INDORFIN™

130mm Brushless FPV Race Drones

SUPREME FAST FPV

If high-speed RC flights in an exceptional, small FPV race drone are your thing, you'll want to check out the cutting-edge INDORFIN. It's available in both FPV-R and fully loaded RTF versions for pro and beginner pilots. Either way, you get the power of 3S LiPo batteries for blistering speed and a carbon fiber frame for exceptional durability.

Open-source Betaflight software makes it exceptionally easy to fine tune, program, and fly. At just 130 mm on the diagonal, it's compact enough to do sick FPV stunts in and through tight spaces. If fast, freestyle FPV is your thing, you need the INDORFIN!

BOTH FEATURE:

- Quad 4100Kv motors for maximum speeds in freestyle drone flying
- Quad 3A OneShot ESCs with plug-and-play convenience
- F3 flight controller with open-source Betaflight software lets you customize your flight program
- 600TVL camera is adjustable to offset the tilt-forward of extreme speeds
- A light, yet rugged carbon fiber frame for ultimate strength

RISE0210 INDORFIN 130 Racer 200mW RTF
 RISE0211 INDORFIN 130 Racer 200mW FPV-R Drone
Specifications-
 Diagonal Size: 130 mm (5.1 in)
 RTFWeight: 169 g (5.9 oz)
 RTF Requires: Nothing!
 FPV-R Requires: 5.8GHz FPV monitor and 2.4GHz transmitter

RTF ALSO INCLUDES:

- 4.3" 5.8GHz color monitor
- Monitor goggles
- RISE J2000 2.4GHz hobby transmitter
- (4) AA batteries for the transmitter

BOTH INCLUDE:

- Installed 5.8GHz FPV transmitter
- ONYX™ 3S 11.1V 740mAh 20C LiPo battery and charger
- Extra props
- Full instructions

RISE™

ARCHON™

Ready-To-Fly 370mm GPS Drone

YOUR FAST TRACK TO FPV

Start exploring drone photography quickly and easily with the ARCHON. Everything you'll need is included — 2.4GHz RISE flight transmitter, Tactic 4.3" 5.8GHz FPV color monitor, 1080p/12MP 5.8GHz 200mW camera, LiPo battery, AC balance charger, and more. Built-in, simple to use GPS flight modes enable the ARCHON to nearly pilot itself while you focus on taking exciting aerial pictures and videos. The ARCHON is durably built, fully equipped, and loads of fun!

FEATURES:

- Easy, intuitive flying, with "Return-to-Home" for safe landings and "Auto-Hold" that keeps the ARCHON at the altitude you want
- "Return-to-Home" mode at low battery power automatically brings the ARCHON back to its original launch location
- Watch your footage in real time from the 5.8GHz FPV camera, or add a micro memory card to store, edit and upload high-quality action videos from the on-board DVR
- Tough, injection-molded design helps you fly with confidence
- LEDs keep you oriented, and prop guards and extra props are included
- Compatible with inexpensive TACZ5200 goggles and most 5.8GHz goggles

INCLUDES:

- 100% Ready-To-Fly ARCHON 370 mm GPS Drone
- RISE 1080p 12 MP 5.8GHz FPV camera
- 200mW 5.8GHz video transmitter
- ISO camera mount
- Tactic 4.3" LCD FPV color monitor
- 2S 7.4V 2200mAh LiPo battery w/Star® Plug
- 2S/3S AC balance charger
- RISE J2020 2.4GHz transmitter
- Tx monitor holder
- Monitor charge cord
- Prop guards
- Extra set of props
- (4) AA transmitter batteries
- Screwdriver (for Tx battery door)
- Instruction manual

DC-3 AIRLINER

FLZA2320 Micro DC-3
Airliner RTF

C-47 SKYTRAIN

FLZA2330 Micro C-47
Skytrain RTF

FLOWN THE WORLD OVER

Whether you like to cruise in comfort or fly behind enemy lines, Flyzone has the perfect micro model for you. The **DC-3 Airliner** recreates the popular passenger plane that put more Americans in the air than ever before. The **C-47 Skytrain** comes complete with invasion stripes and looks like it's ready to drop troops and turn for England. The best part? Both of these classics are fully equipped and ready-to-fly!

