FLIGHT STABILIZATION

Electric Trainer w/WISE Flight Stabilization System

A smart choice for anyone wanting to learn to fly.

The Sensei FS (Flight Stabilization) electric trainer takes learning to fly to new levels of ease and excitement. The WISE 3-axis stabilization system is just like having a flight instructor standing right next to the pilot, ready to instantly take over if necessary. A brushless power system delivers the performance necessary for sport aerobatics as skills improve, and for added fun the “drop-door” feature lets pilots deliver a “payload” of their choosing. Choose from the all-inclusive RTF or the flexible Receiver-Ready version that lets modelers equip the Sensei FS with their choice of radio gear!

Available in these versions:

FEATURES:

- Rugged, resilient AeroCell™ foam airframe with a pre-applied trim scheme
- WISE 3-axis flight stabilization system
- Flight Success Guarantee with the Sensei FS RTF
- Simple, screw-together assembly — no gluing required
- Factory-installed brushless outrunner motor, ESC & 5 micro servos
- Steerable nose gear

The tail section aligns itself automatically and is secured with just one screw.

The wing halves slide together onto a tube and secured with two bolts.

A hatch in the top of the plane provides easy access to the battery.

Operate the "drop-door" from the 5th channel of the radio for in-flight deployment of a parachute or other creative payloads!

Compatible with the R/C industry's most popular polarized plug!

Equipped with the innovative WISE 3-axis stabilization system!

With the WISE stabilization system mastering R/C flight has never been easier — and it works with any radio! Take-offs and landings are as easy as increasing or decreasing the throttle. In the air, three flight modes allow modelers to learn flying skills at their own pace.

- **Beginner** — the Sensei FS maintains a gentle bank and climb/descent envelope, with the pilot able to return the plane to straight and level flight by simply releasing the sticks
- **Intermediate** — pilots will be able to fly with increased freedom, while still having the stick release function to fall back on
- **Advanced** — once pilots are comfortable with the basics, they can fly on their own without limits, but still with the benefits of gyro stabilization
- **Bailout Switch** — extra insurance that immediately returns the Sensei FS to straight and level flight from any orientation, in any of the 3 modes

Wingspan: 58 in (1475 mm)
RTF Weight: 3.2 lbs (1450 g)
Rx-R Weight Range: 3.25-3.5 lbs (1470-1590 g)
Length: 48 in (1220 mm)
RTF includes: Tactic TTX610 radio system with SLT receiver, 3S 2100mAh LiPo flight battery, AC/DC balancing LiPo charger, (4) "AA" batteries
Rx-R requires: radio and receiver with 4-5 channels, 2100-2200mAh 11.1V LiPo battery, compatible charger
