

KODO HD RTF Camera Drone

KODO HD is new, improved, all-in-one fun!

For anyone who is looking for a great first camera drone, the KODO HD makes all kinds of sense. It shoots 1080p video and still photos, and offers both better results and easier framing than the original KODO. It's also lighter than the original, which not only boosts in-air time but boosts overall performance for better flying indoors. And, since the KODO HD comes fully equipped and factory assembled, it can be flip-ready as soon as battery is charged.

Features

- Features a 1080p digital video/still camera for *full* high-definition clarity and sharpness.
- Camera angle adjusts manually, for easier framing.
- Weighs 25% less than the original Kodo, for 20% longer flights, faster response and stronger performance.

Includes

- The assembled KODO HD with LED lights
- Full HD digital 1080p video and still camera
- Card reader and 4GB memory card
- Q106 4-channel 2.4GHz radio system with Auto-Flip Button
- Rechargeable 3.7V 350mAh LiPo battery and USB charger
- "AAA" batteries, installed blade guards and extra blades
