

TwinStar EP ARF

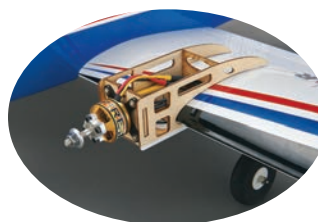

Twin power with electric ease

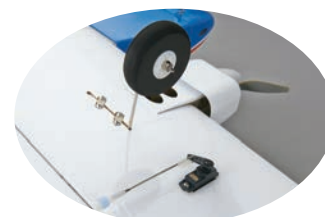

Flying with twin motor power is unique and exciting, and the Great Planes TwinStar EP ARF is the ideal choice for making it happen. Setting up the brushless motors (sold separately) is easy, and the nacelles are positioned near the centerline for more stable flight. Because the TwinStar EP is Almost-Ready-to-Fly, pilots can have this quality-constructed, professionally Mono Kote-covered model in the air in just a few hours!

FEATURES:

- TWO motors — twice the excitement
- Electric reliability and convenience, with brushless power and performance
- Quality balsa and ply construction
- Tricycle landing gear for better ground handling
- Large, magnetically-attached hatch for quick access to flight battery

Two motors add an extra level of excitement to flying. No need to perfectly tune them in unison like glow engines.

The ailerons are operated by individual mini-size servos. They're easy to install, and allow for fine-tuning of the ailerons and flaperon mix.

GPMA1609

Wingspan: 47.5 in (1205 mm)

Wing Area: 392 in² (25.3 dm²)

Weight: 4.0-4.25 lb (1.81-1.93 kg)

Wing Loading: 24-25 oz/ft² (73-76 g/dm²)

Length: 42.5 in (1080 mm)

Requires: 4-6 channel radio, 4 servos, (2) 35-30-1250kV brushless motors, (2) 25A brushless ESCs, 3S 11.1V 3800mAh (minimum) LiPo battery, 3S balancing LiPo charger, (2) 8 x 8 propellers
