous car designer, has made the Challenger even better. **Kit features** Foose custom wheels, detailed HEMI V-8, and Foose-inspired painted body.

85-4398    RMXS4398    Total Parts: 45    Skill Level: 3    Length: 7.9 in (200 mm)

## 1/72 MV-22B OSPREY "US MARINE VIP" Semper Fly

Combining the speed of an aircraft with the maneuverability of a helicopter, the MV-22B Osprey makes a great choice for transporting senior White House personnel. It's able to fully realize HMX-1's mission—transporting ranking VIPs from wherever they are to wherever they need to be quickly and safely. So far, the Osprey is used mainly on "Green Side" missions—carrying VIPs, but not the President or VP. In the future, the Osprey may be transferred to "White Side" missions—transporting the highest ranking individuals in America. **Kit features** a display stand and two HMX-1 decals.

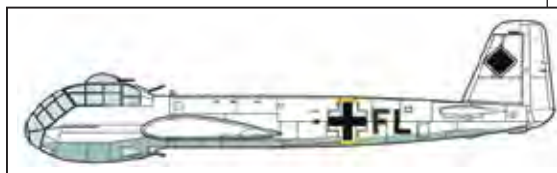

02159 (Limited Edition) HSGS2159 Total Parts: 140 Skill Level: 3  
Length: 7.3 in (245.5mm) Wingspan: 13.3 in (339mm)

## 1/72 TYPE 95 & TYPE 97 FIGHTERS (2 KITS) IJAAF strike craft

Long before WWII began, the twin-wing Type 95 and Monoplane Type 97 were in the air over "Manchukuo" and the rest of China. They fought against the Chinese, the Soviet Union, and the American Volunteer Group in China. By 1940 they were considered obsolete but some served to the end of WWII, even if only on one-way trips as kamikazes. This limited edition **kit combo features** a Type 95 and a Type 97 with two sets of decals each.

02176 HSGS2176 Total Parts: 63 + 41 Skill Level: 3  
Wingspan: (Type 95): 5.55 in (141mm) Wingspan: (Type 97): 6.22 in (158 mm)

## 1/72 JUNKERS JU 188F LONG RANGE RECON Keeping an eye out

The Ju 188 was a longer range, increased payload version of the Ju 88. It was ready for action in 1944—at roughly the exact same time that Germany no longer needed long range bombers and was desperately in need of fighters. Failing fortunes of war saw the "F" variant of the Ju 188 become a reconnaissance aircraft and the Ju 188 in general pushed into roles it was not designed for. Limited edition **kit features** camera window and drop tanks parts plus decals for two versions.

02180 (Limited Edition) HSGS2180 Total Parts: 124 Skill Level: 3  
Length: 8.7 in (220 mm) Wingspan: 12 in (305 mm)

## 1/24 JTCC TEAM SCHNITZER BMW 318i "BTCC CHAMPION" Bringing it to the British

The British Touring Car Championship (BTCC) has run top-notch races since 1958. In touring car races, vehicles are tested as much on endurance and handling as simple speed—making them some of the most demanding races in the world. Overall, the race has been dominated by British drivers, but in 1983 the German BMW 318i driven by Joachim Winkelhock came through as the winner. **Kit features** decals BMW Team Schnitzer Racing Team, car number 1—Driver: Joachim Winkelhock/Car No. 2 Driver: Steve Soper.

20271 HSGS2271 Total Parts: 70 Skill Level: 3 Length: 7.3 in (185 mm)

### 1/700 FULL HULL MYOKO/NACHI IJN HEAVY CRUISERS

#### Gigantic guns for Pacific runs

When it was laid down, Myoko was the largest and most heavily armed cruiser in the world. Myoko and her sister ship Nachi carried a main battery of ten 8-inch guns, supplemented by a secondary armament of eight 5-inch guns and numerous Type 93 Long Lance Torpedoes. Myoko served from the first Shanghai Incident through the end of WWII. Along the way it participated in some of the most pivotal battles of the Eastern Theatre. Nachi also served with distinction from the twenties and through World War Two up until 1944. Unlike the lead ship of its class, however, Nachi was damaged repeatedly and eventually sunk in the Philippines just off Corregidor. Both **kits feature** a full hull version of a Myoko-Class Heavy Cruiser

