

PRESS RELEASE

Maifield wins 1/8 Scale Buggy at '13 Dirt Nitro Challenge

Photos courtesy of NeoBuggy.net

The Dirt Nitro Challenge is the first major nitro event of the year, the one racers spend the winter preparing for — and it all paid off for Ryan Maifield. After 45 grueling minutes in the 1/8 Scale Buggy main, Ryan held on to cross the finish line just a tenth of a second ahead of the top qualifier, Jared Tebo. That wasn't his only trip to the podium. Ryan also finished third in the 1/8 Scale Truggy main.

Like other Team Futaba drivers in the main — including Ryan Lutz, Josh Wheeler, Dylan Rodriguez and Carson Wernimont — Maifield was running with the latest in Futaba racing electronics, including the 2.4GHz 4PKS-R pistol, FASST surface receivers and the bulletproof, high-voltage S9353HV servo.

While known as a nitro event, the Dirt Nitro Challenge includes electric racing classes. Hard, consistent driving by Ryan Lutz paid off as well, earning him matching second place finishes in 1/8 Scale 4WD Electric Buggy as well as 4WD Nitro Short Course.

All products listed are available now.

Stock Number	Description
FUTK4903	Futaba 4PKS-R 4-Channel 2.4GHz FASST Computer System
FUTM0721	Futaba S9353HV High-Torque/-Speed/-Voltage Servo

4PKS-R 4-Channel
2.4GHz FASST
Computer System

S9353HV
