# THE MONSTER TRUCK THAT DOES IT ALL

Like nothing you've ever driven before, the ARRMA NERO 6S is built to conquer the most extreme driving environments you can imagine. Armed with a powerful BLX brushless system, it's ready to hit 60+ mph speeds. The brand-new chassis is constructed with super-tough composites and lightweight anodized aluminum, providing the strength and performance to overcome any challenge you encounter. It's one of RC's biggest and baddest monsters, and the only one with the potential to do more.

ARAD70\*\* NERO 6S BLX 4WD Monster Truck (Standard, Green)

ARAD71\*\* NERO 6S BLX 4WD Monster Truck with Diff Brain (Blue)

With smart "Diff Brain" technology, you can easily lock and unlock all three gear diffs right from the transmitter. Whether running on dirt, asphalt, grass or rocks, the Diff Brain allows you to instantly switch between four available driving styles — blast, drift, wheelie or climb — to optimize performance and drive like a pro in any condition.

See teaser videos at [rcbrain.com](http://rcbrain.com)

**SPECIFICATIONS**

- Length:** 21.9 in (555 mm)
- Width (front):** 21.9 in (555 mm)
- Width (rear):** 17.8 in (452 mm)
- Height:** 8.5 in (217 mm)
- Weight:** 12.8 lb (5.8 kg)
- Wheelbase:** 14.9 in (378 mm)
- Requires:** (2) 2-3S 3000mAh 35C (or 4000mAh 35C) LiPo batteries with XT90 plugs, (4) "AA" batteries

**From the Experts:**

Like nothing you've ever driven before, the ARRMA NERO 6S is built to conquer the most extreme driving environments you can imagine. It's one of RC's biggest and baddest monsters, and the only one with the potential to help you drive like a pro in any condition.

**Long story short...**

Now there's no need to keep a fleet of vehicles for different kinds of driving excitement — the NERO has the capability to be 4 trucks in one!

# PERHAPS THE MOST POWERFUL TRUCK EVER BUILT

Built for strength and endurance

RED ANODIZED ALUMINUM TWIN VERTICAL PLATES

CVD DRIVESHAFT COUPLINGS AND RUBBER BOOTS

QUICK-RELEASE SIDE-MOUNTED BATTERY BOXES FOR 2S OR 3S LIPO CELLS

16mm RED ANODIZED ALUMINUM SHOCKS WITH SUPER-DUTY SPRINGS

SUPER-TOUGH COMPOSITE CHASSIS CAGE

BLX200 WATERPROOF ESC

**Also Features**

- HEAVY-DUTY METAL LOCKABLE GEAR DIFFS
- BLX 2000KV 4075 BRUSHLESS MOTOR
- ADS-15M WATERPROOF 15KG STEERING SERVO
- SPECIALLY DESIGNED WIRE ROUTING

SUPER-TOUGH DOUBLE SUSPENSION ARMS

LARGE DIAMETER, RED ANODIZED ALUMINUM SLIDER DRIVESHAFTS

Lock and unlock all three diffs on the fly for four unique driving styles\*

\*Diff Lock Control System activated only in Diff Brain version.

The RR10 Bomber build-it-yourself kit is loaded with features allowing you to customize it and add your own electronics for the ultimate rock racer! Building on the current, successful ready-to-run model, this kit version includes a wide variety of desirable option parts that deliver next level performance and durability. Hard anodized aluminum suspension links, hard anodized aluminum steering links, long travel rear sway bar, hardened steel universal axles allowing up to 50 degrees of steering, aluminum lower link plates, and King adjustable machined aluminum shocks, all riding on sticky BFGoodrich® Baja T/A® KR2 tires wrapped around 2.2 Walker Evans Racing beadlock wheels .

**Long story short...**

*The RR10 Bomber kit is loaded with option parts and it's ready for you to add your favorite electronics and build the ultimate rock racer!*

# TUNED FOR SPEED

The CC3D flight controller is pre-programmed using LibrePilot.

Add a compatible camera for exciting First Person View action!

RXS stands for RISE Extreme Speed, and the RXS270 is engineered to be fast, agile and durable.

- Fully assembled and ready for extreme racing action
- Dare to fly at the edge: the 100% carbon fiber airframe is lightweight and super-strong
- Tuned for maximum performance with a CC3D flight controller, powerful 2206/2150kV brushless motors and a 4S-compatible ESC
- Pilot the Receiver-Ready RXS270 with your favorite radio system
- Vivid LEDs aid in piloting the RXS270 in low-light flight

# RXS270

Brushless Receiver-Ready™ Extreme Racing Drone

**RISE0270 RXS270 Brushless Extreme Racing Drone Rx-R**  
 Diagonal Size: 270 mm (10.6 in)  
 Weight: 460 g (16.2 oz)  
 Requires: 5-channel radio system, 3-4S 1300-2200mAh 30C LiPo battery, LiPo balancing charger

# RISE™

### From the Experts:

If you've got the right stuff, the RXS270 is the racing drone that will have you first through the final gate. It comes prebuilt for instant flying success — just install your receiver and LiPo battery. In the air, the RXS270's powerful 2206/2150kV motors and 4S ESC deliver exceptional speeds, and the 100% carbon-fiber frame is lightweight and super-strong.

### Long story short...

*When the RXS270 claims to be an extreme racing drone, you can believe it!*

# AN EVEN SHARPER "EYE IN THE SKY"

## DROMIDA

### KODO™ HD

Ready-to-Fly 106mm Camera Drone

DIDE0006 KODO HD 106 mm  
Camera Drone RTF  
Diagonal: 106 mm (4.17 in)  
Weight: 40 g (1.4 oz)  
Requires: nothing!

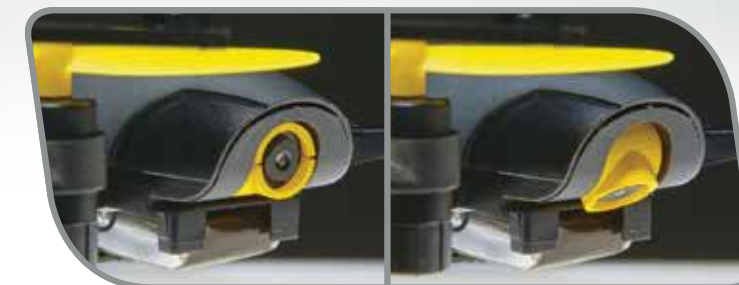

- ▶ Enjoy videos and photos with unprecedented sharpness and clarity, thanks to the high definition of the 1080p digital camera
- ▶ Because it's nearly 25% lighter than the original KODO, the KODO HD can fly nearly 20% longer on a full charge
- ▶ Explore your aerobatic side: the KODO HD delivers maneuvers with extra snap
- ▶ Motor changes are as easy as unplugging the old motor and plugging in a new one
- ▶ A 3-axis gyro and three accelerometers offer smooth, stable flight
- ▶ Activate the flight features you need for your skill level with Easy, Normal and Expert flight modes
- ▶ The sleek, tough body shell protects on-board electronics; factory-installed blade guards protect the props

**You get all this with your KODO HD:**

- ▶ Fully assembled KODO HD drone
- ▶ Full HD digital 1080p video and still camera
- ▶ Card reader and 4GB memory card
- ▶ Q106 4-channel 2.4GHz radio system
- ▶ LiPo battery and USB charger
- ▶ "AAA" batteries
- ▶ Installed blade guards
- ▶ Extra set of blades

Set the camera angle while on the ground, to get the shot you want as soon as you're in the air.

**From the Experts:**

If you thought the original KODO was cool, you've got to check out the KODO HD! Its 1080p digital camera offers incredibly clear videos and photos, and that's not all. At just 40 grams, the KODO HD is more aerobatic, and can fly up to 5-1/2 minutes on a full charge. It comes complete and fully assembled, so you can be up in the air enjoying the view right away!

