Length: 18.3 in (465 mm)
Width: 11.8 in (300 mm)
Height: 6.1 in (154 mm)
Weight: 4.52 lb (2.4 kg)
Wheelbase: 13 in (330 mm)
Ground Clearance: 1.57 in (40 mm)

The biggest, baddest Raider yet!

From the beach to the backyard — and beyond — the bold and brawny RAIDER XL is built for exciting, high-speed action in any conditions. ARRMA engineers have created a larger platform that's more stable and forgiving — that makes for more confident handling, and the RAIDER XL's potent brushless power system offers the potential for top-end speeds in excess of 60 mph! Larger dimensions also mean more scale looks, so this awesome machine will stand out among all of the other buggies!

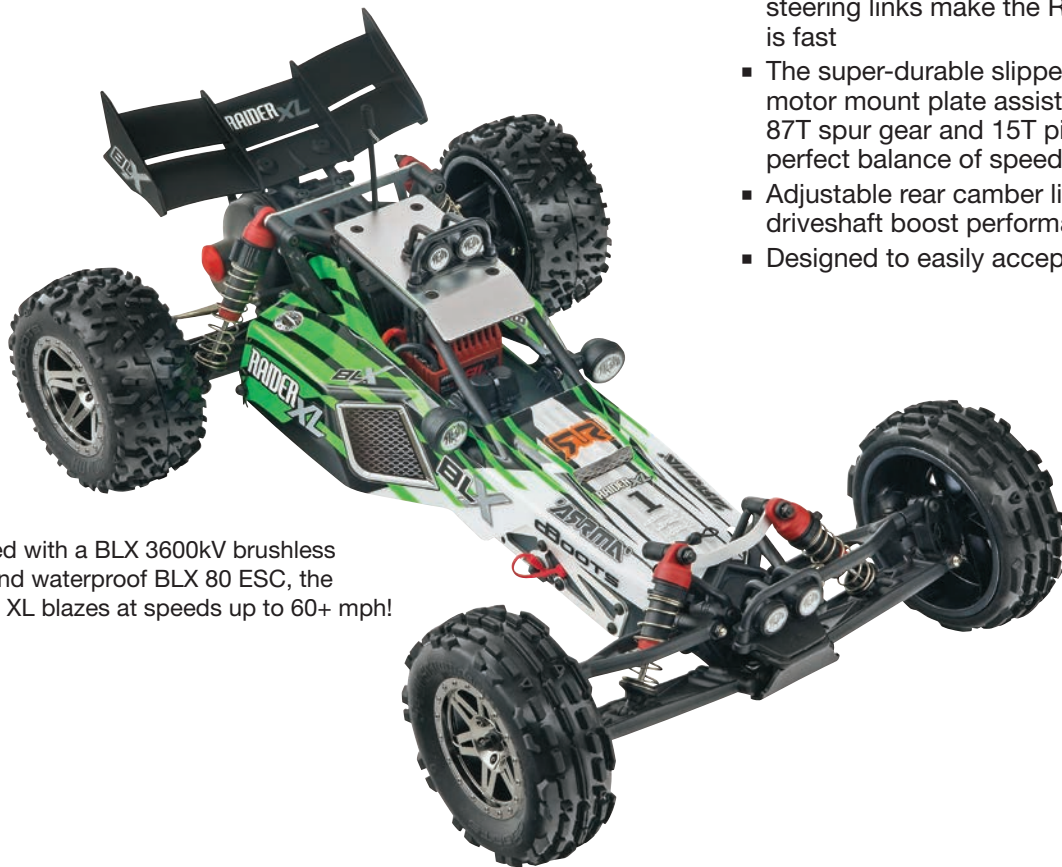

With its longer wheelbase and wider stance, the RAIDER XL is 20% larger than the 1/10 scale RAIDER.

FEATURES:

- Based on the hugely popular 1/10 scale RAIDER chassis — now in awesome 1/8 scale
- Maximum parts efficiency, with many parts from other ARRMA vehicles
- An aluminum Twin Vertical Plate chassis provides superlative strength and durability; aluminum front kick-up and mounting plates aid in performance
- Light pods on the front and roof enhance the RAIDER XL's scale looks, and are compatible with third-party LED light sets
- Adjustable spacers on the oil-filled heavy-duty shocks allow for fine-tuning the RAIDER XL's ride height
- The gasket system effectively keeps dirt and moisture away from components inside the waterproof radio box
- The all-metal differential is the ideal match for the BLX power system
- A sturdy front wheel hub assembly with captured steering links make the RAIDER XL as strong as it is fast
- The super-durable slipper clutch with aluminum motor mount plate assists in heat dissipation; an 87T spur gear and 15T pinion gear deliver the perfect balance of speed and torque
- Adjustable rear camber links and a rugged rear driveshaft boost performance
- Designed to easily accept hardcase LiPo batteries

Equipped with a BLX 3600kV brushless motor and waterproof BLX 80 ESC, the RAIDER XL blazes at speeds up to 60+ mph!
