# A COMPLETE CAMERA DRONE THAT'S WAY COOL!

## DROMIDA VISTA™ FPV

Ready-To-Fly 251 mm First Person View Drone

- No separate viewscreen or expensive headset required — just your smartphone and the DroneView app!
- The Tactic DroneView digital HD FPV camera's anti-vibration mount means sharp video and crisp photos
- Store photos and video on the 4GB micro memory card, or download data directly via Wi-Fi
- Fly with confidence in one of four flight modes: easy, normal, advanced and expert
- A three-axis gyro and three accelerometers provide superior stability
- Use the auto-flip button to show off your pro-style piloting skills\*
- LED lights aid in tracking and orientation

\*with camera removed.

DroneView  
Mobile App

The included smartphone holder holds your smartphone at the optimum viewing angle, leaving both hands free for precise control.

DIDE04\*\* Vista FPV UAV Drone RTF  
Diagonal: 251 mm (9.8 in)  
Weight: 136 g (4.79 oz)  
Requires: Android or Apple device and DroneView app (downloadable for free from Google Play Store or App Store)

Available in four eye-catching colors!

You get all this with the Vista FPV:

- Fully assembled, Ready-To-Fly drone
- Tactic® DroneView Wi-Fi HD FPV mini camera
- SLT radio system
- 4GB micro memory card
- LiPo battery and USB charger
- Transmitter smartphone holder
- "AAA" batteries
- Extra set of blades
- Screwdriver

### From the Experts:

With everything the Vista FPV can do, it's sure to be your favorite drone, whether it's your first or your fifth! The Vista FPV's Tactic DroneView Wi-Fi HD mini digital camera captures photos and 720P video in real time — and stores them on the included 4GB micro memory card. Download the DroneView app and use your smartphone to control the camera, and fly easily indoors or out with four flight modes to choose from!

### Long story short...

See how easy and exciting flying can be from a first-person point of view with the Vista FPV!

# READY TO ROCK THE COMPETITION!

## RS4 SPORT 3

Vaughn Gittin Jr. 2015 Ford Mustang  
RTR Spec 5 4WD Electric

Check out the performance upgrades you'll find on the RS4 Sport 3 chassis!

- Threaded oil shocks
- Double wishbone suspension
- Sealed metal gear diffs
- Enclosed pinion and spur gear
- Hook-and-loop battery strap
- Enclosed receiver case
- High-traction tires
- Composite ball bearings

115126 HPID1226 RS4 Sport 3 Vaughn Gittin Jr. Mustang Spec 5 4WD RTR  
Length: 16.9 in (431 mm)  
Width: 7.4 in (190 mm)  
Height: 4.9 in (125 mm)  
Wheelbase: 10 in (255 mm)  
Requires: (4) "AA" batteries

- Get out in front — and stay there — with the RS4 Sport 3's powerful Firebolt 15T motor and waterproof SC-3SWP2 speed control
- The full-time four-wheel drivetrain is sealed to keep gears safe from track hazards
- Fine-tune steering and traction with the adjustable battery box
- Stand out at any track with the licensed 2015 Ford Mustang body in Vaughn Gittin Jr.'s signature colors

### From the Experts:

It's lean, it's loaded, and it's ready to hit the streets right out of the box! HPI's latest RS4 Sport 3 chassis is tricked out with all the goodies you could ask for — and the sleek Ford Mustang body that replicates Vaughn Gittin Jr.'s full-size racer is nothing short of intimidating!

### Long story short...

Run wild and free with this RS4 Sport 3 Spec 5 Ford Mustang racer made famous by Vaughn Gittin Jr.!

# ASSOCIATED'S MOST REFINED TOURING CAR YET

## TC7 FACTORY TEAM

1/10 Scale 4WD Electric Touring Car Kit

TC7s swept the Modified podium at the 2015 R.O.A.R. Paved On-Road Nationals!

