A NEW ADVENTURE IN EVERY ROOM!

VUSION HOUSERACER INDOOR FPV RACE PACK

www.gpdealer.com

www.gpdealer.com

RISE0207 Vusion House Racer Indoor FPV Race Pack-RTF
RISE0208 Vusion House Racer Indoor FPV Race Pack-FPV Ready
Rotor Diameter: 125 mm (4.9 in)
FPV-Ready version requires: 5+ channel SLT radio, goggles or monitor
RTF requires: nothing!

- See your home in a whole new perspective!
- Three flight modes – Two gyro-assisted Stability Modes for beginners and one Rate Mode for more advanced maneuvers – make it easy for anyone to enjoy indoor FPV
- Ready-to-Fly version comes with a Tactic FPV-RM2 5.8GHz Monitor, FPV-G1 Goggles and a RISE J2000 6-channel 2.4GHz radio system with Flip button and monitor holder
- FPV-Ready version is compatible with virtually all FPV goggles and monitors on the market – just add the 5-channel SLT radio and goggles or monitor of your choice
- Both versions include a 600TVL camera and 25mW 40-channel 5.8GHz video transmitter
- Long-lasting 1S 3.7V 650mAh LiPo battery delivers 6-8 minutes of flight time
- USB charger, 4 "AA" batteries and extra blades round out both flight packages

See your world with the monitor and goggles.

Stay in control with the 6-channel radio system.

Shoot and transmit FPV with the camera and antenna.

Protect and power with prop guards, LiPo pack, charger and "AA" radio batteries.

From the Experts:

No corner of your house is off-limits with the Vusion House Racer! Zip and flip through every room, and create instant obstacle courses. Use the FPV camera to shoot edge-of-your-seat footage, and immerse yourself in the action with the LCD monitor and goggles. And don't worry – the Vusion is tough enough to take a hit, and come back for more.

Long story short...

Put yourself at the controls of the Vusion House Racer, and turn your house upside down!

HAM license required for 200mW transmitter use within the United States. See explore-rise.com for details.

READY TO RUN
YETI JR.™
 SCORE® TROPHY TRUCK®
 1/18th SCALE ELECTRIC 4WD

Trophy Truck and SCORE are registered trademarks of SCORE International and used under license.

BFGoodrich® Tires and Baja T/A® KR2 Trademarks are used under License from Michelin

- Independent front suspension (IFS)
- AR18 solid rear axle with 3-linked rear suspension
- Adjustable coilover shocks (7mm diameter)
- Officially licensed 1.2/1.55 BFGoodrich® BAJA T/A® KR2 tires
- Officially licensed 1.2/1.55 Method 105 Replica Wheels
- Complete with Duratrax batteries and charger

- Tactic TTX200 transmitter 2-channel radio
- Water resistant 40T brushed electric motor
- Waterproof Tactic RE20 ESC/Receiver combo

AX90052 AXID9052 - Yeti Jr.™ SCORE® Trophy Truck®

Length: 13" (330mm)
Width: 6.9" (175mm)
Height: 5.0" (128mm)
Wheelbase: 8.1" (206mm)
Ground Clearance: 1.1" (27mm)
Weight: 1.75lbs (0.80kg)

For additional items see a complete list at www.GPDealer.com

From the Experts:

With the introduction of the Yeti line back in 2014, the bar was set. Axial introduced a vehicle that featured independent front suspension (IFS) with a floating solid rear axle, something commonly reserved only for the full size off-road realm. This time around, the decision was to make things a wee bit smaller, while still providing a high level of performance. Enter, The Yeti™ Jr. SCORE® Trophy Truck® - RTR. We've taken all that you've come to love and appreciate in the Yeti chassis, but shrunk it down to 1/18th scale. It's powered by a 380 sized brushed motor which provides the perfect amount of torque and speed for this tiny Trophy Truck monster. Also featuring a bespoke all-in-one programmable Tactic ESC and receiver, paired with a 3-wire micro high torque steering servo. At the end of the day, the goal was to build a simple, fun, and easy to drive Yeti that anyone can handle. The hardest part about the Yeti Jr. SCORE Trophy Truck is making sure you have enough battery packs charged in order to keep the adventure alive!

BRING ON THE BEAST!

