# Dromida Voyager™ Ready-To-Fly Electric-Powered Airplane

## Flying made easy. REALLY easy.

Choosing the right plane for your first plane is the smart step to enjoying the exciting experience of R/C flying, and Dromida has the right plane. The Voyager is ideal for beginners, because it exhibits slow, docile flight characteristics and comes pre-assembled with everything included. The 4-channel radio delivers positive rudder, elevator and throttle control. Details such as wheel pants and panel lines add more scale realism than typical trainers. And with the Voyager you can learn to fly outdoors in calm conditions, and then take advantage of its compact size to fly inside a large indoor gymnasium as well. Visit [dromida.com](http://dromida.com) for more information.

## Features

- Easy to fly with little or no experience
- 100% Ready to Fly, with everything included
- Rudder, elevator and throttle control
