

## PRESS RELEASE

[aquacraftmodels.com](http://aquacraftmodels.com)

# Updated radio offers more chances to add scale realism.

Now with TTX491  
4-channel radio!

With all of its built-in detail, the Atlantic II tug is the very picture of a hard-working harbor workhouse. And with its new updates, the Atlantic II is a dependability match for full-size craft, too.

New version of the Atlantic II tug now include a Tactic TTX491 radio system. Like all Tactic systems, it's built with SLT (Secure Link Technology), one of the most robust and reliable 2.4GHz protocols available. It's matched to the Tactic 6-channel TR625 receiver—a light, compact plus with added channels for sound chips and other auxiliary features. Other features include dual coaxial antenna for strong, flawless reception and a push button that creates an instant and unbreakable link between itself and the TTX491.

#### Specifications:

**Hull length:** 30.3 in (768 mm)

**Beam:** 10.5 in (267 mm)

**Height:** 19.5 in (495 mm)

**Weight:** 7.8 lb (3.5 kg)

**Requires:** 11.1V 2200mAh LiPo battery, charger and 6 "AA" batteries

The Atlantic II also features another dependability upgrade in the form of the Star Plug. It's 100% compatible with the most common polarized power plug, but installs more simply, holds tighter and releases more easily as well.

And with the improved dependability comes the everyday authenticity and detail the Atlantic II is prized for. Protective tires line the rails. Fire extinguishers, ladders and life preservers adorn the cabin walls and LEDs duplicate the nav, mast and cabin lights you'd expect to see.

Best of all, every stunning detail is factory-installed and part of a complete ready-to-run package.

### The Atlantic II Tugboat includes:

- Factory-finished fiberglass hull and superstructure with working LEDs and numerous scale details
- Tactic TTX491 4-channel 2.4GHz SLT radio, a TR625 dual-antenna receiver and TSX102 servos
- A factory-installed power system that includes: a powerful 550-sized motor, 30A brushed LiPo-ready ESC, direct drive system and 3-bladed brass propeller
- Wooden display stand
