IMPRESSIVELY EQUIPPED, FOR INSTANT FPV

VUSION EXTREME FPV RACE PACK

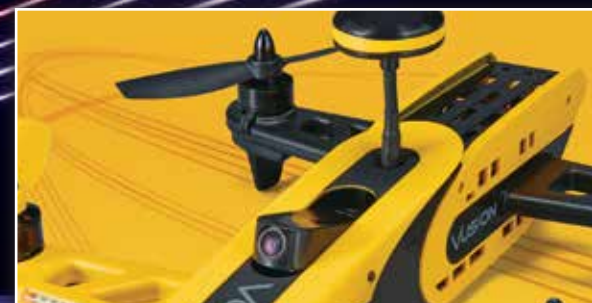

EVERYTHING'S INCLUDED!

Just drop the high-quality LCD monitor into the included goggles for an immersive FPV experience.

The Vusion 250 includes a professional-quality 6-channel 2.4GHz radio system, for superior, interference-free control.

The video transmitter uses 5.8GHz technology so you can see your flights in real time. It features eight Raceband channels optimized for pro FPV racing.

This Extreme FPV Race Pack is all-in-one complete — even a LiPo battery, balance charger, "AA" batteries, spare props and a screwdriver are included!

RISE0200 Vusion 250 RTF Extreme FPV Drone Race Pack (200mW)
RISE0205 Vusion 250 RTF Extreme FPV Drone Race Pack (25mW)
Diagonal: 250 mm (9.8 in)
Height: 110 mm (4.3 in)
RTF Weight: 502 g (1.1 lb)
Requires: Nothing!

RISE™

HAM license required for 200mW transmitter use within the United States. See explore-rise.com for details.

- The first – and only – injection-molded racing drone that's 100% complete and Ready-To-Fly, with no soldering or assembly required
- Available with 25mW or 200mW video transmitters – both use 5.8GHz technology so pilots can watch flights in real time

- Modular, injection-molded construction adds impact resistance. Pieces snap on so pilots can be up and running in no time
- A micro memory card slot (up to 32GB) makes it possible to transfer flying footage from the on-board 600TVL FPV camera without sacrificing video quality

From the Experts:

The revolutionary Vusion 250 Extreme FPV Race Pack blends innovation and convenience with the ultimate First Person View racing drone. It's the first – and only – injection-molded RTF 250-size racing drone to come with all essential FPV equipment installed. Everything's designed to work seamlessly together, for the ultimate flying experience!

Long story short...

The Vusion 250 is a true game changer, combining an ultra-tough racing drone with all of the essential FPV equipment you need to start racing!

REALFLIGHT OPTIONS FOR EVERY PILOT

InterLink-X Controller with RF-X

- Dramatic, immersive graphics driven by UNIGINE
- More closely resembles actual flying, with improved special effects and seamless transition
- Over 50 new aircraft, each detailed down to the panel lines and rivets
- The same unparalleled RealPhysics™ technology that has made RealFlight R/C's #1 selling flight simulator
- Simple, intuitive interface — zero learning curve, zero hassle
- Compatible with the popular InterLink Elite controller

GPMZ4540

RF-X Software Only

If you already own a RealFlight controller, you can use it with RF-X with the software-only RF-X upgrade.

GPMZ4548

InterLink-X Controller Only

- Reset/Rewind button lets reply your successes or reverse your crashes — a RealFlight exclusive!
- Lets you keep from putting wear and tear on your field transmitter
- Operate most simulator functions right from the controller
- 10-channel capability for effortless control of everything from ailerons to arsenals
- Built-in sliders help drone pilots zero their cameras in for the best shots
- Transmitter control of the intuitive user interface makes the mouse obsolete

GPMZ5000

Wireless Interface

If you own an SLT transmitter, RF-X offers a wireless interface that makes it easy to learn all you need for flying at the field with your own transmitter.

GPMZ5020

Wired Interface

For pilots with a wired transmitter RF-X offers an interface version with all of the same set-up ease and control functions.

GPMZ5024

From the Experts:

If you think you know RealFlight, wait'll you experience RF-X! From the exquisite detail on the aircraft to the infinite and subtle differences in the trees and foliage, RF-X far and away surpasses even your highest expectations of what a flight simulator can offer.

Long story short...

RF-X takes the sim experience to a new dimension, with graphic realism that has to be seen to be believed!

Exerience the New RF-X visit realflight.com!

A SLEEK, STREAMLINED COMPETITOR

TC7.1 FACTORY TEAM

1/10 Scale 4WD Electric Touring Car Kit

Shown with body, wheels and tires – not included

- Low CG shocks with hard-coated shafts and a polished finish
- Optimized suspension arm length and multiple shock mounting options
- Central motor mounting allows for free chassis flex in either direction
- DCV front driveshaft assemblies offer smoother rotation at extreme steering angles
- Rear gear diff for maximum performance and minimal maintenance
- Floating servo mount
- Efficient drive belts
- Titanium turnbuckles with eyelets for easy ballstud adjustment

From the Experts:

Over the past decade, Axial has been synonymous with crawlers and the scale trail community for creating vehicles that inspires endless adventure and creative freedom. Something interesting started to evolve and a trend began to appear, 4WD straight axle Monster Jam® Trucks. What better to build upon that trend than to offer one of the most striking trucks within Monster Jam®, MAX-D™. Since 2003, MAX-D™ has won 11 Monster Jam World Finals® championships and brought crowds to their feet with daredevil maneuvers and non-stop excitement. Amongst a lineup of Monster Jam® Trucks, the low slung futuristic SUV body with yellow, red and silver paint scheme combined with chrome spikes is an instant grabber.

Long story short...

Axial went all out when designing the body, chassis and roll cage for the SMT10™ MAX-D™ Monster Jam® Truck.

READY TO ROCK YOUR WORLD!

NERO 6S BLX BIG ROCK

Ready-To-Run 1/8 Scale Brushless
4WD Monster Truck w/Diff Brain

- Stylish scale-looking double cab truck body with gleaming chrome bumpers
- Heavy-duty driveline is fully sealed to keep out debris
- Durable chassis allows for a lower CG, improving handling and control without compromising ground clearance
- Powerful brushless motor with finned aluminum can
- Tactic TTX300 radio system with built-in Diff Lock Control System
- Aggressive-tread tires mounted on black chrome wheels with foam inserts
- Super-strong composites and lightweight anodized aluminum
- Handsome gunmetal-colored parts
- A long list of performance features, including front and rear skid plates, HD shock rod ends, middle hoop set, shock mounts and much more

FEATURES:

- 16mm aluminum shocks, mounted inboard, with super-duty springs
- Super-tough composite chassis cage
- BLX200 waterproof ESC with integrated cooling fan
- Durable double suspension arms
- Large diameter, anodized aluminum slider driveshafts
- Heavy-duty UJ driveshaft throughout, protected from the elements by rubber boots
- Anodized aluminum twin vertical plates
- Quick-release side-mounted battery boxes for 2S or 3S LiPo cells

ARMA
DESIGNED FAST DESIGNED TOUGH

**60+
MPH**

OPTIONS INCLUDED

The heavy-duty universal joint drivetrain is just one example of the high-performance upgrades that are standard equipment on the NERO 6S BIG ROCK.

ARAD73** NERO 6S BIG ROCK BLX 4WD

Monster Truck RTR w/Diff Brain

Length: 21.7 in (551 mm)

Width: 17.6 in (447 mm)

Height: 10 in (253 mm)

Weight: 13.5 lb (6.12 kg)

Wheelbase: 14.9 in (378 mm)

Requires: (2) 2-3S 5000mAh LiPo batteries (35C 5000mAh minimum, 35C+ 5000mAh+ recommended) with XT90 connectors, (4) "AA" batteries, charger, LiPo charging bag

**NERO: the only vehicle with
revolutionary Diff Brain technology**

Advanced "Diff Brain" technology lets you easily lock and unlock all three gear diffs on the fly, right from the transmitter. Whether running on dirt, asphalt, grass or rocks, the Diff Brain allows you to instantly switch among four driving styles — blast, drift, wheelie or climb — to optimize performance and drive like a pro in any conditions.

