

PRESS RELEASE

O.S. ENGINE

osengines.com

Ty Tessmann Limited Edition Engine

A special release of proven World Champion power.

Ty Tessmann tore up the track at the 2014 IFMAR 1/8 Scale Off-Road World Championships running an O.S. Speed Tuned B2101 engine tailored to his winning specs. Now O.S. makes that same setup available to other drivers — in the Ty Tessmann Limited Edition Speed Tuned B2101.

The Limited Edition B2101 features the same tuned pipe, manifold and carb restrictor used by Ty to win the 2014 IFMAR Championships. Its T-2090SC pipe is paired with an M2002SC manifold whose added length increases torque in the low to middle range. The 5.8mm restrictor — not available on any other O.S. engine — matches what O.S. supplied to Ty for extending run time in competition.

Like the standard B2101, this version has a lowered cylinder head; DLC crankshaft with balanced tungsten weights; and efficient, reliable Type 21J carburetor. The design provides stability, predictable handling, instant response and rapid acceleration. "This engine gives me the power and driveability that I need to win," says Ty. "The reliability is second to none."

Only a small number are being produced, making this engine both competitive and collectible. The Ty Tessmann Limited Edition Speed Tuned B2101 is easy to distinguish from the standard model. Look for the natural-color cylinder head and Ty's name laser-etched onto the crankcase, crankshaft and tuned pipe.

Displacement: 0.211 cu in (3.46 cc)

Bore: 0.646 in (16.4 mm)

Stroke: 0.646 in (16.40 mm)

Practical RPM: 4,000-42,000

Output: 2.61 hp @ 34,000 rpm

Weight: 12.42 oz (352 g)

Includes: 21J carburetor; 5.8mm carb restrictor; T-2090SC tuned pipe; M2002S manifold

Requires: Glow fuel

Available: March

Stock Number
OSMG2044
