THE ULTIMATE POWER SOURCE

ONYX RC electronics launched in 2008 to instant acclaim. Never before had modelers found so many advanced features in chargers within their price range. ONYX broke through technical barriers and changed how all RC companies designed chargers from then on. ONYX means more value for your money!

Available soon from ONYX:

NiMH Batteries

Transmitter and Receiver Batteries

- Single cells and flat, square, and hump packs
- AAA, 2/3A, AA, and sub-C cells — universal and JST plugs **ONXM2073 – ONXM2425**

Power Batteries

- 6- and 7-cell flat, stick and hump packs for powering motor/ESC systems
- 2/3A and sub-C cells — standard, mini, and Star® plugs **ONXP5136 - ONXP5509**

LiPo Batteries

Perfect for competition, sport, upgrades, and more! ONYX plans a comprehensive range of discharge rates, capacities, and popular connector styles — including ultra micro, flat micro, micro, JST, XT60, and Star®. Look for easy-to-use JST-XH balancing plugs on all multi-cell packs. Ultra-sonic welding of cell tabs and balancing wires ensures strong joints with great electrical conductivity.

Miscellaneous LiPo Batteries

These single-cell and multi-cell packs make ideal replacement batteries for many LiPo-powered models. **ONXP0010 – ONXP1540**

25C Continuous Discharge (50C Burst), 3C Maximum Charge Rate

30C Continuous Discharge (60C Burst), 4C Maximum Charge Rate

Lightweight and economical for sport use. Some 25C packs feature hard cases for car applications. **ONXP1640 – ONXP2468**

35C Continuous Discharge (70C Burst), 4C Maximum Charge Rate

40C Continuous Discharge (80C Burst), 4C Maximum Charge Rate

These provide a little extra power — without turning cost and weight into considerations. Hard case packs are available for car use. **ONXP2500 – ONXP3040**

50C Continuous Discharge (100C Burst), 4C Maximum Charge Rate

70C Continuous Discharge (140C Burst), 4C Maximum Charge Rate

Batteries that are all about performance! High discharge ratings for applications that require raw power. **ONXP3300 – ONXP4073**

BOOST SCALE REALISM WITH ROBART RETRACTS AND ACCESSORIES

For smooth performance and superior scale detail, nothing beats Robart retracts. RC pilots have trusted the brand's innovative, dependable products for over 45 years. They include pneumatic and mechanical retracts for aircraft such as large-scale Top Flite® warbirds. Robart also manufactures accessories like air line restrictors and quick disconnects. Make your flying experience the best it can be – choose Robart.

Robart retract features:

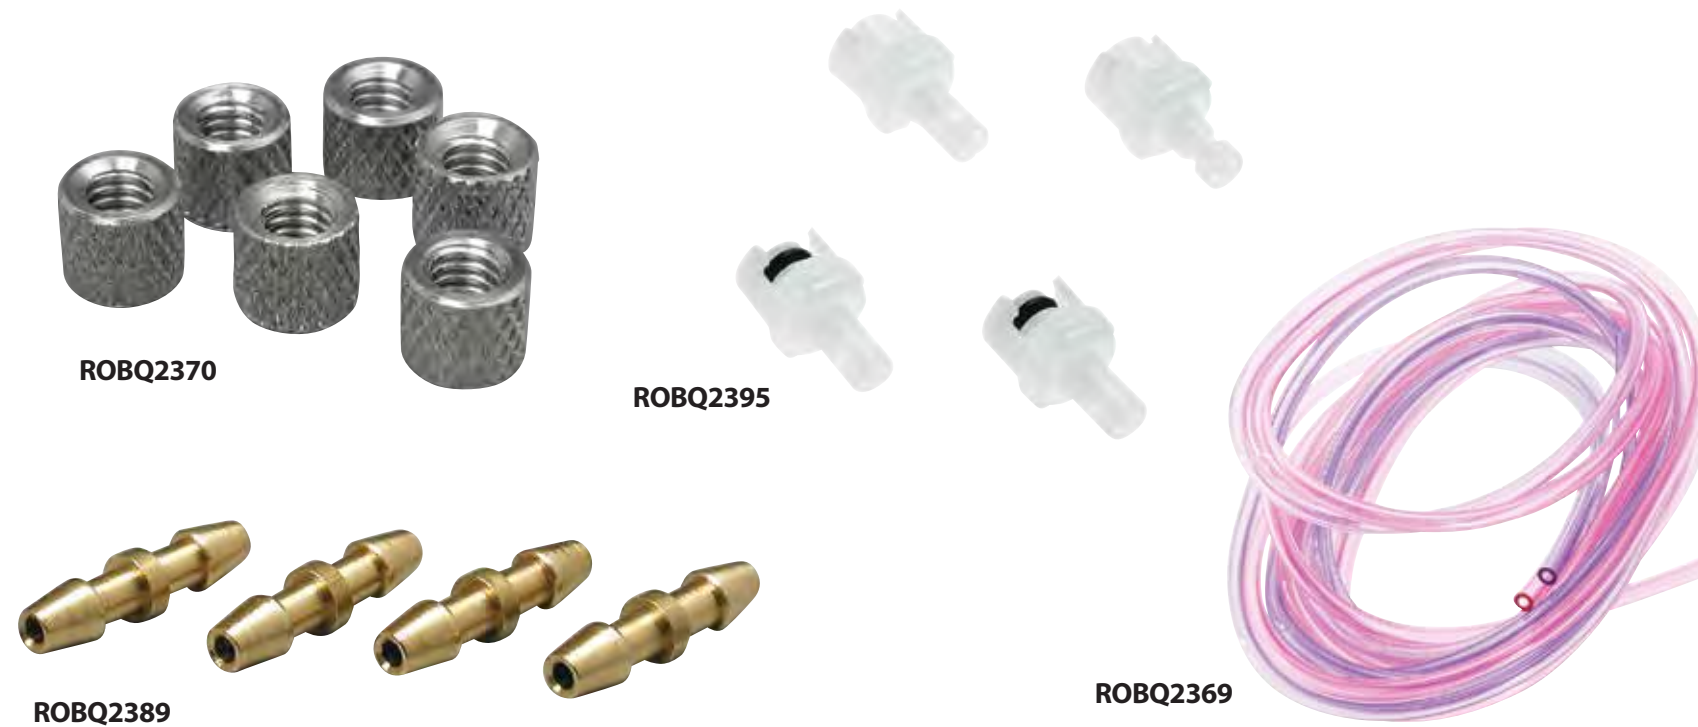

- Assembled and ready to install for ultimate convenience
- Super-strong aircraft-grade aluminum and steel construction
- Functional chrome moly steel oleo struts with height and toe-in adjustability
- Amp-Out circuitry shuts off the motor when there are travel limits or obstructions, preventing battery drain
- Positive up and/or down locks
- 6-month labor and 1-year parts warranties

- ROBQ1634** 622-5E Top Flite Giant P-51 Electric Retracts
- ROBQ1637** 622P47E Top Flite Giant P-47 Electric Retracts
- ROBQ1656** 148-E Top Flite Giant F4U Corsair Electric Retracts
- ROBQ1657** TFFW190E Top Flite Giant Fw 190 Electric Retracts
- ROBQ1666** 150E 1/5 Electric Rotating Mains

Accessories:

Robart complements their best-selling retracts with a wide range of accessories. Popular choices include **Aluminum Air Line Restrictors**, which reduce the cycle speed of pneumatic retracts for added scale realism, and the **Ultra Fueler**, a four-valve fuel switch that simplifies fill-ups for airplanes with pressurized tank systems. Other flight line essentials, too, like **High Pressure Air Tubing**, threaded aluminum **Air Line Retainer Fittings** and lightweight **Air Line Quick Disconnects**, are great additions to any flight caddy.