3 servos and a circuit board lock and unlock all three diffs on the fly!

- Maximum traction
- Very slow-speed driving
- Perfect if you get stuck

- Used at slower speeds
- Best for free-styling
- Responsive to your driving skills

- Easy wheel stands
- Balanced handling
- Stronger brakes

- Balanced handling
- Maximum stability
- Best for jumping

From the Experts:

It's like no truck you've ever driven before — and once you do, you won't settle for anything else! The NERO 6S BIG ROCK has superior size and strength, provided by heavy-duty drivetrain parts that are standard equipment, along with contemporary styling that really stands out. Plus, Diff Brain technology gives you the ability to switch driving styles — on the fly!

Long story short...

Diff Brain technology means the NERO 6S BIG ROCK is like having 4 trucks in 1 — with almost more power than you can control. Almost!

SMALL IN SIZE, BIG ON FEATURES

HoverShot™

Ready-To-Fly 120 mm FPV Drone

- ▶ Comes equipped with a 720p FPV camera
- ▶ 3-axis gyro and 3 accelerometers for smooth, stable flight in all conditions
- ▶ Enjoy flight times of 7-10 minutes
- ▶ Multiple flight modes let you fly at your particular comfort level, whether you're a beginner or a veteran pilot

Altitude Hold takes the guesswork out of exact positioning and throttle control, so you can focus on getting the "perfect shot." Takeoffs and landings are push-button easy, and you can perform pro-style flips whenever you want with the Auto Flip feature.

DROMIDA

In addition to an assembled HoverShot drone, you'll also find an MR101 2.4GHz transmitter with built-in phone holder, a 720p Wi-Fi FPV video/still camera, a 2G micro memory card, a 1S LiPo battery and USB charger, four "AAA" batteries, four extra blades and a screwdriver.

Apple and the Apple logo are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc. Android and Google Play are trademarks of Google Inc. IOS is a trademark or registered trademark of Cisco in the U.S. and other countries and is used under license.

From the Experts:

With everything that the HoverShot can do, you'll wonder how it could possibly be so compact. Its 720p FPV camera shoots sharp videos and photos, and Altitude Hold helps keep the drone steady. Learning to fly the HoverShot is easy, and it comes already assembled with everything you need for immediate flying fun.

Long story short...

If you've been thinking about getting an easy-to-fly drone with First Person View camera capability, the HoverShot is an excellent choice!

Smart phone not included

DIDE0008 HoverShot 120 mm FPV Drone RTF
Diagonal: 120 mm (4.72 in)
RTF Weight: 72 g (2.5 oz)
Requires: device for Android or Apple and DroneView app (download free from Google Play Store or App Store)

RXS255

Extreme Speed Brushless
FPV Racing Drone Rx-R

FLY WICKED FAST

Includes:

- Fully assembled RXS255 drone
- 4S ESCs with BLHeli, OneShot and active braking
- 1000TVL CMOS FPV camera with 0-45° mobility
- 200mW video transmitter* and cloverleaf antenna
- (4) 5x4.5" bullnose props

RISE0255 RXS255 Brushless FPV Racing Drone Rx-R

Diagonal: 257 mm (10.1 in)

Weight: 460 g (16.2 oz)

Requires: 5-channel radio system, 4S 1300-2200mAh LiPo battery w/XT60 connector, LiPo balancing charger, video goggles or monitor (optional)

- Each 4S ESC is pre-loaded with BLHeli firmware and OneShot software for "locked-in" precision and agility
- An adjustable FPV camera, transmitter and cloverleaf antenna are included
- The RXS255's modular design features "wireless" arms, which helps make it extra-tough and extra-light
- The high-frequency ESCs install with "plug and play" simplicity — no soldering required

Note: The RXS255 requires FAA registration. Visit www.faa.gov for details.

KNOWFLY
BEFORE YOU
Unmanned Flight Safety Guidance
KNOWBEFOREYOUFLY.ORG

The RXS255's carbon-fiber airframe is engineered to be fast, agile and durable.

The built-in LED light bar makes the RXS255 easy to see, even during intense Line-of-Sight (LOS) flight.

RISE™

From the Experts:

The RXS255 is all about full-throttle, edge-of-your-seat drone racing, with the bonus of an FPV camera so you can what the drone sees, in real time! It comes already assembled and receiver-ready — just add a 5-channel radio system, a 4S LiPo battery and optional video goggles or monitor, and thrill to the RXS255's insane performance!

Long story short...

If you're ready for exciting racing action with an FPV-equipped drone, the RXS255 is ready for you!

GET THE FIRST PERSON VIEW EXPERIENCE

5.8GHz FPV Accessories

Whether you're into RC models or aerial photography, Tactic has the FPV equipment for letting you see the world around you in new and exciting ways. Almost any type of model can be set up for First Person View, and Tactic innovation ensures quality images.

The FPV-RM2 Monitor with Receiver is the ideal complement

- A 4.3" backlit LCD screen offers great picture quality
- 40-channel, 5-band 5.8GHz Raceband receiver is optimized for pro FPV racing
- Auto-scan makes finding the clearest channel and band quick and easy
- Micro memory card slot lets you store, edit and upload videos
- Long 1.5 hour run time
- Convenient USB charge port

TACZ5152 FPV-RM2 4.3" 5.8GHz 40Ch LCD Monitor & Receiver

Immerse yourself in the action with FPV-G1 Goggles

- See what your model sees, with no distractions
- Compatible with Tactic 5.8GHz FPV equipment, smartphones of virtually any size and Wi-Fi camera drones

TACZ5200 FPV-G1 Goggles w/o Monitor

First Person View perspective with wristband convenience

- Sharp 480 x 240 video resolution
- Powered by a 3.7V 300mAh LiPo battery, with 1 hour of operating time
- Setting the band and frequency is quick and easy with LEDs and pushbutton controls
- The LED charge indicator glows red while charging, and turns off when charging is complete
- Includes the FPV wrist monitor, built-in 5.8GHz receiver and USB-to-micro USB charge cable

TACZ5160 FPV Wrist Monitor with 5.8GHz Rx

A compact camera for capturing the FPV action

- Compatible with Tactic 5.8GHz FPV equipment, for easy set-up
- Mounts easily with double-sided tape, hook-and-loop material or pre-fabricated brackets
- Features 600TVL video resolution
- Requires a video transmitter, receiver, monitor or goggles, mounting tape

TACZ5035 FPV-C2 600TVL Video Camera 30x30mm

Get all this — and save money — when you purchase the combo

Combo includes:

- FPV-G1 goggles
- FPV-RM2 4.3" (109 mm) color LCD monitor with 5.8GHz receiver
- Internal 1S 3.7V 1400mAh LiPo battery
- RP-SMA whip antenna
- Sun shield
- Micro memory card port (up to 32GB)
- USB charge lead

TACZ5202 FPV-G1 Goggles with FPV-RM2 4.3" LCD Monitor & 5.8GHz 40Ch Receiver

From the Experts:

Perfect for FPV drone racing, aerial photography and a variety of other applications, Tactic 5.8GHz FPV accessories offer a unique new perspective of your surroundings. They're a great upgrade for Wi-Fi camera drones, with proven Tactic quality. Give your model the Tactic treatment, and see what your model sees!

Long story short...

Get the full FPV experience with 5.8GHz accessories from Tactic!

TACTIC

Specifications (all):
Length: 16.4 in (417 mm)
Width: 13.2 in (336 mm)
Height (adjustable): 6.3 in (160 mm)
Wheelbase: 10.7 in (272 mm)
Track: 10.3 in (263 mm)

All four vehicles boast these innovative features:

- Tough 6061 aluminum chassis
- Four-wheel shaft drive
- Newly designed painted and detailed body
- 8 oil-filled shocks
- All-terrain tires mounted on black chrome wheels
- 2-channel 2.4GHz radio system with fail-safe and waterproof servos
- Rugged, extra-long suspension arms
- Rubber-sealed ball bearings

From the Experts:

HPI has updated the iconic line of Bullet trucks to be even better than ever! New, detailed body designs deliver awesome looks to match their exceptional power, durability and performance. Choose nitro or brushless power, with an aggressive stadium truck or intimidating monster truck body!

