FUTABA® 12K T-FHSS 14-CHANNEL COMPUTER RADIO SYSTEM

PRECISE PERFORMANCE FOR EVERY PILOT

Equipped with the rock-solid Futaba S-FHSS and T-FHSS protocols, the 12K is compatible with almost a dozen different Futaba receivers to suit modelers' needs. The 12K can transmit and receive telemetry data via the T-FHSS protocol. Simply install Futaba telemetry sensors (sold separately) to monitor flight data, receive alerts while in flight and more. These sensors allow pilots to keep track of battery voltage, altitude, speed and other key flight functions.

Choose from airplane and heli 12K systems with the R3008SB telemetry receiver included. FPV/drone pilots will appreciate the lightweight, compact R3001SB FPV drone receiver optimized for their applications.

Transmitter Features

- Channels: 14 (12 proportional, 2 switched)
- Compatible with T-FHSS and S-FHSS protocols
- S.Bus 2 system allows multiple servos, gyros and telemetry sensors with a minimum number of cables
- Model types: six types of main wing with three tail types for airplanes, six swash types for helis and multi-rotor functions
- Improved stick feel with adjustable lengths and tension
- Dual rates/exponential
- Included 6V 1800mAh NiMH battery and charger
- Large, backlit LCD screen with adjustable contrast for easier reading. Push/dial operation simplifies set-up
- Micro memory card slot for storing model information and free system updates (SD-32MB to 2GB; SDHC-4GB to 32GB, not included)
- 10-character model naming
- Expandable 30-model memory
- 5 flight conditions (Helicopter and Glider model selections)
- 5 customizable programmable mixes

R3008SB T-FHSS High-Voltage Receiver

- Dual Antenna Diversity
- S.Bus/S.Bus 2 ports (S.Bus 2 port for bidirectional telemetry sensors)
- 8-channel PWM conventional ports
- Battery fail-safe
- Power requirement: 4.8-7.4V
- Dimensions: 0.98 x 1.86 x 0.56 in (24.9 x 47.3 x 14.3 mm)
- Weight: 0.36 oz (10.1 g)

R3001SB T-FHSS High-Voltage Receiver

- Dual Antenna Diversity
- S.Bus/PWM and S.Bus 2 ports (S.Bus 2 port for bidirectional telemetry sensors)
- Battery fail-safe
- Power requirement: 4.8-7.4V
- Dimensions: 0.83 x 1.65 x 0.21 in (21.1 x 41.8 x 5.3 mm)
- Weight: 0.15 oz (4.2 g)

INDORFIN™

130mm Brushless FPV Race Drones

SUPREME FAST FPV

If high-speed RC flights in an exceptional, small FPV race drone are your thing, you'll want to check out the cutting-edge INDORFIN. It's available in both FPV-R and fully loaded RTF versions for pro and beginner pilots. Either way, you get the power of 3S LiPo batteries for blistering speed and a carbon fiber frame for exceptional durability.

Open-source Betaflight software makes it exceptionally easy to fine tune, program, and fly. At just 130 mm on the diagonal, it's compact enough to do sick FPV stunts in and through tight spaces. If fast, freestyle FPV is your thing, you need the INDORFIN!

BOTH FEATURE:

- Quad 4100Kv motors for maximum speeds in freestyle drone flying
- Quad 3A OneShot ESCs with plug-and-play convenience
- F3 flight controller with open-source Betaflight software lets you customize your flight program
- 600TVL camera is adjustable to offset the tilt-forward of extreme speeds
- A light, yet rugged carbon fiber frame for ultimate strength

RISE0210 INDORFIN 130 Racer 200mW RTF
 RISE0211 INDORFIN 130 Racer 200mW FPV-R Drone
Specifications-
Diagonal Size: 130 mm (5.1 in)
RTFWeight: 169 g (5.9 oz)
RTF Requires: Nothing!
FPV-R Requires: 5.8GHz FPV monitor and 2.4GHz transmitter

RTF ALSO INCLUDES:

- 4.3" 5.8GHz color monitor
- Monitor goggles
- RISE J2000 2.4GHz hobby transmitter
- (4) AA batteries for the transmitter

BOTH INCLUDE:

- Installed 5.8GHz FPV transmitter
- ONYX™ 3S 11.1V 740mAh 20C LiPo battery and charger
- Extra props
- Full instructions

RISE™

ARCHON™

Ready-To-Fly 370mm GPS Drone

YOUR FAST TRACK TO FPV

Start exploring drone photography quickly and easily with the ARCHON. Everything you'll need is included — 2.4GHz RISE flight transmitter, Tactic 4.3" 5.8GHz FPV color monitor, 1080p/12MP 5.8GHz 200mW camera, LiPo battery, AC balance charger, and more. Built-in, simple to use GPS flight modes enable the ARCHON to nearly pilot itself while you focus on taking exciting aerial pictures and videos. The ARCHON is durably built, fully equipped, and loads of fun!