- ROBQ2389** 189 Aluminum Air Line Restrictors
- ROBQ2370** 170 Air Line Retainer Fittings
- ROBQ2395** 190 Air Line Quick Disconnects
- ROBQ1205** 205 Ultra Fueler
- ROBQ2369** 169 High Pressure Air Tubing 10'

"I have used Robart retracts since the early prototypes, and they have always worked great!" - Dan Landis, RC pilot and Top Flite Product Manager

DAVE DEAL BAJA HUMBUG
Dave Deal's delectable desert driver

It's a long, long way to the finish line. Out there are mile upon mile of rock, sand, dirt, and despair. Cross the finish line, and bragging rights abound. This is the Baja 1000. Outlandish vehicles from motorcycles to buggies to outlandish vehicles with huge tires, chopped fenders, eye popping fog lamps, and rooftop air cleaners cluster at their starting points. Only the bravest drivers with the best machines will make it all the way to the end. **Kit features** extractor exhaust with Super-Stinger, roof mounted air cleaner with hoses, one piece body with chopped fenders, full decals, and soft black tires.

85-1739 RMXS1739 Total Parts: 50 Skill Level: 4 Length: 4.8 in (121mm)

1/25 '66 PONTIAC® GTO®
Vintage muscle

It is accepted that the Pontiac® GTO® was the first true "Muscle Car" made by Detroit. Working to keep ahead of the competition, the 1966 GTO set a sales record with 96,946 cars sold. It combined great looks with unmatched performance. With its Tri-Power motor, it could cut the quarter mile in 14.05 seconds. **Kit features** detailed 389 V-8 with Tri-Power carbs, Tampo printed red lines, two sets of wheel choices, and soft black tires.

85-4479 RMXS4479 Total Parts: 114 Skill Level: 4 Length: 8.3 in (210mm)

1/72 F-100F SUPER SABRE
Supersonic twin-seater

One of the first supersonic aircraft in the US Air Force inventory, the Super Sabre entered service in the fifties. The F-version, represented by this kit, was a twin-seat aircraft originally intended as an instructor/student aircraft to facilitate the Air Force-wide transition from subsonic to supersonic aircraft. Later on, the second seat made the Sabre F-100F perfect for hunting Vietnamese antiaircraft positions. **Kit features** a super decals sheet with markings for three air forces.

1398S ITAS1398 Length: 7.8 in (199mm)

1/48 CHINOOK HC.1 CH-47D
Over fifty years flying

Introduced in 1962, the Chinook helicopter rapidly took on a reputation as a superior aircraft. It was used in Vietnam to transport troops and equipment, including landing heavy artillery on otherwise inaccessible mountain ranges. More recently, Chinooks have provided heavy lift capability for the wars in Iraq and Afghanistan. **Kit features** upgraded mold and a super decals sheet with markings for three air forces.

2779S ITAS2779 Length: 13.4 in (340mm)

1/24 IVECO-MAGIRUS DLK 23-12 FIRE LADDER TRUCK

Where's the fire?

Built to match the extremely exacting standards required by the modern urban environment, this Iveco truck is one hot item. Its ladder reaches a max height of 23 meters and a distance of 12. The bucket at the end of the boom can hold up to three people so it can be used for rescue or hosing down the blaze. **Kit features** a detailed truck with turntable ladder which can be mounted in firefighting or moving position.

3784S ITAS3784 Skill Level: 5 Length: 14.5 in (369mm)

1/35 SCHNELLBOOT TYPE S-38
Faster to the fight

S-Boats "Schnellboot" gave the Allies fits. Capable of attaining speeds of 50mph and ranging up to 700 miles, the S-Boat was the easy-to-produce commerce raider Germany needed to strangle supplies to the UK. They sank over a hundred merchant ships, totaling hundreds of thousands of tons. Plus destroyers, minesweepers, and more. With a 40mm Bofors on board, the vessel became even more deadly. Both aircraft and unarmored ships could be blasted apart with this superior armament. **Kit features** photo-etched parts, upgraded mold, full decals, and over 600 highly detailed parts.

5620S ITAS5620 Total Parts: 600+ Skill Level: 4 Length: 39.3 in (999mm)

1/35 STEYR RSO/01 WITH GERMAN SOLDIERS AND ACCESSORIES

Pushing through

First the rains came. Unpaved roads became a sea of mud, the dreaded "Rasputitsa". Wheeled and half tracked vehicles sank straight into the mire. The German offensive slowed. Then came winter, bitter cold for which the Germans were totally unprepared. The offensive ground to halt. To push through once more, Germany deployed the "Raupenschlepper Ost". This full-tracked vehicle could haul supplies and artillery over the worst mud. Its pressed-steel cab and wooden, drop-side bed became a fixture of the Eastern Front. **Kit features** RSO, seven figures, accessories, and decals for five versions.