**Long story short...**

Check out the KODO HD, and see the difference a 1080p camera — and significantly less weight — can make.

# CONQUER THE COMPETITION — AND THE CONDITIONS

1/10 Scale 2WD Electric Off-Road Competition Buggy Kits

In today's racing, traction dictates your setup, and Associated has it covered with two different configurations. The **B6** offers racers a platform developed for high to very-high traction surfaces, while the **B6D** excels when traction is low to high. Both versions boast the speed and durability you expect from world champion technology — just choose the one for your track conditions!

ASCD0011

ASCD0012

90011 ASCD0011 RC10B6 1/10 2WD EP Buggy Team Kit  
 90012 ASCD0012 RC10B6D 1/10 2WD EP Buggy Team Kit  
 Length: \*  
 Width: \*  
 Weight: \*  
 Wheelbase: 11.0-11.1 in (280-282 mm)  
 Both require: radio system w/steering servo, motor, ESC, tires, wheels, pinion gear, battery

\*Final length, width and weight will vary based on electronics, tire configuration, wing position and vehicle setup.

- Centralized motor mount for optimum side-to-side balance
- The hard-anodized aluminum pocketed chassis is beyond sturdy and allows for weight bias tuning
- Factory Team aluminum shock bushings provide stability for shock mounting
- A reverse bell-crank steering rack design allows more room for electronics

- V2 "Big Bore" threaded aluminum shocks with 3mm TiN coated shafts and low friction x-rings for improved smoothness
- Aluminum front axle and heavy-duty rear axle add the strength required for aggressive off-roading
- RC10B6 offers the option of mounting shocks on the front or the rear of the rear arms; both RC10B6 and RC10B6D have a 4-gear standup transmission available as an option

MAIN CONFIGURATION DIFFERENCES

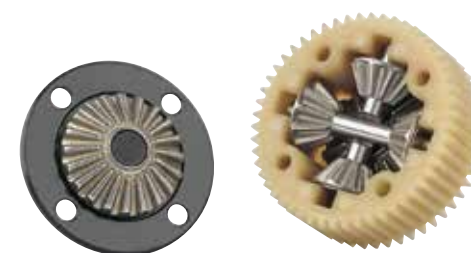

TURF CARPET CLAY HARD DIRT LOOSE DIRT

Laydown 3-gear transmission  
 Lower CG and reduced polar moment

Standup 3-gear transmission  
 More rearward weight for increased rear traction

Gear differential  
 More corner speed and forward acceleration

Ball differential  
 More rear traction and stability

Gull wing arms, wide front tower  
 Lower CG and increased on-power steering

Flat arms, narrow front tower  
 More responsive steering and quicker release out of corner

## Long story short...

Both the RC10B6 and RC10B6D are specialized rides for taming the types of tracks that you like to drive on!

NEWPRODUCT

# A WWII WARHORSE - IN MICRO SCALE

## B-25 Mitchell™

fly a WWII warhorse

Micro B-25 Mitchell™ EP Bomber RTF & Tx-R

Extensive use of clear plastic for the cockpit glass and gun turrets allows for maximum realism and detail in a micro-sized model.

- Impressive scale looks, combined with micro dimensions
- Exhibits smooth, stable flight characteristics, indoors and out
- Scale counter-rotating 3-blade props eliminate torque for easier flights
- Experience smooth, effortless ground handling with the steerable nose wheel
- Working twin rudders improve scale looks on the ground as well as control authority in the air
- Get airborne right away with the RTF version that includes a Tactic 4-channel SLT radio system with built-in battery charger
- Fly the Tx-R version of the Micro B-25 Mitchell with your favorite radio system

FLZA2300 Micro B-25 Mitchell EP Bomber RTF

FLZA2302 Micro B-25 Mitchell EP Bomber Tx-R

Wingspan: 21.7 in (552 mm)

Wing Area: 63.6 in<sup>2</sup> (4.1 dm<sup>2</sup>)

Weight: 2.7-2.9 oz (77-82 g)

Wing Loading: 6.1-6.6 oz/ft<sup>2</sup> (19-20 g/dm<sup>2</sup>)

Length: 17.2 in (437 mm)

RTF Requires: nothing

Tx-R Requires: 4-channel SLT-compatible transmitter

### From the Experts:

Don't just fly a micro-sized plane — pilot a replica of a legendary WWII aircraft while carrying out military missions! Flyzone's Micro B-25 Mitchell has the scale appearance and markings of the Allied bomber "Heavenly Body," with exceptional detail for its size. Twin counter-rotating props and twin rudders deliver stable flight, and the steerable nose wheel makes ground control a breeze.

### Long story short...

**Flyzone's Micro B-25 Mitchell EP Bomber pays homage to a vital piece of military history!**

**Flyzone**<sup>®</sup>  
how high will you soar™

## SOAR ACROSS THE SKY WITH EASE

micro  
calypso™cruise on air  
Electric-Powered Sailplane

www.gpdealer.com

The included folding prop is designed for less drag and better soaring performance.

- Made of lightweight, durable foam, to endure everyday impacts
- Count on being up in the air in 5 minutes or less
- The wing attaches quickly and securely, for easy transport
- The RTF version offers all-in-one-box convenience, and lets you charge the LiPo battery directly from the transmitter
- Choose the Tx-R to fly the Micro Calypso with your favorite transmitter
- Both versions come with a 1S LiPo flight battery

**FLZA3050 Micro Calypso Sailplane EP RTF**  
**FLZA3052 Micro Calypso Sailplane EPTx-R**  
**Wingspan:** 24.8 in (630 mm)  
**Wing Area:** 66.2 in<sup>2</sup> (4.27 dm<sup>2</sup>)  
**Weight:** 1.9 oz (54 g)  
**Wing Loading:** 4.15 oz/ft<sup>2</sup> (12.65 g/dm<sup>2</sup>)  
**Length:** 19.1 in (485 mm)  
**RTF Requires:** nothing  
**Tx-R Requires:** 4-channel SLT transmitter, (4) "AA" batteries

**From the Experts:**

If you're new to sailplanes, the Micro Calypso is the ideal place to start. Docile flight characteristics make this slope soarer easy to control, and if you do suffer a mishap the Micro Calypso's foam construction minimizes the damage so that you can continue flying.

**Long story short...**

*Catching thermals is fun and relaxing, and the Micro Calypso makes it easy as well!*

**Flyzone**  
how high will you soar™

NEWPRODUCT

# AN AUTHENTIC REPLICA OF THE ULTIMATE AGGRESSOR

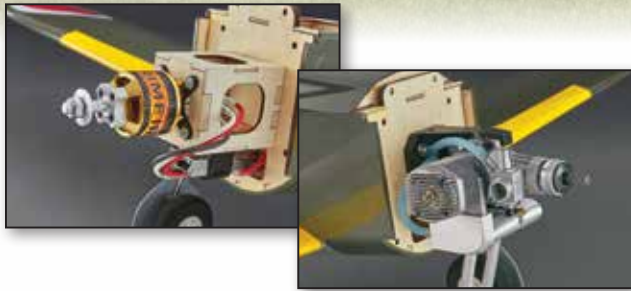

www.gpdealer.com

# ZERO

Pilot figure sold separately.

Almost-Ready-to-Fly .46/EP Sport Fighter  
**SPORT FIGHTER SERIES**

Fly with your choice of power: the Zero Sport Fighter performs equally well with either a glow engine or brushless motor.