Rick Hohwart

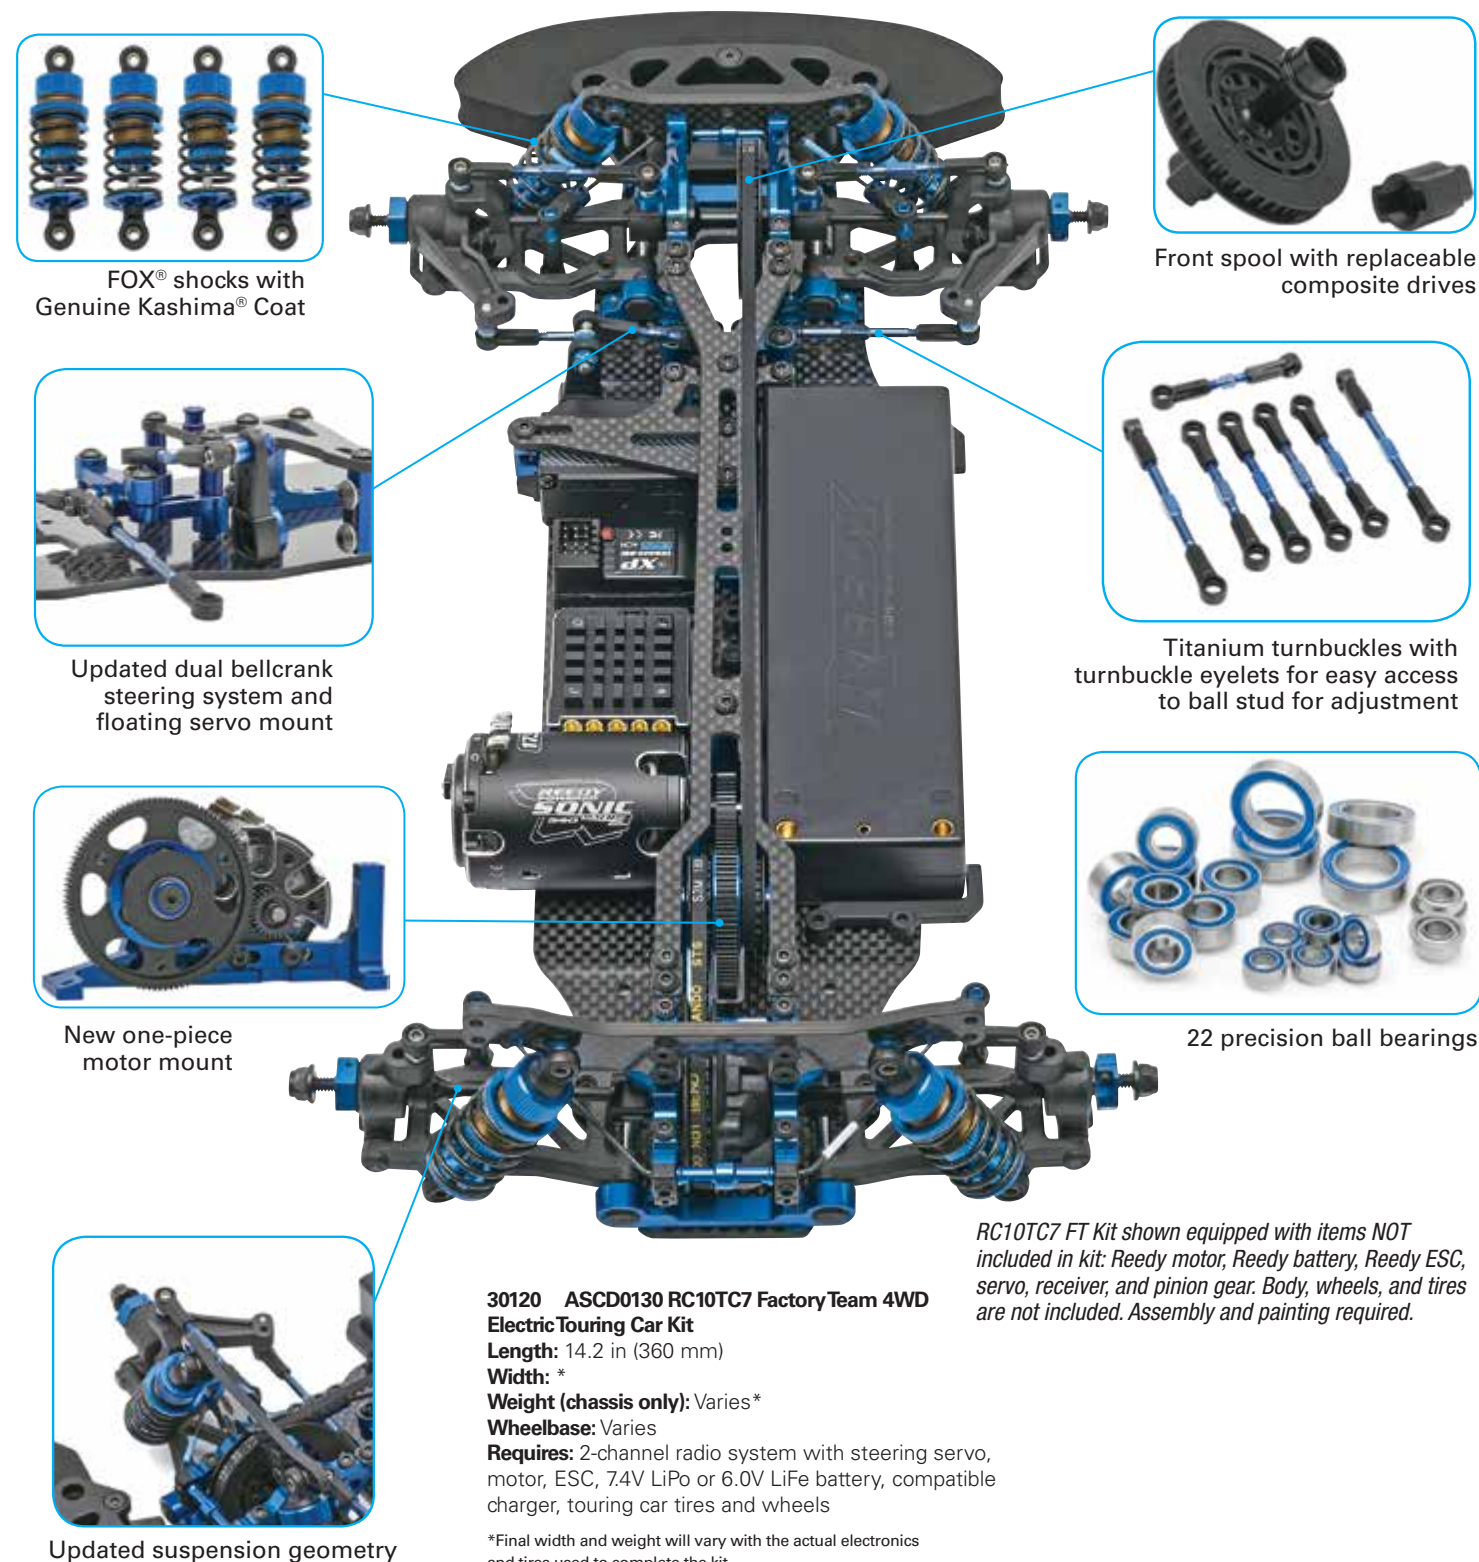

Ryan Cavalieri

Keven Hebert

- The TC7 showcases Area 51's state-of-the-art engineering and dedication to creating a touring car that leaves the competition in its rear-view mirror!
- Packed with Factory Team options for ultra-fine tuning that can make the difference between winning and 2nd place

- The suspension package has been updated to deliver a superior level of consistency
- Mounting the motor centrally produces consistent chassis flex for more predictable cornering
- Accurate gear alignment boosts efficiency, acceleration and top speeds

# INTRODUCING THE WORLD'S SMALLEST DRONE!

proto**N**<sup>TM</sup>  
READY-TO-FLY NANO-SIZED DRONE

ONE TOUCH FLIPS  
AND BARREL ROLLS

DRONE STORES IN  
THE TRANSMITTER

WORLD'S  
SMALLEST DRONE!

Shown actual size.

When you purchase the Proto-N you also get a 2.4GHz transmitter with a compartment where you can store your drone. You also get a 3.7V 80mAh LiPo battery, USB charge cord and 4 extra blades.

Fly the Proto-N in your favorite color: Green, Black, Red and White.

Measuring 1-1/2 inches diagonally and weighing just over a quarter of an ounce, the Proto-N is one of the tiniest drones ever designed.

ESTE44\*\* Proto-N Nano-Sized RTF Drone  
Diagonal dimension: 31 mm (1.2 in)  
Weight: 8 g (0.28 oz)  
Requires: 4 "AAA" batteries

**KNOWFLY**  
BEFORE YOU  
Unmanned Flight Safety Guidance  
[www.knowbeforeyoufly.org](http://www.knowbeforeyoufly.org)

## From the Experts:

Talk about portable flying fun! The Proto-N is so tiny you can store it inside the transmitter you fly it with. With just a few minutes of practice anyone can be piloting this super-small drone — and looking like a pro while doing flips and barrel rolls. You've got to see it to believe it!