Both Feature:

- Smooth and stable flight characteristics
- Impressive micro scale looks
- Twin motor power
- Tactic 4-channel SLT™ radio system with built-in battery charger
- Wing attaches quickly with two screws
- Magnetic nose cone for fast, easy battery replacement
- Clear plastic cockpit glass and side windows
- Scale counter-rotating 3-blade propellers
- 1S LiPo flight battery
- 5 AA batteries

Wingspan: 23 in (584 mm)

Wing Area: 66.5 in² (4.3 dm²)

Wing Loading: 5.6 oz/ft² (17 g/dm²)

Weight: 2.6 oz (74 g)

Length: 16.75 in (426 mm)

Both Require: nothing!

SPEED R2103 1/8 ON-ROAD ENGINE

THE NEXT GENERATION OF PERFORMANCE

OSMG200

OSMG201

The next generation of on-road performance has arrived with the Speed R2103 from O.S.! Capable of a wider range of torque than the R2102, the Speed R2103 dominates even on high-grip surfaces. Superior fuel consumption ensures you get the most mileage from every fill-up. Factory-applied two-color graphics add signature style to this sleek-looking power plant.

- Compatible with 16% nitro fuel, which complies with EFRA regulations
- Crankshaft with Diamond-Like Coating (DLC) and an embedded tungsten weight
- Outer head with factory-applied two-color graphics
- Inner button head allows for finer tuning to meet track conditions
- Steel rear ball bearing
- Slide valve carburetor
- 8.5 mm reducer installed in the carburetor venturi to reduce the amount of airflow for greater torque
- Turbo RP7 glow plug
- Includes exhaust seal ring, tapered collet and three carb dust seal caps
- Also available with the T-2080SC Pipe Set, constructed of polished aluminum and tuned for competition

OSMG200 1AY00 Speed R2103 1/8 On-Road Engine
OSMG201 1AY01 Speed R2103/T-2080SC Tuned Pipe
Displacement: 0.213 cu in (3.49 cc)
Bore: 0.633 in (16.08 mm)
Stroke: 0.677 in (17.2 mm)
Rpm Range: 4,000-45,000
Output: 2.76 hp @ 33,000 rpm
Weight: 11.99 oz (340 g)
Both Include: Exhaust seal ring, tapered collet and three carb dust seal caps
OSMG201 Includes: T-2080SC exhaust pipe

SPEED B21 TY TESSMANN II LIMITED EDITION

CHAMPION DESIGN, CHAMPION PERFORMANCE

Ty Tessmann
TY TESSMANN

110% RACING
NOTHING LESS.

Ty Tessmann has delivered a power plant that's worthy of his winning pedigree with the Speed B21 Ty Tessmann II Limited Edition. Unique features include a low-profile cylinder head designed by Ty, a 5.8 mm carb reducer and laser-etched engravings of Ty's signature on the crankshaft cylinder head and crankcase. Supplies are limited, so get yours now before they run out!

- Special low-profile cylinder head with double-height vertical fins, designed by Ty Tessmann
- Crankshaft, cylinder head and crankcase feature a laser-etched engraving of Ty Tessmann's signature
- 5.8 mm carb reducer
- 21J3 (B) slide valve carburetor
- P3 Turbo glow plug
- Exhaust seal ring
- Dust cap set

OSMG2086 1A209 Speed B21 Ty Tessmann II Limited Edition
Displacement: 0.211 cu in (3.46 cc)
Bore: 0.646 in (16.4 mm)
Stroke: 0.646 in (16.4 mm)
Practical Rpm: 4,000-42,000
Power Output: 2.61 hp @ 34,000 rpm
Weight: 12.56 oz (356 g)
Includes: P3 Turbo glow plug, exhaust seal ring, 5.8 mm carb reducer, dust cap set
Requires: Glow fuel, glow igniter, fuel filter, fuel bottle, starter and T-2090SC Tuned Pipe Set (OSMG2953)

NEW PRODUCT

R21 1/8 ON-ROAD CLUB RACING ENGINE

PREMIUM POWER, ENTRY-LEVEL EASE

Club racers rejoice! The R21 is based on the Championship heritage of the R2102 engine and delivers an unbeatable blend of power and value for 1/8 on-road racing. Its crankshaft and piston/liner are designed with premium performance and easy maintenance in mind, which makes it an ideal choice for beginners. This engine is upgradeable with high-performance O.S. Speed parts, letting you realize your full winning potential.