FEATURES:

- Easy, intuitive flying, with "Return-to-Home" for safe landings and "Auto-Hold" that keeps the ARCHON at the altitude you want
- "Return-to-Home" mode at low battery power automatically brings the ARCHON back to its original launch location
- Watch your footage in real time from the 5.8GHz FPV camera, or add a micro memory card to store, edit and upload high-quality action videos from the on-board DVR
- Tough, injection-molded design helps you fly with confidence
- LEDs keep you oriented, and prop guards and extra props are included
- Compatible with inexpensive TACZ5200 goggles and most 5.8GHz goggles

INCLUDES:

- 100% Ready-To-Fly ARCHON 370 mm GPS Drone
- RISE 1080p 12 MP 5.8GHz FPV camera
- 200mW 5.8GHz video transmitter
- ISO camera mount
- Tactic 4.3" LCD FPV color monitor
- 2S 7.4V 2200mAh LiPo battery w/Star® Plug
- 2S/3S AC balance charger
- RISE J2020 2.4GHz transmitter
- Tx monitor holder
- Monitor charge cord
- Prop guards
- Extra set of props
- (4) AA transmitter batteries
- Screwdriver (for Tx battery door)
- Instruction manual

RISE0300 ARCHON 370 mm GPS RTF Drone
 Drone Specifications-
 Diagonal Measurement: 370 mm (14.6 in)

DC-3 AIRLINER

FLZA2320 Micro DC-3
Airliner RTF

C-47 SKYTRAIN

FLZA2330 Micro C-47
Skytrain RTF

FLOWN THE WORLD OVER

Whether you like to cruise in comfort or fly behind enemy lines, Flyzone has the perfect micro model for you. The **DC-3 Airliner** recreates the popular passenger plane that put more Americans in the air than ever before. The **C-47 Skytrain** comes complete with invasion stripes and looks like it's ready to drop troops and turn for England. The best part? Both of these classics are fully equipped and ready-to-fly!

Both Feature:

- Smooth and stable flight characteristics
- Impressive micro scale looks
- Twin motor power
- Tactic 4-channel SLT™ radio system with built-in battery charger
- Wing attaches quickly with two screws
- Magnetic nose cone for fast, easy battery replacement
- Clear plastic cockpit glass and side windows
- Scale counter-rotating 3-blade propellers
- 1S LiPo flight battery
- 5 AA batteries

Wingspan: 23 in (584 mm)

Wing Area: 66.5 in² (4.3 dm²)

Wing Loading: 5.6 oz/ft² (17 g/dm²)

Weight: 2.6 oz (74 g)

Length: 16.75 in (426 mm)

Both Require: nothing!

DROMIDA

VISTA™ FPV

V2 RTFs

DIDE04YW Dromida Vista V2 FPV 251 mm RTF

DIDE04BW Dromida Vista V2 FPV 251 mm RTF

Vista V2 FPV RTFs include:

- Mounted LEDs with Surface Mount Technology
- Tougher, lightweight bottom frame covers
- Bold, eye-catching colors

ONE COOL, COMPLETE CAMERA DRONE

Features:

- New SMT mounted LEDs provide brighter illumination for enhanced visibility
- New lighter, stronger bottom frame covers increase durability
- New Blue and Yellow trim scheme options
- Rugged, resilient plastic airframe tough enough to survive routine crashes with ease
- Auto-Flip Button for pro-style flips on demand
- Four flight modes (Easy, Normal, Advanced and Expert) to customize response to your skills and preferences
- Advanced 3+3 stabilization system includes a 3-axis gyro for easy, level flight and 3 accelerometers to offset outside forces. Accelerometers can also be turned off for added maneuverability
- Store video and photos on the memory card, or download them directly to your smartphone via Wi-Fi

