

1/10 Scale 4WD Electric Touring Car Kit

DETC410^{V2}

Stronger & Lighter = Faster

Sometimes the difference between winning and losing comes down to shaving mere fractions of a second off of lap times. The DETC410v2 takes a proactive approach to building a faster, more responsive touring car by looking at every possible facet of improving the car's speed, handling and durability. The engineering involved was exhaustive and comprehensive — and well worth it!

FEATURES:

- Approximately 10 grams lighter, for better power-to-weight ratio and faster laps
- Stiffer V2 materials allow for more precise handling
- New hardware mounting holes and redesigned materials increase durability
- Fast and easy tuning options for increased performance on all tracks