- The perfect power plant for rookies and club racers
- Newly developed crankshaft and piston/liner with the capability to upgrade later to a Spec-class performer
- RP7 Turbo glow plug
- 8.5 mm carb reducer
- Speed flywheel collet
- Exhaust seal ring
- Dust cap set

OSMG2032 1B900 R21 1/8 On-Road Club Racing Engine

Displacement: 0.213 cu in (3.49 cc)
Bore: 0.633 in (16.08 mm)
Stroke: 0.677 in (17.20 mm)
Practical Rpm: 4,000-44,000
Power Output: 2.71 hp @ 32,000 rpm
Weight: 12.35 oz (350 g)
Includes: RP7 Turbo glow plug, exhaust seal ring, 8.5 mm carb reducer, dust cap set
Requires: Glow fuel, glow igniter, fuel filter, fuel bottle, starter and T-2080SC Tuned Pipe Set (OSMG2983)

Product Re-Release

DROMIDA

VISTA™ FPV

Ready-to-Fly 251 mm FPV Drone

DIDE04** Dromida Vista FPV 251 mm RTF

ONE COOL, COMPLETE CAMERA DRONE

Features:

- Rugged, resilient plastic airframe tough enough to survive routine crashes with ease
- Auto-Flip Button for pro-style flips on demand
- Four flight modes (Easy, Normal, Advanced and Expert) to customize response to your skills and preferences
- High-intensity, multi-color LEDs for easy tracking and orientation
- Advanced 3+3 stabilization system includes a 3-axis gyro for easy, level flight and 3 accelerometers to offset outside forces. Accelerometers can also be turned off for added maneuverability
- Store video and photos on the memory card, or download them directly to your smartphone via Wi-Fi

Includes:

- Fully assembled Vista FPV drone
- Tactic DroneView digital HD FPV camera
- 2.4GHz SLT radio system
- 4GB micro memory card
- 3.7V 850mAh LiPo battery
- USB charger
- Smartphone holder
- 4 AAA batteries
- Extra blades
- Screwdriver

CUSTOMIZE AND CONQUER THE COMPETITION

No matter how you look at them, RC10B6.1 and RC10B6.1D Team Kits are top-notch competitors from every angle! The RC10B6.1 is ideal for high-traction tracks, while the RC10B6.1D is great for dirt tracks.

Both Feature:

- Shortened 7075 aluminum chassis
- JConcepts® B6 clear body and wing
- Easy-access ball differential
- Differential height adjustment with 0, 1, 2 and 3 mm inserts included
- Slipper assembly improves weight balance and shock clearance
- Heavy-duty V2 routed graphite shock towers
- Innovative rear arm with molded inserts for ultra-fine lower shock mount adjustment
- Battery strap allows the use of optional turnbuckle-based braces
- Machined pistons for a superior fit and smooth operation

- Rear hubs feature large bearings and an easy-insert system to adjust camber link position and rear axle height
- Aluminum C and D arm mounts for a large range of anti-squat and toe adjustment
- Lightweight aluminum top shaft
- Factory Team oil ball bearing kit

RC10B6.1 Also Features:

- Designed for high-traction tracks
- 3-gear Laydown Stealth® transmission for lower and forward CG
- Front and rear anti-roll bars limit chassis roll for increased cornering speed
- Steel chassis weight

RC10B6.1D Also Features:

- 3-gear Lay Back Stealth® transmission gives the car additional traction when exiting corners
- +1 steering block arms optimize feel on dirt tracks

1/25 '94 CHEVY® IMPALA™ SS™ Seventh-generation greatness

After seven generations of full-size cars, the '94-'96 Chevrolet® Impala™ marked the end of this great nameplate. The market for big, full-size 4-door sedans was coming to a close. However, the SS™ model was packed with performance. With its 5.7-liter OHV V-8 engine and rear-wheel drive, it was a muscle car for the '90s. **Kit features** white, transparent red and clear plastic molding, a detailed LT-1 V-8 engine, separate door panels, painted window lines, assorted chrome-plated parts and soft black tires.