Includes:

- Fully assembled Vista FPV drone
- Tactic DroneView digital HD FPV camera
- 2.4GHz SLT radio system
- 4GB micro memory card
- 3.7V 850mAh LiPo battery
- USB charger
- Smartphone holder
- 4 AAA batteries
- Extra blades
- Screwdriver

Diagonal: 251 mm (9.8 in)

Weight: 136 g (4.79 oz)

NEWPRODUCT

SPEED R2103 1/8 ON-ROAD ENGINE

THE NEXT GENERATION OF PERFORMANCE

The next generation of on-road performance has arrived with the Speed R2103 from O.S.! Capable of a wider range of torque than the R2102, the Speed R2103 dominates even on high-grip surfaces. Superior fuel consumption ensures you get the most mileage from every fill-up. Factory-applied two-color graphics add signature style to this sleek-looking power plant.

- Compatible with 16% nitro fuel, which complies with EFRA regulations
- Crankshaft with Diamond-Like Coating (DLC) and an embedded tungsten weight
- Outer head with factory-applied two-color graphics
- Inner button head allows for finer tuning to meet track conditions
- Steel rear ball bearing
- Slide valve carburetor
- 8.5 mm reducer installed in the carburetor venturi to reduce the amount of airflow for greater torque
- Turbo RP7 glow plug
- Includes exhaust seal ring, tapered collet and three carb dust seal caps
- Also available with the T-2080SC Pipe Set, constructed of polished aluminum and tuned for competition

OSMG2020 1AY00 Speed R2103 1/8 On-Road Engine
OSMG2021 1AY01 Speed R2103/T-2080SC Tuned Pipe
Displacement: 0.213 cu in (3.49 cc)
Bore: 0.633 in (16.08 mm)
Stroke: 0.677 in (17.2 mm)
Rpm Range: 4,000-45,000
Output: 2.76 hp @ 33,000 rpm
Weight: 11.99 oz (340 g)
Both Include: Exhaust seal ring, tapered collet and three carb dust seal caps
OSMG2021 Includes: T-2080SC exhaust pipe

O.S. ENGINE
UNEQUALLED QUALITY PRECISION & PERFORMANCE

NEWPRODUCT

SPEED B21 TY TESSMANN II

LIMITED EDITION

CHAMPION DESIGN, CHAMPION PERFORMANCE

Ty Tessmann
TY TESSMANN

110% RACING
NOTHING LESS.

Ty Tessmann has delivered a power plant that's worthy of his winning pedigree with the Speed B21 Ty Tessmann II Limited Edition. Unique features include a low-profile cylinder head designed by Ty, a 5.8 mm carb reducer and laser-etched engravings of Ty's signature on the crankshaft cylinder head and crankcase. Supplies are limited, so get yours now before they run out!

- Special low-profile cylinder head with double-height vertical fins, designed by Ty Tessmann
- Crankshaft, cylinder head and crankcase feature a laser-etched engraving of Ty Tessmann's signature
- 5.8 mm carb reducer
- 21J3 (B) slide valve carburetor
- P3 Turbo glow plug
- Exhaust seal ring
- Dust cap set

OSMG2086 1A209 Speed B21 Ty Tessmann II Limited Edition
Displacement: 0.211 cu in (3.46 cc)
Bore: 0.646 in (16.4 mm)
Stroke: 0.646 in (16.4 mm)
Practical Rpm: 4,000-42,000
Power Output: 2.61 hp @ 34,000 rpm
Weight: 12.56 oz (356 g)
Includes: P3 Turbo glow plug, exhaust seal ring, 5.8 mm carb reducer, dust cap set
Requires: Glow fuel, glow igniter, fuel filter, fuel bottle, starter and T-2090SC Tuned Pipe Set (OSMG2953)

O.S. ENGINE
UNEQUALLED QUALITY PRECISION & PERFORMANCE

R21 1/8 ON-ROAD CLUB RACING ENGINE

PREMIUM POWER,
ENTRY-LEVEL EASE

Club racers rejoice! The R21 is based on the Championship heritage of the R2102 engine and delivers an unbeatable blend of power and value for 1/8 on-road racing. Its crankshaft and piston/liner are designed with premium performance and easy maintenance in mind, which makes it an ideal choice for beginners. This engine is upgradeable with high-performance O.S. Speed parts, letting you realize your full winning potential.

