

extra 300 SX

Receiver-Ready Brushless 3D Aerobatic Airplane

Rx-R
RECEIVER-READY

Fly an aerobatic legend.

For nearly 30 years the full-scale Extra 300 has been mesmerizing audiences at air shows around the world. Flyzone's first truly 3D-capable model pays homage to this legendary performer, combining a powerful brushless motor and ESC with an extremely high power-to-weight ratio. The result? An airplane that excels at everything from solid sport flying, precision aerobatics, and heart-pumping high alpha maneuvers. For experienced pilots ready to expand their flight envelope, the Extra 300 SX Rx-R is the plane to take them there!

Features:

- Durable AeroCell™ foam airframe
- Factory-installed motor, ESC & servos
- Double-beveled ailerons and elevators
- Magnetic cowl, canopy and wheel fairings
- Removable wing
- Steerable tail wheel
- Preinstalled electronics

Wingspan: 58 in (1475 mm)

Wingspan: 41.5 in (1055 mm)

Wing Area: 297 in² (19.2 dm²)

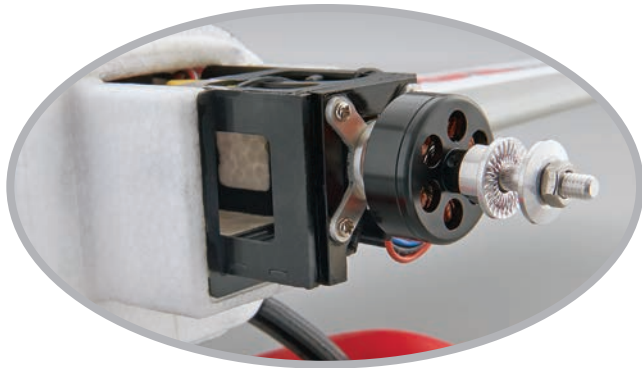

Weight: 28-31 oz (795-880 g)

Wing Loading: 13.6-15.0 oz/ft² (42-46 g/dm²)

Length: 34.5 in (875 mm)

Requires: 4+ channel radio and receiver, 3S 11.1V

1800-2200mAh 30C LiPo battery and balancing LiPo charger

The 30-35-1000kV brushless motor provides plenty of power for executing extreme 3D maneuvers.

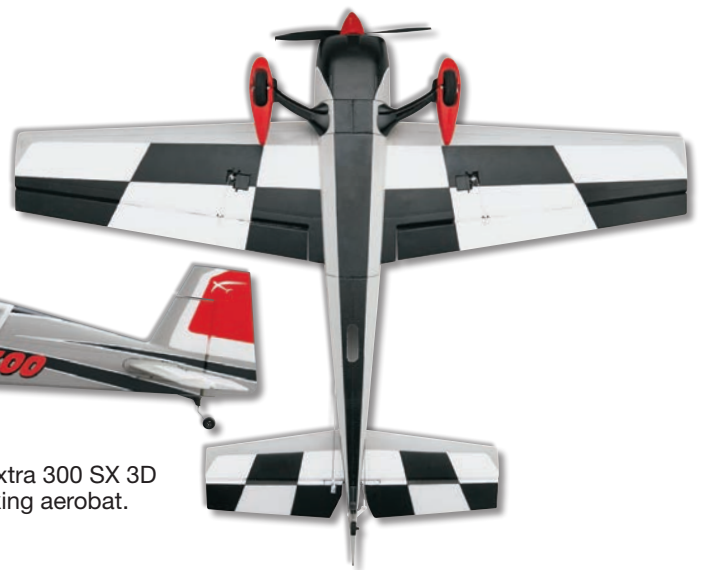

These large control surfaces are double-beveled, which greatly enhances the plane's aerobatic and 3D capabilities.

The landing gear fairings and wheel pants are magnetically attached and will "pop" off during rough landings to avoid damage.

The hatch is held securely in place with magnets, which allow for quick LiPo replacement and access to the plane's on-board gear.

From any angle, the Extra 300 SX 3D is one impressive-looking aerobat.
