

# 4PLS 4-Channel T-FHSS Radio System

## Makes telemetry and racing features affordable.

With the 4PLS, modelers can enjoy the benefits of telemetry in two ways. Temperature, voltages and rpm can be monitored in real-time AND logged for future reference. Even better, these advantages are included in the 4PLS for the same price as the original 4PL!

The Futaba 4PL is the only 4-channel 2.4GHz FHSS surface system that's been awarded the coveted "Basher Seal of Approval" from BigSquidRC.com. The 4PLS offers the same value and durability, and adds to an already impressive list of high-end racing features.

### 4PLS highlights include:

- T-FHSS (telemetry), FHSS and S-FHSS transmission modes
- Telemetry for temperature, rpm, receiver voltage and external voltage
- Digital trims
- 40 model memory
- 10 character model naming
- 10 character user name
- Large 128 x 64 dot backlit LCD display with contrast adjustment
- Alarm (adjustable)
- User updatable software (using CIU-2)
- Data logging at user-settable intervals
- 1 programmable mix
- Gyro, dual ESC, 4WS and brake mixing
- Assignable functions
- Steering wheel/trigger adjustment
- Model data transfer
- Model copy
- Model clear
- MC LINK
- Fail-safe on all channels

The 4PLS includes an R304SB 2.4GHz receiver.

For a complete list of features, visit the 4PLS web page at futaba-rc.com. Telemetry sensors are available separately.
