

Duratrax Tires

New choices for 1/8 scale buggies, dirt oval racers and rock crawlers!

Duratrax now offers a pair of tires for 1/10 scale dirt oval racing, a 28-item lineup for rock crawlers and new spoke wheel options for Bandito and Lockup tires.

The dirt oval tires are a ready-made option for what drivers were already doing: modifying Bandito short course tires for racing. There are more grooves for grip and lower tread depth to make them great on both packed dirt and clay. They're available unmounted in C2 or super-soft C3 compounds.

The 4 new crawler tires—Scaler, Deep Woods, Approach and Showdown—give drivers the grip they want for a price they can easily afford. Molded in C3 compound, they're available mounted on 1.9" or 2.2" black or chrome/black wheels. Unmounted tires and 4-packs of wheels are also available separately. As always, all tires include high-quality foam inserts. To see any of the 41 new Duratrax wheel and tire choices, visit www.duratrax.com.