SAVAGE XL FLUX

Ready-To-Run 1/8 Scale 4WD Electric Monster Truck

- With its heavy-duty drivetrain and all-metal diffs the Savage XL Flux has more muscle than any other 1/8 scale electric monster truck
- The Flux 2200kV motor and 6S ESC crank out all the power you need for pulling off giant stunts and reaching speeds of over 60 mph
- A longer wheelbase and wider stance provides extra stability
- Rip through rain, snow, mud and more — all electronics are completely waterproof
- The aluminum Twin Vertical Plate (TVP) chassis fights chassis flex and distortion
- Side-mounted battery holders hold a wide range of LiPos, and allow for electronics to be centrally located to lower CG and improve handling
- Big Bore shocks smooth out even the roughest terrain, and they're adjustable

112609 HPID2609 Savage XL Flux 1/8 Scale
4WD Electric Monster Truck RTR
Length: 23 in (585 mm)
Width: 16.8 in (427 mm)
Height: 10 in (254 mm)
Weight: 14.77 lb (6.7 kg)
Requires: (2) 3S LiPo batteries, compatible
charger

From the Experts:

When you pair the legendary Flux brushless power system with a virtually bulletproof drivetrain, you've got a monster truck that's unstoppable! Everywhere you look the Savage XL Flux is beefed up to handle its awesome torque as well as any terrain or conditions you can imagine. And because it's Ready-To-Run, you can be out terrorizing the competition right away.

Long story short...

It's bigger, it's faster, it's stronger...the Savage XL Flux is a basher's dream machine!

THE ULTIMATE KIT FOR DIRT AND CLAY COMPETITION

RC10 B64D TEAM KIT

1/10 Scale 4WD Electric Factory Team Competition Buggy Kit

- Four-wheel drive
- Easy diff access for quick tuning and maintenance
- Front and rear anti-roll bars for flat cornering
- Adjustable toe-in/camber
- B6 generation ball cups and turnbuckles for precise adjustments
- Option to mount rear shocks on front or rear suspension arms
- Fully adjustable aluminum front and rear suspension arm mounts
- Full set of Factory Team ball bearings
- Comes with a clear buggy body with screw-mounted wing by JConcepts

90015 ASCD0015 RC10B64D 1/10 Scale 4WD Electric Factory Team Buggy Kit
 Length: *
 Width: *
 Weight: *
 Wheelbase: 11.18 in (284 mm)
 Requires: 2-channel radio with 1 high-torque steering servo, motor, ESC, 1/10 scale buggy tires and wheels w/ 12mm hex, 2S 7.4V LiPo shorty battery pack, LiPo-compatible charger, pinion gear
 *Actual length, width and weight will vary depending on the electronics used in the finished kit.

THIS KIT IS ALL ABOUT PERFORMANCE!

Stiff, lightweight 4mm thick carbon fiber shock towers

7075 anodized narrow aluminum chassis with lightweight side guards

Center gear differential maximizes drive out of the corner

Aluminum floating motor mount for consistent torsional chassis flex

Aluminum/carbon fiber floating servo mount

12mm aluminum drive hexes both front and rear

Robust suspension arms with multiple shock mounting positions

Aluminum caster blocks for added durability

Long story short...

Continuing the winning RC10B44 legacy, the RC10B64D Competition Buggy Kit is a perfect pick for high-traction action!

A NEW TAKE ON A LEGENDARY ARF

ULTRA SPORT™ 46

Almost-Ready-to-Fly 46/EP Sport Aerobatic Airplane

- Flies well with glow OR electric power
- Large hatch for easy access to on-board gear and battery
- Symmetrical airfoil for a wider aerobatic range
- Separate aileron servos for more precise control and customized mixing
- High-quality fiberglass cowl that complements the plane's balsa and plywood construction

When the mechanical retracts are up the plane flies faster and looks sleeker — when the gear is down ground handling is solid and predictable.

GPMA1015 Ultra Sport 46/EP ARF

Wingspan: 55 in (1395 mm)
Wing Area: 564 in² (36.4 dm²)
Weight Range: 5.5-6.5 lb (2.4-2.9 kg)
Wing Loading: 22-26 oz/ft² (67-79 g/dm²)
Length: 49.5 in (1255 mm)
Requires: 4-6 channel radio with minimum 5 standard servos (additional standard servo required for glow power); .46-.55 cu. in. 2-stroke or .70 cu. in. 4-stroke glow engine OR 42-60-480kV electric motor with 75A ESC; 6S 22.2V 3600mAh LiPo battery (electric only); 12 x 7 sport prop (glow power) or 15 x 8 electric power (electric power)

From the Experts:

For years the Ultra Sport has been the epitome of what a sport aerobatic airplane should be: quality construction, uncompromising performance and contemporary style. This 4th iteration incorporates the most up-to-date features, resulting in an ARF that will appeal to a wide range of R/C pilots.