## Long story short...

*The Proto-N is the truly "take anywhere" drone that flies indoors when bigger drones are grounded!*

Ready-To-Fly

Flies indoors

Fly with friends

One-button flip!

# FLIP-IT, FLY-IT FUN!

## DROMIDA

### Verso

Ready-To-Fly Inversion UAV Drone

- Flip the drone upside down and back with just the push of a button
- Advanced Flight Assistance Technology eliminates control reversal issues that can make inverted flying confusing
- Fly within your comfort zone: three selectable flight modes match up to your particular skill level
- The 3.7V 350mAh LiPo battery provides 5+ minutes of flight on a full charge
- Tough enough to take the routine dings that indoor flying dishes out

You get all this: Ready-To-Fly Verso drone, Q205 transmitter, 3.7V 350mAh LiPo battery, USB charger, (4) "AA" batteries, extra blades, joystick and gamer-style stick ends.

Available in four colors!

Press the Invert/Flip button once to fly or land inverted, twice to bring the Verso upright again.

The drone you can  
**fly upside down**

DIDE10\*\* Verso Inversion UAV Drone RTF  
Diagonal dimension: 110 mm (4.3 in)  
Weight: 34 g (1.19 oz)  
Requires: nothing!

**KNOWFLY**  
BEFORE YOU  
Unmanned Flight Safety Guidance  
[www.knowbeforeyoufly.org](http://www.knowbeforeyoufly.org)

#### From the Experts:

Take the Verso up in the air, and see how much fun flying a drone can be! With just the push of a button you can switch from regular flight and inverted flight. And when the Verso is upside down, flight assistance technology eliminates the confusing control reversal that inverted flight usually entails.

#### Long story short...

Add a whole new dimension to drone flight with the nimble, no-holds-barred Verso Inversion UAV!

# HUBSAN HAS THE DRONE

## H107D+ FPV X4 PLUS CAMERA RTF DRONE

Drones are HOT, and Hubsan has 'em! Check out this lineup of flyer-friendly, ready-for-action UAVs, choose the one you like best, and get in on the fun of piloting a drone today!

The top-of-the-line in drone technology, with an HD camera featuring First Person View.

HBNE0050

Enjoy enhanced picture reliability and range with 5.8GHz video transmission.

The battery "snaps in" to place on the H107D+ (and H107C+) for quick installation.

	Flips & Rolls	Transmission	4.3 Inch LCD	Altitude Mode	720P HD Camera	"Snap-In" Battery	Memory Card Slot*	Indoor/Outdoor Flight	USB Charge	LED Lights

\*Memory Card sold separately

# YOU'RE LOOKING FOR

## H107C+ X4 CAMERA RTF DRONE

A value-packed, easy-to-fly drone, with the bonus of a camera for video adventures.

The lightweight controller is shaped to fit your hands for maximum comfort and control.

- Has many of the H107D+'s features, including 360° capability, Adjustable Hold, Indoor/Outdoor flight, USB charge cord and bright LEDs for night flying

HBNE0060

## H107P X4 PLUS RTF DRONE

Build confidence in your drone flying skills with the economical, super-stable H107P.

HBNE0070

- Also shares many of the same functions as the H107D+ and H107C+: Flips and Rolls, Adjustable Hold, Indoor/Outdoor flight, USB charge cord and bright LEDs
- Blade covers help guard against less-than-perfect landings
- All three UAVs measure 113 mm (4.45 in) across diagonally

### From the Experts:

Whether you're just starting out or ready to move up, Hubsan offers quality-built drones that fit right into your skill and price level. If you just want to fly, there's the H107P. If using your drone to shoot video appeals to you, the H107C+ fills the bill. More advanced pilots looking for FPV capability will love the H107D+. Whichever one you choose, you win!

### Long story short...

Let Hubsan show you how easy and enjoyable flying a drone can be!

HBNE0050

HBNE0060

HBNE0070

# ALL-OUT AMPHIBIOUS ADVENTURE

## Seawind

Receiver-Ready Select Scale Brushless Seaplane

- Take off from the grass and land on water — or lift off from the lake and touch down on solid ground
- Get in the air quicker, thanks to the preinstalled brushless motor, ESC and servos
- Lots of scale touches, including Fowler flaps, detailed cockpit and working lights
- A twist-and-lock wing attachment system makes the Seawind Rx-R easy to transport, with no tools required
- Being Receiver-Ready, the Seawind assembles quickly, while offering flexibility on receiver, battery and charger options

A built-in Speed Reduction Unit adds scale realism to the mechanical retracts. A water rudder deploys when the landing gear is up, and withdraws when the gear is down.

Open the canopy to admire the detailed cockpit interior, and to access the spacious battery compartment.

Scale Fowler flaps give the Seawind Rx-R amazing authenticity while improving overall aerodynamics.

Working navigation and landing lights

**FLZA4054 Seawind Select Scale Brushless Seaplane Rx-R**  
**Wingspan:** 56.6 in (1438 mm)  
**Wing Area:** 421 in<sup>2</sup> (272 dm<sup>2</sup>)  
**Wing Loading:** 20.9 oz/ft<sup>2</sup> (63.7 g/dm<sup>2</sup>)  
**Weight:** 61 oz (1729 g)  
**Length:** 44.3 in (1125 mm)  
**Requires:** 6+ channel radio and receiver, 3S 11.1V 2100mAh 25C LiPo battery and balancing LiPo charger

**Rx-R**  
RECEIVER-READY

**Flyzone**  
how high will you soar™

### From the Experts:

The Seawind's truly amphibious design means you don't have to choose between different environments, like with other seaplanes. Both land AND water can be your runway/landing strip! Plus, it flies like a dream and stands out from the other aircraft with its graceful looks.

### Long story short...

For a truly unique flying experience, nothing tops the Select Scale Seawind Rx-R!

# GROW YOUR FLYING SKILLS WITH THIS GIANT

**AVISTAR**  
Almost Ready-to-Fly 30cc/EP Sport Trainer

Functional flaps are built into the wing, and are already pre-hinged. Use them to make your plane capable of slower takeoffs and "light as a feather" landing speeds.

