

# DEX408v2 1/8 Scale Electric 4WD Buggy Kit

## The buggy for serious 1/8 scale racers

The expertise and attention to detail that Team Durango engineers are known for are on full display with the 1/8 scale DEX408v2. The goal was to upgrade this race-winning electric buggy kit while keeping the parts count low. The result is a more efficient drivetrain designed to maximize the advantages of today's brushless technology, super-smooth precision shocks for improved handling and setups that match PRO Team specs. Add to that Team Durango's legendary durability and the DEX408v2 is the kit pros have been waiting for.

**Length:** 15.9 in (405 mm)

**Width:** 11.9 in (302 mm)