1/24 '53 CHEVY® BEL AIR® 3N1 Fifties fantasy

The Chevrolet® Bel Air® model was first introduced in 1950 and featured a unique roofline. In 1953 there were many changes and it was advertised as "entirely new through and through". The unique side trim distinguished it from the lower priced models. This model also introduced options such as power steering and power brakes, previously only offered on expensive luxury cars. **Kit features** stock and lowered suspension, detailed 6 cylinder engine with custom parts, additional parts to build as stock, lowrider, or custom versions, Tampo printed whitewall tires, and soft black tires.

85-4431 MONS4431 Total Parts: 111 Length: 8.1 in (206 mm)

REVELL OF GERMANY®

1/96 USS UNITED STATES Pride of a People

When you build this ship, you can almost hear the wind singing in her lofty rigging. Her 32 long-barrel twenty-four pounders are menacing, even in 1/96 scale, and you can almost smell the smoke from five wars curling from their muzzles. From her fighting tops to her brass-sheathing, she's a true predator. A frigate built to eat frigates. The first and proudest of all the US Navy's fighting ships, and you can make her seaworthy once more. **Kit features** structured two-part hull, representation of brass plating, detailed superstructure, authentic sails, cannon, shrouds, thread, life boats, rigging blocks, display stand, and flag chart.

AMT® 1/25 1965 Lincoln Continental Two ways to construct a classic

The Lincoln Continental was designed with luxury in mind, capturing the imaginations of discerning drivers for almost eight decades. The 1965 model boasted a redesigned front end with wraparound signal and parking lights on the fenders. Also new to the '65 version were Kelsey-Hayes disc brakes, an oil pressure gauge and front seat belts. **Kit features** convertible and wagon build options, countless customizing parts, reversible wide whitewall/pinstripe tires, tinted windows, a decal sheet with two woodgrain panel types and Retro Deluxe™ vintage-style packaging.

AMT1081/12 AMTS1081 Skill Level: 2

AMT® 1/25 1958 Edsel Pacer Cruise in comfort

Available for one year only, the Edsel Pacer was equipped with many features that made it a cut above other sedans in its class. Contoured seat backs ensured a comfortable ride. A 303 hp V8 engine with four-barrel carburetor and a choice of 3-speed transmissions guaranteed everyone would have a ball driving it. **Kit features** modern tooling, option parts to build the car as a "full continental kit" with extended bumper, a super-detailed V-8 engine, chassis and interior, pad-printed whitewall tires, customizing decals and retro-style packaging.

AMT1087/12 AMTS1087 Skill Level: 2

AMT® 1/25 Peterbilt 352 Pacemaker Cabover Setting the pace of the seventies

Peterbilt has been moving America for nearly a century. Though it's most famous for its legendary long-nosed prime movers, the Peterbilt 352 Cabover was a force to be reckoned with as well. **Kit features** tilting sleeper cab, authentic diesel engine, dual exhaust stacks, hollow vinyl tires, detailed chassis with dual-drive tandem rear axles, original 1970's packaging, and an expanded decal sheet.

AMT1090/12 AMTS1090

AMT® 1/25 1966 Ford Fairlane GT Pure muscle, through and through

In addition to a redesigned front end, the 1966 Ford Fairlane GT featured a 390 cu. in. V8 engine with four-barrel carb that delivered 335 bhp. Another new feature that the '66 offered was a convertible option to complement the sedans, station wagons and hardtops that were already available. "GTA" models were equipped with a SportShift Cruise-o-Matic automatic transmission. **Kit features** modern tooling, a super-detailed engine, a separate frame and floorboard, "ground-up" interior assembly, an opening hood, pad-printed tires and 1966 "annual" Retro Deluxe™ packaging.

