TTX850
8-Channel 2.4GHz SLT Computer Radio System

Tactic has no shortage of tough, reliable transmitters, but the TTX850 is in a class all its own! It's an 8-channel radio with 30-model memory and tons of adjustable features. On top of that, everything is modified with a large backlit graphing LCD screen and easy-to-use push-button programming controls. This radio is the only one you'd need to fly an entire fleet of fixed-wing aircraft and helis. Plus, since it's equipped with SLT, it's reliable and perfect for the entire range of Tx-R aircraft.

System Features:

- Large, backlit graphing LCD screen with adjustable contrast
- 8-channels, 30-model memory
- Easy-to-use, push-button programming controls
- Intuitive and straightforward menus
- 8 pre-programmed mixes, 6 programmable mixes
- 3 flight conditions
- Digital trims with slow/fast adjustment
- 6 user-assignable 3-position switches
- 2 user-assignable 2-position switches
- 2 user-assignable proportional sliders
- Reversing, endpoint adjustment, sub-trim and exponential
- Ball-bearing gimbals and adjustable stick lengths
- Charge jack
- Low-voltage alarm
- Wireless and 3.5 mm wired trainer systems
- External antenna that rotates and folds for easy storage
- Dual rates
- Airplane and helicopter programming
- User-updateable firmware
- Includes TR825 twin-antenna receiver
