PERFORMANCE TIRES

Duratrax unveils Six Pack and Picket tires for Short Course

Duratrax now offers two more ways to fine-tune traction to short-course tracks: new Six Pack and Picket tires.

Like the other tread choices for short course – Lockup, Lineup, Shotgun, Posse and Bandito – Six Pack and Picket tires are molded in soft C2 compound. Sold in pairs, they include foam inserts and are available unmounted, or mounted and glued to 5-spoke black rims.

Models for most popular short-course trucks are available, and priced to make competitive traction affordable to virtually any driver.

Available: Early September
