

Pit Tech Stands in Black

Car Stand

Truck Stand

Black is the new Blue for Pit Tech stands.

In addition to blue, Duratrax's lineup of Pit Tech stands is now available in stylish black! These R/C maintenance "must-haves" perform a variety of useful functions while also helping to reduce work area clutter. They're made of sturdy, high-impact polystyrene with aluminum center posts for years of service. When not in use they store flat — saving valuable workbench space and allowing them to be taken to the track — and all are proudly made in the USA.

The Car and Truck Stands both feature a rotating top plate with a dropped center section that accommodates models with uneven chassis, plus rubber inserts that grip the chassis securely. A tray in the base keeps parts within easy reach. Eight holes in the Shock Stand hold 1/10 or 1/8 scale shocks during cleaning and rebuilding, while four slots keep shocks inverted for oil draining. The base has four compartments for organizing O-rings, etc. — as does the Tool Stand, which features 18 holes that keep drivers, wrenches and other tools together and not rolling around.