6549S ITAS6549 Skill Level: 3 Length: 5 in (126mm)

ACADEMY MODELS 1/72 ROKAF F-15K SLAM EAGLE
Outfitted with cutting-edge components

The F-15K Slam Eagle is the Republic of Korea Air Force's licensed variant of the celebrated F-15E. While it shares many of the F-15E's features, it adds some differences, too. Unique to the F-15K are a night vision device-compatible cockpit, an AAS-42 infrared search and track system and an ARC-232 U/VHF radio with Fighter Data Link System. **Kit features** multi-colored parts, glue-free assembly, precisely engraved panel lines, rivet details, cockpit and landing gear, an external fuel tank, an air-to-air missile, an air-to-surface missile, a targeting pod, Cartograf® decals and stickers.

12554 ACYS1254

Plastic Models

AMT® 1/25 DIRTY DONNY'S 1969 PLYMOUTH GTX

A dynamite design from Dirty Donny

Few muscle cars could top the Plymouth GTX in terms of style and performance. Introduced in 1967, the GTX was available with the choice of a "Super Commando 440" V8 engine or a Chrysler 426 Hemi "Elephant" power plant. The 1969 model was the last to be offered as a convertible, but was the first to offer an optional Air Grabber hood for non-Hemi-equipped versions. **Kit features** modern tooling, black molding, many extra, intricately detailed parts, pad-printed redline tires, plus all-new decal art and package illustrations by Dirty Donny.

AMT1065/12 AMTS1065 Skill Level: 2

AMT 1/25 PETERBILT 352 PACEMAKER CABOVER

Setting the pace of the seventies

Peterbilt has been moving America for nearly a century. Though it's most famous for its legendary long-nosed prime movers, the Peterbilt 352 Cabover was a force to be reckoned with as well. **Kit features** tilting sleeper cab, authentic diesel engine, dual exhaust stacks, hollow vinyl tires, detailed chassis with dual-drive tandem rear axles, original 1970's packaging, and an expanded decal sheet.

AMT1090/12 AMTS1090

AMT 1/25 TEXACO/STANDARD/CHEVRON TRUCKING DECALS

Fuel, fire, and the decals I desire!

Fuel from Texaco, Standard, and Chevron makes you go and these decals make your truck look great for the ride! **Full set** of 1/25 scale decals for three of the most popular brands of gasoline in the United States.

MKA029/12 AMTS9929

BANDAI® 1/144 STRIKER GN-X "BUILD FIGHTERS"

Amazingly armed and armored

The Striker GN-X is based on the Advanced GN-X, which first appeared on episode four of the "Gundam Build Fighters Battlogue." A large, newly designed rifle utilizes grips throughout the weapon, ensuring the recreation of realistic shooting scenes. The rifle can be supported by both hands, allowing for many dynamic poses and added play value. Newly designed parts also recreate the head unit and defense rods. **Kit features** a smart gun, a discharger, two defense rods, two beam sabers and an armor set.

221055 BANS1055 Skill Level: 1 Height: 5 in (127 mm)

BANDAI® 1/144 GUNDAM "THE ORIGIN" ACT ZAKU (KYCILIA'S FORCES)

A new generation of fighter

Near the end of the One Year War, the Act Zaku (Kycilia's Forces) was created under the "Pezun Project," using the Zaku II as its foundation. The mobile suit features the iconic Kycilia's Forces "crest" on the head. Bandai has also recreated the Act Zaku's distinctive weapons, including a bullpup gun and designated Heat Hawks with newly designed parts. Fans can recreate memorable poses with two Heat Hawks posed in each hand. **Kit features** a bullpup gun, two designated Heat Hawks, a foldable Heat Hawk and decals.

221056 BANS1056 Skill Level: 1 Height: 5 in (125 mm)

BANDAI® 1/100 "GUNDAM 0080" GM COMMAND (COLONY TYPE)

Made for maximum mobility

The Colony Type GM Command from "Mobile Suit Gundam 0080: War in the Pocket" is now available as an MG kit! Its iconic silhouette is recreated with newly designed MG detail. The kit's frame allows for smooth articulation in the waist, arms and legs, resulting in a wider range of movement for realistic poses. The colony version backpack is manufactured with newly design parts as well. **Kit features** a bullpup machine gun, two beam sabers, a shield, two magazines, 18 runners, a sticker sheet and a decal marking sheet.