- The perfect power plant for rookies and club racers
- Newly developed crankshaft and piston/liner with the capability to upgrade later to a Spec-class performer
- RP7 Turbo glow plug
- 8.5 mm carb reducer
- Speed flywheel collet
- Exhaust seal ring
- Dust cap set

OSMG2032 1B900 R21 1/8 On-Road Club Racing Engine

Displacement: 0.213 cu in (3.49 cc)

80938 ASCD0938 1/8 RC8T3.1e EP 4WD Team Kit

- Choose from the nitro RCT8T3.1 and the electric RC8T3.1e
- Hard-anodized 7075 aluminum chassis with keyed lower suspension plates
- 16 mm Big Bore 6061 aluminum shocks with bleeder-style caps
- 20 mm I.D. shock springs for optimal spring rates
- V3 diffs offer increased fluid capacity and more consistent feel, lap after lap
- CVA driveshafts increase traction and chassis support
- Suspension arms are updated to race specs
- All suspension arm pivots are revised for more ground clearance, resulting in better jumping and landing and improved durability
- Pro-Line® Predator body
- Efficient drivetrain utilizes straight-cut bevel gears for great acceleration and run time
- Enclosed receiver box
- Improved servo saver assembly
- Full Factory Team rubber-sealed ball bearings

STAY ON COURSE WITH DYNAMIC VEHICLE CONTROL

1/10, 2WD ProSC10 Brushless RTRs deliver exciting short course action in feature-packed ready-to-run packages! All feature a powerful Reedy brushless system, Dynamic Vehicle Control for improved stability, a trimmed and painted replica body, multi-terrain tires and much, much more.

- Low-CG molded composite chassis with hook-and-loop battery straps that hold NiMH and 2-3S LiPo packs
- Rear wheel drive with CVA driveshafts
- Reedy 3300Kv brushless motor
- Reedy SC600-BL brushless ESC with cooling fan
- 2-channel 2.4GHz radio with DVC (Dynamic Vehicle Control) receiver that automatically counter-steers, improving stability when the vehicle starts to slide
- Water-resistant, enclosed receiver box
- Reedy 0712 metal gear high-torque steering servo
- Aluminum bodied 12mm Big Bore shocks
- Fully adjustable suspension geometry
- Externally adjustable V2 slipper clutch
- Multi-terrain scale tires with reinforced sidewalls
- Realistic wheels and tires

LiPo Combos add a Reedy 2S LiPo battery with T-plug connector and Reedy Compact Balance Charger

CUSTOMIZE AND CONQUER THE COMPETITION

No matter how you look at them, RC10B6.1 and RC10B6.1D Team Kits are top-notch competitors from every angle! The RC10B6.1 is ideal for high-traction tracks, while the RC10B6.1D is great for dirt tracks.

Both Feature:

- Shortened 7075 aluminum chassis
- JConcepts® B6 clear body and wing
- Easy-access ball differential
- Differential height adjustment with 0, 1, 2 and 3 mm inserts included
- Slipper assembly improves weight balance and shock clearance
- Heavy-duty V2 routed graphite shock towers
- Innovative rear arm with molded inserts for ultra-fine lower shock mount adjustment
- Battery strap allows the use of optional turnbuckle-based braces
- Machined pistons for a superior fit and smooth operation

- Rear hubs feature large bearings and an easy-insert system to adjust camber link position and rear axle height
- Aluminum C and D arm mounts for a large range of anti-squat and toe adjustment
- Lightweight aluminum top shaft
- Factory Team oil ball bearing kit

RC10B6.1 Also Features:

- Designed for high-traction tracks
- 3-gear Laydown Stealth® transmission for lower and forward CG
- Front and rear anti-roll bars limit chassis roll for increased cornering speed
- Steel chassis weight

RC10B6.1D Also Features:

- 3-gear Lay Back Stealth® transmission gives the car additional traction when exiting corners
- +1 steering block arms optimize feel on dirt tracks