AMT1091/12 AMTS1091 Skill Level: 2

AMT® 1/25 '62 Pontiac® Catalina Polyglas Gasser II 2-in-1 design for double trouble

The contoured design of the Catalina helped make it popular in gasser racing during the early 1960s. While the standard version could be upgraded with several option parts available through Pontiac, true gassers preferred to put in their own parts to create a custom racer. **Kit features** a choice of "stock" and "custom" build options, modern tooling, super-detailed parts such as interior, side pipe and front grille customizing options, four bonus Goodyear CWT red pinstripe tires, remastered decals with original artwork and extras, plus throwback Retro Deluxe™ packaging.

AMT1092/12 AMTS1092 Skill Level: 2

Bandai® 1/144 Unicorn Gundam 02 Banshee Norn UC R The Banshee is Back!

"Banshee Norn", is coming to the RG series! Its advanced frame allows it to transform smoothly between its two modes and lock into place. This intricate "Lock Mechanism" secures parts of the kit during transformation and adds stability. Its two types of iconic Armed Armors and head units have been recreated with realistic detailing. Choose between one articulated or two fixed head unit antennas, the largest and most distinct feature of the Banshee Norn! The newly designed Armed Armor XC integrates clear parts into sections of the Psycho-Frame, which are revealed when the kit is transformed into Destroy Mode. **Kit features** beam magnum, revolving launcher, armed armor DE, armed armor XC, beam sabers, and more. Premium box (BANS5888) features art of the Banshee Norn in Unicorn Mode.

Bandai® 1/144 "Gundam Build Fighters"

Born to battle

The HGUC Zeta-inspired Gundam is based on the special unit used by Tatsuya Yuki from "Gundam Build Fighters." It features a unique weapon load-out and color scheme that's worthy of the title "Meijin Kawaguchi." Main armaments consist of the A Mega Rifle and Z Mega Rifle, which combine to form the A-Z Mega Launcher! It is also capable of transforming into a wave rider through replacement parts. **Kit features** a Dash Shield that can be mounted on the forearm. The shield also features an opening for the Unlimited Saber weapon.

224496 BANS4496 Skill Level: 1 Height: 5 in (125 mm)

Bandai® Gundam ZZ Ver Ka ZZ Gundam MG

30 years of mecha mashing!

The next mobile suit to make its way to the Master Grade line-up is the ZZ Gundam Ver. Ka, as part of the 30th anniversary of "ZZ Gundam!" This new version, overseen by renowned mecha designer Hajime Katoki, is based around the elongated proportions in the Enhanced ZZ and Full Armor ZZ Gundam variants that appeared in the latter half of the anime series "ZZ Gundam". The ZZ Gundam Ver. Ka. is fully transformable! Combine the Core Base, Core top, and Core Fighter to create the G-Fortress! **Kit features** two core fighters, multi-tube missile launchers, double beam rifle, hyper beam sabers, and interchangeable hand parts.

Dragon Models 1/72 Sd.Kfz.181 Tiger I Early Production

Smashing enemy armor

One of the most iconic tanks of WWII, the German Tiger I was armed with the incredibly lethal 88mm KwK 36 L/56 and wrapped in between 25 and 120mm of armor plate. Enemy tanks and anti-tank guns were largely inadequate to deal with the threat posed by the Tiger. Fortunately for the Allies, Tigers arrived in relatively small numbers (less than 2,000) and the rapidly deteriorating supply and air power situation for Germany more than offset the advantages of its armor. **Kit DMLS0343 features** a design scheme for Sicily in 1943, kit DMLS0344 features a design scheme for Germany in 1943.

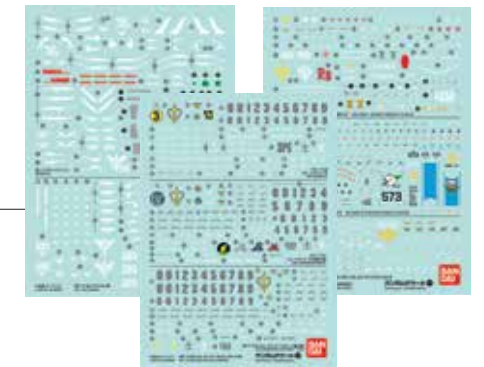

60343/60344 DMLS0343

Dragon Models 1/72 Sd.Kfz.184 Elefant 3/s Pz.Jg. Abt.653

Knockout kriegsmachine

The second and third companies of Panzerjager Battalion 653 were equipped with 30 Elefants each in April, 1944, and had, by August, just twelve vehicles total. Eighty percent of their vehicles were destroyed in five months, testament to the ferocity of the fighting. Although they were extremely effective in their original anti-armor role, they suffered badly against air and massed infantry attacks. Late in the war, they served in the final defense of Berlin. **Kit features** decals for Pz.Jg.Abt.653 on the Eastern Front in 1943.