222257 BANS2257 Skill Level: 2 Height: 9 in (230 mm)

BANDAI® PETIT'GGUY GRAHAM AKER WHITE & PLACARD

Chase with an ace

2018 marks the tenth anniversary of "Mobile Suit Gundam 00," and Bandai is celebrating with a lineup of character-inspired Petit'gguy kits! Petit'gguy Graham Aker's design is based upon the show's popular flying ace of the same name, and comes with a placard. Bring the main cast of "Mobile Suit Gundam 00" to your Gunpla lineup as Petit'gguy! **Kit features** a placard for displaying personalized messages.

222258 BANS2258 Skill Level: 1 Height: 3.5 in (89 mm)

BANDAI® 1/144 "GUNDAM BUILD FIGHTERS"

Born to battle

The HGUC Zeta-inspired Gundam is based on the special unit used by Tatsuya Yuki from "Gundam Build Fighters." It features a unique weapon load-out and color scheme that's worthy of the title "Meijin Kawaguchi." Main armaments consist of the A Mega Rifle and Z Mega Rifle, which combine to form the A-Z Mega Launcher! It is also capable of transforming into a wave rider through replacement parts. **Kit features** a Dash Shield that can be mounted on the forearm. The shield also features an opening for the Unlimited Saber weapon.

224496 BANS4496 Skill Level: 1 Height: 5 in (125 mm)

BANDAI® GUNDAM EXIA (LIGHTNING VERSION)

Let there be light

Released in honor of the tenth anniversary of "Gundam 00," the Gundam Exia incorporates a full mechanical skeleton that's packed with rich surface detail and capable of dynamic poses. The first Perfect Grade kit from the GunPla Evolution 40th Anniversary Project, the Gundam Exia comes with a GN Sword, GN Short and Long Blades, a GN Shield, plus GN Beam Sabers and Daggers. **Kit features** a "Luminous Elements" LED system that illuminates the body's GN Drive, GN Condenser and GN Cables, plus a color-changing "Trans-Am" mode and a display stand.

219773 BANS9773 Skill Level: 3 Height: 14 in (356 mm)

MOEBIUS® 1/350 STAR TREK BEYOND USS FRANKLIN

Fighting for the Federation

Boasting Warp 4 capability and a registry of NX-326, the USS Franklin is one of the ancestors of the more famous USS Enterprise. The 22nd-century vessel was featured in 2016's Star Trek Beyond, where everyone's favorite starship crew discover the ship on the planet Altamid. By the film's climax, the Franklin is once again fighting for the Federation, helping Kirk and company defeat Krall and his swarm of drones. **Kit features** authentic, screen-accurate styling, a display stand, decals and instructions.

975 MOES0975 Total Parts: 97 Length: 15.5 in (394 mm)

MPC® 1/48 Space: 1999 Nuclear Waste Area 2 Diorama

The perfect accessory for the Eagle Transporter

"Space: 1999" only ran for two seasons, but its influence on serious sci-fi can still be seen today. It featured Martin Landau and Barbara Bain as marooned researchers searching for a new home. **Kit features** a "plug and play" light kit, 8 lamp stands, 2 moon buggies with cargo, 2 nuclear waste control cones, 2 waste containment platforms, 8 hexagonal storage boxes, 2 lamp post bases, 10 figures, a bonus 1/24 moon buggy with figures and a large decal sheet with full-color paint and decal guide. Requires 4 AA batteries.

MPC860/06

MPCS0860

MPC 1/25 Jeep Commando Mount 'n Goat

MPC's Mountain Machine

Back by popular demand, MPC's Mount 'n Goat Jeep Commando features a plentitude of exciting options! How about three different wheel choices, massive off-road or rugged street tires, hard up-top or open-top options and a greatly expanded decal sheet featuring the original graphics plus all new factory-style stripes! It's even molded in pearlized blue plastic. Super-detailed engine, raised suspension, and authentic interior components round out the package, which of course is full-on Retro Deluxe! **Kit features** extra large knobby tire option, stock and custom wheel options, hard or open top, expanded decals, and more.

