

Dromida HoverShot™ Ready-To-Fly 120 mm FPV Drone

Small in size, big on features

While it's true that the HoverShot is compact, don't be fooled by its smaller dimensions. It comes equipped with a 720p FPV camera, to shoot video and photos via the DroneView app in real time*. Altitude Hold makes learning to fly easy, and takes the guesswork out of exact positioning and throttle control, so flyers can focus on getting the "perfect shot". Takeoffs and landings are as easy as pushing a button. The HoverShot comes completely assembled with everything included for immediate flying fun, and 7-10 minute flight times will make it seem like it's in the air forever. Multiple flight modes let modelers fly at their particular comfort level, from a beginner all the way up to a veteran pilot! See more at dromida.com.

*Smartphone or other mobile device required for FPV. Not included.

Available: Fall 2016
