

Dromida scores another hit with Wasteland RTRs

The Wasteland Buggy and the Wasteland Truck are the newest 1/18 scale vehicles in the Dromida line. They offer all the advantages of previous vehicles, as well as something new: a radio-controlled foam dart launcher!

Both vehicles include the new D103 3-channel radio, which features a thumb button on the handle for fast, easy launches. With a touch, the spring-operated launcher will send a foam dart streaking toward a target up to 30 feet away. The target can be stationary; however, the D103's interference-free 2.4GHz technology and push-button linking will also allow a group of friends to get together for "hit and run" battles where everyone has fun and no one gets hurt.

As with previous Dromida RTRs, these vehicles are mission-ready almost as soon as they come out of the box. Bodies are painted, decaled and already mounted on a rugged and fully assembled chassis. It's equipped with a 370 motor, gear diffs, and 4WD drive train. Onboard electronics—including a receiver/ESC, steering servo and launcher servo—are not only installed but waterproof. The list also includes the "extras" that Dromida offers on all of its vehicles: Big Bore oil shocks, bearings, an adjustable suspension and mounted tires. And in addition to "AA" cells for the radio, Wasteland vehicles also include a 6-cell, 1300mAh NiMH pack and a charger that provides a full charge in half the time of previous models.

For those looking for something a little more exciting than a rugged off-road vehicle, Wasteland vehicles are a great choice.

Both include:

- Assembled vehicle with dart launcher and three foam darts
- Painted and decaled body
- Factory-installed 370 motor and water proof receiver/speed control, steering and dart launcher servos
- D103 3-channel 2.4GHz radio system with dual rates, trims and servo reversing
- 6-cell, 1300 mAh NiMH battery
- 100-240 VAC fast charger
- 4 "AA" batteries

Wasteland Buggy Specifications:

Length: 10.0 in (254 mm)

Width: 6.96 in (177 mm)

Height: 5.0 in (127 mm)

Weight with battery: 1.49 lb (678 g)

Requires: nothing!

Wasteland Truck Specifications:

Length: 11.53 in (293 mm)

Width: 6.96 in (177 mm)

Height: 5.0 in (127 mm)

Weight with battery: 1.64 lb (744 g)

Requires: nothing!

Available: mid-November 2015