#### GPMA1209 Zero Sport Fighter GP/EP ARF

**Wingspan:** 56.5 in (1435 mm)

**Wing Area:** 537 in<sup>2</sup> (34.6 dm<sup>2</sup>)

**Weight:** 5-5.75 lb (2.2-2.6 kg)

**Wing Loading:** 21-25 oz/ft<sup>2</sup> (64-76 g/dm<sup>2</sup>)

**Length:** 46 in (1170 mm)

**Requires:** 4-6 channel radio w/4-5 standard servos, .46-.55 glow engine OR 42-50-800kV brushless outrunner motor, 75A ESC, 4S 14.8V 2000mAh LiPo battery

- Fast, straightforward assembly means you can be flying sorties in a matter of hours
- Enjoy smooth, predictable flight, with the capability for sport aerobatics
- The ailerons are operated by individual servos, which allows for fine-tuning and flaperon mixing
- Access on-board gear and LiPo batteries quickly and easily through the large, magnetically-attached hatch
- Lots of scale detail, right down to the realistic trim scheme

### **From the Experts:**

Pilot this Sport Fighter ARF with the same speed and maneuverability that made the full-scale Zero one of the deadliest dogfighters of WWII. Building is a breeze, looks are definitely display-worthy, and the flight characteristics are spot-on!

### **Long story short...**

**Check out Great Planes' Zero Sport Fighter ARF, and experience a piece of warbird history!**

# FLY JIM ALLEN'S AMA NATIONALS WINNER!

## Quik-V6

Almost-Ready-to-Fly Quickie  
500 Racing Plane

- Compete in Quickie 500 events with an ARF that builds as fast as it flies!
- The wings, fuselage and V-tail come factory-covered in MonoKote
- Carbon fiber/fiberglass adds reinforcement to the balsa-sheeted foam core wing
- Internal V-tail linkages reduce drag and increase speed
- Mount virtually any .40-.55 engine cleanly and easily with the included aluminum back plate
- Comes equipped with ultra-durable, low-drag wheels
- An all-white finish makes it easy to create a custom trim scheme

### GPMA1250 Quik-V6 Q500 Pylon Racer ARF

**Wingspan:** 52 in (1320 mm)

**Wing Area:** 503 in<sup>2</sup> (32.4 dm<sup>2</sup>)

**Weight:** 3.6-3.75 lb (1630-1700 g)

**Wing Loading:** 16.5-17.2 oz/ft<sup>2</sup> (50-52.5 g/dm<sup>2</sup>)

**Length:** 40.5 in (1030 mm)

**Requires:** 4+ channel radio system with V-tail mixing, 4 mini servos, 2-stroke .40-.55 glow engine

**WARNING:** The Quik-V6 Q500 requires advanced flying skills and is not suited for beginning or intermediate pilots. It reaches speeds well over 100 mph (160 km/h) when equipped with the recommended racing power system, and should only be flown at an approved AMA flying site. Because it can quickly disappear from sight, pilots should remain focused on the plane at all times.

### From the Experts:

"This sixth version of the Quik-V series incorporates everything I've learned through 30+ years of designing pylon airplanes. It takes advantage of modern tools like CAD, laser cutting and computer airfoil analysis, resulting in a plane that came out winning races right away, including the 2014 AMA NATS. And now it's available as an ARF to get you in the air and racing FAST!"

— Jim Allen, Team Futaba Pilot

### Long story short...

For sport pilots with the "need for speed", the Quik-V6 really fills the bill!

# A MAKE-OVER FOR MEGA VEHICLES

## RACE AT THE ABSOLUTE EDGE

RXD250

Extreme Durability Race Drone

- Rugged frame constructed using a premium foam/carbon composite is designed to fly fast and withstand crashes
- Receiver-Ready: just add your battery, receiver and start flying
- Fly the RXD250 even in low-light conditions — bright LED lights make it easy
- The CC3D controller with LibrePilot comes pre-programmed, perfect right out of the box
- Install a compatible camera on the included mount for an exciting First Person View perspective!

RISE0250 RXD250 Extreme Durability Race Drone Rx-R

Diagonal Size: 9.8 in (250 mm)

Weight (minus battery & FPV): 10.6 oz (300 g)

Requires: 5-channel radio system, 3S 1500-1800mAh LiPo battery, LiPo balancing charger

# RISE™

### ***From the Experts:***

It's stripped down, lightweight, and made from high-impact foam and carbon fiber. That makes the RXD250 the perfect drone for getting into racing, because you can cut close to every obstacle to find the shortest, scariest route on the course. And if you crash? No problem — the RXD250 comes back for more!

### ***Long story short...***

***Push your limits, then leave them behind — the RXD250 is designed with the drone racer in mind!***

# ENHANCE YOUR LIFE WITH XIRO ACCESSORIES

## Hardshell Backpack

**XIRE6038**  
Xiro Hardshell Backpack

- It's the ultimate in Xplorer transportation — and so much more
- The hard plastic outer shell resists far more than casual knocks
- Plastic covers over the zippers limit dirt and water infiltration
- Padded shoulder straps for carrying comfort, with D-rings for attaching accessories
- Foot pads on the bottom of the shell keep the surface from getting scuffed

Foam cutouts prevent your drone, battery, radio and accessories from rattling around and possibly getting damaged.

**XIRO®**

**Long story short...**

*Protect and carry your drone with the added peace of mind of the Hardshell Backpack.*

## Just Released

**TURN HERE FOR GENERAL HOBBY PRODUCTS**

### Xiro® Handheld Gimbal

*Record unforgettable moments using your smartphone!*

- Simply attach the Xplorer V or G gimbal\* to the handle, and insert your mobile device (up to 5.5") in the clip and connect to the built-in Wi-Fi
- The built-in LiPo pack ensures 2 hours of operating time
- So lightweight and ergonomic, you can shoot with one hand
- You can also attach tripods, camera poles and selfie sticks

\*Camera is included with the Xplorer V gimbal; Xplorer G gimbal requires a GoPro Hero 3 or 4 camera, sold separately.

**XIRE6055**  
Xiro Handheld Gimbal

### From the Experts:

Combining the fun of a toy car and the sense of accomplishment that comes from building something of your own, these Revell Junior Kits make building fun easier than ever!

### Long story short...

With two prestigious "Toy of the Year" awards already, it's clear that Revell Junior Kits are going to put smiles on a lot of faces for years to come.

# THE BEAST IS BACK!

Skill Level **4**

These kits are extremely complex and require a high degree of building, painting and use of advanced wood and paper techniques. Assembly may take a few weeks but the result is an exceptional flyer with museum-like qualities.

## Saturn V™

*Take it to the moon!*

**Length:** 43.25 in (109.9 cm)

**Diameter:** 3.94 in (100 mm)

**Weight:** 11 oz (312 g)

**Max. Altitude:** 350 ft (107 m)

**Features:** Twin 24-inch recovery chutes for the lower stage and an 18-inch chute for the top section. Improved interior, laser-cut centering rings, and easily removable molded Apollo capsule, escape tower, and main engine display nozzles.

**Recommended Engines:** D12-3, E12-4, E30-4, ESTT2157

## From the Experts:

The Saturn V is the first and only spacecraft yet invented capable of transporting humans to the moon and it will transport you to new heights of model rocketry fun with its exquisite scale detail!

## Long story short...

*Just the look of the nearly four foot Saturn V on the pad will make you feel like a rocket scientist. It's supreme in detail, superior in the sky, and majestic as it sinks back to earth under three chutes!*

**1/24 2016 #88 DALE EARNHARDT JR.®  
NATIONWIDE CHEVY® SS™**

**Dream display**

While Dale Jr.® is the son of the famous race car driver Dale Earnhardt Sr., he has carved out his own place in NASCAR® history as well. In fact, he won the Most Popular Driver Award twelve times in a row as well as two Daytona 500 wins and numerous others. While he has won championships in other classes, his number one goal is to win the Cup. **Kit features** detailed racing interior, metal axles, molded in color parts and soft black tires.