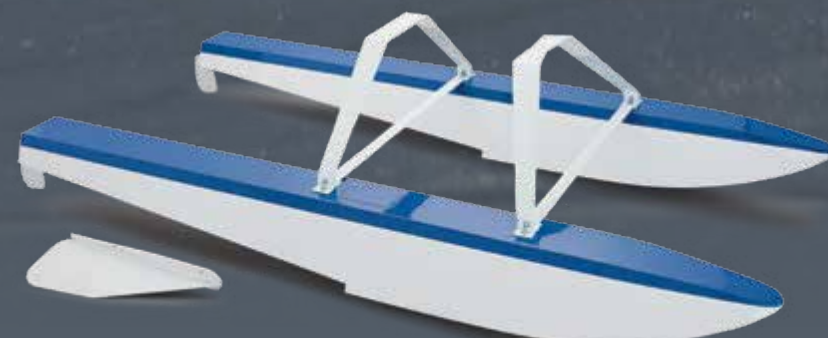

Reduce noise with a brushless electric motor system. You'll also enjoy "instant" power — ideal if you plan to add floats and fly off water.

Equip your Avistar with gasoline power and you'll have a sport flyer that's economical to fly and requires minimal maintenance.

Expand your flying experiences with exciting accessories!

GPMA1676 Float Kit  
GPMA4568 Nose Gear Conversion Set  
GPMA4561 Nose Gear Wheel Pant  
GPMA4567 Sailplane Tow Release

## GPMA1675 Avistar 30cc/EP Sport Trainer ARF

**Wingspan:** 90.5 in (2300 mm)

**Wing Area:** 1448 in<sup>2</sup> (93.4 dm<sup>2</sup>)

**Weight:** 16.5-17.5 lb (7.5-7.9 kg)

**Wing Loading:** 26-28 oz/ft<sup>2</sup> (79-85 g/dm<sup>2</sup>)

**Length:** 77.25 in (1962 mm)

**Requires:** 4-6 channel radio with minimum 5 high-torque servos (additional standard servo for throttle when using gas power), 30-35cc gasoline engine OR 63-63-250kV electric motor, 60A ESC and two 4S 14.8V 5000mAh OR two 5S 18.5V 5000mAh LiPo batteries and charger

## From the Experts:

The Avistar 30cc/EP is perfect for giant-scale sport training — and from there you can use it to try optional flaps, floats and even sailplane towing. It's also the ideal introduction to gasoline engines or large electric power. And while it's definitely impressive in the air, this ARF is easy to fly for less experienced pilots, with power and maneuverability to satisfy seasoned fliers.

## Long story short...

Add the Avistar 30cc/EP to your hangar and you'll have an ARF that's as versatile as it is fun to fly!

NEW PRODUCT

# EXCITING AIRBOAT ACTION — ANYWHERE!

## MINI ALLIGATOR TOURS™

Ready-To-Run EP Airboat

**Now with Tactic  
TTX300 radio!**

- Compact in size, but big on realistic airboat details, including prop cage, railings and an elevated pilot's seat
- Skim across shallow waters on the Mini Alligator Tour's broad, flat hull
- Make skid turns with ease — twin air rudders provide quick, powerful steering control
- Air rudders also eliminate the hazards that underwater obstacles pose for boats with water rudders

AQUB1807 Mini Alligator Tours EP Airboat  
RTR w/TTX300  
Length: 18.25 in (465 mm)  
Beam: 7 in (175 mm)  
Weight: 24.6 oz (695 g)  
Requires: (4) "AA" batteries

**AQUACRAFT®**  
Models

**TACTIC™**  
PURE RELIABLE 2.4  
**TTX300**  
3-CHANNEL SLT RADIO

The TTX300 delivers reliable, interference-free control — along with great features such as steering and throttle reverse and trims, steering rates, two-button control of the 3rd channel and a 2-in-1 receiver/ESC unit.

### From the Experts:

It's a blast to drive, it stands out from all the other boats out there — and now the Mini AlligatorTours airboat is controlled by a top-of-the-line Tactic TTX300 radio system. "Mini" means you run it on any size lake or pond, and it's ready right now for solo speed runs or racing with friends!

### Long story short...

**Blaze across the bayou with the Mini Alligator Tours airboat, now upgraded with Tactic radio technology!**

# THE BEST PACKS TO POWER YOUR DRONE

## Drone Series LiPo Batteries

Packs arrive with leads, XH balancing connector and XT60 connector ready for instant use\*.

\*Except FPWP9060 module.

[hobbico.com/ama-lipo-warning.html](http://hobbico.com/ama-lipo-warning.html)

- Enjoy premium power and like-new performance after 100, 200, even 300 or more cycles, with capacities up to 16,000mAh!
- Cell-matched to create superior packs, extensively tested to ensure premium performance and supported with the best service in the industry
- Fly without fear: ultrasonic welding on cell tabs and balancing leads offers superior strength and dependability
- Look for FlightPower packs and performance wherever you see the bright metallic orange shrink!

# FlightPower™

Quite simply, the #1 LiPo battery line in the world!

FPWP8005

FPWP8020

FPWP8050

See the complete lineup of FlightPower Drone Series LiPo Batteries at [flightpowerbatteries.com](http://flightpowerbatteries.com)!

### From the Experts:

If you fly drones, FlightPower has the batteries you should be flying with. Choose from 24 different packs, from lightweight 3S and 4S packs with extra-high C rates for FPV racing to 3-6S 10C packs for stretching flight times to the max. There's even a modular pack designed just for the DJI Phantom 2 — and all are tested, proven and protected by a no-nonsense 2-year limited warranty.

### Long story short...

Drop a FlightPower Drone Series LiPo Pack in your UAV, and leave no mAh behind!

## DEX210F

### 1/10 Scale 2WD Electric Front-Motor Buggy Kit

Pushing the motor forward and lowering the CG allows the DEX210F to stick to today's high-grip track surfaces like glue.

Length: 15.75 in (400 mm)  
TDRC0015

## DEX410V5

### 1/10 Scale 4WD Electric Buggy Kit

Enjoy smoother power delivery and better traction with the DEX410v5's center differential with adjustable slipper clutch.

Length: 16 in (407 mm)  
TDRC0124

See all of the game-changing advancements these buggies have to offer at [team-durango.com](http://team-durango.com)!

- Multi-Axle Driveshaft "squares up" power for maximum efficiency
- Mount any 12mm wheels on the front and rear hubs
- New body shells offer looks as sharp as their performance

# NEWPRODUCT

## MINI-ENGINE MARVEL

The Indicator™ points to serious fun!

