

Built For The Fastest Battles

DESC10

1/10 Scale 4WD Electric Short Course Truck Kit

The DESC10 is the short course truck for drivers serious about winning. Designed to be faster off your pit bench and faster on the track, the DESC10 is loaded with innovative new features, such as the patent-pending sliding gear mesh. Weight has been trimmed wherever possible, and the DESC10 can be fine-tuned to create a truly customized racing machine. With its blazing speed and amazing durability, winning intense big track SC competition is now easier than ever!

FEATURES:

- Patent pending sliding gear mesh allows the motor to always stay in place, for fast, consistent settings and optimized weight distribution
- Hard anodized aluminum chassis, with shock towers milled to reduce weight
- Hard-anodized 3mm thick aluminum chassis, plus 5mm thick shock towers, suspension mounts, shock bodies, shock caps
- Front caster inserts work with the adjustable pivot ball suspension for super-efficient vehicle tuning; reactive caster delivers consistent handling on a wide range of track surfaces
- Front and rear gearboxes allow for quick access to the differentials, with an aluminum insert for shaft bearings to increase bevel gear durability
- The ultra-lightweight diffs include feature lightweight cross shafts for increased efficiency, reduced rotating mass, and long-lasting durability

Length: 21.5 in (546 mm)

Width: 10 in (255 mm)

Weight: 7.9 lb (3.5 kg)

Requires: 550-size brushless motor, brushless ESC, 2-channel radio system, high-torque steering servo, (2) 2S 7.4V 5000mAh (min.) LiPo batteries, compatible charger, 1/10 short course off-road tires, 1/10 short course wheels, extra-long shank pinion gear, body shell

- Center differential is accessed with just four screws
- Center universal joints offer super-efficient drivetrain operation with less heat transfer
- Center diff mount mounted on aluminum posts for easy maintenance and extra strength
- 16mm Big Bore shocks with vented shock caps can be used in constant volume or emulsion for set-up flexibility and superior performance
- A protective shock cap insert reduces impact damage during rollovers
- Fully-adjustable suspension geometry with hinge pin inserts on all four lower suspension mounts for superior "tunability"
- Adjustable Ackermann with four positions out of the box
- Ultra-strong 4mm hinge pins for long-lasting performance

16 mm Big Bore shocks allow drivers to conquer even the most demanding tracks.

Equalized weight distribution makes handling more consistent. Fast, easy pinion changes result in efficient gear tuning.

Independent active caster inserts help you make the most of the dynamic, adjustable pivot ball suspension. Can be fine-tuned in a matter of minutes!

The innovative front/rear gearbox and differentials provide hassle-free servicing and faster tuning options.

The easy-access center differential simplifies servicing.

Milled shock towers reduce weight and increase durability. Etched parts deliver high quality and impressive style.

Premium aluminum inserts reduce friction wear and heat. All are factory-molded into the gearbox cases for added security.

Multiple battery layout options allow racers to create custom weight configurations for faster lap times and improved agility.

3 mm hard-anodized 7075 T6 aluminum chassis.
