

# PRESS RELEASE

# protoN™

Nano-Sized, Ready-to-Fly

Available in four great colors.

## The mini mechanical marvel you can take anywhere!

The Proto-N is totally unlike anything else you've ever seen. It's a quadcopter so tiny you can store it in on the transmitter you use to fly. Even though it's tiny, the Proto-N is amazingly easy to pilot! With just minutes of practice, virtually anyone can fly the Proto-N and, thanks to its small size and convenient transmitter storage, you can take it with you to the game, to the office—anywhere.

### Includes:

- Assembled drone with 3+3 stabilization system, finished canopy and LEDs
- 2.4GHz transmitter with Auto-Flip button, trims, three flight modes and battery LED
- Rechargeable 3.7V 80mAh LiPo battery
- High-output USB charge cord
- 4 spare blades

### Specifications:

- Diagonal:** 31 mm (1.2 in)
- Weight:** 8 g (0.28 oz)
- Requires:** 4 "AAA" batteries

### Colors Available:

- ESTE44GG** – Green
- ESTE44LL** – Black