HOBao 1/10 DC-1 TRAIL TRUCK 4WD EP RTRS

Ready to tackle any trail

HB-DC1E-C60BU HOAD0011 1/10 DC-1 Trail Truck Blue 4WD EP RTR

HB-DC1E-C60DG HOAD0012 1/10 DC-1 Trail Truck Gray 4WD EP RTR

- CNC-machined aluminum one-piece chassis with a high ground clearance design
- Four wheel drive with metal links and heavy-duty slider-style center driveshafts, steel gears and lockers on each axle, plus universal CVA front driveshafts
- 27T 550 brushed motor with aluminum heat sink
- Hobbywing WP 60A ESC with drag brake
- HoBao radio system with 18 kg high-torque metal gear steering servo
- Painted, semi-scale body with detailed interior and accessories such as front headlight buckets for LED lights (not included), roof bars, snorkel, door handles, wipers, running boards, mirrors and grille
- Aluminum oil shocks
- Four-link front/rear suspension
- Transmission features 32-pitch steel gears with heavy-duty slipper clutch and a servo-controlled 2-speed transfer system
- Panhard rod steering servo mount

Length: 22 in (559 mm)
Width: 17 in (432 mm)
Height: 10 in (254 mm)
Both Require: 6-cell NiMH or 2-3S LiPo battery, charger and 4 AA transmitter batteries

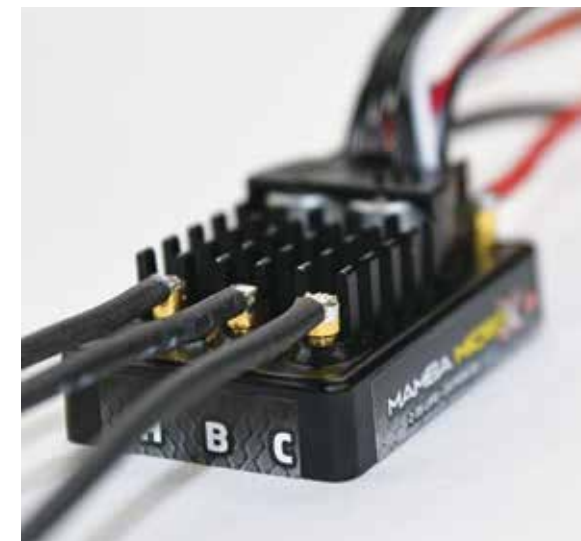

CASTLE™ CREATIONS MAMBA MICRO X CRAWLER ESC & MOTOR COMBOS

A cutting-edge crawler controller

- Sensored, waterproof ESC features an adjustable 5.5V or 7.5V/2A peak BEC
- For 2-3S LiPos and 1/10 crawlers up to 8 lb and faster vehicles up to 4 lb
- Also available with **1406-2280Kv** and **1406-2850Kv Motors**

010-0162-00 CSEM6200 Mamba Micro X 12.6V Crawler ESC

REVELL PORSCHE DIESEL JUNIOR 108

Powerhouse plower

At the same time he was developing the "People's Car", the VW Beetle, Prof. Dr. F. Porsche was designing the "People's Tractor". After the war, Germany needed to make efficient use of their limited farm land. Starting production in 1952, the Porsche Junior tractor was powered by a 14 hp 822 cc engine. Over the years, Porsche partnered with a number of different companies to meet production demands. **Kit features** positional front wheels, choice of seats, and a hinged hood with support.

AMT 1/537 Star Trek USS Enterprise Refit

Rebuilding a classic

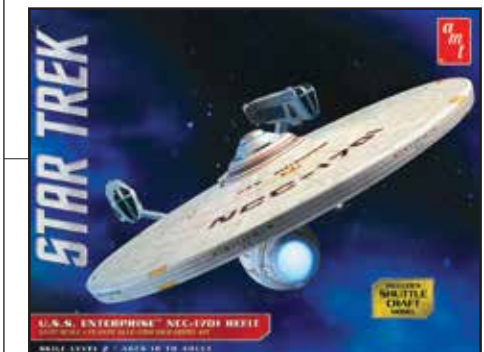

With its five-year mission completed under the command of Captain James T. Kirk, the U.S.S. Enterprise™ NCC-1701 was ordered into dry-dock where it underwent extensive upgrades that affected every aspect of the starship. Newly swept back pylons held modernized engines that were capable of warp factor 9. The ship skin may have provided the most recognizable change with its marine gray metal plating giving way to a glistening series of panels arranged in patterns that appear reminiscent of ancient Aztec hieroglyphics. **Kit features** sturdy dome base with metal support rod, decals, and shuttle craft with "Galileo" and "Copernicus" markings.