Skill Level **1**

Requires some painting, gluing and sanding. Features laser-cut wood fins, plastic nose cone and high quality decals. Step-by-step instructions make building very easy. Assembly may take an afternoon.

### Indicator™

*Mini-engine might for exceptional flight*

**Length:** 21.2 in (53.8 cm)

**Diameter:** .74 in (19 mm) top/.98 in (25 mm) bottom

**Weight:** 1.3 oz (36.9 g)

**Max. Altitude:** 200 ft (69 m)

**Features:** laser-cut wood fins, waterslide decals, 9 in (22.9 cm) recovery parachute

**Recommended Engines:** A3-4T (First Flight), A10-3T ESTT7244

### Long story short...

*Mini engines lead to huge altitudes with the Indicator!*

## MINI BLASTER™ AIR ROCKET LAUNCH SET

No batteries, no flames, lots of FUN!

**Length:** 9 in (22.9 cm) and 6.3 in (16 cm)

**Max. Altitude:** 50 ft (15.2 m)

**Features:** Air powered, easy to apply colorful decals, sturdy rubber ball and air hose for launching.

ESTH1911

### Long story short...

*Perfect for our youngest rocketeers, the Mini Blaster is a safe and fun air-powered launcher you will get hours of enjoyment out of!*

### 1:25 PORSCHE 914/6 2N1

Porsche performance, 6-cylinder power

In 1968, Porsche presented its prototype of a new mid-engine, entry-level sports car to replace the aging 912. It would be offered with either a 4 cylinder or 6 cylinder engine. Both were boxer-style, air-cooled engines mounted between the driver and the rear axle. The distinctive styling featured a removable Targa top and a roll bar. **Kit features** stock or road racer build options, detailed 6 cylinder engine, independent suspension, removable Targa top and engine cover.

85-4378 RMXS4378 Total Parts: 93 Skill Level: 3 Length: 6.25 in (159 mm)

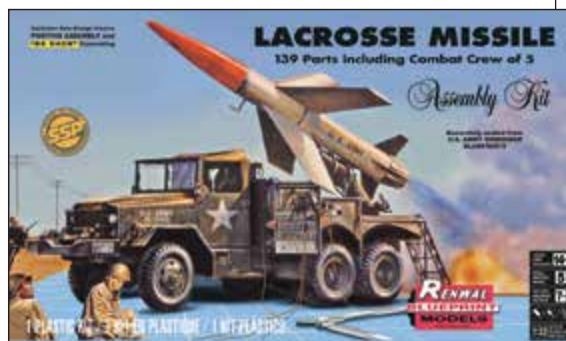

### 1/25 '66 CHEVY® FLEETSIDE PICKUP

A fleet of Fleetsides

The first Chevy® pickup truck was introduced in 1924. Since then, it has gone through many changes including a complete redesign in 1960. The 1960 model had a new frame and a suspension system that gave it a more car-like ride. The pickup truck was emerging as something more than just a workman's vehicle. The C/K line offered a wide choice of engines. This 1966 Fleetside comes with a 283 c.i. V-8 High Torque 175 horsepower engine. **Kit features** detailed V-8, separate bed with positional tailgate, spare tire, and soft black tires.

85-7225 RMXS7225 Total Parts: 112 Skill Level: New 4 Length: 7.6 in (194 mm)

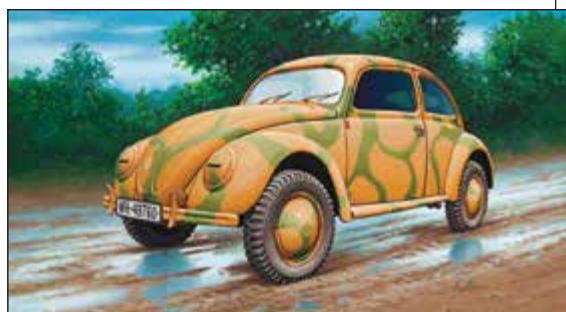

### 1/32 LACROSSE MISSILE

Truck-mounted tactical nukes

With a simple behind the line launch vehicle and a relay forward observer for final guidance, the LaCrosse Missile was a potentially devastating weapon. It was capable of bringing down a 10 kiloton nuclear warhead with the radio-guided accuracy of a smart bomb. With a twelve mile range and easy truck transport, the LaCrosse could be easily transported virtually anywhere and rapidly set up for launch. This made it incredibly hard to target with counter-battery fire. **Kit features** fully detailed truck and missile with five crew figures.

85-7824 RMXS7824 Total Parts: 139 Skill Level: New 5 Length: 9.9 in (251 mm)

### 1/35 GERMAN STAFF CAR TYPE 82E

Kubelwagen/Kampfer crossover

The German Kübelwagen was the surprisingly capable staff car of choice for the Wehrmacht throughout much of WWII. Despite being only a two-wheel drive vehicle it ably crossed terrain even its designers didn't believe was possible. The Type 82E was a Kübelwagen with the traditional Volkswagen Beetle body instead of the box-like standard body. The air-cooled flat 4-cylinder engine took the Type 82E and the soldiers that drove it from downtown Paris to the doorstep of Leningrad. **Kit features** single-piece body, detailed interior, and three sets of decals.

03247 RVLS3247 Total Parts: 66 Skill Level: Length: 4.4 in (112 mm)

## 1/72 POLIKARPOV I-153 CHAIKA

### The Communists catching up

During the Great Purge of the 1930's, thousands of ranking Russian party, military, and intelligentsia members were removed from society—either to labor camps or permanently. The resulting loss of man and brainpower hampered the Soviet Union's progress in terms of aviation. The Chaika would have been an enormous breakthrough in 1919. However, it was produced in 1939. Despite exceptional maneuverability and firepower, it suffered badly against state-of-the-art German aircraft.

03963    RVLS3963    Total Parts: 50    Skill Level:    Length: 3.5 in (88 mm)  
Wingspan: 5.4 in (138 mm)

## 1/72 BELL MV-22 OSPREY

### Tilt-rotor triumph

Marine MV-22 Ospreys combine some of the best features of both fixed wing and rotary aircraft. Their tilting rotors, when in the traditional flying position, deliver high speed—316mph max—for quick insertions. Plus, when in helicopter position, the rotors allow for vertical takeoffs and landings. This combination of speed and capability allows for troops, cargo, and small vehicles to be transferred into combat zones faster than ever before. **Kit features** a detailed cockpit, interior, and under carriage, with rotating propeller, tilting rotors, separate rear ramp, and USMC decals.

