

Duratrax Onyx 260 AC/DC Touch Screen Dual Balancing Charger

Just a touch better for all charging needs.

Say "Goodbye!" to programming with push buttons and "Hello!" to the most advanced Onyx charger ever. Its 3.2 inch color touch screen is the key, because you can take advantage of the 260's power and potential with a fingertip. Just touch the screen to select from two charging outputs with identical charging capabilities. Touch again to program up to 10 battery charging routines on either output, and to view data in numerical form or as color graphs. Combined with 0.1-6A charge rates, balance charging for 2S-6S lithium packs and peak charging for up to 15 nickel cells, the Onyx 260 offers an unequalled mix of ease, versatility and value.