Long story short...

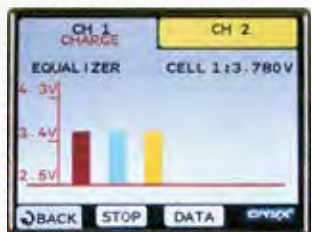

Sharp-looking, super-fast Bullet trucks really stand out at the track — no matter which one you choose!

CONTROL TWO CHARGERS FROM A SINGLE TOUCH SCREEN!

Review charge data as numbers, or on a graph

DTXP4260
Onyx 260 AC/DC
Dual Balancing Touch
Screen Charger

ONYX 260

AC/DC Dual Balancing Touch Screen Charger

- Charge 2 batteries at once from a single 3.2" color touch screen, eliminating buttons and knobs
- Independent outputs let you peak charge 1-15 NiCd/NiMH cells at the same time you balance charge 2-6S lithium packs
- Both sides also charge single lithium cells and 4-, 5- and 8-cell radio packs
- Quick balance lithium packs without charging or discharging
- Store up to 10 charging routines per output for quick and easy setup
- Customize sound cues, text color and backlighting to your preferences
- Features 60W AC power supply and 0.1-6A fast charge rates on both outputs
- Includes two 2-6S balancing boards with JST-XH connectors and two sets of Star Plugs and standard adapters

From the Experts:

By just touching the Onyx 260's screen you can access two identical chargers. View data the way you want by customizing the sound, color and backlighting to your preference. For the modeler who wants the latest in programming ease and charging versatility, the Onyx 260 is the way to go.

Long story short...

The Onyx 260 offers charging ease with a super intuitive menu that allows for a quick and easy setup.

4PV

4-Channel Computer Surface Radio System

- Provides live telemetry data including temperature and rpm, as well as receiver and external power voltage
- Data logging allows you to view telemetry data at a later time
- Audio alerts are delivered via audio jack, so you can focus on your vehicle
- Adjustable steering wheel and trigger offers customizable ergonomics
- Compatible with S-FHSS and T-FHSS protocols and includes an R304SB T-FHSS receiver for optimal performance
- Updateable via CIU-2 and CIU-3 USB interface to capitalize on the latest Futaba innovations

FUTK4700 4PV 4-Channel Computer
Surface Radio System
Type: 4-Channel S-FHSS/T-FHSS
Includes: 4-Channel R304SB Receiver
Requires: (4) "AA" alkaline batteries

R304SB Receiver Specifications:
Type: 4-Channel T-FHSS
Input Power: 4.8V-7.4V
Dimensions: 1.38 x 0.91 x 0.33 in
(35.1 x 23.2 x 8.5 mm)
Weight: 0.23 oz (6.6 g)

Futaba

From the Experts:

Quality engineering and amazing versatility have come together to create the 4PV surface system. Its telemetry functions offer drivers a wealth of information for keeping tabs on their vehicle, along with gaining a competitive edge. The 4PV's receiver flexibility means you can use the one included with the radio, or supply your choice.

Long story short...

Whether it's racing or bashing, the 4PV is one radio designed to bring out your best.

BIG ADVENTURE IN SMALL SCALE!

PRO-LINE
AMBUSH 4x4

1:25 4WD ELECTRIC MINI SCALE CRAWLER RTR

Solid metal axles and a ladder frame chassis take on whatever obstacles you can put in front of this truck.

An open roll cage Ambush trail rig body tops off the package of high-quality hardware, for intense looks to match the aggressive performance.

Long story short...

Enjoy unstoppable crawling action virtually anywhere with the Ambush 4x4!

4004-00 PROC0004 Ambush 1/25
Electric 4x4 Mini Scale Crawler RTR
Length: 7.8 in (198 mm)
Width: 3.8 in (95 mm)
Weight: 10.9 oz (308 g)
Wheelbase: 4.5 in (115 mm)

- The Ambush conquers rugged terrain, whether it's in your backyard, your living room — or even on your desk
- Comes fully assembled with pre-painted body
- Equipped with full-time 4WD and steel leaf springs suspension, just like full-size crawlers
- A 2.4GHz radio system with G9000 micro servo is included for total control
- Mini Flat Iron tires and Denali wheels add scale realism along with excellent gripping power

PRO-LINE

GO FROM MILD TO WILD!

Factor 30cc

Almost Ready-to-Fly 30cc/EP 3D/Sport Plane

MONOKOTE
COVERING

- A nearly limitless flight envelope, for everyday sport flying to 3D
- Accepts popular 30-35 cc gasoline engines or 1.60 brushless motor systems; mounts for both options are included
- Prebuilt using high-strength wood, fiberglass, carbon-fiber and aluminum
- The two-piece wing slides onto a lightweight carbon-fiber tube for easy installation, removal and storage
- A large, removable hatch affords easy access to the radio gear, batteries and engine or motor

GPMA1555 Factor 3D 30cc/EP 3D/Sport Plane ARF

Wingspan: 70 in (1778 mm)

Wing Area: 1174 in² (75.7 dm²)

Weight: 12-14 lb (5.4-6.4 kg)

Wing Loading: 24-27 oz/ft² (73-82 g/dm²)

Length: 75 in (1905 mm)

Requires: 4-7 channel radio with minimum 5 high-torque servos (2 additional standard servos when using gas power), 30-35cc gas engine and fuel —OR— 63-62-250kV brushless outrunner motor, 80A brushless ESC (minimum), two 5S 18.5V 5000mAh LiPo batteries, charger

GREAT PLANES
MODEL MANUFACTURING COMPANY

From the Experts:

The original 38" wingspan Factor 3D was a popular park flyer known for its performance and affordability. Today's Factor offers the same flight potential, along with the added stability and visibility of a 70" wingspan. Plus, it flies equally well with your choice of a 30 cc gasoline engine or brushless electric power plant.

Long story short...

Whether you're a sport flyer or an experienced aerobatic pilot, the Factor 3D is a versatile ARF plane with the ability to satisfy.

- The composite gears are more than capable of handling 3S power
- A Tactic TTX300 radio system provides secure, precise control. Waterproof servo is included.
- All come preassembled, and require a 2-3S 4000-5000mAh LiPo battery with Star® Plug, LiPo-compatible charger and 4 "AA" batteries

ARMY
DESIGNED FAST DESIGNED TOUGH

From the Experts:

They offer the same quality engineering and preassembled convenience as before — but these Ready-To-Run vehicles now feature new brushless motors, ESCs and Tactic TTX300 radios. Plus, they all have eye-catching new trim schemes!

Long story short...

Now you can personalize the LiPo power of your 2WD BLX vehicle to maximize their performance!

NEW 1/8 SCALE POWERHOUSES FROM O.S.

Speed 21XZ-B Spec III 1/8 Scale Buggy Engine

- It's the evolution of the Spec II, a proven performer at races worldwide
- Enhanced low-to middle-range torque provides a great advantage on tracks that require lots of power
- The cylinder liner features 3 scavenger ports and 3 exhaust ports, and works with the crankcase to deliver more torque with less fuel consumption
- The drop-in type outer head is lighter, with a lower CG
- Long stroke design provides more torque
- Comes with an easy-tuning 21J carburetor with 6.5 mm restrictor

OSMG2060 Speed 21XZ-B Spec III 1/8 Scale Engine

Speed 21XZ-GT 1/8 Scale GT Touring Car Engine

- Designed specifically to dominate the competition in the increasingly popular 1/8 GT Touring class
- 5 scavenger ports and 3 exhaust ports improve power in the mid- to high range
- The crankshaft has been engineered for GT touring with silicon-potting, diamond-like coating and tungsten weights
- The outer head features a lower CG, along with shiny fins
- The included dual adjustable carb is ROAR-legal, and comes with a 7 mm restrictor

OSMG2062 Speed 21XZ-GT 1/8 Scale GT Touring Car Engine

Specifications (both):
Displacement: 0.213 cu in (3.49 cc)
Bore: 0.641 in (16.27 mm)
Stroke: 0.661 in (16.80 mm)
Practical RPM: 4,000-42,000
Power Output: 2.61 hp/2.65 ps @ 34,000 rpm
Weight: 12.45 oz (353 g)

From the Experts:

The Speed lineup of 21-size engines has enjoyed numerous racing successes, and that same O.S. expertise is evident in these latest powerhouses. Many of the same cutting-edge innovations that have made Speed 21 engines so dominant are still here, and these engines include performance-enhancing modifications for their particular applications.