Long story short...

The versatility of glow or electric power adds a new dimension to the highly popular Ultra Sport ARF!

LOW PROFILE = HIGH PERFORMANCE

Speed B2102 1/8 Scale Competition Buggy Engine

- Unveiled at the 2016 IFMAR 1/8 Off-Road World Championships
- The shorter cylinder head looks cool, and lowers the engine's CG by an impressive 17 millimeters
- You'll see a big boost in your buggy's handling, which can be a real difference-maker on race day
- Ceramic bearings let you run cooler with no special handling or cleaning — they're also lighter, create less friction and last longer than steel bearings
- Enjoy up to ten minutes of run time per tank with the Speed B2102's more fuel-efficient 22C carburetor
- O.S. Speed innovations include a tungsten weighted crank shaft with diamond-like coating and silicon potting
- Also available with a T2090SC muffler

Side by side, you can easily see that the Speed B2102 is leaner and meaner.

OSMG2064 Speed B2102 1/8 Scale Competition Buggy Engine
OSMG2065 Speed B2102 1/8 Scale Competition Buggy Engine w/T2090SC Muffler
Displacement: 0.211 cu (3.46 cc)
Bore: 0.646 in (16.40 mm)
Stroke: 0.646 in (16.40 mm)
Practical RPM: 4,000-42,000
Power Output: 2.65 PS/2.61 hp @ 34,000 rpm
Weight: 12.25 oz (347 g)

From the Experts:

Drop the Speed B2102 into your ride, and you'll hug the track and conquer the corners like never before, and without sacrificing cooling performance. It has all of the benefits of advanced Speed technology, with a bold new design that's like no other power plants out there.

Long story short...

You'll go low with the Speed B2102, while the other are going home.

A WINNING PEDIGREE

E817

COMPETITION 1/8 SCALE 4WD ELECTRIC BUGGY

204035 HBSC4035 E817 1/8 Scale 4WD Electric Competition Buggy Kit
 Length: 19.1 in (486 mm)
 Width: 12.2 in (310 mm)
 Wheelbase: 12.8 in (325 mm)
 Gear Ratio: 4.3:1
 Requires: 2-channel radio system with 1 high-torque steering servo, brushless motor, brushless ESC, battery, charger, tires, wheels, "AA" batteries

- Fully adjustable battery mounting system that accepts 4S brick packs, 2x2" long or "shorty" packs
- Packs mount directly to the chassis for the lowest CG possible, and can be positioned to fine-tune balance for better handling
- Milled aluminum chassis
- Four-wheel shaft drive with D815-style drivetrain and 43/10 gearbox ratio optimized for electric power
- Threaded Big Bore coil-over aluminum oil shocks with front/rear aluminum shock towers
- Fully adjustable steel turnbuckles and aluminum front/rear hubs
- Dual clamp aluminum motor mounts
- Sealed radio box
- Topped off with a Pro-Line Predator body with rear wing – also accepts nitro bodies and popular wheels and tires

From the Experts:

It's already won the prestigious 2016 Euros — now let the E817 put YOU on the podium. Benefitting from the DNA of the World Champion D815 V2, this 1/8 electric terror is fast, strong and flat-out loaded!

Long story short...

You'll really appreciate the E817's well thought-out design come race day!

DESIGNED FOR DRONE RACING

R2001SB 2.4GHz S-FHSS S.Bus Receiver

FUTL7619
 R2001SB
 2.4GHz S-FHSS
 S.Bus Receiver

- Futaba's smallest, lightest full-range receiver ever!
- Link it with one of four Futaba S-FHSS radios with multicopter function for unparalleled reliability and innovation
- Weighs only 4 grams

Compatible with these Futaba systems:

18MZ-WC	10J
18MZ	8J
18SZ	6J
14SG	6K

Long story short...

The R2001SB is an S.Bus powerhouse that's guaranteed to take your FPV flights to the max!

