

PRESS RELEASE

D815 Tessmann Worlds Edition 1/8 Scale 4WD Nitro Buggy Kit

"We've put a lot of work into developing the D815 so it has more grip in the rear end and it feels better at high speeds, so it does exactly what you want it to do."

- Ty Tessmann

Race like a champion with the D815!

The D815 is the most impressive Hot Bodies buggy yet, combining the brand's trademark toughness with the winning features racers demand. This extreme off-roader is the perfect evolution of the D812, which powered Ty Tessmann to multiple titles in 2014, including the IFMAR World Championships, and Ty himself has been instrumental in the development of Hot Bodies' newest racer. Included among the upgrades that Ty has recommended are new caster blocks and rear hubs, as well as rear roll center adjustments that make the buggy handle even better. Those are just a few of the difference-making features that club racers and aspiring competitors will find integral when vying for the top spot on the podium.

Length (adjustable): 14.8 in (480 mm)
Width (adjustable): 12.2 in (310 mm)
Wheelbase (adjustable): 12.9 in (327 mm)
Requires: engine, tuned pipe, fuel, radio, receiver, 2 servos, Rx battery, paint, tires, wheels, CA glue

FEATURES:

- Extra-tough components range from a 3mm 7075 aluminum chassis with a steel rear skid plate to 16mm Big Bore threaded coil-over shocks to 43/13 spiral-cut diff gears
- Ultra-lightweight chassis braces, diff gears, shock towers, outdrives and a Pro-Line® rear wing add to the buggy's racing pedigree
- Monocoque suspension arms, stand-up servo mounting, woven carbon fiber steering arms and more keep drivers going in tough conditions
- Tuning options include steering blocks, rear hub carrier arms, sway bars and shock springs
- Orange anodized aluminum components add signature Hot Bodies styling