MPC887/12

MPCS0887

Skill Level: 2

Tamiya 1/48 Messerschmitt Bf 109 G-6

Like a G6

The Bf 109 is a legendary name in aviation, an aircraft which combined longevity and versatility. The G-6 accounted for more than a third of Bf 109 production. Introduced in 1943, it could be fitted with underwing 20mm cannon pods or synchronized 13mm machine guns. **Kit features** figure, model, and three marking options. DB605A engine can be displayed with cowlings open to show off detail or cowlings can be closed. Cowlings and engine parts attached by magnet for easy post-assembly swaps. Dual radiator flaps in wings can be depicted up or down, canopy can be open or closed, and a drop tank is included.

TAMS1117

Length: 7.4 in (188mm)

Tamiya America 1/35 French Armored Car AMD35 1940 (ICM)

Panzer bait

This assembly kit recreates the AMD35, a 4-wheeled armored car deployed first as a reconnaissance vehicle by French cavalry units, and then by conquering German troops after the Fall of France in 1940. It was a mobile vehicle, able to transport its 4-member crew at speeds of up to 72km/h thanks to the 105hp engine. Around 360 were produced by 1940. **Kit features** armor rivets, separate 4-cylinder engine, gun breech, interior parts, tons of accessories, open/closed hatch options, leaf spring suspension, commander torso figure, and decals for two French and one German vehicle.

32411

TAMS2411

Tamiya 1/48 M1A2 Abrams

A heck of a tank

The M1A2 has a 120mm gun and when it points at you, it's too late to run. Unless you can outrun depleted-uranium-tipped-armor-piercing-fin-stabilized-discarding-sabot, believe me you shouldn't make it a habit. Its turbine engine produces 1,500 horsepower and drives the beast at 42 miles per hour. Plus, it's got depleted Uranium reinforced armor protection that's roughly 600mm thick in cross section. Add in three machine guns and you'll have so much fun, the only question to ask is "where can I get one?" **Kit features** fully detailed model with driver figure.

32592

TAMS2592

Skill Level: 2

Tamiya America 1/48 German Heavy Tractor SS-100

Heaviest hauler

This scale model recreates the SS-100, which was a veritable workhorse for German forces during WWII. Powered by a 100hp 8,553cc diesel, it was based upon a civilian vehicle design and could pull loads of up to 20 tons. The SS-100 was put to work towing all sorts of subjects including artillery pieces, aircraft, broken down vehicles, and even V2 rockets. **Kit features** slide molded cab, realistic underside, tool box, air tanks, detailed interior, tow bar to pair with other 1/48 scale models, realistically posed driver figure, and four marking options for army, air force, and navy vehicles.

Length: 4.5 in (114mm)

Width: 2.1 in (53mm)

Tamiya America 1/12 Ducati 1199 Panigale S Tricolore

Ducati speed demon

The thoroughbred Ducati 1199 Panigale S Tricolore came in a red, white and green color scheme to match the colors of the famous Tricolore Italiano national flag, in commemoration of the 150th anniversary of Italian reunification. It shared most of the base bike's revolutionary design, including the 1,198cc L-Twin engine integrated into the monocoque frame and directly connected to the swing arm, damper unit, and so on. **Kit features** new decals and masking stickers, removeable side cowlings, metal shock coil spring, metal transfers for mirror surfaces, moving kickstand, separate racing stand, and more.

14132

TAMS4132

Length: 6.8 in (173mm)

Width: 2.6 in (67mm)

Tamiya America 1/24 Mercedes AMG GT3

Power to spare

With a 6.3 liter, 558 horsepower V8 engine under the hood, the Mercedes-AMG GT3 race car has more performance on tap than it should be legal to put on the road. It's a customer special sports car converted from the AMG GT road car by the Mercedes-AMG high performance division. And it features a carbon fiber body, a prominent grill, a large rear wing, canards, and more aerodynamic essentials. **Kit features** expertly detailed parts for supreme accuracy.