Futaba®

AN INVALUABLE DIAGNOSTIC TOOL

Mini Digital Tachometer

HCAP0400
 Mini Digital
 Tachometer

- Simply aim the Mini Digital Tachometer at the blades to get an accurate reading of revolutions per minute
- Works on fans with two blades on up to 9 blades, and measures rpm up to 99,999
- Information is displayed on a custom LCD with blue backlight for easy viewing in low-light conditions
- Powered by a long-lasting CR2032 Lithium-Ion battery (included)
- Takes up very little space in your field box or on your workbench

Long story short...

Hobbico's Mini Digital Tachometer makes checking blade rpm easy, convenient — and safe.

HOBBICO™

CLICK HERE FOR GENERAL HOBBY PRODUCTS

SHOOT IT UP AND SHOOT 'EM DOWN! THE NIKE IS VICTORY

Skill Level **2**

Skill level two kits are the first tier of more advanced kits. They feature laser cut wood fins, balsa or plastic nose cones, unfinished body tubes, and waterslide decals. Requires beginner skill in model construction and finishing. Assembly may take a day.

Nike-X™
A sure fire win
Length: 23.4 in (59.4 cm)
Diameter: 1.3 in (34 mm)
Weight: 2.4 oz (68 g)
Max. Altitude: 600 ft (183 m)
Recommended Engines: B6-4 (first launch), C6-5 ESTT7259

Requires: launch system, engines, starters and recovery wadding

From the Experts:

Modeled on designs from the original surface to air missiles, the Estes Nike-X is a detailed but easy to build.

Long story short...

Every inch as awe-inspiring as the originals, this scale model Nike-X is the perfect project for building family fun!

REVELL 1/56 BOMARC MISSILE

Stopping nukes with nukes

Early in the Cold War, when the threat of atom-bomb bearing bombers roaring in was very real, the Bomarc was one of the first SAMs put into use to protect against a first strike. Planned massive batteries of these missiles could be emplaced around America's major cities. If hostile bombers were detected, they could be launched, home in, and then detonate their own multi-kiloton warhead. In the end, ICBMs made Bomarcs obsolete. The few remaining missiles are on static display. **Kit features** launch rails, service platform, crew figures, instrument panel, and blast shield.

85-1806 RMXS1806 Total Parts: 61 Skill Level: 5 Length: 7.6 in (192mm)

REVELL 1/25 FORD FD-100 PICKUP

Chip's old big block

The Foose™ Ford FD-100 has an amazing history that will soon span 3 generations. Originally, the '56 Ford F-100 was owned by Chip's father, Sam, but at age 13 Chip bought it from his father. It became Chip's daily drive through high school and college. Then, many years later, Sam completely rebuilt and customized the FD-100 using Chip's drawings. Soon it will be passed on to Chip's son, Brock, when he is able to drive. **Kit features** independent front and coil over rear suspension, dual exhausts, solid axles, and molded in color parts.

85-4426 RMXS4426 Total Parts: 78 Skill Level: 4 Length: 7.3 in (184 mm)

REVELL 1/8 GRIM REAPER

Get to the chopper!

The baddest of the bad custom old school choppers is back. Tom Daniel's righteously designed 1974 Grim Reaper still has "the look", 40 years on. It starts with raked custom square-tubular forks with cool dual-square headlights. Then there's the "coffin" shaped gas tank on the custom frame with his 'n hers custom stitched seat, sissy bar and "Iron Cross" medallion. It's powered by a classic V-twin motor with down-swept chrome pipes. A tight, mean, classic looking Hog. ...Let's RIDE! **Kit features** flexible tubing for wiring, swing out kick stand, and lots of chrome parts.

85-7541 RMXS7541 Total Parts: 80 Skill Level: 5 Length: 14.8 in (375 mm)

REVELL OF GERMANY®

REVELL GERMANY 1/72 SPITFIRE MK.IIA

Holding the skies

Britain expected to fight the Second World War on and in the skies over France, just like it had fought the first one. This was not to be. In July, 1940, Germany launched the Battle of Britain—striving to dismantle the British Air Force and force England out of the war. The Spitfire Mk.IIa, along with a host of other aircraft, ensured this would not happen. Though both sides suffered terrible losses, it was the British who emerged victorious. **Kit features** detailed cockpit, rotating prop, and RAF Battle of Britain decals.