60355 DMLS0355

Dragon Models 1/72 Pz.Kpfw.IV Ausf.F1

Rushing across Russia

Item DMLS0695 has decals for Infantry Division Großdeutschland on the Eastern Front in 1942. It was rebuilt from the totally destroyed infantry regiment of the same name and equipped with some of the newest and best Panzer IV tanks available to Germany. Item DMLS0696 has decals for SS Division Leibstandarte Adolf Hitler, a famously destructive military formation of the Nazi Party which was used to devastating effect on the Eastern Front. Both groups used the Panzer IV—the quintessential German tank—in their attempt to “kick in the door” of Russia for Hitler. Both failed.

60695/60696 DMLS0695/0696

Dragon Models 1/35 Egyptian Sherman

Fighting on both sides

The end of WWII saw surplus Shermans sold to numerous countries in the middle east as tensions rose to a fever pitch over the new state of Israel. Egypt modified their Shermans with turrets from French light tanks and threw them into action against similarly modified Israeli Shermans during the Six Day War. It was a complete rout for Egypt. Their air force was destroyed on the ground, their armor decimated, the Sinai taken at a stroke. **Kit features** authentic looking Sherman with FL-10 turret, rubber gasket on front of turret, brand new engine deck, slide-molded muzzle brake, new armor patches, detailed bodies and road wheels, and much more.

3570 DMLS3570

Dragon Models 1/72 Do335B-6 Arrow

Night Arrow

Only thirty seven of these aircraft ever made it into the air, and that's a very good thing. These predatory aircraft were uniquely equipped with a pair of 12 cylinder engines and a propeller both front and rear. That gave them a top speed of 475mph—nearly 40mph faster than the P-51. B-6 variants carried radar units which enabled them to hunt down enemies in the night and stitch them up with a devastating array of 20 and 30mm cannon.

5010 DMLS5010

Dragon Models 1/72 P-38J Lightning

Pacific buzzsaw

Armed with a quartet of .50 caliber machine guns and a single 20mm cannon, all packed in the nose, the P-38J Lightning packed a heavy, long ranged wallop. In the Pacific, all the top aces of the war used the P38 Lightning. Its long range, high speed, and heavy armament made it perfect for demolishing Japanese dominance in the air. Though it fared less well in Europe, the P-38 has a secure legacy as a superior twin engine fighter. **Kit features** photo etched parts.

5018 DMLS5018 Total Parts: 75+ Skill Level: 4 Weight: 9 in (229 mm)

Dragon Models 1/72 P-38 Pathfinder

Bombs for Berlin

The standard P-38 wasn't much of a bomber, but the Pathfinder variant included a solid nose with a ground tracking radar and a Norden bombsight, plus an extra crewman in claustrophobic conditions. This extra gear allowed the Pathfinders to lead packs of bomb-armed P-38s directly to a target and drop off their lethal cargo on target. **Kit features** newly tooled Pathfinder nose, detailed undercarriage, engraved fuselage and booms, photo-etched upgrade parts, clear canopy and cabin, and full decals for accurate markings.

5032 DMLS5032

Dragon Models 1/72 F-5E Reconnaissance

Sneaking pictures

Fast, nimble, long-ranged P-38s made the perfect platform for reconnaissance aircraft. In their F-5 reconnaissance variant, they lost the striking power of their noses, but they gained something that was very possibly even more powerful—cameras. These cameras allowed the aircraft to swoop in, grab photos of enemy positions and installations behind enemy lines, and return this intelligence to commanders. **Kit features** newly tooled F-5E Recon nose, fine panel lines, photo-etched upgrade parts, clear canopy and detailed cabin, and vivid decals with accurate markings.

