PRESS RELEASE

helimax-rc.com

1SQ[™]
V-CAM
Quadcopter

**Includes on-board camera
— record video with the
push of a button!**

The 1SQ V-Cam adds several new twists to compact quadcopter flying fun. Its built-in digital camera lets you shoot aerial videos, with transmitter-activated ON and OFF. An LED illuminates each motor pod for exciting maneuvers after dark. And its TAGS-FX Sensor Fusion stabilization system — featuring a 3-axis gyro and a 3-axis accelerometer — corrects drift as well as unwanted movement in yaw, pitch and roll. New pilots enjoy unprecedented confidence... experts gain the precision to execute perfect maneuvers!

- So incredibly stable, it's perfect even for new pilots.
- With Auto-FLIP, just press a transmitter button to perform impressive somersaults!
- Record video with the micro digital camera — RTF version takes still photos, too.
- Comes with 2GB microSD memory card and USB card reader.
- RTF and Tx-R versions both include 1S 250mAh LiPo battery, USB LiPo battery charger and 4 extra rotor blades.

RTF
READY-TO-FLY

Tx-R[™]
TRANSMITTER-READY

Choose from two 1SQ V-Cam packages.

- 6-channel 2.4GHz SLT radio
- Micro digital camera with status LED
- 2GB microSD memory card and USB card reader
- 4 LED-equipped motor pods
- 1S 250mAh LiPo battery
- USB LiPo battery charger
- "AA" batteries
- Extra set of (4) rotor blades

- Everything in the RTF except transmitter and "AA" batteries. Just add your favorite SLT compatible radio and fly!

Maximum stability from 3 gyros and 3 accelerometers.

TAGS-FX continuously keeps you in complete control. Sensor Fusion Technology integrates data received from dual sources — a 3-axis gyro and a 3-axis accelerometer — and compensates immediately for any actions except those you command. TAGS-FX corrects unwanted movement in yaw, pitch and roll while also preventing drift in any direction. With TAGS-FX, you're more in control than ever before!

Length: 5.7 in (145 mm)
Width: 5.7 in (145 mm)
Blade Length: 2.16 in (55 mm)

RTF Requires: Nothing
Tx-R Requires: 6-channel 2.4GHz SLT helicopter transmitter or AnyLink and compatible 6-channel helicopter transmitter

Take exciting in-flight videos with the built-in micro digital camera. An on-board LED shows when the camera is recording. Images are saved to the included memory card and can be downloaded later to your computer.

See actual footage from the transmitter-controlled camera!

Available: June

Stock Number	Description	Advertised Price
HMXE0836	1SQ V-Cam Quadcopter Electric RTF	\$129.99
HMXE0837	1SQ V-Cam Quadcopter Electric Tx-R	\$99.99