Long story short...

You can count on O.S. to power your 1/8 scale vehicle to the winner's circle!

ON-ROAD POWER THAT'S AS GOOD AS GOLD

Speed R2102 Gold Edition 1/8 Scale On-Road Engine

- This Speed 2102 powerhouse sports a gleaming gold cylinder head and carb insert, to commemorate O.S.'s 80th anniversary
- Center of gravity is 3 mm lower, for better handling
- A second inner button head allows for finer tuning to meet track conditions
- New ceramic rear bearing reduces friction loss
- Features Speed innovations such as diamond-like coating and tungsten weighted crank shaft
- Available with or without the T2080SC muffler

OSMG2038
w/ muffler

OSMG2039
w/o muffler

OSMG2038 Speed R2102 Gold Edition 1/8 Scale On-Road Engine w/T-2080SC Muffler

OSMG2039 Speed R2102 Gold Edition 1/8 Scale On-Road Engine

Displacement: .213 cu in (3.49 cc)

Bore: .633 in (16.08 mm)

Stroke: .677 in (17.2 mm)

Practical RPM: 4,000-45,000

Power Output: 2.8 ps/2.76 hp @ 33,000 rpm

Weight: 11.99 oz (340 g)

Includes: 21M2(B) carburetor, R2102 inner head, T-RP7 plug, exhaust seal ring, tapered collet

OSMG2039 requires: T-2080SC Tuned Muffler

From the Experts:

It runs as good as it looks — and it looks like a million bucks! This 80th anniversary edition of the Speed R2102 will turn heads with its gold accents, and its performance is just as impressive. This engine is available only in limited supplies, so be sure to get yours today!

Long story short...

Give your on-road machine the "WOW!" factor with the Speed R2102 Gold Edition 1/8 Scale Engine!

DISPLAY — AND COMMAND — THESE SCALE BATTLE TANKS

1/24 Scale Leopard 2 A6 Winter & Tiger 1 Late Desert Battle Tanks

VSKC2032
1/24 Scale Leopard 2
A6 Winter Tank

VSKC2071
1/24 Scale Tiger 1
Late Desert Tank

- Both feature incredible detail, including molded scale accessories and working hatches
- Proportional forward, reverse and turning speeds
- All-wheel suspensions and flexible tracks tackle inclines of up to 35°
- Infrared battle systems allow for tank-to-tank combat and hit scoring
- The interference-free radio lets you do battle with up to 15 other VS Tanks at the same time!

From the Experts:

VS Tank continues to produce scale replica tanks worthy of display — while also capable of infrared armored combat! Advanced radio systems offer precise control of their direction, speed and functions, including infrared cannon fire for scoring points in mock battles!

Long story short...

Engage in wireless warfare with these realistic looking — and operating — VS Tanks!

TAKE OFF-ROADING TO THE EXTREME

jumpshot SC

Ready-To-Run 1/10 Scale 2WD EP Short Course Truck

The Jumpshot SC is all about extreme off-roading and catching big air!

- The tough, TVP (Twin Vertical Plate) chassis is proven to stand up to aggressive driving and come back for more
- Punch the throttle and watch the Firebolt 15T motor and LiPo-ready Flux SC-3SWP2 ESC put you out in front
- Massive oil shocks and a double-wishbone suspension help keep you in control over rugged terrain
- Go wherever adventure awaits: all-terrain tires and waterproof electronics defy the elements
- The battery box is easily accessed from underneath and holds either a 7-cell NiMH stick or 2S LiPo packs

116103 HPID1214 Jumpshot SC 2WD EP Short Course Truck RTR
Length: 22.0 in (560mm)
Width: 11.6 in (295mm)
Height: 7.5 in (190mm)
Wheelbase: 13.2 in (335mm)

From the Experts:

Take the Jumpshot SC out for a spin and take the fight to whatever the elements can throw at you! The modular chassis design simplifies maintenance, so you're bashing more and repairing less. And its impressive performance is matched by its stylish truck profile with eye-catching trim scheme.

Long story short...

The strong, reliable Jumpshot SC is the perfect introduction to fender-to-fender short course racing action!

ELITE CHARGING PERFORMANCE — TIMES 4

X4 Pro

44254 HRCP4254
X4 Pro AC/DC Four-Port
Multicharger

- Connect up to four batteries of different chemistries to any channel, with each channel performing independently of one another
- Capable of operating on 100-240 volts AC current or 11-18 volts DC power
- Delivers 200 watts of charge power in AC mode, and 300 watts of output in DC mode
- Charge Master software lets you operate the X4 Pro via your PC
- Built-in Bluetooth allows for use with a smartphone app

The X4 Pro can be used with any of these battery chemistries:

NiMH	Lilon	NiCd	LiHV	LiPo	Pb	LiFe
------	-------	------	------	------	----	------

Long story short...

The X4 Pro is multi-charging as it was meant to be!

Just Released

Associated® Reedy Zappers 100C Shorty LiPo Batteries

More voltage for going deeper into the race!

- Reedy's high-voltage LiPo chemistry means more power, which means greater performance on the track
- Can be safely charged to 8.7V (4.35V/cell) with a compatible charger
- Durable hard case protects components from impact damage
- Where approved batteries are required, ASCC7306 offers the same flatter discharge curve, and conforms to ROAR/EFRA/BRCA/IFMAR specs

Also available:

27306 ASCC7306 Reedy Zappers 7.4V 4400mAh 100C Shorty LiPo Battery

Long story short...

The latest official Pinewood Derby® products from Revell lets racers build and customize their own cool comic-inspired creation.

1/25 KENWORTH® K100
Boxy beauty

Unlike most of its more modern successors, the Kenworth K100 was a squared-up cabover design. It made its mark as a reliable prime mover and, later, as the truck version of Optimus Prime. Its incredible power and high-quality construction has made it a legend of the automotive world long after the design was retired from production. **Kit features** detailed 6-cylinder diesel engine, position-able front wheels, and opening doors.

85-2513 RMXS2513 Total Parts: 284 Skill Level: 5 Length: 10.6 in (270mm)

1/25 2016 CORVETTE® STINGRAY™
A classic makes a comeback!

The seventh generation Corvette is as coveted today as the first Corvette was in 1953. Groundbreaking, cutting edge design has made every generation of "America's sports car" a masterpiece. Today's version uses the most advanced materials and manufacturing processes available including use of aluminum, carbon fiber, Aerogel, and more 21st century components. Performance results are impressive with 0-60 times of only 3.8 seconds! **Kit features** Detailed LT-1 V-8 engine, multi-piece chassis, metal axles, molded in color parts, and soft black tires.

85-4425 RMXS4425 Total Parts: 57 Skill Level: 4 Length: 6.9 in (176mm)

1/25 CUSTOM CADILLAC® LOWRIDER
Bring the bling!

Roll out in the style in your custom Caddy! The last of these big, bold beauties was produced in 1984. Their classic body on frame construction made them absolutely perfect lowriders. With hydraulics, they can sink way low or stretch high, and their not short on power either! Thanks to a huge 4.1 liter V-8 engine, classic Cadillacs have more than enough muscle to stop the show on the strip. **Kit features** gold-plated, spoked, lowrider-type wheels plus your choice of stock or custom grills, custom moonroof, engraved vinyl top, opening trunk with hydraulic pumps, battery, stereo speakers, and more!

