

PRESS RELEASE

Kunai 1.4M Electric Glider

One “hot” warmliner.

Soaring...aggressive climb performance...exciting, high-speed aerobatics. The Kunai offers the best of all worlds! It does all sport aerobatic maneuvers and allows the use of optional spoilerons. The Kunai’s designers kept the parts count low for quick, straightforward final assembly. Whether you choose the ARF or the Rx-R version, you’ll have a great-flying model that looks awesome — and is ready for fun FAST.

FEATURES:

- Requires only a few final assembly steps
- Molded fiberglass fuselage and carbon fiber tail boom
- Strong, built-up wood wing
- Ailerons for rolls on demand
- Both versions include a powerful brushless motor and folding propeller — Rx-R (Receiver-Ready) version comes with a 20A brushless ESC and micro servos already installed

Wingspan: 55 in (1395 mm)
Length: 36 in (915 mm)
Weight Range: 20-21.5 oz (565-610 g)
Wing Loading: 9.4-10.1 oz/ft² (29-31 g/dm²)
Requires: 4-5 channel radio w/micro receiver, 11.1V 1200mAh LiPo battery & charger
ARF Also Requires: 20A brushless ESC & 4 high-torque micro servos

Available: Mid Summer