5040 DMLS5040

Dragon Models 1/48 Me-163B-1a Komet

"T-Stoff" terror

Powered by an explosively powerful Hydrazine/Methanol/Hydrogen Peroxide rocket motor, the Komet could reach speeds above 600 mph. Fortunately for the Allies, the thing that gave it its immense speed also necessitated it being an extremely short range fighter. It could fly faster than any other aircraft of the day, or for decades, but it could fly less than thirty miles on a tank of fuel. Twin 30mm cannons were fully capable of shredding targets but the high rate of approach and low ammo capacity of the guns meant only the most lethal pilots could score kills with them.

5504 DMLS5504

Dragon Models 1/48 He 162D Volksjager WWII Jet Fighter

Last ditch effort

With the war rapidly coming to its conclusion, the Luftwaffe decided they needed a fighter that was fast to produce, technically superior, and easy to fly. They wanted to put Hitler Youth pilots who had barely completed glider training behind the controls of cutting-edge jet fighters made out of wood. It was crazy... and it very nearly worked. Luckily, it was the last year of the war before these went on duty. **Kit features** newly tooled swept wings, detailed engines, photo-etched parts, and full decals.

5552 DMLS5552

Dragon Models 1/35 1/4-Ton 4x4 Ambulance Truck (6)

Far from home

The military vehicle known in official US nomenclature as Truck, 1/4 Ton, 4x4, is probably the world's most famous design in its class. This iconic WWII vehicle was produced from 1941-45, with more than 634,000 rolling off American production lines. These small 4x4 vehicles were employed in numerous battlefield tasks, with one role being that of an ambulance. **Kit features** one folded and one unfolded stretcher, and a full set of six GI figures dressed in winter gear including a suitably equipped medic.

6832 DMLS6832

Dragon Models 1/35 IJA Type 97 Medium Tank Chi-Ha

Early Production

Island-ready armor

This model depicts an early production variant—the type that rolled across China and fought in the battle of Khalkhin Gol against the Soviet Union. Later, its 57mm main gun and twin machine guns were pointed towards defending the extremely broad territorial grabs of the Japanese in the Pacific, going places tank commanders believed tanks couldn't go. **Kit features** extremely accurate model based on precise measurements of surviving tanks plus NEO track which is easier to assemble than individual link tracks and far more detailed than belt tracks!

6870 DMLS6870

Dragon Models 1/72 Pz.Kpfw.IV Ausf.F2(G)

Versatile and lethal

With an improved long-barreled 75mm gun, the Ausf.F2 was a highly necessary addition to the German attack on the Eastern Front. The gun provided the Wehrmacht with a weapon to defeat the heretofore largely invulnerable T-34. **Kit features** elevating and depressing gun barrel, slide molded turret and upper hull, detailed hull rear and crisply detailed sprockets, single piece lower hull, single piece road wheels, return rollers, and tracks, and vivid decals with marking options.

7549

DMLS7546

Dragon Models 1/72 Stug.III Ausf.C/D

Carrying the krieg

Based on the chassis of the Panzer III, the Stug. III was a turretless assault gun that ended up becoming the most-produced armored fighting vehicle in the Wehrmacht inventory. They were cheap, they were quick to build, and they were exceptionally effective when employed properly. Early examples, like the C and D variants carried short-barreled 75mm guns which fired low-velocity high explosive shells perfect for blasting field fortifications into dust. **Kit features** one piece upper hull, full details, short-barrel 75mm gun, single piece road wheels, return rollers, and tracks, and vivid decals with multiple marking options.

7553

DMLS7553

Dragon Models 1/72 King Tiger Henschel

Virtually invulnerable

Behemoths of the late-war battlefield, the King Tiger heavy tank was an extremely tough nut to crack. Its gun was capable of knocking out virtually any Allied tank at distances at which the enemy would have extreme difficulty penetrating the King Tiger's armor. Fortunately for the Allies, there were less than five hundred of these brutes produced. The ones that were built also suffered from mechanical breakdowns that effectively immobilized them. **Kit features** slide molded turret, detailed engine deck and wheels, lots of accessory detail, DS tracks, and vivid decals with multiple marking options.