85-4438 RMXS4438 Total Parts: 110 Skill Level: 5 Length: 9 in (229mm)

1/25 '57 CHEVY® BLACK WIDOW 2N1
Track-heavy Chevy

Thanks to its low curb weight and high curb appeal, the Chevy 150 was extremely popular with hot rodders. Chevy embraced the racing pedigree of the 150 with the "Black Widow" racing stock car. These non-production cars were built by Southern Engineering and Development Company—a special builder set up by GM. All "Black Widows" were based on the 1957 150 Utility Sedan. Many proved highly successful, with wins at the National Championship and elsewhere. **Kit features** option to build as factory stock 150 Utility Sedan or Black Widow, choice of stock single carb or fuel injection engine, six lug stock wheels with dog dish hub caps, and soft black tires.

85-4441 RMXS4441 Total Parts: 151 Skill Level: 5 Length: 7.9 in (202mm)

1/48 F/A-18F SUPER HORNET

Bigger better bird

Get there first with the most and you win. The Navy knows this, that's why the Super Hornet carries more weaponry, further, and just as fast as the smaller F/A-18 it was developed from. All told, the F/A-18F flies at MACH 1.8, can fly over 1,000 miles, and can carry nearly 18,000 pounds of external ordnance. That's an awful lot of outbound hurt. **Kit features** large assortment of bombs and rockets plus separate cockpit access ladder, and recessed panel line detail.

85-5532 RMXS5532 Total Parts: 168 Skill Level: 5 Length: 15.4 in (391mm)

1/72 T-55A

There's always more

Estimates vary, but it is entirely possible that over 100,000 T-54/55 tanks have been produced in the world since their introduction in 1949. Since then they have been fielded by a majority of countries in the world—first with the Soviet Union and Warsaw Pact, then China, the Middle East, and virtually all of Africa. Along the way, the tank has been upgraded, modified, and customized but its rugged reliability always remains. **Kit features** injection-molded tracks, rotating turret, four sets of decals, and detailed anti-aircraft machine gun.

03304 RVLS3304 Total Parts: 131 Skill Level: 3 Length: 4.9 in (124mm)

1/72 SPITFIRE MK.IIA

Holding the skies

Britain expected to fight the Second World War on and in the skies over France, just like it had fought the first one. This was not to be. In July, 1940, Germany launched the Battle of Britain—striving to dismantle the British Air Force and force England out of the war. The Spitfire Mk.IIA, along with a host of other aircraft, ensured this would not happen. Though both sides suffered terrible losses, it was the British who emerged victorious. **Kit features** detailed cockpit, rotating prop, and RAF Battle of Britain decals.

03953 RVLS3953 Total Parts: 52 Skill Level: 3 Length: 5.2 in (131mm)
Wingspan: 6.1 in (156mm)

1/32 MESSERSCHMITT ME 262B-1 FIGHTER

Learning by doing

B-variant Messerschmitt Me 262s were trainers, but the pilots behind the sticks were no novices. The learning curve for flying the first jet-powered aircraft must have been unimaginably steep. The technology was brand new, many of the concepts untested, and pilots would be going directly into combat against an experienced and determined enemy. With the speed and heavy armament of the Me 262, however, the opposition could be overcome if the pilots could overcome the teething problems of the aircraft. **Kit features** replica Jumo 004 engines, antennae, guns, cockpit, auxiliary fuel tanks, and two sets of decals.

04995 RVLS4995 Total Parts: 222 Skill Level: 5 Length: 13.2 in (336mm)
Wingspan: 19.3 in (491mm)

1/600 SS UNITED STATES

Her future in the balance

Built as a luxury liner and auxiliary troopship just after the end of WWII, SS United States was the fastest Atlantic passenger liner in the world for many years. Her four steam turbines produced power equivalent to that on many WWII era aircraft carriers and made her capable of 38 knots. Today, she quietly awaits restoration or the scrapper's torch at dock in Philadelphia. She has been berthed since the seventies and changed owners repeatedly. **Kit features** single piece waterline hull, 24 lifeboats, detailed superstructure, three derricks, display stand and full decals.

05146 RVLS5146 Total Parts: 41 Skill Level: 3 Length: 20.1 in (510mm)

1/8 1965 CORVETTE STINGRAY C2

One fast fish

Part of the second generation of the Corvette line, the 1965 Stingray was designed by Bill Mitchell. The radical contouring of the body shape was based on the aquatic sting ray which contributed its name as well. **Kit features** large, single-part body with fastback styling plus opening hood, rotating wheels, multi-part injected V-8 with generator and fan, one-piece chassis, tilting headlights, rubber belts and hoses, chromed parts, and authentic decals.

07434 RVLS7434 Total Parts: 174 Skill Level: 5 Length: 21.7 in (552mm)

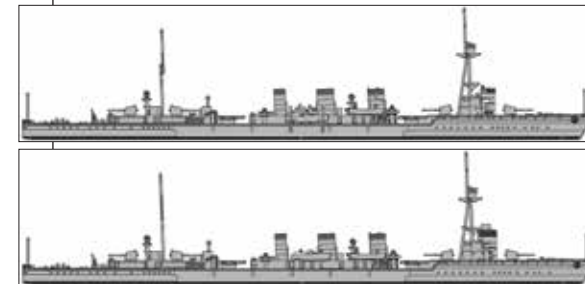

1/700 JAPANESE NAVY LIGHT CRUISERS

Swift spear of the IJN

Tatsuta and her sister ship Tenryū were tough Japanese light cruisers commissioned just after the First World War and used in WWII. Tatsuta followed Tenryū into the Second Sino-Japanese war then, during WWII, both fought at Wake Island, off Guadalcanal, and extensively in the waters around New Guinea before each was sunk by US submarines. The vessels of the Tenryū class were new designs intended to lead destroyer flotillas. Long, thin, and fast for cruisers, their only flaws were in their light armament. Each **kit features** two sets of decals and full photo-etched parts set.

30038/30039 HSGS0038/0039 Total Parts: 100 Skill Level: 3
Length: 8 in (204.5mm)

1/48 "AREA-88" F-8E CRUSADER "SHIN KAZAMA"

Last of the gunfighters

Shin Kazama is the conflict-beset protagonist of the AREA-88 manga, anime, and OVA and he's flown many an aircraft in each. One of his most iconic rides, however, is the F-8E Crusader. This quad 20mm-armed aircraft was developed in the mid-fifties and served through the mid-seventies with front-line forces. This makes it ideal for the mercenary pilots of AREA-88 who fight a seemingly endless war over the desert. **Kit features** decals for Kingdom of Arslan AREA-88 pilot Shin Kazama.

64739 HSGS4739 Total Parts: 119 Skill Level: 3 Length: 13.7 in (348mm)
Wingspan: 8.9 in (226mm)

1/72 B-52G STRATOFORTRESS™

Maximum bang for your buck

The B-52 can carry roughly 60,000 lbs of ordnance. Eight times as much as the B-17 of a decade earlier. Added to that massive capacity is the extensive range of the type which allowed it to fly all the way from Louisiana, strike targets in Iraq during the Gulf War, and make it home. Today, 25 years after the B-52 rocked Iraq, it's still flying. It's planned to continue in service until 2040—by which point it will be ninety. **Kit features** three sets of Gulf War decals plus one from 1977.

1378S ITAS1378 Total Parts: 137 Skill Level: 4 Length: 26.5 in (674mm)
Wingspan: 30.8 in (783mm)

1/24 FORD TRANSIT MK. II

Transforming the world of transportation

Thanks to its sleek American styling and range of body choices, the Ford Transit revolutionized the light commercial vehicle industry in 1965. When the Mark II arrived in 1978, customers could select from six body styles, five different engines, short or long wheelbase versions, up to 17 interior seats, six axle ratios and 32 door combinations. No wonder it's been a global success! **Kit features** a choice of right- or left-hand drive set-ups, five rubber tires and decals for the British Gas Society as well as various European license plates.