24345

TAMS4345

Tamiya America 1/35 British Self-Propelled Anti-Tank Gun Archer

Backwards British battler

Literally a 17-pounder anti-tank gun mounted backwards on a Valentine tank chassis, the "Archer" provided much-needed mobility to one of the few guns in the Allied inventory capable of knocking out Axis heavy armor from a distance. Because of the cramped, open-topped fighting compartment, and the inherent difficulty of driving it anywhere, the Archer was primarily a defensive vehicle. However, it still managed to get its knocks in before the end of the War and British troops used it into the early 1950s. **Kit features** open top compartment with gun details, shell rack, and more plus commander, loader, and gunner figures, and two marking options.

TAMS4356

Length: 7.5 in (191mm)

Tamiya America 1/35 German Soldiers At Rest

Rest and relaxation

Believe it or not, Blitzkrieg is really, really hard work. Pushing thousands of men beyond their physical limits day after day. Telling men on foot to keep up with men in tanks takes a toll. Even the most hard-driving, goose-stepping Nazi commander had to let his men stop to rest if he wanted to have a fighting force left to do the fighting. This set shows Wehrmacht troopers as you don't see them in the movies—fully attired in their M36 field uniforms, and equipped with helmets, bayonets, and cartridge cases, but at rest. Eating, drinking, cutting bread, and sitting down to rest. **Kit features** four full body figures.

35129

TAMS5129

Tamiya Honda MB50z

Wheeling and dealing

The sporty Honda MB50z immediately became popular for its sporty design. Its 49cc air-cooled, 2-stroke, single-cylinder engine produced 7hp and was equipped with a bell-shaped combustion chamber to ensure stable combustion through all speeds. The bike featured a unique cross line backbone frame structure as well as Honda's distinctive Com-Star wheels. With its simple construction and sporty mechanism, the MB50z garnered a large fan base during the 1980s. The Tamiya 1/6 scale model is faithful in every way to the life size subject. **Kit features** distinctive Com-Star wheels, coil springs for rear suspension movement, synthetic rubber tires, vinyl tubing, steerable front fork, and two sets of decals.

16014 TAMS6014

Tamiya 1/16 German Kubelwagen Type 82 Africa Corps w/Feldmarschall Rommel

Speeding over the sands

The vehicle that earned Rommel's trust in the searing African desert! Because of its reliability and ease of repair, and since its engine did not require coolant, the Kubelwagen was particularly effective in North Africa. Divisions in North Africa requested a vehicle suitable for the desert and a Continental balloon tire version went into production from 1942. Two types of balloon tires, a grooved and an un-grooved version were used. The Tamiya model depicts all the fine details of the Kubelwagen. **Kit features** open/closed doors and engine room cover, balloon tires, steerable front wheels, lots of accessories, driver figure, Rommel figure, and five marking options.

36202 TAMS6202 Length: 9.4 in (238mm) Width: 4.1 in (103mm)
Height: 3.7 in (93mm)

Tamiya 1/16 Kubelwagen Type 82 European Campaign

A true war "wagen"

Designed as a civilian vehicle, but plans were soon made for a military version. Improved model "Type 82" went into mass production in 1940 with a reliable, 4-cylinder, 23.5hp engine which provided a top speed of 80km/h. Over 50,000 produced by wars end. From the searing heat of North Africa to the blistering cold of Russian, the Kubelwagen Type 82 was used for recon and communications. **Kit features** semi-pneumatic rubber tires, open/closed doors and engine room cover, full 4-cylinder engine, hood up/down, with/without window frames, driver figure, and four marking options.

36205 TAMS6205 Length: 9.5 in (242mm) Width: 3.9 in (100mm)

Tamiya 1/16 German Pz.Kpfw IV Ausf.J w/Single Motor

Static model accuracy RC mobility!

Equipped with a gearbox mated to an electric motor for realistic runs. Tough aluminum alloy chassis and metal parts for drive sprockets, idler wheels, suspension parts, and more to take on the terrain and keep rolling on! Aluminum gun barrel and separate Schürzen armor plates on the turret. Includes two marking options for Panzer Divisions in WWII. Drive the tank that conquered all it touched today! Requires two C batteries (sold separately).