7558

DMLS7558

Dragon Models 1/72 10.5cm Sturmhaubitze 42

Fire support for the front

Equipped with a 105mm howitzer for effective infantry support, the "Sturmhaubitze 42" variant of the Stug.III came the closest of any variant of the type to being the true, envisioned "storm artillery". The 105 was an exceptionally long-ranged field artillery piece already in common use with the Wehrmacht, but putting it in an armored chassis and putting an engine behind it vastly increased its implementation potential. **Kit features** full details, newly tooled Nutek light, one piece slide molded barrel, detailed shocks, single-piece road wheels, rollers, and tracks, plus vivid decals.

7561

DMLS7561

Dragon Models 1/72 Stug.III Ausf.E

"E" variants for the Eastern Front

Cheaper and faster to produce than the average armored fighting vehicle, the Stug.III in all its variants became the most common armored weapon in the Wehrmacht inventory. For the "E" variant, slightly less than three hundred were produced between 1941 and 1942. These variants incorporated a lot of small changes including armored boxes for the radio equipment, MG34 machine guns, and a 75mm gun perfect for lobbing high explosive shells. **Kit features** completely new roof, engine deck, and 75mm short barrel gun.

7562

DMLS7562

Dragon Models 1/72 Jagdtiger Henschel Type

Baddest of the bad

Nazi Germany didn't know the meaning of the word "overkill", but they definitely implemented weapons that exhibited the definition. Their "Jagdtiger" carried a 128mm gun (that's over five inches). Five inches guns usually show up on warships. In field use, these guns could destroy vehicles from miles away or blow through layers of hard cover and take out the vehicles behind. Adding insult to injury, the armor on the type was up to nearly ten inches thick. Making for one truly devastating, impervious fighting machine.

7563

DMLS7563

Dragon Models 1/72 Panzerkampfwagen T-34/85

Captured for the krieg

Turning the weapons of the enemy back on their owners is a tactic as old as warfare itself. Germany was expert at it. Some of their best tanks, early in the war, were actually captured from the Czechs, and they kept up their commandeering of enemy supplies whenever they were advancing. Tanks like the T-34 were taken when they were left behind by their crews and repurposed. Naturally, these vehicles needed extra-large identification markings to avoid friendly fire! **Kit features** detailed parts and full decals.

7564

DMLS7564

Lindberg® 1/12 Jolly Rogers Series: Dismay Be the End

Shivering timbers for the first time since 1972

All set for some swashbuckling? Dismay Be the End recreates a fan favorite that hasn't been available for almost fifty years. This fun-filled kit stars a skeletal scallywag whose bony leg is a hungry alligator's latest lunch. Luckily, our pirate pal has a cutlass to help him counter against this reviled reptile's fearsome attacks! **Kit features** white plastic molding, lively rubber band action and exquisite detail.

HL611/12

LNDS0611

Height: 6 in (152 mm)

MPC® 1/25 1986 Chevy® El Camino™ SS™ & Dirt Bike

Part car, part truck, all cool

For over two decades, the Chevy El Camino was an automotive icon, combining a car and pickup truck into one vehicle packed with unmistakable flair. In the car's final years of production, Choo-Choo Customs Inc. gave it a more aerodynamic front end, creating a fan favorite, the El Camino SS. **Kit features** black pearl plastic molding, aerodynamic front end styling, all-new decals recreating the iconic 2-tone paint and pinstripe package, a bonus 1/25 mini trail bike with carrier rack, optional rack parts and retro-style 1980s MPC illustrated packaging.

MPC888/12

MPCS0888

Skill Level: 2

Tamiya 1/35 German Assault Pioneer Team & Goliath Set

Rumble-rumble-rumble-KER_BOOOM!

The Goliath was a quirky little remote-controlled "tank" with an explosive cargo. Goliath tracked mines gave German Assault Pioneers the ability to make attacks without ever exposing themselves to return fire. They'd simply run the little tanks towards the building, fortification, or tank targeted, then hit a button and KER-BOOOM, 130-220lbs of high explosives make things very interesting downrange. Germany built these by the thousands and deployed them on many fronts where they enjoyed mixed success. **Kit features** parts for two Goliath tracked mines, enamel wire for the control cable, 3 assault pioneer team figures in realistic poses, and lots of accessories.