85-1474    RMXS1474    Total Parts: 35    Skill Level: New 2    Length: 8.2 in (208 mm)

**1:24 2016 #48 JIMMIE JOHNSON® LOWE'S  
CHEVY® SS™**

**Pass the glue and pass the rest!**

In 2009, the Associated Press presented Jimmie Johnson® with the Athlete of the Year Award in honor of his six NASCAR® Championships. He was the first race car driver to ever win this award. His prestigious career has included more than seventy Cup wins so far and, with the backing of Hendrick Motorsports™, it is likely the racing world hasn't heard the last of this California native. **Kit features** detailed racing interior, metal axles, molded in color parts and soft black tires.

85-1475    RMXS1475    Total Parts: 35    Skill Level: New 2    Length: 8.2 in (208 mm)

**1:25 '48 FORD POLICE COUPE 2N1**

**Forties flatfoot Ford**

The 1948 Ford was the final year for a new design that began in 1941 with a completely updated, wider and more modern looking car. Shortly after the new car was introduced in 1941, however, Ford had to convert its factories to war production. It wasn't until 1946 that car production resumed. The Coupe came in 3 trim levels, this '48 model being the Super De Luxe version powered by a 239ci Flathead V-8 engine. **Kit features** police car parts including a roof light, siren, spot light, and radio plus a detailed engine.

85-4318    RMXS4318    Total Parts: 136    Skill Level: New 5    Length: 7.9 in (200 mm)

**1:25 '30 FORD MODEL 'A' COUPE 2N1**

**Fan favorite Ford**

The classic Model A Coupe has been a favorite with street rod builders since the beginning. In the 1950s, old Model A Fords were easy to find and cheap. Times and prices have changed, but the fun of building and driving a street rod has remained the same. Now, aftermarket suppliers offer just about every part you could want or need for your street rod. **Kit features** detailed small block V-8, two different frames to choose from, choice of two interiors, and soft black tires.

85-4326    RMXS4326    Total Parts: 151    Skill Level: New 5    Length: 5.8 in (146 mm)

**1/35 GERMAN TRUCK TYPE 2.5-32**  
Putting the "Blitz" in "Blitzkrieg"

Two and a half ton trucks, manufactured by Opel (a GM® subsidiary since 1931), were some of the most popular trucks in the German Army. Chief amongst the reasons for this popularity was simple availability. Opel's Brandenburg facility was a brand new factory set up in 1935 with the express purpose of building trucks and those trucks, primarily, went on to the motorized divisions of the re-arming German Military. **Kit features** detailed engine, interior, chassis and transmission plus open flatbed, hand tools, and decals for four versions.

03250    RVLS3250    Total Parts: 170    Skill Level: 5    Length: 6 in (152 mm)

**1/72 TOPOL SS-25 SICKLE**  
Missiles on the move

Despite many treaties, smiles, and much hand shaking, mobile intercontinental missile batteries like this one continue to serve in the Russian Armed Forces. Mobile launchers reduce the likelihood that a battery will be destroyed by a first strike before it can counter-launch its missiles. It is equipped with a warhead that's 53 times as powerful as the one that dropped on Hiroshima. **Kit features** detailed parts and decals for two missiles and a START-1 Space Launch System.

03303    RVLS3303    Total Parts: 309    Skill Level: 5    Length: 12.2 in (310 mm)

**1/72 STEARMAN PT-17 KAYDET**  
Stearman's dazzling Allied trainer

The Kaydet was the Army Air Force's primary trainer during WWII. An estimated 9,783 Kaydets biplanes were built throughout the 1930s and 1940s to train the thousands of pilots needed for the war effort. Once WWII ended, thousands were sold for use as crop dusters and stunt planes. Kaydets were popular sport aircraft as well and many of these beloved birds are still flying to this day. **Kit features** a realistic radial engine, a movable prop, detailed landing gear and decals for either a US Army or US Navy version.

03957    RVLS3957    Total Parts: 58    Skill Level: 4    Length: 6.3 in (160 mm)  
Wingspan: 8.1 in (206 mm)

**1/48 MESSERSCHMITT Bf 109 G-10**  
Aggressive air power

Designed by Messerschmitt and Lusser in 1934, the Bf 109 was one of the first truly modern aircraft of the era. Features such as a liquid-cooled V-12 engine, a closed canopy and retractable landing gear made the Bf 109 a huge improvement over WWI fighters. Powerful engines with superchargers and the option for extra guns, rockets, bombs or fuel tanks, made it a highly versatile fighter. Upgrades, variations, and field modifications kept the Bf 109 competitive through the end of the war. **Kit features** detailed cockpit and undercarriage plus full decals.

03958    RVLS3958    Total Parts: 40    Skill Level: 3    Length: 7.4 in (189 mm)  
Wingspan: 8.1 in (206 mm)

## 1/32 GLIDER DUO DISCUS AND ENGINE

Champion thermal rider

With an incredibly broad wingspan and the option for a two-stroke motor, the Duo Discus is a glider quite capable of making extraordinarily long-range unpowered flights. Over 500 Duo Discus gliders have been produced for use in pilot training and recreational cross country flying. **Kit features** detailed motor with propeller, cockpit with bucket seats, blue toned cockpit canopy, detailed landing gear, two wing type sets, and decals for one version.

03961    RVLS3961    Total Parts: 65    Skill Level: 3    Length: 10.6 in (268 mm)  
Wingspan: 24.4 in (620 mm)

## 1/144 AIRBUS A320 ETIHAD AIRWAYS

On order for Etihad

Airbus A320 aircraft in all their variants are some of the most powerful and efficient passenger aircraft on the market. Etihad Airways has 10 orders currently submitted for new A320neo aircraft. These "new engine option" A320s are more efficient, more spacious, and longer ranged than the originals; providing a boost to operators, passengers, and the planet as a whole. Etihad, based out of the United Arab Emirates, is one of the most luxurious airlines in the world with service to airports all over the globe. **Kit features** detailed undercarriage and engines plus decals for an Etihad Airways aircraft.

03968    RVLS3968    Total Parts: 60    Skill Level: 3    Length: 10.3 in (261 mm)  
Wingspan: 9.3 in (235 mm)

## 1/32 UH-72A LAKOTA

Training to fight terror

Purchased in 2006 to replace the ageing fleet of American LUHs, the UH-72A is primarily used for Homeland Security operations as well as training and light transport. It is a militarized version of the Eurocopter EC145, one of the premier executive transport helicopters in the world. Though it has frequently been suggested as the basis for the Armed Aerial Scout role, it is not rated for combat operations, partially due to poor hot and dusty conditions performance. **Kit features** cockpit with instrument panel, rotating rotors, and decals for two versions.

04927    RVLS4927    Total Parts: 204    Skill Level: 4    Length: 12.2 in (331 mm)

## 1/144 GERMAN LSM EIDECHSE-KLASSE

Where were these in 1940?

Operation Sea Lion fell apart for a number of reasons, including a lack of transports capable of conveying landing forces across the Channel. Had Germany possessed the Eidechse-Klasse landing ships in this kit, history might have changed. However, the transport capacity, helicopter landing deck, and anti-aircraft capability of the LSM was not available to Germany until 1959. **Kit features** two part hull, detailed propulsion unit, moveable rudder, detailed cargo deck, opening bow doors and ramp, 3 M47 tanks, 3 APCs, 3 trucks, helipad and Bristol 171 helicopter plus four sets of decals.