43157/43158 HSGS3157/3158 Total Parts: 208 Skill Level: 3 Length: 11.5 in (291 mm)

### 1/450 IJN AIRCRAFT CARRIER SHINANO

#### Sixty-thousand ton secret

Shinano was built and launched in absolute secrecy. She set out for the first time with construction crew still aboard and without a load of aircraft. At her launch she was the largest aircraft carrier ever made, built on the basis of an eight-hundred seventy foot-long battleship hull. The pall of secrecy was drawn so tightly around her that nobody in US Naval Intelligence believed the vessel existed—even after it was sunk by the submarine USS Archer Fish. **Kit features** five carrier-based planes and full decals.

40153 HSGS4153 Total Parts: 281 Skill Level: 3 Length: 23.3 in (592 mm)

### 1/48 "STRATOSPHERE FIGHTER" NAKAJIMA KI44-II TYPE 2 SHOKI (TOJO)

#### Aggression at altitude

Compared to the Ki-43 and the Zero, the Ki44 was about as maneuverable as a thrown brick. However, it was faster in a climb, faster in a dive, and much more heavily armed than either of its predecessors. It was also the only aircraft in the Japanese arsenal that could confront the B-29 at its cruising altitude with any hope of success. As testament to the ferocity of the conflict: over 1,000 were produced and none exist today. **Kit features** a 40mm cannon and decals for two aircraft from Leiji Matsumoto's "The Cockpit".

64729 (Limited Edition) HSGS4729 Total Parts: 83 Skill Level: 3  
Length: 7.3 in (185.5mm) Wingspan: 7.75 in (197mm)

## 1/35 MECHATROWEGO NO. 04 "WARM AND COOL" (SHINONOME LABORATORY) (TWO KITS)

### Cute-tastrophe

The cute but cool MechatroWeGo robots are taking the modeling world by storm! Now they're back and they've brought a few friends! **Kit features** two Mechatros and three figurines. Three molding colors, moveable joints, boy and girl figures, and cartoon characters Hakase, Nano, and Sakamoto. Plus, a "racing" decal set is available separately (HSGR5227).

64730 HSGS4730 Total Parts: 173 (79 x 2 + 15 figure parts) Skill Level: 2

## 1/72 F-14A TOMCAT "ACE COMBAT WARDOG"

### Join Wardog squadron and send the Yuktobanians back

The skies above Osean are blue and full of screaming metal. As a member of "Wardog Squadron" it is your responsibility to stop the Yuktobanians in their tracks, push them back, and protect the people of Osean. Fortunately for you, you get an F-14A Tomcat—one of the top fighters from the seventies to the nineties, and still in service with second-line air forces around the world to this day. This limited edition **kit features** a display stand and decals for Wardog Unit for "ACE COMBAT 5".

52135 (Limited Edition) HSGS5235 Total Parts: 195 Skill Level: 3  
Length: 10.5 in (266mm) Wingspan: 10.6 in (271mm)

## 1/35 HITACHI DOUBLE ARM WORKING MACHINE ASTACO NEO

### Double duty done right

With both a grabber/digger and a sniper arm, the Astaco Neo is one of the more versatile construction tools ever designed. This **kit features** a finely detailed cockpit interior, mesh sheet for the cockpit front screen, soft tracks and cables, posed operator figure, moveable arms, moveable machine body, molded in color for easy completion with no paint required.

54004 HSGS5404 Total Parts: 192 Skill Level: 3 Length: 8.3 in (211 mm)

## EGGPLANE TBF/TBM AVENGER

### Midway's magnificent torpedo bomber!

Tested just before the outbreak of WWII, the TBF Avenger was first deployed during the Battle of Midway in 1942. The Avenger was the heaviest single-engine aircraft of its time, and it was also the first to feature a compound wing folding mechanism, which helped maximize space on aircraft carriers. Sturdy and reliable, it was later adapted for use as a transport, trainer and bomber in civilian service. **Kit features** an egg-plane version of the TBF/TBM Avenger with two sets of decals.

