

PRESS RELEASE

A6M2 ZERO

Unmatched maneuverability

Long-ranged, fast, and more maneuverable than any Allied aircraft of the time, the Japanese Zero was the ultimate aggressor. With its combination of looks, performance, and unique features, the Flyzone Select Scale Zero is an elegant representation of the power and lethal beauty of the Zero. This bird is authentic all the way from the trim scheme and brushless motor system down to the replica bomb drop and retractable electric landing gear.

The Zero comes in two versions—RTF and Rx-R. If you own a radio, 7-channel receiver, AnyLink adapter, and 3S LiPo battery, the Rx-R can be in the air in minutes.

Rx-R Features:

- Electric retractable landing gear, replica engine, pilot figure and LED lights
- Assembled, factory-finished airframe
- Servos for the flaps and bomb drop
- Powerful brushless motor and ESC

Available: Summer