05139    RVLS5139    Total Parts: 485    Skill Level: 4    Length: 17.4 in (443 mm)

# Revell New Releases! of Germany

www.revell.com

## 1/24 VW® T1 SAMBA BUS LUFTHANSA

From the airport to anywhere

The Volkswagen T1 Samba made a great airport shuttle in the early days of the Lufthansa airline. Its spacious seating arrangement and canvas roof made conveying passengers to the airport, quite literally, a breeze. Add in the wrap around glass windows for sightseeing and the efficient, reliable engine and it's no wonder the T1 was so popular! **Kit features** multi-part body, detailed interior with bench seats, movable doors and tailgate, rotating wheels, and full decals for a T1 with blue and yellow Lufthansa design and logos!

07436 RVL57436 Total Parts: 167 Skill Level: 5 Length: 7.1 in (181 mm)

## 1/48 F-8J CRUSADER

The last gunfighters

For a fifties era aircraft, the F-8 Crusader was far ahead of its time. It had remarkable variable incidence wings which allowed it to significantly increase lift for takeoff runs. It was the first US aircraft capable of flying faster than 1,000 mph. Additionally, it was the last US fighter aircraft to be equipped with guns (four 20mm autocannons) as the primary armament. Crusaders fought over Vietnam and served with the French and Philippine navies as well. **Kit features** a cockpit with instrument panel and pilot, landing gear and decals.

07226 (Limited Edition) HSGS0226 Total Parts: 125 Skill Level: 3 Length: 13.7 in (348 mm)  
Wingspan: 8.9 in (226 mm)

## 1/24 MAZDA COSMO SPORT "1968 MARATHON DE LA ROUTE"

In it for the long haul

The Cosmo Sport made its racing debut at the 1968 Marathon de la Route, held at Germany's infamous 84-hour Nürburgring event. Mazda used two Cosmos to promote its revolutionary two-rotor Wankel engine during this endurance test. While one of the Cosmos suffered axle damage in lap 84, another claimed a fourth-place victory. This limited edition **kit features** two marking options for cars from the 1968 Marathon de la Route held on August 21, 1968: 1. Car no. 19, 4th place and 2. Car no. 18.

20274 (Limited Edition) HSGS0274 Total Parts: 101 Skill Level: 3 Length: 6.7 in (171 mm)

## 1/72 HEINKEL He 111P

Blitzkrieg baby

Designed as a transport to avoid Treaty of Versailles restrictions, the Heinkel He 111P rapidly showed its true colors when Germany began rearming. Early versions, including the P variant, were in service by the invasion of Poland. There, their speed allowed them to evade enemy fighters while their bomb loads left defenders scrambling for cover. Fortunately for the Allies, the Germans had neglected the defensive armament of the He 111. Unescorted bombers suffered drastic casualties during the Battle of Britain. **Kit features** new marking options.

01552 (Limited Edition) HSGS1552 Total Parts: 115 Skill Level: 3 Length: 9 in (229 mm)  
Wingspan: 12.4 in (314 mm)

## 1/72 JUNKERS Ju 88A-4

Auntie Ju is here for you

One of the most modified and varied of all German aircraft during WWII, the Ju 88 served as a bomber, night fighter, recon plane, and more. The A-4 variant was a bomber model with improved defensive armament and stronger engines. Unfortunately for the Axis, the A-4 variant only arrived in the closing days of the Battle of Britain—a conflict that cost the bomber force over 300 Ju 88s of earlier types. On the Eastern Front, Ju 88s crippled Russian air power, dispersed Russian ground forces and helped power the drive to Moscow.

01555 (Limited Edition) HSGS1555 Total Parts: 158 Skill Level: 3 Length: 7.8 in (199 mm)  
Wingspan: 11 in (279 mm)

## 1/72 MOSQUITO Mk.XIII "NIGHT FIGHTER"

Every German's night fright

Night fighter versions of the popular De Havilland Mosquito were first produced in 1942. Mk.XIII versions, specifically, were equipped with microwave radar for homing in on enemy aircraft. Once it hunted down an enemy, the Mosquito used a combination of speed and four 20mm cannons to bring down bombers and fighters alike. For long hauls over Fortress Europe, the balsa-built Mosquitos could carry external drop tanks. **Kit features** new resin radome and gun camera parts plus external drop tanks and full decals for two versions.

02198 (Limited Edition) HSGS2198 Total Parts: 68 Skill Level: 3 Length: 6.8 in (173.5 mm)  
Wingspan: 9 in (229.5 mm)

## 1/72 A-1H/J SKYRAIDER "VIETNAM WAR"

Close-up catastrophe

Some planners scoffed at this piston-engine aircraft operating in the jet age. However, it was one of the most successful close support aircraft of the Vietnam War. Its lower flying speed allowed weapons to be delivered with greater precision and its 8,000lb weapons capacity ensured there was plenty to go around. Close support missions are inherently dangerous as the low level, low speed attack makes the aircraft vulnerable to every weapon on the battlefield. Thankfully, the remarkable resilience of the Skyraider pulled most through. **Kit features** two full decal sets.

02199 (Limited Edition) HSGS2199 Total Parts: 92 Skill Level: 3 Length: 6.6 in (167 mm)  
Wingspan: 8.3 in (212 mm)

## 1/72 F-100D SUPER SABRE COMBO (TWO KITS)

Supersonic trend-setter

The first USAF fighter capable of sustained, level supersonic flight, Super Sabres were in service with the US for twenty-five years. In the skies over Vietnam, they performed combat air patrols and escort missions for bombers. In combat, they could outperform the opposing MiG-17. None were lost to enemy fighters. However, anti-aircraft fire and accidents still reaped a toll of Sabres in Vietnam. **Kit combo** features two aircraft with two sets of decals.

02200 (Limited Edition) HSGS2200 Total Parts: 69 + 69 Skill Level: 3  
Length: 9.1 in (231 mm)

### 1/72 P-3C ORION "GERMAN NAVAL AVIATION CENTENNIAL"

#### 100 years above the waves

Celebrate a century of soaring with this awesome P-3C Orion kit! In 1916, naval aviation in Germany consisted both of fixed wing aircraft and their considerably less maneuverable but higher-endurance zeppelin companions. P-3C Orions combine the features of each in a way leaders from 100 years ago could scarcely have dreamed. These aircraft have an endurance of 16 hours—still far less than the zeppelins, but their cruise speed of 328 knots and, of course, the incredible sensitivity of their sensors make zeppelins and flimsy 1916 seaplanes look like toys. **Kit features** new resin parts and two "Graf Zeppelin" decals.

02201 (Limited Edition) HSGS2201 Total Parts: 164 Skill Level: 3 Length: 19.5 in (495 mm)

### 1/72 F/A-18A+ HORNET "VFC-12 ADVERSARY" COMBO

#### Trained for adversarial action

Active since 1973, Fighter Squadron Composite Twelve (VFC-12) is based at Naval Air Station Oceana in Virginia Beach, VA. VFC-12 trains pilots from East Coast air wings in the finer points of aerial combat. Until 2012, VFC-12 aircraft were easily distinguished by a unique blue camouflage paint scheme. Today, their F/A-18A+ Hornets sport a signature splinter camouflage similar to select SU-35 Flankers. This limited edition **kit combo features** two F/A-18A+ Hornet kits with one marking option each: 1. US Navy VFC-12, Code: 06 and 2. US Navy VFC-12, Code: 05.

02202 (Limited Edition) HSGS2202 (Includes 2 Kits) Total Parts: (Per Kit): 76 Skill Level: 3 Length: 9.3 in (237 mm)

### 1/72 SR-71 BLACKBIRD

#### Above and Beyond the Ordinary

A full forty years after it was set, the SR-71's 2,193 mph speed record still stands as the single fastest flight for a manned, air-breathing aircraft. In secret Cold War missions over the Soviet Union, the SR-71 evaded pursuit and missiles with intense acceleration. Pressure-suited crews took these miraculous titanium-skinned aircraft to 80,000 feet and cruised at Mach 3.2. They snapped pictures of targets with high-powered cameras and scanned with radar. No hostile action ever brought down an SR-71, but peace and satellites grounded them forever in 1998. Now you can build your own 50th anniversary Blackbird with this fan-favorite Hasegawa kit! **Kit features** new markings.

