

# Lutz triples at Futaba E-Challenge

## Futaba ELECTRIC CHALLENGE 2014

Ryan Lutz turned a weekend in Joliet, Illinois, into a weekend of decisive wins at the Futaba Electric Challenge.

The event took place September 5-7 at the Leisure Hours Raceway in Joliet, Illinois. After two solid days of racing – one indoors, one outdoors – Ryan walked away with TQ and first place honors in the 1/8 4WD Modified and E-Buggy mains, a win in the 2WD Modified “Dash for Cash” and a second place finish in 1/10 2WD Modified Main.

Ryan’s vehicles for the event included three of Team Durango’s finest: the DEX210V2 for 2WD, the DEX410V4 for 4WD Modified and the DEX408V2 for E-Buggy. However, he ran them all with just one radio system: the Futaba 4PX.

As the replacement for the 4PKS-R, the 4PX is the very latest in cutting-edge surface systems for competition. It’s 30% faster than the 4PKS-R, making it the ultimate in racing response. With its full-color TFT display and intuitive menus, Ryan can achieve setup precision and winning performance with minimum of programming effort. Other features include a synthesized voice option for telemetry data and an assignable, body-activated button for key features.

Congratulations to Ryan for his wins and for choosing Futaba, the radio brand racers trust most.