03953 RVL3953 Total Parts: 52 Skill Level: 3 Length: 5.2 in (131mm) Wingspan: 6.1 in (155 mm)

www.revell.com

REVELL GERMANY 1/72 DC-4 BALAIR
Serving Swiss skies

DC-4 aircraft were actually a rarity, with less than one hundred built. Far more common was the military version C-54. These served in WWII and, after the end of hostilities, many were sent back into civilian service. Balair—a pilot training group and commercial airline purchased two DC-4s in 1959 and used them for charter flights. Although Balair (now Belair) long ago switched to jets, two are still used by an airline based out of Johannesburg and many more are in use in Canada by Buffalo Airways. **Kit features** radio compartment with consoles, choice of cargo or passenger door, interior seats, rotating props, detailed engines, and two sets of decals.

04947 RVLS4947 Total Parts: 356 Skill Level: Length: 15.8 in (401mm)

REVELL GERMANY 1/300 GERMAN FRIGATE CLASS F122
Bremen-class battlers

Frigates, with their light armament and thin or no armor, are some of the smallest and lightest ships in the world inventory. For the German Navy, however, the frigate is the toughest ship class currently available. These vessels are specialized for anti-submarine and anti-aircraft roles necessitated by the Cold War era. After three decades of service, the Bremen Class is being phased out in favor of larger, modernized frigates. Add an F122 to your Cold War convoy today. **Kit features** two-piece hull, guided missiles, gun, helicopter, and decal sets for eight ships.

05143 RVLS5143 Total Parts: 235 Skill Level: 4 Length: 17.0 in (433 mm)

REVELL GERMANY 1/150 GORCH FOCK
Training tall ship

Sail-powered tall ships are some of the most majestic vessels in the world, and they still have a role to fill. The Gorch Fock is a German training ship which has turned cadets into commanders since 1958. In that time, nearly 15,000 cadets have been trained and the vessel has taken cruises all around the world. Own your piece of sailing history today! **Kit features** two piece hull, pre-assembled sails, lifeboats, masts with structured yard arms, yarn for ropes, display stand, flag chart, and decals.

05417 RVLS5417 Total Parts: 524 Skill Level: 5 Length: 23 in (584mm)

REVELL GERMANY 1/96 CUTTY SARK
The fastest of them all

Well after the steamship was invented, the Cutty Sark was still the fastest ship on the seas. Her brass-clad hull cleaved the waves as taut sails pulled her at 17 knots. The ship hauled thousands of tons of tea every year for her owners. After the tea trade was taken over by newer ships, the Sark endured as a training ship and a museum. Now you can build the Cutty Sark! **Kit features** fully detailed two-piece hull, representation of brass plating, wood grain detail, authentic sails, rigging thread, metal anchor chain, life boats, rigging pulleys, display stand, and full decals.

05422 RVLS5422 Total Parts: 698 Length: 36 in (914 mm)

REVELL GERMANY 1/24 MERCEDES AMG GT
Not your average grocery getter

Why does the Mercedes AMG GT only have room for a medium suitcase in the trunk? Easy. Because all the space was taken up by the turbocharged 243 cu in V8 engine. That beastly engine delivers over 250 horsepower per seat—a total of 503 British Horsepower. With that much under the hood, it can hit 60 mph from a dead stop in just under four seconds and maintain a top speed of nearly 190 mph. **Kit features** multi-part body, opening hood, left or right hand drive, and lots of plate options.

07028 RVLS7028 Total Parts: 93 Skill Level: 3 Length: 7.4 in (189 mm)

HASEGAWA 1/72 60/54CM MORSER KARL WITH MUNITIONSPANZER IV BOOM

With shells weighing nearly 5,000 pounds, filled with hundreds of pounds of high explosive, the “Karl Gerat” (Karl Device) made a significant impact wherever it went. Fortunately for the Allies, it wasn’t capable of going many places. Although it could move under its own power, its massive size limited it to traveling at six mph and only using pre-prepared firing sites. In total, seven were built along with over a dozen specially modified panzers for ammo transport. **Kit features** four sets of decals.

30041 (Limited Edition) HSGS0041 Total Parts: 317 Skill Level: 3
Length: 6.2 in (158 mm)

HASEGAWA® 1/24 KENWOOD KREMER PORSCHE 962C
High-octane competitor

The Porsche 962 was designed to compete from day one. However, some models were revamped by private teams to make it even better. Kremer Racing replaced the original’s aluminum sheet tub chassis with carbon fiber for added rigidity. Eleven 962Cs were built by Kremer Racing. Some were sold to other international teams for use in World Sports Prototype Championships. This limited edition **kit features** one marking option: 1. World Sports Prototype Car Championship, 1989, Kremer Racing Team, Car No. 10.