04056 (Limited Edition) HSGS4056 Skill Level: 3

### 1/72 KAWANISHI H8K2 "NOT GO BACK AGAIN" FLYING BOAT

#### A high-water mark for model kits

The H8K2 boasted many advantages over the H8K1, notably Mitsubishi® MK4Q engines and an upgraded tail gun turret. Later versions substituted search radar for side gun blisters. Artist Leiji Matsumoto used this unique aircraft as the cornerstone for his manga, "Kawanishi H8K Not Go Back Again," which flew off the shelves in his native Japan. This limited edition **kit features** one marking option, based on Leiji Matsumoto's "Kawanishi H8K Not Go Back Again" battlefield manga, 1. IJN "Kondo-ke."

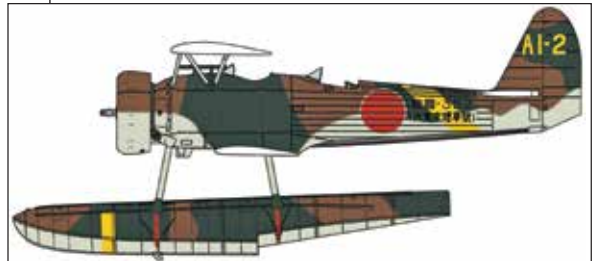

64734 (Limited Edition) HSGS4734 Total Parts: 182 Skill Level: 3 Length: 16.5 in (418 mm) Wingspan: 20.6 in (524 mm)

## 1/48 NAKAJIMA E8N2 TYPE 95 RECON SEAPLANE (DAVE) Eyes and ears of Nagato

Early in the Second Sino-Japanese War, Chinese skies provided the testing grounds where Japanese aircraft and pilots would be stressed and improved. The E8N2 seaplane was a catapult-launched reconnaissance biplane. It would have fit in well in WWI and provided valuable service to the Japanese over China, but American entry into the war escalated the caliber of aircraft needed for the war. The E8N2 continued to serve, but only in rear echelon units. **Kit features** two sets of decals plus new aileron rod and oil cooler parts.

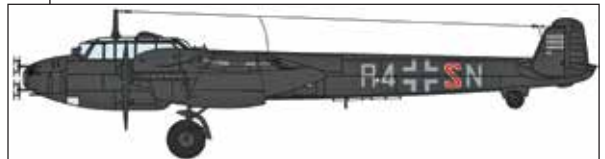

07431 (Limited Edition) HSGS7431 Total Parts: 115 Skill Level: 3 Length: 7.3 in (186 mm)  
Wingspan: 9.1 in (231 mm)

## 1/48 DORNIER DO 215B-5 "NJG 2" The Luftwaffe's legendary night fighter

Slim but striking, the Do 215 was initially developed by Dornier for the Swedish Air Force. When war broke out in 1939, the Do 215 was transferred into Luftwaffe service, where it was used as a light bomber and night fighter by Nachtjagdgeschwader 2 (NJG 2), a night fighter-wing. By the war's end, NJG 2 had tallied an estimated 800 aerial victories. This limited edition **kit features** two marking options: 1. Luftwaffe 5./NJG2, Code: R4 + SN and 2. Luftwaffe stab II./NJG 2, Code: R4 + DC, spring 1942.

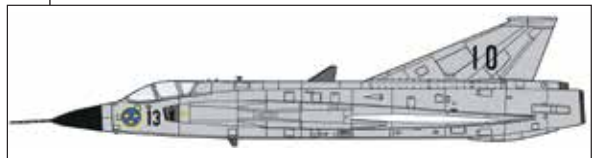

07433 (Limited Edition) HSGS7433 Total Parts: 190 Skill Level: 3 Length: 13.8 in (350 mm)  
Wingspan: 14.8 in (375 mm)

## 1/48 J 35D DRAKEN "NATURAL METAL" Satisfy your thirst for thrust

Massive Rolls-Royce® Avon 300 afterburning engines were capable of delivering 77.3kN of thrust (roughly 17,000 lb of force). This incredible power made the Draken Western Europe's first fully supersonic aircraft. At full throttle, the Draken passed Mach 2. Armament consisted of twin 30mm cannons, rockets, missiles, and bombs. All told, for a sixties era fighter, the Draken was one deadly delta-winged fighter. **Kit features** two Swedish Air Force decal sets.

07434 (Limited Edition) HSGS7434 Total Parts: 106 Skill Level: 3 Length: 12.7 in (323.5 mm)  
Wingspan: 7.8 in (198 mm)

## 1/48 MITSUBISHI® F-2B "ADTW 60TH ANNIVERSARY" Japan's Air Development and Test Wing turns 60

The Mitsubishi F-2B may not be the most famous fighter around, but it is certainly one of the most impressive. The F-2 has the distinction of being the first military aircraft equipped with Active Electronically Scanned Array (AESA) radar. Its wing area is also 25 percent larger than other fighters in its class. Currently, there are 61 single-seat F-2As and 21 F-2B two-seat trainers flying worldwide! This limited edition **kit features** one marking option: 1. JASDF ADTW 60th anniversary special marking, Code: 101 (63-8101), Gifu AB, 2015.

07435 (Limited Edition) HSGS7435 Total Parts: 185 Skill Level: 3 Length: 12.9 in (328 mm)  
Wingspan: 9.6 in (244 mm)

### 1/32 F-5E TIGER II "TAIWAN AIR FORCE"

One fierce fighter

The F-5E Tiger II continued the tradition of excellence begun by the F-5A Tiger, but replaced the AN/APQ-153 radar with the more advanced AN/APQ-159 system, which improved range and frequency agility. The Taiwan Air Force received its first shipment of 28 F-5E Tiger IIs in May 1975. By the time production ceased in 1987, Taiwan received a total of 308 F-5Es, 23 of which remain in service today. This limited edition **kit features** one marking option: 1. Taiwan AF, 737 TFW (7th Wing), Code: 5281, 5261.

08243 (Limited Edition) HSGS8243 Total Parts: 131 Skill Level: 3 Length: 17.1 in (434 mm)  
Wingspan: 10 in (254 mm)

### 1/32 MESSERSCHMITT Bf 109K-4

K series kriegers

Arriving near the end of WWII, the K-Series Bf 109 was equipped with a high horsepower engine that kept it competitive with the latest Allied aircraft and, reportedly, superior to most in rate of climb. The K-Series also allowed Germany to standardize aircraft design behind a single type which greatly simplified maintenance, crew training and logistics. Despite these advantages, Bf 109s steadily fell prey to more experienced Allied pilots, advances on the ground, and the overwhelming numerical superiority of the Allies.

08870 (Limited Edition) HSGS8870 Total Parts: 112 Skill Level: 3 Length: 12.2 in (310 mm)  
Wingspan: 11.1 in (283 mm)

### 1/700 WORLD OF WARSHIPS GERMAN BATTLESHIP BISMARCK

Gray giant of Germany

With an armament of eight 15 inch guns, a host of smaller batteries, and the largest displacement of any European WWII Battleship, Bismarck was the most advanced battleship in the European theater of operations. Interestingly, it was an obsolete Bi-Plane torpedo bomber that sealed Bismarck's fate when it jammed the massive vessel's rudder. Locked into a circular course, the doomed Bismarck was pounded by shells and torpedoes. Despite two hours of shelling, Bismarck's crew never surrendered. **Kit features** plastic cement, instructions, and invite codes for World of Warships.