Bandai® RE/100 Gundam UC Guncannon Detector

Impressive looks, intricate detail

The Guncannon Detector from “Gundam UC” is now available as a model kit for the first time! It was featured in a brutal battle with Zeon remnants at Torrington Base in “Episode 4: At the Bottom of the Gravity Well.” Most notable with this kit is the included 170 mm cannon. You can combine this weapon with other 1/100 scale kits from the Gundam UC series. **Kit features** a Designated Beam rifle, a Beam gun, two Beam cannons, a 170 mm cannon and two decal sheets.

Bandai® 1/144 HGBF “Gundam Build Fighters” #30 Ballistic Weapons

Cool ways to customize

Bandai is proud to introduce a set of new weapons that can be used with Zeon or other mobile suits to create your own original weapon loadouts. **Kit features** a deployed and short version of the Beam Tomahawk, three funnels based on the HGUC Sazabi weapon loadout, a bazooka and a small beam rifle.

BAN219760 BANS9760 Height: 5 in (127 mm)

Dragon Models 1/35 Egyptian Su-100 Tank

Destroyer- The Six Day War

Striking in the Sinai

Fifty years after the explosive Six-Day War, Dragon is rolling out a line of commemorative kits in 1/35 scale. The latest is an Egyptian SU-100 Tank Destroyer. These Soviet-built vehicles were used in the last year of WWII, then sold off to countries around the world. In the Six-Day War (and other Middle Eastern conflicts), Egyptian troops deployed them against the M4 Shermans fielded by the Israelis. This one-off model is a very special release, upgraded with new parts and decals for the Arab forces. **Kit features** realistic details, slide-molded gun, photo-etched parts, and convenient “Magic Tracks”.

3572 DMLS3572

Dragon Models 1/48 He 162D Volksjager WWII Jet Fighter

Last ditch effort

With the war rapidly coming to its conclusion, the Luftwaffe decided they needed a fighter that was fast to produce, technically superior, and easy to fly. They wanted to put Hitler Youth pilots who had barely completed glider training behind the controls of cutting-edge jet fighters made out of wood. It was crazy... and it very nearly worked. Luckily, it was the last year of the war before these went on duty. **Kit features** newly tooled swept wings, detailed engines, photo-etched parts, and full decals.

5552 DMLS5552

Dragon Models 1/35 IJN Special Type 4 Ka-Tsu Amphibious Tracked Vehicle

Solomons-inspired swimmer

One of the hidden gems of WWII, the “Ka-Tsu” was a 16-ton amphibious landing craft designed to solve the supply and transportation problems of the IJN. It could swim in the water and transport cargo across land. The design sprang out of Japanese experience in the Solomon Islands campaign, where moving men and supplies place to place was a painstaking and difficult process. **Kit features** a slide-molded hull, fine details, open/closed deck hatches, fully detailed helmsman’s cabin interior, and full decals.

6839 DMLS6839

Dragon Models 1/35 Pz.Kpfw.VI 7.5cm Ausf.B

Trial for the Tiger

This is the first ever 1/35 scale kit of an unusual German tank from the WWII era. Known as the Pz.Kpfw.VI (7.5cm) Ausf.B, it was a prototype tank that never made it into mass production. Krupp was ordered to produce six Waffe 0725 turrets, while Henschel was required to modify its existing VK 36.01 hull to accommodate this turret. To be crewed by five soldiers, the resulting vehicle would have weighed 40 tonnes. However, Hitler ordered the project scuttled. This Pz.Kpfw.VI (7.5cm) Ausf.B was a direct predecessor of the VK 45.01 (H), which eventually led to the famous Tiger I. **Kit features** 100% new tooling, 7.5cm gun in a Krupp-designed turret, well detailed full fighting compartment detailed tracks with individual slide-molded links.