20287 (Limited Edition) HSGS0287 Total Parts: 52 Skill Level: 3
Length: 7.8 in (199 mm)

HASEGAWA 1/200 AIR DO B767-300 BEARDO HOKKAIDO JET
One massive mascot

Air Do operates five Boeing 767-300. Three of them are the standard model and two are modified ER extended range versions. Beardo is a bear-like mascot for the Air Do line that sometimes appears on the tails of its aircraft. This limited edition **kit features** special decals for the Beardo Hokkaido Jet.

10820 (Limited Edition) HSGS0820 Total Parts: 39 Skill Level: 3
Length: 10.7 in (273 mm) Wingspan: 9.5 in (242 mm)

HASEGAWA 1/24 NISSAN BLUEBIRD 1600 SSS
 1970 East African Safari Rally Winner

The East African Safari is one of the most difficult rally races in the world. Held in Kenya, racers face rough roads, unpredictable weather, and long timed hauls. Some people look at winning an East African Safari Rally as winning three normal rallies, which makes it all the more exemplary that Edgar Herrmann won two rallies back to back in 1970 and 1971. For 1970, he drove a Nissan Bluebird 1600—one of the most reliable marks of cars available. **Kit features** decals for the number 4 rally racer.

21266 HSGS1266 Total Parts: 101 Skill Level: 3 Length: 6.9 in (176 mm)

HASEGAWA 1/24 DATSUN FAIRLADY 240Z 71
SAFARI RALLY WINNER

Off-roading at its best

The East African Safari Rally is one of the most difficult rally races in the world. Held in Kenya, racers face rough roads, unpredictable weather, and long timed hauls. How many commutes involve giraffe crossing zones? Edgar Herrmann won the race two years running, the second time with a Datsun Fairlady 240Z. This four wheel drive, four cylinder powered car had the reliability and performance to go the distance. **Kit features** decals for number 11, the 1971 Safari Rally Winner.

21268 HSGS1268 Total Parts: 118 Skill Level: 3 Length: 7.2 in (182 mm)

HASEGAWA 1/72 AICHI E13A1 TYPE 0 11 & CATAPULT
 Ready for recon

Nicknamed "Jake" by the Allies, the Aichi E13A floatplane made long-range recon a reality for the IJN during World War II. E13As were typically launched by catapult, and many were used for kamikaze missions during the latter half of the war. Several E13A1 pilots were from the Kashima Naval Flying Group, which had begun as a flight training group in 1938. This limited edition **kit features** a separately molded catapult and two marking options: 1. IJN Kashima NFG, Kashi-98 and 2. IJN Kashima NFG, Kashi-95.

HASEGAWA 1/72 F-35A LIGHTNING II JASDF
FIRST AIRCRAFT

The fighter of the future, here today

In years to come, aerial warfare will change as more sophisticated weapons emerge. The F-35 is intended to counter improvements in detection and engagement systems using stealth to improve its survivability in a world swarming with SAM batteries. Today, this multirole aircraft is active with the US Air Force, the JASDF, and on order with Korea and Israel. **Kit features** decals for the first F-35 to be delivered to the JASDF.

 02222 (Limited Edition) HSGS2222 Total Parts: 68 Skill Level: 3

HASEGAWA 1/72 F/A-18F ADVANCED SUPER HORNET
 True 21st century sophistication

First flown in 2013, the F/A-18F Advanced Super Hornet prototype is packed with innovations that made it a success with the US Navy. Initial flight tests proved successful, thanks in part to "Enhanced Performance Engines" that boosted output from 22,000 pounds to 26,400 pounds per power plant. Conformal fuel tanks increased the aircraft's combat range by 260 nautical miles while adding 3,500 pounds (1,600 kg) of fuel per fill-up. This limited edition **kit features** new resin parts and one marking option: 1. US Navy Advanced Super Hornet Demonstrator, Code: 168492.

HASEGAWA 1/72 KAWASAKI T4 ASHIYA SPECIAL
2016 2 KITS

Train and fight

Ashiya Air Base was taken over by the US after WWII, used throughout the Korean War, then handed back to Japan in the sixties. Today, the shorter runway at Ashiya is used to fly off training missions for the JASDF. Their Kawasaki T4 trainers are some of the most agile small jet aircraft available. The type was originally introduced in 1988 and just over two hundred were built. This limited edition kit combo features two aircraft with special decals for Ashiya Air Base.