46501 ITAS4501 Total Parts: 247 Skill Level: 4 Length: 14.4 in (365 mm)

### 1/700 WORLD OF WARSHIPS IJN ATAGO

Master of the waves

Atago was the most heavily armed heavy cruiser in the world when she was commissioned in 1932. Her ten 20cm guns and significant secondary armament were intended to give her the advantage in conventional surface engagements with numerically superior enemies. Early in the war, this advantage helped inflict serious damage but as the Allies gained air superiority Atago was increasingly at a disadvantage. She was sunk in Palawan Passage by USS Darter before she ever reached her "decisive battle". **Kit features** plastic cement, full decals and in-game codes for World of Warships.

46502 ITAS4502 Total Parts: 317 Skill Level: 4 Length: 11.6 in (295 mm)

## 1/700 WORLD OF WARSHIPS USS ESSEX

### Pacific power projection

Aircraft from Essex provided air cover, reconnaissance, strikes on enemy naval forces, and support for the costly amphibious assaults that the Pacific War was famous for. Later, the Essex served in the Korean War and hauled Apollo 7 astronauts out of the waters off Puerto Rico. **Kit features** plastic cement, full instructions, and invite codes for the World of Warships game!

46503 ITAS4503 Total Parts: 529 Skill Level: 4 Length: 14.8 in (375 mm)

## 1/56 WORLD OF TANKS PZ.KPFW.VI TIGER

### Lord of the field

On the simulated fields of World of Tanks skirmishes, where mechanical breakdowns in the bitter Russian winter weather are not a concern, the Tiger I must be a supremely terrifying opponent. Recorded field tests indicated that the 88mm gun on the Tiger I could knock out Shermans at a range of over a mile and was invulnerable to return fire at ranges further than 100m. **Kit features** liquid cement, tank guide, full decals, and in-game codes for World of Tanks.

56501 ITAS5501 Total Parts: 50 Skill Level: 2 Length: 5.5 in (140 mm)

## 1/56 WORLD OF TANKS PZ.KPFW.V PANTHER

### The highest caliber

The Panther was built for blitzkrieg with thick front armor and a supremely-powerful 75mm gun. Moving fast in the open it's virtually unstoppable. The long retreat from the Eastern Front after Kursk, however, was the worst possible situation for the Panther. Thin side armor and a low-powered HE round made it vulnerable to masses of Russian infantry and continuous retreats overtaxed the suspension. When you field a Panther in WoT, attack, when you face one, run. **Kit features** plastic cement, tank guide, full decals, and in-game codes for World of Tanks!

56502 ITAS5502 Total Parts: 39 Skill Level: 2 Length: 6.1 in (154 mm)

## 1/56 WORLD OF TANKS M4 SHERMAN

### Knock-knock, Berlin?

Late war German tanks had better armor, better guns, and sophisticated road wheel designs which is all well and good... but Shermans actually made it to the field. Over-engineered German tanks broke down constantly, Shermans didn't. Germany was fast running out of gas, America wasn't. Shermans had air support, panzers... not so much. Germany put 6,000 Panthers in the field, America built roughly 50,000 Shermans. It wasn't the best tank of the war and it wasn't the worst; it was the one we needed to WIN. **Kit features** plastic cement, tank guide, decals, and in-game codes for World of Tanks!

56503 ITAS5503 Total Parts: 40 Skill Level: 2 Length: 4.1 in (104 mm)

## 1/56 WORLD OF TANKS CROMWELL

Meteoric mover

With a Rolls-Royce Meteor V12 600 horsepower engine and the Christie Suspension, the Cromwell tank could potentially reach speeds of 40 mph and up. Unfortunately, at those speeds the suspensions didn't last very long. Operational tank models were electronically limited to 32 mph which was still entirely fast enough to do end runs around lumbering German tanks and hit the flanks hard. **Kit features** plastic cement, tank guide, full decals, and in-game codes for World of Tanks.

## Academy® 1/72 F-14A VF-2 "Bounty Hunters"

Triumphant twin-engines

The F-14 Tomcat was built to a stringent set of requirements. It had to have long range and high takedown capability to defend against cruise missiles and bombers. It had to be fast, maneuverable, and equipped with mid-range missiles to fight fighter-bombers. Additionally, it had to be equipped with a cannon, fast, and easy to control for close range turning dogfights. In what was as much an aviation miracle as a milestone, the F-14 met all the challenges put before it and more. **Kit features** two sets of decals, moveable wings, weaponry, and detailed cockpit.

12532    ACYS2532    Total Parts: 93    Skill Level: 4    Length: 10.2 in (258 mm)

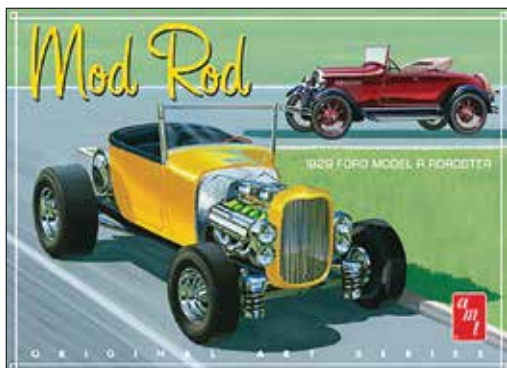

## Academy® 1/72 F-16C USAF Multirole Fighter

Lightweight legend

Light, fast, easier and cheaper to operate than the majority of first-line fighters, the F-16 is the top fighter, in terms of numbers, in the world. Dozens of countries use the F-16, primarily in regions where reliability and cost count for more than absolute stopping power. Now you can put together this 1/72 scale version of the original quick with no painting or gluing required. **Kit features** new tooling, multi-colored parts, precision mold engineering, accurate weapons, and display stand.

12541    ACYS2541    Total Parts: 34    Skill Level: 1

## AMT® 1/25 1929 Ford Model A Roadster (OAS) Mod Rod

Two door terror

The classic Model A has been a favorite with street rod builders since the fifties. Model A Fords were easy to find and cheap to upgrade. Hot rodders have frequently replaced engines, bored out cylinders, lowered run heights and trimmed every pound possible to get the fastest car around. Today, automotive shops supply virtually every part you could want making the fun of building and driving a street rod easier to attain than ever before. **Kit features** parts to build the stock roadster and the "Mod Rod" custom.

AMT1000/12    AMTS1000    Skill Level: 2

## AMT® 1/25 1929 Ford Model A Roadster Combo

*Stock and Mod Rod in one!*

With its updated body styling the Model A Ford finally entered the aesthetic competition Henry Ford had fought against with the Model T. The original Model A was a thing of beauty, with rounded lines, ample power, and amenities like an electric starter. The Mod Rod is another animal altogether. It's a souped-up, low-slung gasser made to go fast. This "Retro Deluxe™" **kit combo features** two model kits—a stock Model A and the "Mod Rod", both molded in yellow pearl with a bonus mini box.

AMT1002/12 AMTS1002 Skill Level: 2

## AMT® 1/25 Motorcycle Parts Pack Double Dirt Bikes

*Beef up your bikes!*

Is your dirt bike or BMX racer a dud? Does it shudder at the smallest dirt hill and tremble in curves? It's time for an upgrade. This AMT set supplies you with the parts you need to upgrade your dirt bikes into the mud-flinging masterpieces you've always dreamed of! Pick yours up and leave stock far behind! **Kit features** Retro Deluxe™ packaging and parts for two complete 1970s-era dirt bikes.

AMTPP014/24 AMTS9914 Skill Level: 2

## Dragon Models® 1/72 M103A2 Heavy Tank

*120mm Heavy*

Designed to deliver killing blows at maximum range, the M103A2 was a heavy tank that mounted a 120mm rifled cannon capable of punching through nearly 200mm of armor at a range of over a mile. So much focus was put on the armor and armament of the M103 that it wasn't until the A2 variant that the serious problems with the engines were addressed. The A2 version's diesel engine more than tripled the types range and increased its top speed.