03964    RVLS3964    Total Parts: 126    Skill Level:    Length: 9.5 in (242 mm)  
Wingspan: 8.3 in (210 mm)

## 1/48 ROLAND C.II

### Revolutionary recon

One of the most ingenious aircraft of the First World War, the Roland C.II featured a monocoque fuselage made from angled layers of plywood. This load-bearing fuselage massively cut down on the number of struts and wires needed by the wings, reducing drag. This made it as fast if not faster than many existing fighters, and allowed it to carry bombs, a forward-firing gun, and an observer's machine gun.

03965    RVLS3965

## 1/72 MIL MI-28N HAVOC

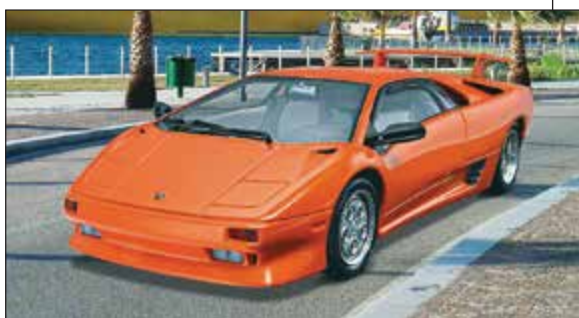

### Aptly named attack helicopter

The Mi-28 "Havoc" is incredibly appropriately named. Its combination of firepower, speed, and sophistication makes it one of the most potent attack helicopters on the planet. The firepower is derived from a 30mm autocannon, and a mixture of guided missiles and unguided rockets. Speeds of up to 201 mph are provided by a 5-blade propeller and twin 2,200 shaft horsepower engines. Sophisticated target acquisition technology and a helmet-enabled weapons cueing system ensure that both speed and firepower are utilized to maximum effect. **Kit features** moving rotors, cannon, sights, and night vision device, plus stub wings with four pylons, and detailed engines.

04944    RVLS4944    Total Parts: 100    Skill Level:    Length: 9.3 in (237 mm)

### 1/24 FERRARI® 250 SWB

Swift symbol of success

For the rich and successful, the Ferrari 250 was the success status symbol for its 1953-1964 production run. It was powered by an extraordinarily light V-12 engine producing nearly 300hp and it was available in a swarm of variants, body-styles, and packages. Styling varied from the somewhat blocky and blunt originals to incredibly modern models in the early sixties. Of course, all that performance comes at a price—a fair condition 1960 Ferrari might cost half a million dollars. Or you can build one in 1/24 for far less than 1/24 of the price.

07056 RVLS7056

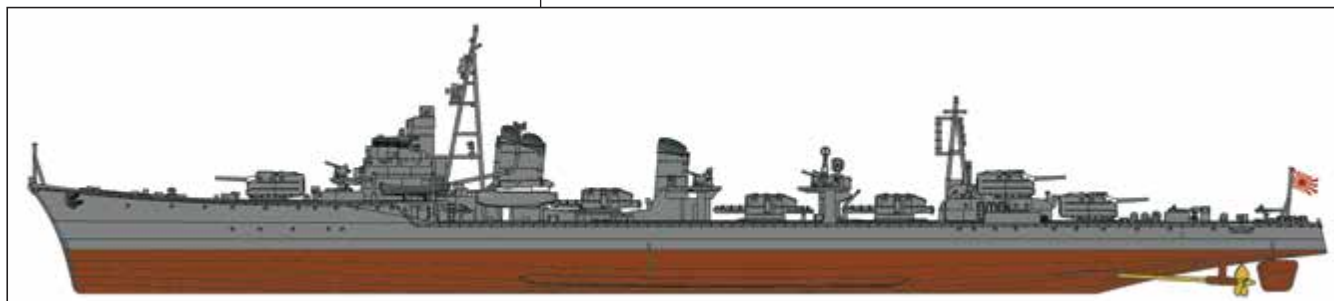

### 1/350 IJN DESTROYER SHIMAKAZE "LATE TYPE"

Faster to the fight

Shimakaze was literally one of a kind. This fast, heavily armed destroyer was Japan's test bed for a new type of propulsion system. Its steam turbine engines propelled it to 47 mph in test runs despite it carrying twice the guns and more sophisticated torpedoes than any other destroyer running. Japan had originally wanted to launch sixteen of these vessels, but the realities of war and limited production kept Shimakaze in a class all by herself. **Kit features** display stand and full decals. Linoleum deck detail available separately (HSGS7158).

40029 HSGS0028 Total Parts: 227 Skill Level: 3 Length: 14.6 in (370 mm)

### 1/144 YS-11 "JASDF 403SQ FAREWELL" (TWO KITS IN THE BOX)

Time-tested transports

Replacing the aging DC-3 fleet in the mid-sixties, the YS-11 was a relatively fast, high-flying turboprop with seating for sixty-four passengers and a range of over a thousand miles. Thirteen were used by the JASDF in a variety of roles from VIP transport to electronic intelligence. After over fifty years, the type was finally retired from military service. These aircraft still are in limited service with civilian carriers in Japan. **Kit features** two sets of decals.

10815 HSGS0815 Total Parts: 48 x 2 Skill Level: 3 Length: 7.2 in (183 mm)

### 1/72 F-4EJ KAI PHANTOM II "302ND SQ., GOODBYE OKINAWA"

From Naha to a new home

When the JASDF's 302nd Squadron joined the 83rd Air Group in 1985, it moved to a new home, Naha Air Base in Okinawa. Eight years into the 302nd's twenty-three year association with Naha, it transitioned to F-4EJ Kai Phantom IIs. Sadly, the 302nd's time at Naha came to an end in 2009 when it transferred to Hyakuri Air Base as part of a transition to the 7th Air Wing. This limited edition **kit features** one marking option: 1. JASDF 83rd AG, 302nd Sq., Code: 322 (37-8322), Naha AB, 2009.

02182 (Limited Edition) HSGS2182 Total Parts: 117 Skill Level: 3 Length: 10.4 in (265 mm)

### 1/72 SPACE PIRATE CAPTAIN HARLOCK SPACE WOLF SW-190

Deep space dogfighter

Even a ship as mighty as Harlock's needs a little support now and again. The Space Wolf SW-190 fighter launches from the hangars onboard to deal with nuisance craft that approach. This **kit features** pilot and display stand parts plus a low-visibility space camouflage scheme.