36211 TAMS6211 Length: 17.5 in (445mm) Width: 7 in (179mm)
Height: 6.5 in (166mm)

Tamiya 1/35 US Self-Propelled Howitzer M109A6 Paladin

Fire support on the fly

The chief new feature of the Paladin variant of the M109 was its ability to fire, move, and be ready to fire again in 30 seconds. That kind of mobility reduces the effectiveness of counterbattery fire and improves the survivability of the vehicle. America used the Paladin for fire support throughout the Iraq War. **Kit features** 155mm howitzer and complex turret, sharply detailed road wheels, paint/cementable belt type tracks, moveable gun travel lock and hull rear spade, two torso figures, tons of accessories, decals, and more.

RC FUN ASSEMBLY KITS

Great for beginning builders!

Introducing RC Fun Assembly Kits, perfect "do-it-yourself" projects for radio-control rookies and budding builders! The **Dakar** truck kit makes it easy to tear up the terrain in style, while the **Night Flash** heli hovers high, thanks to a coaxial rotor system and gyro for superior stability.

Night Flash Features

- Take to the skies with the Night Flash RC Heli
- Built-in gyro provides first-class flight stability
- Coaxial rotor system with tail rotor for easy, beginner-friendly flying
- Interference-resistant 3-channel 2.4GHz radio system with trim function and built-in LiPo battery charger cable
- Rechargeable 3.7V 1S LiPo battery
- LED light
- Spare rotor blade set

Dakar Features

- Dominate the dirt with the Dakar RC Truck
- 2-channel 27MHz radio provides full-range control
- Approximately 1/20 scale – compact size lets you take it virtually anywhere

RFNE0300

RFNC0400

RFNE0300 Night Flash RC Heli Assembly Kit
Length: 7.3 in (185 mm)
Rotor Diameter: 7.7 in (195 mm)
Flight Time (approx.): 6-9 minutes
Radio Range (approx.): 164 ft (50 m)

RFNC0400 Dakar RC Truck Assembly Kit
Dimensions: 4.7 x 8.7 x 5.5 in (120 x 220 x 140 mm)
Weight: 12.7 oz (360 g)

Both Require: 6 AA batteries

SPRING INTO ACTION - BUILD AN ESTES ROCKET!

Warm Up with Cool Designs

Skill Level 2

Skill Level 2 kits require average building, painting and finishing skills. These kits feature laser-cut wood fins, plastic nose cones, plastic, self-stick or waterslide decals, unfinished body tubes and instructions.

Hyper Bat™

A frenzy of flight

Max. Altitude: 2,125 ft (648 m)

Height: 21.9 in (55.6 cm)

Diameter: 0.98 in (25 mm)

Weight: 1.8 oz (51 g)

Recommended Engines: Single stage:

B6-4 (first flight), B6-6, C6-5, C6-7.

Two stage: A8-0, B6-0 (first flight),

C6-0. Upper stage: A8-5, B6-6 (first

flight), C6-5, C6-7.

ESTT7217

Big Daddy™

A king-sized classic

Max Altitude: 900 ft (274 m)

Height: 19 in (48.3 cm)

Diameter: 3 in (76 mm)

Weight: 5.3 oz (150.3 g)

Recommended Engines: C11-3 (first

flight), D12-3, D12-5, E9-6.

Requires 3/16 Maxi Launch Rod

(ESTT2244)

ESTT2162

V2™

Soaring scale realism

Max Altitude: 725 ft (221 m)

Height: 22.4 in (56.9 cm)

Diameter: 2.6 in (66 mm)

Weight: 6.3 oz (178.6 g)

Recommended Engines: C11-3

(first flight), D12-3, E9-4, E9-6.

Requires 3/16" Maxi Launch Rod

(ESTT2244)

ESTT3228

Mercury Redstone

History blasts off

Max. Altitude: 200 ft (61 m)

Height: 28.6 in (72.6 cm)

Diameter: 2.1 in (53 mm)

Weight: 3.7 oz (105 g)

Recommended Engine: C6-3.

ESTT1921

All include:

- Laser-cut wood fins
- Plastic nose cones
- Unfinished body tubes
- Decals
- Recovery parachute

All require:

- Engines
- Starters
- Recovery wadding
- Launch pad
- Launch controller

• Tools

- White or yellow glue and/or tube type plastic cement
- Paint
- Finishing supplies