HASEGAWA 1/32 SHIDENKAI NO MAKI
KAWASAKI KI-61 TYPE 3 "TONY"

Manga-inspired, mission-ready

Manga and anime enthusiasts all over the world are familiar with writer Takeshi Nogami's crazy creations. His craziest one yet is "Shindenai No Maki," which features high school girls piloting World War II's most famous aircraft – including the Kawasaki Ki-61 – in dogfights to the death. Whether you're a manga fan or a warbird buff, this unique kit has something for everyone. This limited edition **kit features** a design based on Takeshi Nogami's "Shindenai No Maki," with new resin parts for two pilot figures, plus markings for pilot student Kei Kogarashi.

HASEGAWA 1/48 F-15J EAGLE 204SQ SUPER DETAIL
 Eagles from Naha

When it took its first flight in July, 1972, there was little doubt that the F-15 Eagle would be an all-out success. But after 40 years in the air it remains one of the world's most successful fighters with over 100 victories. The "J" variant of the F-15 is an export model purpose-designed for Japan. It has been upgraded several times over this service life and continues to be one of the finest aircraft in the JASDF inventory. This limited edition **kit features** metal and photoetched parts plus an emblem of 204SQ and full decals.

HASEGAWA EGGPLANE F-15C EAGLE ACE COMBAT GALM 1

Fight through the war in the Belkans

Will you be a mercenary, a soldier, or a knight? As the mysterious "Cipher" from Ace Combat Zero, you get to choose. When Namco brought out Ace Combat Zero: The Belkan War, it was one of the best fighting flight simulators out there. It featured actual moral choices, a solid plot, and an intricate flying/fighting system. In it you can fly many aircraft including the F-15C—one of the most successful of all modern fighter aircraft. **Kit features** decal for Ustio Air Force 6th Air Division 66th Air Force Unit Pilot: Cipher GALM1: 032 from "Ace Combat Zero the Belkan War".

Length: 3.9 in (100 mm)

ITALERI 1/48 MACCHI MC.205 VELTRO

Beefing up the bullets

The Folgore helped eliminate the Italian Air Forces shortcomings, but the Italians knew they were still not packing enough. Their solution was to equip a redesigned C.202 airframe with a powerful new DB 605 engine, two 50cal machine guns and two 20mm cannons. With that much muscle behind it, the Veltro was considered by its designers to be a match for the P-51 Mustang. Unfortunately for the Italians, they simply couldn't get enough Veltros in the air. Only 262 were produced. **Kit features** six sets of decals from before and after the armistice.

2765S ITAS2765 Skill Level: 2 Length: 7.2 in (182 mm)

ITALERI 1/24 MERCEDES BENZ ACTROS MP4 GIGASPACE

Made for the long haul

In many ways, the Mercedes Benz Actros is just like every other semi on the road. It's a dedicated heavy hauler, durable, powerful, and straightforward. Still, some things put it in a class all its own. The unique aspects start with the "Telligent Gearbox". This specially designed gearbox uses sensors to automatically choose the best gear for the truck to be in and either automatically select that gear or give you a gear recommendation. This makes it easier for novice drivers to select gears and puts less wear on the gearbox. **Kit features** special "GigaSpace" version with tons of interior space.

3905S ITAS3905 Skill Level: 5 Length: 10 in (255 mm)

ITALERI 1/56 M18 HELLCAT TANK DESTROYER WITH TWO DRIVERS

Locked and loaded

The open-topped and extremely fast M18 Hellcat was designed to stop rampaging armored spearheads cold. Its exceptionally thin armor (roughly one inch), open-topped turret, and radial aircraft engine helped it attain a top speed of 50mph on road. Once in combat, it needed every ounce of that speed. Its 76mm gun was only marginally effective against the front armor of the Panther, so savvy commanders knew they had to get around for a side or rear shot. **Kit features** an easy to assemble Hellcat with three sets of decals.

15762 ITAS5762 Skill Level: 1

ITALERI 1/72 WWII BATTLE SET: 1940 BATTLE OF ARRAS

Critical counterattack

France was in shambles. Belgium was reeling. The Dutch had surrendered. British Expeditionary Forces had barely made it off the boats. Everywhere, German divisions advanced unchecked. In a bold counterattack, British forces massed their Matilda I and II tanks and hurled them at the flanks of one of the advancing spearheads. Only desperate action by Rommel and unconventional use of Flak 88s prevented three German divisions from being cut off from reinforcements. Set features 50 German infantry, 42 British infantry, two Matilda II tanks with crew, an Sd.Kfz.250 with crew, and a Flak 88 with crew plus two MDF houses!