## Dragon Models® 1/35 German Communication Center with Troops

*Can you hear Der Fuhrer now?*

Communication brings coordination, coordination brings victory. At the beginning of WWII, Germany was more focused on developing and distributing radio technology than virtually any other belligerent nation. Even single tanks were frequently equipped with radios allowing German commanders to rapidly issue commands and put all their forces in optimal positions. Communications Centers like the one in this kit were vital for controlling and monitoring the many radio contacts a large operation would generate.

3826 DMLS3826 Total Parts: 50+ Skill Level: 3

## Dragon Models® 1/72 Ar 234 C-4 with V-1 "Huckepack"

*Detour to destruction*

The V-1 "Buzz Bomb" was a devastating semi-guided cruise missile the Germans used to destroy huge swathes of London. In order to combat the rain of iron, the British deployed fast fighters and radar-directed anti-aircraft guns. Though they never completely ended the threat from the V-1 these measures forced Germany to consider radical concepts like "piggyback" mounting V-1s on Ar 234 jet bombers and firing them into the city from other directions. Fortunately, the Allied invasion of Germany ended the threat from V-1s permanently. **Kit features** photo etched parts.

5011 DMLS5011 Total Parts: 75+ Skill Level: 4 Wingspan: 8 in (203.2 mm)

## Dragon Models® 1/72 P-38J Lightning

*Pacific buzzsaw*

Armed with a quartet of .50 caliber machine guns and a single 20mm cannon, all packed in the nose, the P-38J Lightning packed a heavy, long ranged wallop. In the Pacific, all the top aces of the war used the P38 Lightning. Its long range, high speed, and heavy armament made it perfect for demolishing Japanese dominance in the air. Though it fared less well in Europe, the P-38 has a secure legacy as a superior twin engine fighter. **Kit features** photo etched parts.

5018 DMLS5018 Total Parts: 75+ Skill Level: 4 Wingspan: 9 in (229 mm)

## Dragon Models® 1/72 F-5E Reconnaissance

*Ready for your close up?*

The fast and lethal P-38 lightning had the range to get just about anywhere and the speed to get out unharmed. Both those qualities were also needed in a reconnaissance plane. With a few modifications like cameras in the nose instead of guns, the P-38 became the F-5E. It was one of the fastest and most effective recon planes of the war and Dragon has a specially modeled one just for you! **Kit features** newly tooled nose, detailed undercarriage, fine panel lines, photo-etched detail parts, clear canopy, and cartograf decals.

5040 DMLS5040 Total Parts: 75+ Skill Level: 4 Wingspan: 9 in (229 mm)

## Dragon Models® 1/72 Heinkel He 219A-5/R4

*Death in the dark*

Softly winging through the night, the He 219 is illuminated briefly by the play of searchlights from below. It's a predatory leviathan shaped like a nightmare, probing in the darkness for its target. A blip appears on the radar and the vessel veers, gathering speed to catch its prey. It roars in, spitting fire and shredding its target in seconds. As the bomber sinks to earth with wings of fire, the He 219 is already gone; hard on the tail of another victim. **Kit features** detailed cockpit, new tooling, and fine Cartograf decals.

5041 DMLS5041 Total Parts: 75+ Skill Level: 4 Wingspan: 11 in (279 mm)

## Dragon Models® 1/48 Fw 190A-7 with slipper tanks

*In the "Luft" longer*

The ever-expanding need to keep fewer fighters in the air longer as losses mounted led German industry to try all kinds of stopgap solutions. One of these was the Graf Zeppelin Works-designed "Doppelreiter"—twin over-wing fuel tanks that held 270 liters of aviation gas. Though never as common as under-slung drop tanks, these "slipper" tanks gave the A-7 variant of the Fw 190 longer range and more loiter time. Eighty A-7s eventually received the modification before the A-8 arrived. **Kit features** newly tooled tanks, photo-etched detail parts, and Cartograf decals.

DRA 5545 DMLS5545 Total Parts: 75+ Skill Level: 4 Wingspan: 9 in (229 in)

## Dragon Models® 1/35 Wittmann's Ace Tiger Crew (5)

*Extraordinary on the Eastern Front*

Though there was no verification system in place for determining tank aces, some historians credit Wittmann and his crew with over 100 tank kills and over 100 anti-tank guns knocked out. What is certain is that they devastated Russian forces on the Eastern Front and had one exceptional run in the Battle of Villers-Bocage in France. Ultimately, Wittmann and his crew were undone by Wittmann's aggression. However, he remains one of the most famous German tank commanders of all time. **Kit features** five tank crew figures for use with your Tiger tank model.

DRA 6831 DMLS6831

## Dragon Models® 1/72 Sd.Kfz. 181 Ausf. E Tiger I, Late Production with Zimmerit

### Devastating detail

In 1942, when Germany was struggling to destroy T-34 tanks, they developed a magnetic mine with a shaped charge warhead capable of blowing a hole through 140mm of armor. Germany knew, however, that the simple to produce and easy to use mine could be mass produced by Russia as well. They began coating their tanks in Zimmerit, a paste that prevented magnetic mines from adhering to the armor. Zimmerit removed one of the few serious land-based threats the Tiger I faced, letting it continue to dominate the field. **Kit features** a Tiger tank with injection-molded Zimmerit ridges pre-applied.

DRA 7203 DMLS7203 Total Parts: 50+ Skill Level: 3 Length: 4 in (102 mm)

## Dragon Models® 1/72 LCM(3) Landing Craft with 29th Infantry Division

### On Omaha

The 29th hit Omaha beach in the teeth of overlapping machine gun fire. Concentrated mortar and artillery fire turned the beach into a typhoon of hot iron. Landing crafts struck ground early. Tanks foundered in heavy seas. Soldiers drowned in the surf. Despite it all, the 29th made it off the beach and fought for 242 days in Europe; suffering over 20,000+ combat casualties along the way. **Kit features** landing craft with opening/closing ramp, 12 infantry, 3 LCM crew, six obstacles, diorama base, and decals.

DRA 7257 DMLS7257 Total Parts: 100+ Skill Level: 3 Length: 9 in (229 mm)

## Moebius® 1/32 BSG Raptor

### Every mission is for man

The Colonial Raptor is a supreme fighting platform. It is an electronic warfare craft, an assault transport, it totes a powerful array of missiles, and it's capable of faster than light jumps. For the wide variety of missions the characters of BattleStar Galactica have to face, the Raptor is the premier aircraft left. It doesn't get much cooler than this! **Kit features** full interior.

962 MOES0962 Total Parts: 97 Skill Level: 3 Length: (approx.): 12 in (305 mm)

## MPC 1/25 1979 Ford® Pinto Wagon

### The Pinto Pony rides again!

The Pony Express had just ten days to get from St. Joseph, Missouri, to San Francisco, California. On horseback that's a grand feat, in a 1979 Ford Pinto Station Wagon that's a rather lazy drive. Interestingly, you can still hop on US 30 and travel virtually the exact same route that the Pony Express riders traveled 150 years ago. If you do make the trek in a Pinto, make sure not to get rear ended. **Kit features** "street stock" and custom options, Retro Deluxe™ packaging and a collectible mini box.

MPC845/12 MPC80845 Skill Level: 2

## Trumpeter 1/72 Chinese J-10B Fighter

### Communist canard

The relatively secretive J-10B was developed in China and introduced into service in 2005. It's a substantially powerful multirole fighter with Mach 2+ capability and hardpoints for up to 15,000 lb. of external stores. In addition, it mounts a twin-barreled 23mm autocannon capable of firing over 3,000 rounds a minute. Most importantly, the J-10 is equipped with a radar set than can simultaneously track ten enemies and engage two. Approximately four hundred of the type have been produced with some being exported to Pakistan.