3687S ITAS3687 Total Parts: 80 Skill Level: 3 Length: 7.6 in (192 mm)

1/24 DAF XF 105 & TRAILER "MARITIME TRANSPORT"

2007's "International Truck of the Year"

Two years after its debut, the XF 105 scored an "International Truck of the Year" award. Was it because of the truck's brilliant blend of form and function, or was it because of its powerful 7.87 cu. in. (12.9 liter) turbo diesel engine? Maybe it was the improved engine cooling and spacious interior that took it to the top? We'd like to think it was all of the above. **Kit features** a two-axle truck with left-hand drive, a trailer, rubber tires and a super decal sheet featuring "Maritime Transport" graphics.

3920S ITAS3920 Total Parts: 300 Skill Level: 5 Length: 28.3 in (720 mm)

1/56 M3 STUART LIGHT TANK

First to the fight

The M3 Stuart was the first American tank to engage Axis tanks in WWII. It was sent to British forces through Lend-Lease and fought in North Africa just before America entered the war. Its armor and weaponry made it a match for early German tanks and more than a match for Japanese light tanks. Before the war was over, the M3 Stuart would fight with the British, Russians, and Americans in Europe, Africa, and the Pacific. **Kit features** three choices of tank drivers (British, American, and Russian) plus four sets of decals.

15761 ITAS5761 Total Parts: 95 Skill Level: 2 Length: 3.1 in (78mm)

1/72 UNION INFANTRY—AMERICAN CIVIL WAR

Fighting for other's freedom

Over two million men served in the armed forces of the Union during the Civil War. Over four years, they faced the first Industrial-Era war—battling rifled muskets and canister-loaded artillery in open fields with Napoleonic-Era tactics. They came from all walks of life, from foreign countries, from small towns and huge cities. They came to set men free. 1 in every 4 would become a casualty himself in the most deadly battles in American history. **Kit features** 50 unpainted Union Infantry figures with period equipment.

6177S ITAS6177 Total Parts: 50 Figures Skill Level: 1

1/72 CONFEDERATE INFANTRY—AMERICAN CIVIL WAR

Fighting for the cause

Roughly one million men served in the armed forces of the Confederacy during the Civil War. Over four years, they faced the first Industrial-Era war—battling rifled muskets and canister-loaded artillery in open fields with Napoleonic-Era tactics. They faced constant lack of supplies and equipment, but they fought on despite incredible odds against them. They fought for their perceived rights and those of their neighbors. 1 in 3 would become a casualty in the most deadly battles in American history. **Kit features** 50 unpainted Confederate Infantry figures with period equipment.

6178S ITAS6178 Total Parts: 50 Figures Skill Level: 1

1/35 LMV LINC UNITED NATIONS

Keeping the peace with Italian ingenuity

The LMV Lince has many advantages that make it a must-have. For combat, there's a collapsible sandwich structure built into the floor which helps protect troops from mine blasts. Modular armor packs allow infantry units to tailor the amount of protection needed for the mission type. Combined with its 310 mile (500 km) operational range and top speed of 81 mph (130 km/h), the LMV Lince is a force to be reckoned with by any measure. **Kit features** upgraded molds, 42 photo-etched parts, rubber tires and five marking options.

Academy® 1/72 SB2C-4 Operation Iceberg US Navy

Over Okinawa

Operation Iceberg was the codename for the operations on, around, and over Okinawa during WWII. Curtiss SB2C Helldivers did their part in this bloody operation, assisting in the sinking of Yamato—the largest battleship ever constructed—and softening up defenses. The SB2C-4 was fitted with racks for eight, 5-inch rockets or 1,000lb bombs. These increased the already considerable bomb load of the Helldiver, making it even more lethal to the opposition. This limited edition **kit features** photo-etched parts and bombs.

Tough as stone

A Mobile Suit variation of the Sinanju from the PlayStation 3 game "Gundam UC". This white, prototype Sinanju is based on the previously released MG Sinanju Ver. Ka frame. The new emotion manipulator hands allow expressive individual finger and hand gestures and include new weapon locking tabs. Featuring over 15 new runners of parts, Sinanju Stein comes with exclusive beam rifle and bazooka as well as a shield with integrated beam cannon and missiles. Beam saber racks on the forearms slide open and close while leg mounted thrusters can swivel.

BAN181337 BANS1337 Total Parts: 22 Runners Skill Level: 2

Bandai® #155 Gundam EZ-8 HGUC
Armed to the teeth

This new model of the incredibly popular machine from the 08th MS Team OVA features enhanced articulation and refined proportions. The included parachute pack may be swapped with the backpack on the HGUC RX79(G) Gundam (sold separately). **Kit features** beam rifle, shield, beam saber, and machine gun.

BAN181589 BANS1589 Total Parts: 9 Runners Skill Level: 2

Bandai® RX-78 GP03S Gundam Master Grade
Red, white, and blowin' 'em apart

MG version of the GP03 recreates the last machine from Gundam 0083 with excellent proportions and includes features not seen in the animation. Elbow-mounted grappling arms have been faithfully incorporated for grabbing weapons containers. An optional core fighter concept is included and can either be used in the main body housing or for display alongside completed model. **Kit features** beam rifle, folding shield, bazooka, and beam saber.

BAN101788 BANS1788 Total Parts: 13 Runners Skill Level: 2

Bandai® #3 Gundam Kyrios Gundam 00
Bent on battle

Kyrios is a transforming Gundam design from the "Gundam 00" anime series. It can convert between flight and robot modes. Translucent parts and rubber cables replicate GN condensers and cables. Fast, rugged, and heavily armed—Kyrios is everything a good Gundam should be and more. **Kit features** a sub machine gun, beam sabers, and shield with hidden extending claw weapon.

BAN152368 BANS2368 Total Parts: 11 Runners Skill Level: 2

Bandai® Char Z Gok Master Grade
One mean handshake

The Master Grade version of Char's customized, shiny red Z'Gok is here! The expertly designed inner frame system allows flexibility for poses to equal the "real" thing in the animated series. The bellows rims (the loopy things on its arms and legs) even stretch out a little, for added reach and flexibility. All in all, it's a superb kit of an incredibly cool machine. **Kit features** a highly detailed kit of the Z'Gok from Mobile Suit Gundam.

BAN122718 BANS2718 Total Parts: 7 runners Skill Level: 2

Bandai® #86 RX-93 Nu Gundam HGUC

Unleash the power of the mind

Final Gundam of Amuro Ray in Char's Counterattack. This Gundam's Psycommu system allowed Amuro to patch his thoughts directly into the controls of the unit. With this direct link from thought to action, the Nu Gundam was nearly unstoppable—holding off the entire Neo Zeon army single-handedly. **Kit features** individually articulated remote fin funnel weapons that can detach, beam rifle, bazooka, custom beam saber and hidden beam saber. Shield contains micro missiles and beam cannon.

BAN153143 BANS3143 Total Parts: 8 runners Skill Level: 2

Bandai® #163 Gundam Double X HG

Defend a devastated Earth

The mighty Twin Satellite Cannon mid-season upgrade for Gundam X appears in a modern high-grade kit! Part of the All Gundam project which seeks to bring new modern kits from older Gundam titles, the Double X shares common construction with other kits to allow for part swapping and easy customization. Twin satellite cannon and solar collectors can fully deploy or collapse. **Kit features** buster rifle, tow beam swords with detachable beams, composite shields and clear parts for the microwave receiver and sensor.

BAN183664 BANS3664 Total Parts: 11 runners Skill Level: 2

Bandai® #21 Gundam EZ-SR Gundam Build Fighters Try

Just Try it

This 1/144 scale High Grade Gundam Plastic Model from Bandai represents the vaunted RX-79(G) Ez-SR from Gundam Build Fighters Try. Unlike most Gundam series, Build Fighters features peaceful frays between Gunpla builders rather than full-fledged wars between star-spanning empires. **Kit features** highly detailed parts and armament.

BAN194355 BANS4355 Total Parts: 11 runners Skill Level: 2

Bandai® #22 Beargguy Family Build Fighters Try

Cute and cuddly meets massive and mechanical!