60138 HSGS6138 Total Parts: Skill Level: 3 Length: 3.8 in (96 mm)  
Wingspan: 5.3 (135 mm)

### 1/20 MOON/SPACE HUMANOID UNMANNED INTERCEPTOR

#### On the hunt

In the dark, futuristic world of Maschinen Krieger, most of Earth's population was burned to ash by World War IV. As life returns, war erupts. The power-suited soldiers of the IMA struggle against the roving robots of the SDR. Innovation and adaptation is the key to the IMA's victory. Technology and numbers are the keys to the SDR's domination. This limited edition **kit features** parts and decals for assembling either Vega or Altair.

64109 (Limited Edition) HSGS6409 Total Parts: 180 Skill Level: 3  
Length: 6 in (153 mm) Width: 3.3 (84 mm)

### 1/450 IJN CARRIER-BASED AIRCRAFT SET

#### Winged wonder weapons

Aircraft delivered many of the decisive blows of the Pacific War. From Pearl Harbor to the bombings in Hiroshima and Nagasaki, the long range, striking power, and relatively low cost of aircraft made them the weapon of choice for combats in the far-flung reaches of the Pacific Ocean. A combination of dive bombers like "Grace", torpedo bombers like "Jill", "Myrt" recon, and fighters like "George" and the "Type 52" gave Japan a well-balanced and lethal striking arm. **Kit features** eighteen total aircraft: Zero Type 52 (6), "Grace" (3), "Jill" (3), "Myrt" (3), and "George" (3).

72156 HSGS7156 Total Parts: 78 Skill Level: 3

### 1/48 NAKAJIMA KI-43-III HAYABUSA "48TH FLIGHT REGIMENT"

#### Ferocious but largely forgotten

The Mitsubishi A6M Zero gets all the attention and all the credit, but it was the Nakajima Ki-43 that actually shot down more Allied pilots than any other Japanese aircraft. It was maneuverable, fast, and lethal. Like its more famous compatriot, however, the Ki-43 suffered from light armor and a lack of self-sealing fuel tanks. These two features together made the Hayabusa highly vulnerable to damage from enemy fighters. Limited edition **kit features** new cowlings, exhaust, oil cooler, wheel, and fuel pipe resin parts, plus decals for two versions.

07418 (Limited Edition) HSGS7418 Total Parts: 82 Skill Level: 3  
Length: 7.3 in (186 mm) Wingspan: 8.9 in (226 mm)

### 1/48 F-4EJ PHANTOM "OLD FASHION"

#### An American design for Japanese air power

Phantom II aircraft were the last aircraft to be flown by aces in the twentieth century—carrying numerous pilots to the five kill mark and beyond. They set sixteen world speed and altitude records that stayed in place for decades. They were America's most commonly produced supersonic aircraft. Though they have been phased out of use by the American military, many of these exceptional craft still provide air reconnaissance for the JASDF. This limited edition **kit features** six sets of JASDF markings.

07419 (Limited Edition) HSGS7419 Total Parts: 133 Skill Level: 3  
Length: 15.8 in (402 mm) Wingspan: 9.7 in (246 mm)

## ITALERI® 1/48 RF-4E PHANTOM II

*The ghost in the skies*

The RF-4E was a tactical reconnaissance version of the Phantom II responsible for observing and reporting troop movements, weapons sites, and other items of strategic significance. Its extremely high speed, high service ceiling, and large equipment load made it ideal for penetration missions in defended airspace. These aircraft were removed from front line service with US forces in 1996, but they are still active with smaller air forces around the globe. **Kit features** German, Italian, Japanese, and Greek decals.

