

PRESS RELEASE

DEX210v2 1/10 Scale Electric 2WD Buggy Kit

A proven competitor with brand-new racing firepower.

With wins at European Championships and the Reedy Race of Champions to its credit, the DEX210 had nothing to prove. But now, the company that's "Serious About Racing" has added 20 new features to create the DEX210v2 — a buggy destined for even greater success in the future.

Specifications:

Length: 13.2 in (355 mm), 14.5 in (368 mm)

Width: 9.6 in (245 mm)

Wheelbase: 10.6-11.2 in (274-282 mm)

Weight: 3.64 lb (1650 g)

Requires: 2-4 channel radio w/high-torque steering servo, 540 motor and ESC, 2S 7.4V 4000mAh (min.) LiPo battery, LiPo charger & tires

Please note: the information in this press release was the best available at the time. Please see the Team Durango web site for updates.

These race-winning features are now standard equipment:

- 8 mm-longer hard-anodized aluminum chassis for more straight-line stability and better post-jump recovery
- New, straight front arms for more ground clearance and better aerodynamics
- New, interchangeable rear arms for front or rear shock mounting options
- Redesigned rear chassis brace for easier access to gearbox and power system
- New side pods provide more mounting space for electronics and better dirt and water protection
- New front shock tower design and material for faster, easier access to camber links and superior crash resistance
- Improved, low-profile rear shock tower for better post-jump handling and more shock tuning options
- New v2 cab-forward body for greater downforce and straight-line stability
- More shock piston choices, including blank pistons for custom setups
- Updated DIMEC X ball cups for better crash resistance and faster adjustment
- -2 mm rear low roll-center suspension hanger for improved (forward) traction and smoother cornering on low-grip tracks
- All Team Durango Type "B" upgrades

These are in addition to standard features such as the patented Hybrid Gearbox, which allows drivers to run rear- or mid-motor setups in the same kit.

Racers anxious to make their mark in the record books can find the DEX210v2 at better hobby retailers everywhere.

Available: Mid Spring