This awesome set of Gundam models includes a big white Beargguy and a little blue Beargguy! The blue one can ride on the white one's back, and they can be fully posed. Based on characters from the Gundam Build Fighters Try series, the Beargguy is a loveable, unarmed machine you'll be proud to display! **Kit features** multiple face options and plenty of possible poses.

BAN194360 BANS4360 Total Parts: 11 runners Skill Level: 2

Bandai® #9 Avalanche Exia 1/100

Cut in close!

This variant of the Exia includes multiple GN thruster units for enhanced speed in tactical use missions. An upgrade of the original Exia, the Exia Avalanche is designed with enhanced speed and mobility in mind as well as heavier armor. It is still intended as a close combat frame—with the distinctive "seven swords" armament of the original Exia, but it is actually substantially more lethal. **Kit features** all seven swords found in the original Exia including GN Sword, GN Blades, and GN Beam sabers.

BAN154600 BANS4600 Total Parts: 11 Runners Skill Level: 2

Bandai® #66 Gundam GP-02A HGUC

Bulked out for battle

Where some Gundams are designed for agility, the GP-02A is a unique, bulked-out design from Gundam 0083 Stardust Memory. Its massive shoulder armor, gigantic shield, and collapsing nuclear bazooka are rendered in fine detail for the ultimate in heavy-hitting potential. **Kit features** bazooka, shield, beam sabers, and more.

BAN145069 BANS5069 Total Parts: 8 runners Skill Level: 2

Bandai® Duel Gundam Assault Shroud

Celebrating "Seed"

Duel Gundam Assault Shroud is the first of 4 designs being released to celebrate the Blu Ray release of "Mobile Suit Gundam Seed". All features of the Duel are faithfully replicated, including the ability to remove the Assault Shroud Armor. The depth of detail, accuracy, and articulation on this model makes it a standout in the Master Grade series. It's also built on a common internal frame with the Gat-X series to reflect the similarity between these types in the series. **Kit features** hyper bazooka exclusive to the Duel, beam rifle, rail gun, shield, and beam sabers.

BAN175299 BANS5299 Total Parts: 15 runners Skill Level: 2

Bandai® #47 NT-1 Alex HGUC

Stardust Memory mech

NT-1 "Alex" (Armored Layers Experimental) is the main Gundam from the hugely popular OVA Gundam 0080 A Stardust Memory. It comes with removable Chobham armor which allows you to switch between the heavily armored version and the standard version. The Chobham armor, while heavy, makes this Gundam highly resistant to most forms of direct attack. **Kit features** beam rifle, beam saber, shield, and opening forearm hatch which reveals a gatling gun.

BAN125650 BANS5650 Total Parts: 8 runners Skill Level: 2

Bandai® #118 GX-9900-DV X Divider

Stardust Memory mech

Bandai released the GX-9900 Gundam X as part of its High Grade After Ware line. Now, Bandai brings you the Divider-equipped version of that awesome kit. The Divider is unique. It opens and closes, can be attached to the back of the suit, or used as a shield. The energy tanks and thrusters on the back also articulate. **Kit features** beam machine gun, large beam sword, hyper bazooka, and foil stickers.

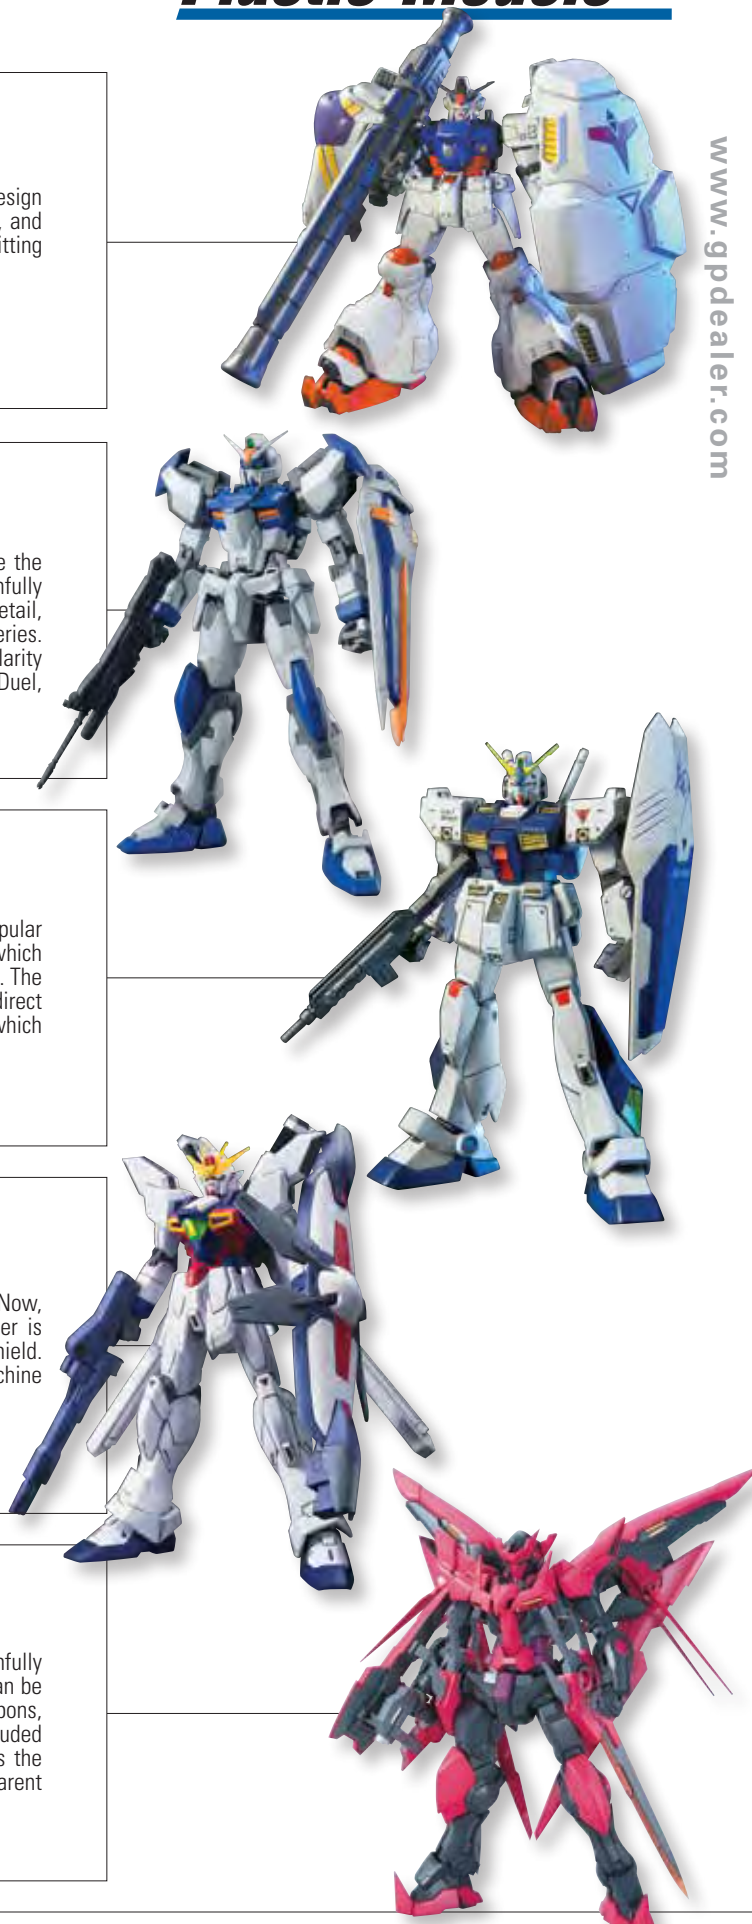

BAN165661 BANS5661 Total Parts: 8 runners Skill Level: 2

Bandai® Gundam Exia Dark Matter

Behold the power of darkness!

The Exia dark matter from the Gundam build fighters anime series has been faithfully re-created using the streamlined proportion of the mg Exia. Dark matter booster can be separated from the main body allowing the GN drive to be equipped directly. Its weapons, the prominence and Brinicle blade, dark matter blades, and dark matter rifle are included along with beam saber blades that can attach to the rifle. Face mask that hides the original Exia's face can be switched out. GN condensers are recreated using transparent plastic. **Kit features** runner x 20, stickers, instruction manual.