2737S

ITAS2737

Total Parts: 100

Skill Level: 3

Length: 15.7 in (400mm)

Wingspan: 9.8 in (250mm)

## Plastic Models

## Atlantis Models EVTFS 5" Lighted UFO Silver Edition

*Attention Earthlings:*

Remain in your homes. Make no attempt to resist the assimilation. Your planet is under quarantine until your threat level can be assessed. The "Earth" is under occupation until further notice. Any resistance will be met with immediate liquidation. You have been warned. **Kit features** a light-up Earth Versus the Flying Saucers-style UFO. Kit features two ways to build (skyhook or ground assault), plus easy Twist-tite assembly, a display stand with cardstock backdrop, and pulsing LED lights with battery.

1005S

AANS0005

Skill Level: 1

5 in diameter (127 mm)

## Dragon Models 1/35 MIM-104B Patriot Surface-To-Air Missile (SAM)

*Securing the skies*

This 1/35 scale Black Label model kit is impressive in size and detail. This extremely accurate depiction of this massive combination of truck, trailer and missile launcher **kit features** launch or travel position builds. The M901 Launching Station can be posed with the missiles elevated and/or rotated for firing at the correct 38° angle and with the trailer stabilizers extended. The antenna and generator are included, too. For modelers looking to launch into something absolutely stunning, this Patriot PAC-1 combination is simply unbeatable!

3558

DMLS3558

## Dragon Models 1/35 Vietnam War Infantry Weapons

*Unending war, unyielding weapons*

For over a decade, war raged in Southeast Asia. A war that had begun with surplus military equipment from the end of WWII escalated into one which saw state of the art infantry weapons deployed against a largely unseen foe. At the center of it all were the M-16 and the AK-47. Supported by the squad-level M-60 machine gun, single-shot grenade launchers, disposable anti-tank weapons, grenades, shotguns, pistols and even knives.

3818

DMLS3818

## Dragon Models 1/48 Luftwaffe Ground Crew/Equipment

### *Keeping the krieg aloft*

Pilots get all the attention, but it was the ground crew that really decided the outcome of conflicts. Aircraft, especially vintage aircraft, require constant maintenance to keep flying. In addition, they must be armed, fueled, and protected on the ground. A crack ground crew could perform maintenance on aircraft quickly and get pilots back out on sorties multiple times in a day. Continuous attrition of trained ground crews and pilots in the "Battle of Britain", the invasion of Russia, and the Allied bomber offensive ground the Luftwaffe down to nearly nothing.

5532

DMLS5532

## Dragon Models 1/35 German Signal Troops

### *Can you hear me now?*

Coordinating aircraft, infantry, tanks, artillery and more was a tough job in WWII. An even tougher one was running all the telephone and telegraph lines needed to make those communications possible—and deciphering the Army's coded radio transmissions. These operations were carried out by the German Signal Corps or "Nachrichtentruppe". From running across a combat zone with a wire wheel strapped to their back, to transmitting the Führer's personal correspondence from the bunker in Berlin, the Signal Corps handled everything.

6053

DMLS6053

## Dragon Models 1/700 USS Independence Aircraft Carrier

### *Pacific power projection*

Independence Class vessels were laid down as cruisers, but converted into carriers as the need for naval aircraft increased. The comparatively small, fast Independence launched its complement of 45 aircraft into fights off Rabaul, the Philippines, and Okinawa before being used in nuclear tests and finally scuttled off the West coast of California. **Kit features** clear flight deck, photo-etched hangar bay, radio tower, crane, and SK radio plus AA guns, transparent aircraft, and full decals for USS Independence, USS San Jacinto, and USS Monterey.

7054

DMLS7054

## Dragon Models 1/700 USS Lake Erie CG-70 Ticonderoga Class

### *Guided Missile Cruiser*

As a Ticonderoga Class vessel, the Lake Erie carries over 122 missiles. Perhaps her most interesting role, however, is not in launching missiles, but in shooting them down. Lake Erie served as a testing platform for exoatmospheric weapons interception—a very convoluted way of saying: it shoots down nukes. This capability would allow the Ticonderoga Class to become extremely effective defensive as well as offensive vessels. **Kit features** full and waterline hull options, new 5 inch guns, and intricate detail.