6118 ITAS6118 Skill Level: 2

ITALERI 1/72 F-4 C/D/J PHANTOM II USAF/NAVY VIETNAM ACES

Collecting kills

"Aces" are any aircrew who destroy five or more enemy aircraft in air to air combat. Air combats over Vietnam were comparatively limited and produced only five aces. Three of them: Richard Stephen "Steve" Ritchie, Jeffrey Feinstein, and Randy Cunningham are named pilots in the decal sets for this kit. Charles DeBellevue and William Driscoll flew as weapons officers with Richard Ritchie and Randy Cunningham and are also credited as aces. The last decal is for Robin Olds—a maverick ace pilot and commander who flew in WWII and Vietnam. **Kit features** four sets of decals.

1373S ITAS1373 Total Parts: Skill Level: 3 Length: 10.5 in (267 mm)

ITALERI 1/72 SEPECAT JAGUAR A "GULF WAR" Calamitous cat

The Jaguar is one of the most famous and long serving ground attack and close air support aircraft used by British Royal Air Force and French Armée de l'Air. After the Iraqi invasion of Kuwait, the French Government joined to the International Coalition and launched operation "Daguet" in the first Gulf War. The Armée de l'Air Jaguars successfully close support and strike missions against ground targets, command centers, and communication lines with laser-guided munitions. **Kit features** four sets of decals.

1386S ITAS1386 Total Parts: Skill Level: 2 Length: 9.3 in (236 mm)

ITALERI 1/35 LAND ROVER 109 "GUARDIA CIVIL"

Go anywhere with the Guardia and Land Rover

To protect the citizens of Spain, the Guardia Civil (or Civil Guard) has to be able to traverse even the most remote regions of Spain quickly. For that task, the Land Rover 109 is pivotal. Sure, a helicopter could get there faster and easier, but there's only so many helicopters to go around. With its powerful four wheel drive and reliable engine, the Land Rover could go where most others wouldn't dare—just like the guard. **Kit features** three sets of "Guardia Civil" decals.

Take off on a high-flying fifties comic adventure of epic proportions! With Vic Torrey's flying saucer, you can celebrate the golden age of comics and your love of all things extra-terrestrial at the same time! **Kit features** a five inch flying saucer model based on the Vic Torrey comic.

AMC-1009 AANS1009

Academy 1/35 US Army M36/M36B2 Battle of the Bulge

90mm of metal

As German tanks got larger and more heavily armed, the US Army faced an ever-growing shortage of armored vehicles that could face German tanks on an even footing. The open-topped M36 with its 90mm gun was one of the few American tank destroyers that could confront the Panther and Tiger head on. In the Battle of the Bulge, with German forces surging forward, commanders desperately needed the firepower of the M36. The M36 warmed up the snowy, bitter cold with burning cordite and hot lead. **Kit features** six sets of decals for WWII and Korean War units.

Trumpeter 1/35 Soviet MT-LB 6MB Multi-Purpose Tracked Vehicle

Fielded through the fallout

In the event of a full-scale nuclear exchange between the Eastern and Western powers, the MT was designed to be able to operate in irradiated zones thanks to its NBC (Nuclear, Biological, Chemical) protection system. It could bypass downed bridges with amphibious capability. Its broad tracks give low ground pressure—perfect for driving through drifting fallout ash. Later variants were even equipped with a remotely-operated 30mm autocannon for dealing with pesky holdouts. **Kit features** a MT armored vehicle with added turret.

05580 TSMS5580 Total Parts: 1100+ Length: 7.1 in (180.5 mm)

Trumpeter 1/72 German E100 Super Heavy Tank

Super heavy striker

At over 150 tons in planned weight and slated to be equipped with a 150mm gun, the E100 was far larger than any tank produced during WWII. Its chassis was equipped with up to 200mm of slightly slanted armor—a truly outrageous amount. A partial prototype was captured at the end of the war, but no full E100s were ever built. Had they been fielded, their firepower would have reduced any Allied tank to scrap—assuming Allied planes didn't take out the E100s first. **Kit features** finely detailed parts and full decals.