BAN195690 BANS5690 Total Parts: 20 runners Skill Level: 2

www.gpdealer.com

www.gpdealer.com

Bandai® R16 M1 Astray Remaster

Mass-produced mayhem

This mass production variant of the Astray Gundam is from Gundam Seed. The M1 Astray was designed with a fixed flight pack to increase its mobility in atmosphere and in space as well as an array of powerful weapons for dealing with mobile suits or ships. **Kit features** integrated flight pack, beam rifle, beam sabers, composite shield, two anti-ship swords, runners, stickers, and full instructions.

BAN175700 BANS5700 Total Parts: 8 runners Skill Level: 2

Bandai® #33 Wing Gundam Zero Honoo

Built to burn

From the Gundam Build Fighters Try Honoo side story, comes a fiery version of the Wing Gundam Zero! Built by Yusei Kouen, it features translucent orange parts to replicate its flame like appearance. This model can also transform into Neo-Bird mode, just like the original Gundam from the series! **Kit features** two hyper caletwvlch swords mounted on wings, twin buster rifle, beam saber, and beam dagger plus stickers and instruction manual.

BAN195703 BANS5703 Total Parts: 10 runners Skill Level: 2

Bandai® #31 Gundam Portent BFT

Foretelling victory

Built by Shia Kijima in Gundam Build Fighters Try, the Gundam Portent is perfection given form. Its lethal agility gives it the ability to turn away missiles with a light touch or manipulate its stream of GN particles for powerful effects. It's also equipped with Karels for self repair and a heavy arsenal of weaponry for making sure the damage to enemies gets done and stays done. **Kit features** rifle, sword, beam swords, hand part options, display stand, and full instructions.

BAN195959 BANS5959 Total Parts: 9 runners Skill Level: 2

Bandai® #47 Stargazer Gundam

Side story standout

Mobile Suit Gundam Stargazer is a three-episode slide plot anime from the Gundam Seed series. Its chief mechanical protagonist is the Stargazer Gundam. This unit is designed to use solar wind to travel deep into space and explore the universe well beyond humanity's Mars colonies. It just so happens that the design of this Gundam makes it especially capable of capturing and re-directing beam weaponry, giving it powerful defense capabilities. **Kit features** effect parts, holographic stickers, opening leg louvers with thrusters, and display stand.

BAN146748 BANS6748 Total Parts: 8 runners Skill Level: 2

Bandai® #29 GN Archer Double Zero

Arios' sidekick

This transforming mobile suit/fighter is technically not a Gundam, but pilot Marie Parfacy doesn't let that slow her down. The GN Archer uses stored GN particles from Gundam Arios for maneuvering and attacking with its pair of wide-beam beam rifles. Agility and ability meet to form lethality in the GN Archer Gundam. This model can be built on its own or can dock with the Arios Gundam for the combined MA form. **Kit features** 2 beam rifles and transformation ability.

BAN157477 BANS7477 Total Parts: 4 runners Skill Level: 2

Bandai® #17 Wing Gundam Version Zero EW

Death on the wing

The iconic winged Gundam from Gundam Wing Endless Waltz returns in Real Grade form! The wing structure of this Wing Zero interpretation is based on real world aircraft technology. Considerable thought has been put into heat and mechanical protection as well as design function for an unorthodox, but incredible mecha design. Even the flexible, feather-shaped extremities incorporate elements from thrust vectoring mechanisms of combat aircraft. **Kit features** twin buster rifle, beam sabers, decals, and full instructions.

BAN194380 BANS9380 Total Parts: 9 runners Skill Level: 2

Bandai® #79 RX-79(G) Ground Type

Down to Earth destruction

As its name suggests, the Ground Type RX-79(G) doesn't fight in some far-flung corner of space. It fights right here on the ground. Here it's "100mm" machine gun and "180mm cannon" take on a whole new meaning as the lesser of the two weapons fires shells larger than those of a main battle tank on full automatic. This Gundam can be modeled in numerous poses including the kneeling, cannon-firing pose. **Kit features** beam rifle, machine gun, beam saber storable in the leg, collapsing bazooka, shield, and weapon container backpack.

BAN149833 BANS9833 Total Parts: 7 runners Skill Level: 2

Dragon 1/16 SS-Sturmmann

Shock troopers of the Third Reich

The "Sturmmann" was an enlisted soldier of the Nazi German Waffen SS or, prior to the war, SA. In loose terms, it was roughly equivalent to the Private First Class—indicating a soldier of some tenure that has displayed his capability. In reality, the Sturmmann was a fanatic. A Nazi party loyalist determined to bring about Hitler's dream of unifying Europe under his boot. This Sturmmann is carrying the StG44—the world's first assault rifle. This select-fire, 7.92mm marvel was a monumental leap forward from the standard infantry rifle.

1604 DMLS1604 Total Parts: 20 Skill Level: 2

Dragon 1/35 2nd Fallschirmjager Division 1942/43

Always in the thick of it

Although the 2nd "Fallschirmjager" Division was technically constituted of paratroopers, it never participated in any airborne actions. Instead, the unit was used as a mobile fire brigade. They fought in Italy, Russia, and France—wherever the fighting was hottest, they were rushed in as a reserve. In '43 the Division fought in Italy and on the Eastern Front. After D-Day in '44, the division was cut to pieces and surrounded in the Falaise Pocket. **Kit features** four figures in winter uniforms.

6157 DMLS6157 Total Parts: 65 Skill Level: 2

Dragon 1/35 German Winter Grenadiers 1943-45

Frozen but still fighting

The winters of '43, '44, and '45 were some of the hardest times Germany would ever face. By 1943, Germany was getting progressively pushed back on the Eastern Front. In the winter of 44 to 45, they launched The Battle of the Bulge—an offensive which rocked the Allies back on their heels for a time. Grenadiers were amongst the best-equipped units in the German armies. Ideally, they were equipped with trucks to give them superior mobility. Towards the end of the war, trucks were a rarity.

6372 DMLS6372 Total Parts: 200+ Skill Level: 3

Plastic Models

MPC® 1/16 1982 Pontiac Firebird

As sleek as it is swift

The third generation Pontiac® Firebird® is a prime example of the 80's look. Its sweptback appearance made it look like it was moving while it was standing still. This kit version is a big, 1/16 scale representation of the original and it comes packed with detail. **Kit features** authentic detailing, opening doors/hood, steerable wheels, many option parts, two color schemes, and full illustrated instructions.

MPC858/06 MPC80858 Skill Level: 3

Trumpeter® 1/48 J-7A Chinese Fighter

Still flying

Originally built in 1963 and based on the even more venerable MiG-21, the J-7A is not the nimblest, the fastest, or the most well equipped of fighters. Nevertheless, it still serves a lethal purpose with the air forces of numerous third world nations and with China. In most cases, it is an interceptor that is popularly used in air-to-ground attacks. **Kit features** clear parts, tires, and photo-etched parts.

2859 TSMS2859 Total Parts: 190

Trumpeter® 1/35 Soviet KV-7 Object 227 Tank

Only one

Only one of these experimental, self-propelled guns was ever built. It was based on the KV-1 chassis and armed with three cannons—two 45mm cannons and one 76mm cannon. It was even more massively heavily armored than the rest of the KV series of tanks with 100mm of front armor. Like the rest of the series, the KV-7 would have been hard to knock out but extremely expensive to build had it been accepted for service. **Kit features** plastic tracks, decals, and highly detailed pieces.

9504 TSMS9504 Total Parts: 250+

Trumpeter® 5 inch Battery Operated Round Mirrored Turntable

Detail on display

You've worked hard on your models, why not display them in the coolest way possible? The mirrored surface of this turntable shows off the chassis and reflects light up onto the body details and the whole turntable rotates to make sure all your masterpiece's best sides are on display! **Kit features** five inch, mirror-top turntable. Requires 2 "AAA" batteries.