7142

DMLS7142

## Dragon Models 1/72 AAVP-7A1 with Up-Gunned Weapon Station

### *Clear the beach*

Amphibious assaults are some of the most costly and dangerous of all types of operations. To make them work, you need every edge you can get. That's where the AAV comes in. The Amphibious Assault Vehicle is a tracked landing vehicle with enough armor to stop small arms and shell fragments. The upgraded weapons station with a .50-cal and MK-19 automatic grenade launcher was added in the late eighties. Despite previous plans for a new model, the AAV is currently slated to be in service until 2030. **Kit features** attachment points for add-on armor, smoke generator, weapons station, stow brackets, and full decals.

7237

DMLS7237

## Dragon Models 1/72 Tiger 1 (Mid Production) with Zimmerit

*Get stuck on our armored vehicles*

Zimmerit was a distinctive-looking paste applied in ridges to German tanks in 1943 and 1944. It was designed to prevent magnetic mines from adhering to German vehicles. The irony being that only Germany used quantities of magnetic mines. No mid-war Nazi vehicle quite looks right without it, so Dragon has produced this intricate 1/72 scale Tiger I with the distinctive ridging of Zimmerit to spare you hours of work with sculpting putty. **Kit features** new hull, slide-molded barrel, metal exhaust covers, and full decals.

7251

DMLS7251

## Dragon Models 1/72 M3A2 Bradley Infantry Fighting Vehicle

*A new "ERA" of model!*

Up-armored with Explosive Reactive Armor (ERA) panels for enhanced survivability in urban warfare scenarios, the M3A2 served in Iraq and is currently being exported to Saudi Arabia and South Korea. Despite the extra weight of the ERA panels, the M3A2 carries the same 25mm Bushmaster auto cannon and anti-tank TOW missiles of all Bradleys. In Desert Storm this lethal combination allowed the Bradley to destroy more enemy fighting vehicles than the Abrams it was meant to accompany. **Kit features** new armored commander's station, open/closed hatch and ramp, TOW launcher, photo-etched parts, and decals.

7333

DMLS7333

## Minicraft 1/16 1931 Ford Roadster Hot Rod

*Road Trip!*

In terms of luxury or comfort, not much could be said for the windowless, roofless two-seater Ford Model A Roadster, but it was really, really fast. Without all that extra weight and drag from a roof, the Roadster could get more speed from the same engine. Hot rod enthusiasts loved the speed, the low price, the easy access to spare parts, and the ease with which these cars could be modified, upgraded, and turned into real road burners. **Kit features** open engine compartment showing flathead V-8, plus custom parts, opening jump seat/doors, poseable steering and custom wheels.

11240

MMIS1240

Total Parts: 144

Skill Level: 2

Length: 9 in (229 mm)

## Minicraft 1/144 He 111 with Two Marking Options

*Strategic strike craft*

As a medium bomber, the He 111 excelled at getting to targets quickly with up to 4,000lbs of bombs aboard. Early in the war it demonstrated top-tier capabilities, but as the war drug on its light defensive armament and speed limitations led to more and more unsustainable losses. In the Battle of Britain, especially, the inability of German fighters to protect bomber formations caused many to be damaged or downed far from friendly bases. **Kit features** three marking options.

14721

MMIS4721

Total Parts: 42

Skill Level: 2

Length: 4.5 in (114 mm)

Wingspan: 6 in (152 mm)

## Minicraft 1/144 L-188 Electra

*Top turboprop*

One of the first top turboprop airliners built in the United States, the Electra boasts impressive performance from high altitude airstrips and short runways. Its short wings and massive propellers were its greatest feature—giving it increased performance—but they were also its major downfall. Propeller oscillation could overstress the wings and literally tear them off the airframe. Even after this problem was fixed, a lack of confidence in the model limited the type to freight hauling. A derivative of this aircraft is the P-3C Orion, one of the longest-serving US Navy aircraft.