6868 DMLS6868

Dragon Models 1/35 DAK Pz.Bef.Wg.III Ausf.H Smart Kit

Showdown in the sand

Dragon launched a 1/35 kit of a Panzerbefehlswagen III Ausf.H (Item No. 6844) last year, it was a hit with modelers and there was also clamor for a Deutsches Afrikakorps (DAK) version. Dragon has now created a special DAK configuration of the Pz.Bef.Wg.III Ausf.H! This specialized command tank containing long-range radios was created based on a standard Ausf.H. However, on the Pz.Bef.Wg. version there was no 5cm gun, just a single MG34 for self-defense and a dummy gun to fool the enemy. **Kit features** a large storage box on the engine deck, plus a smaller storage box on the front left of the fender. Another modification is a spare-track rack on the glacis plate. The sprockets and idler wheels are also different to that on the predecessor. And unchanged, is the characteristic large frame antenna for the long-range radio.

6901 DMLS6901

Lindberg Models 1/12 Jolly Roger Series: In Pinch Peril Scuppered!

Resurfacing from Round 2's tooling archive comes the third in a series of ghastly pirate figure kits. The Lindberg Jolly Roger Series: In the Pinch of Peril shows that not all pirates were merciless, one scallywag looks to disjoint his partner from certain doom. Neither realizes the "pinch" they are in as a giant crab imperils them both! Rubber band action brings the model to life in a surprising way. The skeleton figure measures approximately 6' tall. This detailed model presents great detail perfect for new as well as experienced modelers.

Minicraft 1/48 Beechcraft T-34A/B & C Mentor

Perfecting pilots since the forties

After the end of the Second World War, America needed a trainer aircraft with more performance than the existing ones to keep up with the rapid pace of aircraft development. They got the Beechcraft T-34. It was a very popular design, used by most aviation arms within the US Armed Forces, and many forces abroad. Even though the type was phased out in 1959 in favor of the T-6 Texan, you can still see flying examples of the T-34 today. **Kit features** all new tooling, detailed cockpit with sliding canopy, position-able landing gear and full decals.

MMIS1671

Tamiya 1/20 Ferrari SF70H

Devastating downforce

This model recreates the Ferrari SF70H F-1 of the 2017 F1 season. Specifically, this replica kit recreates the car that won the opening round of the Australian G.P. With regulations promoting greater aerodynamic downforce and mechanical grip, Scuderia Ferrari came up with the sleek SF70H body featuring a lengthened nose, arrow-shaped front wing, engine cover fin and revamped side pods. Powered by the 1.6-liter V6 062 engine in harmony with an electric motor, ace driver Sebastian Vettel was in the thick of an enthralling Drivers' Championship race all season long with Mercedes driver and eventual world champion Lewis Hamilton.

TAMS0068

Tamiya 1/35 German Assault Pioneer Team & Goliath Set

Rumble-rumble-rumble-KER-BOOOM!

The Goliath was a quirky little remote-controlled "tank" with and explosive cargo. Goliath tracked mines gave German Assault Pioneers the ability to make attacks without ever exposing themselves to return fire. They'd simply run the little tanks towards the building, fortification, or tank targeted, then hit a button and KER-BOOOM, 130-220lbs of high explosives make things very interesting downrange. Germany built these by the thousands and deployed them on many fronts where they enjoyed mixed success. **Kit features** parts for two Goliath tracked mines, enamel wire for the control cable, 3 assault pioneer team figures in realistic poses, and lots of accessories.

Tamiya 1/35 German Tiger I Late Version w/Ace and Crew

Sherman shredder

This highly detailed model recreates the German Tiger I Late Version heavy tanks that were produced from January of 1944. Tamiya's high-quality 1/35 scale model depicts this variant of the Tiger in full detail, **complete with** a set of 4 crew figures in realistic relaxed poses. A variety of markings are included to depict various tanks, including one belonging to the famous Tiger Ace Michael Wittmann. Features link-type assembly tracks, a range of separate parts to recreate hull accessories, all hatches except the escape hatch can be assembled open or closed, range of marking options.

25401

TAMS5401

Tamiya 1/24 Citroën 2CV

Smooth Citroën

This car model recreates a classic French piece of motoring history - the Citroën 2CV! While some may have questioned its body styling, there's no denying that the simple, rugged Citroën 2CV was a masterpiece of automotive mass production, with over 3.5 million produced from 1948 to 1990. Its reliable air-cooled 2-cylinder engine got the little front wheel drive car from A to B with little fuss, and the car could accommodate 4 adults adequately. With its soft suspension designed for off-road driving, it is said that the 2CV could traverse a ploughed field without breaking any of the eggs it carried.