64501 HSGS4501 Total Parts: 83 Skill Level: 3 Length: 6.4 in (164 mm)

### 1/72 MITSUBISHI G4M2E TYPE 1 ATTACK BOMBER "BETTY"

Fitted for flying bombs

Mitsubishi designed the G4M2E to transport the MX-7 Ohka attack plane. The MX-7 manned flying bomb was powered by three solid-fuel rockets which made it reach top speeds approaching 620 mph (1,000 km/h). This limited edition **kit features** one G4M2E marking option: 1. IJN 764th NFG, Code: 764-14, August 1945 and one MX-7 Ohka model with two marking options: 1. IJN 764th NFG, Code: I-44, Lt. Nonaka, August 1945 and 2. IJN 764th NFG, Code: I-99, Lt. Nonaka, August 1945.

64728 HSGS4728 Total Parts: 184 Skill Level: 3 Length: 10.7 in (273 mm)

### 1/72 CAPTAIN HARLOCK SW-190 YUKI KEI SPECIAL

Supreme Space Wolf!

The overarching leading-lady of the various Space Pirate Captain Harlock elements, Yuki Kei is well deserving of her own Space Wolf—so we gave her one! The Space Wolf SW-190 fighter launches from the hangars onboard the ship to deal with nuisance craft that approach. This limited edition **kit features** new gunpods, larger canopy and intake parts, plus a special Yuki Kei pilot figure, display stand, and special Yuki Kei markings.

64731 HSGS4731 Total Parts: 87 Skill Level: 3 Length: 6.4 in (164 mm)

### 1/48 KAWASAKI KI-61-I TEI TYPE 3 FIGHTER HIEN (TONY)

#### Spoils of war

Kawasaki Ki-61s were a clear departure from the standard Japanese aircraft of World War II. Where other Japanese aircraft used radial engines, the Ki-61 was powered by an inline V engine license built on a Daimler-Benz design. Additionally, it featured more armor, heavier guns, and self-sealing fuel tanks—features mostly lacking on Japanese aircraft of the time. American forces were keen to get their hands on these unorthodox aircraft for testing and evaluation. This model represents one such captured fighter. **Kit features** two sets of decals.

07420 HSGS7420 Total Parts: 64 Skill Level: 3 Length: 7.3 in (186 mm)

### 1/48 NAKAJIMA C6N1 CARRIER RECON PLANE "Uncatchable"

The C6N1 was a slim, aerodynamic, three-seater reconnaissance plane fielded by Japan towards the end of WWII. With top speeds equal to that of the best Allied fighters, it was physically impossible to catch up with a well handled and maintained C6N1. Fortunately for the US, by the time these carrier aircraft arrived on the scene, there were simply no carriers left for them to operate from. Many were converted into night fighters for shooting down bombers, but the original recon role was obsolete. **Kit features** two sets of decals.

07421 HSGS7421 Total Parts: 119 Skill Level: 3 Length: 9.1 in (232 mm)

### 1/48 F-16B PLUS FIGHTING FALCON "FLYING TIGERS" Island interceptors

Forming the backbone of the Taiwan Airforce, the F-16 Fighting Falcon is a light, inexpensive air superiority fighter with exceptional capabilities and high operational readiness. In any engagement above Taiwan, the ability to fight effectively, return to base, rearm, and return to the fight would be absolutely essential. The reliable and easy-to-maintain F-16 fits that bill exactly. Over 100 are in the service currently, making them by far the most numerically significant aircraft in the Taiwanese inventory. **Kit features** decals for one version.

07422 HSGS7422 Total Parts: 121 Skill Level: 3 Length: 12.4 in (315 mm)

### 1/35 KFZ.15 FÜNKWAGEN Cross-country communication

The Kfz.15 was one of several medium 4WD off-road passenger cars developed for the German Army, starting in the mid-1930s. Different vehicles were used for different roles, and the Kfz.15 was no exception. Its built-in radio and transmission systems made it an ideal mobile command and communications post for German troops during the Second World War. **Kit features** upgraded molds, rubber tires and two WWII-era German Army marking options: 1. 21st Panzer Division, North Africa, 1942 and 2. Regimental Staff, Panzer Regiment Hermann Göring, Italy, late 1943.

6526 ITAS6526 Total Parts: 202 Skill Level: 3 Length: 5.3 in (134 mm)

## STATUE OF LIBERTY

### Freedom forever

Constructed and dedicated after the end of the Civil War, the Statue of Liberty is an iconic representation of the light of freedom and opportunity offered to all the world. For millions it represents the forward progress of a free society, governed by laws and always moving forward. Now nearly 130 years old, Liberty endures as a tourist attraction and a UNESCO World Heritage Site. **Kit features** a full statue with podium and star fort base.

68002

ITAS6802

Skill Level: 2

## 1/56 M8/M20

### The Allies' armored adventurer

Sporting a 37 mm main gun turret, the M8 Greyhound was introduced to the Allies' arsenal in 1943. A year later, the M20 variant replaced the 37 mm gun turret with an open, armored superstructure and a mount for a .50-in M2 heavy machine gun. M8s and M20s were commonly used by the US Army. Free France, the UK and Brazil also used the Greyhound, courtesy of the Lend-Lease Act. **Kit features** all-new molds, one figure and two marking options: 1. US Army, WWII and 2. Free French Army, WWII.

## THE PARTHENON

### Icon of the ancient world

The Parthenon represents everything that is great about Western civilization—the opulence and prosperity that result when reason, wisdom, courage, and freedom combine. At over twenty-three thousand square feet in total area, 45 feet high, and completed after 15 years of construction in 432 BC, the Parthenon, even in its current much-reduced state, is an incredible tribute to the tenacity of the works of free minds. This **Italeri kit** lets you rebuild the Parthenon as it was prior to 2400 years of invasion, destruction, and theft, with a full reproduction of Athena Parthenos as well as the Cella interior and marble friezes. Includes interlocking design, statue of Athena and reference leaflet with historic facts.

## 1/24 SCANIA 143M TOPLINE 4X2

### Sweden's heavy-hauling workhorse

Scania introduced its first 3-series semis in 1987 as a successor for the brand's innovative 2-series trucks; the 143M 4x2's reliable design and transport versatility helped it quickly evolve into one of the line's most successful models. The 143M was released in countless configurations from its debut until 1997, including a 500 hp V-8 engine-powered model that was paired with a 16-speed gearbox. Today, the 143M Topline 4x2 remains a favorite of drivers all over the world. **Kit features** ten tires, chrome wheels and a super decal sheet.

