

DEX410v4

1/10 Scale Electric 4WD Buggy Kit

Length: 13.75 in (349 mm)
Width: 9.8 in (249 mm)

The newest incarnation of world championship performance

Team Durango UK Team Driver Chris Doughty summed it up best when he was recently quoted as saying: "I am really excited about the added tuning and performance options that are being offered on the latest version of the world-class DEX410 racing platform. The DEX410v4 buggy is hotly anticipated by Team Durango fans world-wide."

With many new upgrades to an established championship-winning design, the DEX410v4 is staking its claim as the world's most advanced 4WD racing machine, and ready to continue Team Durango's off-road dominance. For drivers 'Serious About Racing' the DEX410v4 is the right car, right now!

FEATURES:

- New cab-forward body design
- Front arm features outboard wheelbase adjustment
- Rear arm has a recessed droop screw and captured outer hinge pin
- New piston sizes included: 2x1.6mm, 2x1.7mm, 3x1.6mm, 3x1.7mm, plus 4 blanks
- Black titanium nitride-coated shock shafts front and rear
- 19° aluminum caster blocks
- Low 'Stiction' O-rings
- 2mm hex balls throughout
- Larger body clips included

DEX410v4