14723

MMIS4723

Total Parts: 52

Length: 9 in (229 mm)

Wingspan: 8 in (203 mm)

## Moebius® 1/8 1966 Robin

*Holy beloved anachronisms!*

For a whole generation, the campy, humorous Robin of the 1966 television series is the only real Robin. As the wise-cracking sidekick to the caped crusader himself, Robin helped biff, bop, and pow his way through a fair share of villains and criminals. **Kit features** a Jeff Yagher sculpted 1/8 scale model of Robin with a batcave rock display base and nameplate.

951 MOES0951 Total Parts: 35 Skill Level: 3 Height: 9.5 in (241 mm)

## Moebius® 1/8 1966 Penguin

*Classy corruption at its finest*

Where other villains from the franchise are typically insane, disfigured, and irredeemably evil, Penguin is an altogether different breed of classy criminal. His criminal capers are focused on profit rather than mindless mischief and he himself dresses in formal attire. That's not to say he isn't dangerous, however. Penguin is consistently rated amongst the most cunning and dangerous of the Super Villains. **Kit features** a 1/8 scale sculpture of Penguin with batcave rock display base and nameplate.

953 MOES0953 Total Parts: 41 Skill Level: 3 Height: 9.5 in (241 mm)

## Moebius® 1/8 Bride and Monster Finished Polystone

*Love beyond death*

Frankenstein created the Monster and was forced by the Monster to create the bride. The resulting two characters are some of the most instantly recognizable creatures of the horror genre. Here, they are **expertly built and pre-painted** in an impeccable 1/8 scale resin sculpture. Fans of horror movies and classic films will be thrilled by the attention to fine detail on this immaculately executed model.

2928 MOES2928 Height: 10 in (254 mm)

## Polar Lights® 1/8 Wicked Witch of the West Resin Figure

*Icon of an era*

The Wicked Witch of the West is pure malevolence in the minds of millions. Her iconic role in "The Wizard of Oz" was so powerful that it has spawned an entire genre of spinoffs, re-interpretations, and merchandising. She is consistently rated as one of the most recognizable villains of all time. This resin representation is the ideal homage to everyone's favorite H2O-averse broomstick riding witch. **Kit features** a crystal ball with Dorothy and her pesky friends, plus replacement hands to hold the broomstick.

POL903/06 PLLS0903 Total Parts: 25 Skill Level: 2 Height: 10 in (254 mm)

## Polar Lights 1/72 King Kong Resin Figure

*Hide your leading ladies*

Fresh off the silver screen comes KING KONG! The 8th wonder of the world! The terror of Tinsel Town! The preeminent primate on planet Earth! This resin figure is fully assembled and ready to be painted. Display your admiration for the biggest, burliest gorilla to fill the frame in the last eighty years with this exceptionally detailed model. **Kit features** iconic 1933 King Kong with T-Rex base and dramatic pose.

POL923/04 PLLS0923 Total Parts: 5 Skill Level: 3 Height: 9 in (229 mm)

## Tri-Stage Triumph!

Comanche-3 takes you to the stratosphere!

**Skill Level 3**

More advanced kits with laser-cut wood fins and parts, unfinished body tubes, detailed designs, and plastic or balsa nose cones. Requires moderate skills in rocket construction and finishing—assembly may take a few days.

### Comanche-3™

**Accelerate to altitude**

**Length:** 41 in (104.1 cm)

**Diameter:** .98 in (25 mm)

**Weight:** 2.5 oz (70.9 g)

**Max. Altitude:** 2500 ft (762 m)

**Features:** laser-cut wood fins and waterslide decals

**Recommended Engines:** (2 or 3 Stage): Booster Stage: C11-0, D12-0. 2nd Stage: B6-0, C6-0. 3rd Stage: B4-4 (first flight), B6-4, B6-6, C6-5, C6-7. (Single Stage): B4-4 (first flight), B6-4, C6-5.

**ESTT7245**

**Long story short...**

**Take a ride into the sky with the triple-stage Comanche-3!**