## 1/12 FIAT 806 GRAND PRIX

The first of the modern Formula One racers

Introduced in 1927, many car aficionados consider the Fiat 806 to be the springboard for all the Formula One racers that succeeded it. A 180 hp 12-cylinder engine propelled the car to speeds exceeding 149 mph (240 km/h). Fiat positioned the engine and gearbox unit between the two chassis bars to optimize performance and drivability. **Kit features** a detailed engine, working steering, an opening hood, rubber tires, photo-etched parts, a decal sheet, masking stickers, PVC tubes, springs, copper wire, leather parts, a clear sheet, hardware and more. Requires screwdriver.

AMTF102/12

AMTS0102

## Bandai® 1/144 Graze High Mobility Commander Type

Crush the Martian menace

The newest and fourteenth installment of the Gundam franchise, Iron-Blooded Orphans centers around the activities of CGS and Mikazuki as they battle hostile forces on and off Mars. The Graze mobile suit is an exceptionally effective weapon used by the "Gjallahorn" forces against Mikazuki and his friends. **Kit features** numerous verniers, rifle, battle axe, shooting claw, runners, sticker, and full instructions.

201876

BANS1876

## Bandai® HG 1/144 Gundam Kimaris

*Knight of the night sky*

A warrior knight themed Gundam from the "Calamity War", Kimaris shares the same frame as the Gundam Barbatos. Unlike that Gundam, however, Kimaris is armed with an enormous energy lance, slashing discs, and a folding sword. **Kit features** weaponry, runners, stickers, and full instructions.

201893    BANS1893    Height: 5 in (127 mm)

## Bandai® HG 1/144 MS Option Set 3

*"Gjallarhorn Mobile"*

*Keep your MS options open*

A special pack of parts for customizing MS from the Gundam Iron-Blooded Orphans series or other 1/144 Gundam models. Includes three large Medieval melee weapons as well as parts for a special Gjallarhorn Mobile worker, runners, stickers, and full instructions.

0202308    BANS2308    Height: 3 in (76 mm)

## Bandai® RG 1/144 XXXG-OIW Wing Gundam EW

*Ready for action*

The eponymous Wing Gundam of "Gundam Wing Endless Waltz". **Kit features** a buster rifle with extra ammo cartridges, shield, beam saber, pop-up chest machine guns, runners, stickers, full instructions, and the option to transform into bird mode.

0203222    BANS3222    Height: 5 in (127 mm)

## Bandai SD EX-Standard Gundam Astray Red Frame

*"Gundam Seed"*

*New, and ready for the fight!*

Part of the new SD Gundam EX-Standard line, the Gundam Astray Red Frame has been recreated with an emphasis on articulation and enhanced proportion. Translation: it moves better and looks more realistic. **Kit features** a beam katana and shield plus runners, stickers, and full instructions.

0204935    BANS4935    Height: 3 in (76 mm)

## Dragon Models® 1/72 Mistel 5-He162A-2 w/Arado E-377a

*Last ditch defense*

Take a bomber, strap it to a fighter. Fill the bomber with high explosives and put a pilot in the fighter. Fly the combo to target, release the bomber and guide it to the target with remote controls in the fighter. Boom. The concept was devilishly clever and took advantage of the large amount of practically obsolete medium bombers Germany had near the end of the war. In spite of the impressive amount of explosives detonated, the effect of Germany's Mistel program was limited. **Kit features** both aircraft of a "Mistel" configuration.

5002    DMLS5002

## Dragon Models® 1/72 Heinkel He219A-7 OWL

### *Own the night*

With twin forward-firing 20mm, twin upward-firing 30mm cannons, and one of the most sophisticated search radars of its day, the He 219 was an effective counter to large night-flying RAF bombers. Upward-firing cannons allowed night fighters to fly, undetected, close beneath enemy bombers and tear them open with high-caliber rounds. Fortunately for the allies, these aircraft were only deployed in relatively small numbers and close to the close of the war.

5006

DMLS5006

## Dragon Models® 1/72 Me1101 Nachtjäger

### *Jet-propelled jaeger*

Even in mid-1944, with enemies closing in on all sides, Nazi Germany refused to consider surrender. Instead, it began designing ever wilder and more impossible aircraft such as the Me P.1101. This jet-propelled aircraft was novel in many ways. Variable wing geometry, compound sweep wings, and a plethora of conceptual variants made it one of the least-understood aircraft to be designed in the closing days of the Third Reich. No production aircraft ever made it to the air—much to the relief of Allied aircrews everywhere.

5014

DMLS5014

## Dragon Models® 1/48 Me 163B Komet

### *Rocket-powered reaper*

The "Komet" was by far the fastest aircraft of its day—powered by a combination of hydrazine and hydrogen peroxide, this rocket aircraft could attain speeds near to 600 mph. For attaining altitude and evading enemy fighters, this impressive speed was an advantage. However, against the Komet's favored 4-engine heavy bomber targets, the Komet could close at over 300mph. With the limited effective range of the Komet's 30mm armament, this gave mere seconds of firing time. The Komet was effective, but was phased out in favor of the Me 262. **Kit features** photo etched parts, fully detailed engine and pilot and ground crew.

5504

DMLS5504

## Trumpeter Models 1/35 Seven Soviet Scud B Crew Figures

### *Ballistic barrage weapon*

Despite being relatively inaccurate (50% of missiles will land within 450 meters of their target), the Scud in all its variants is a highly effective terror weapons. It travels well beyond the speed of sound, meaning that it explodes before you can see or hear it. Additionally, thanks to its relative inaccuracy, it is primarily used against large, stationary targets like cities. The variable warhead of the Scud can carry conventional, chemical, or nuclear weapons. **Kit features** seven Soviet crewmen with AK47s, two warheads, decals and photo etched parts.

434

TSMS0434

## Trumpeter Models 1/700 HMS Dreadnought British Battleship 1918

### *Defining ship of the modern era*

The innovations made on HMS Dreadnought were so pivotal, they represent a benchmark in naval history. Every "Pre-Dreadnought" was obsolete. Every new "Dreadnought" battleship had to be based on the design upgrades of the Dreadnought to stay competitive. Chief among the Dreadnought's upgrades were steam turbine power, turreted heavy guns, and state of the art fire control. These, combined, gave her speed, firepower, and accuracy previously unattainable. **Kit features** display stand, nameplate, and wood deck detail.
